

marmoleum® | the **best** resilient floor

best raw materials

The path to real carbon neutral building is made from natural raw materials, not plastic. Our linoleum brand, Marmoleum, contributes to a healthy and sustainable indoor environment and is CO2 neutral from Cradle to gate without buying Carbon Credits.

best performance

Marmoleum's Legendary Performance starts with an industry proven 30-year System Service Life. Marmoleum becomes more resilient as time goes on and is repairable due to its 80mil (60mil MCT/MCS) homogeneous wear layer.

All Marmoleum floors now include Topshield2, a double UV cured finish that takes care of beautiful floors with lasting appearance retention, that results in the flooring solution with the lowest costs of ownership over its lifetime.

best design flexibility

Marmoleum allows you to bring the beauty of nature into your interior environment with warm, tactile surfaces, rich color palettes and natural light reflection properties. Available in a broad palette of colors and structures, ranging from soft and subtle to vibrant and bold, Marmoleum helps set the mood and define spaces intended for work, play, rest and healing environments.

best in innovation

Hygienic and Watertight installations without heat welding. Marmoleum provides significant initial savings versus PVC floors that require heat welding for all applications. For monolithic or seamless installations such as surgical/procedure areas or those areas required by code, Forbo Marmoweld ETU color-matched paste weld is the preferred seaming method.

Forbo EZvations include our Forbo 100 adhesive system, ArmorCove and Marmoweld... ETU paste weld products which focus on reducing costs through efficient use of materials, improved labor efficiency, and providing immediate-on occupancy.

Forbo EZvations help eliminate costly moisture mitigation costs, reduce downtime, providing hygienic watertight floors helping to prevent infection control issues from water intrusion when installing Forbo Marmoleum.

best for our health

Marmoleum prevents* micro-organisms from multiplying themselves naturally without added antimicrobials. *Based on Independent Laboratory Testing

Marmoleum can help to improve communication, block unwanted sounds, and lower overhead noise

Marmoleum is anti-static, which means it won't attract dust on the surface and is ideal for people suffering from asthma and helps improve cleaning.

best for a sustainable society

Through the use of rapidly growing natural raw materials and renewable electricity, the weighted average of the Marmoleum portfolio is carbon neutral (cradle to gate) without the need to offset. It combines ecological values with contemporary design and offers an important contribution to a sustainable world.

social accountability

The SA8000 standard is our commitment to realizing a guaranteed fair treatment of our workers and ensure that our suppliers properly observe human and labor rights, occupational health and safety requirements and responsible business practices.
