

## Tough, durable and stylish

Nuway grid offers a contemporary and cost effective alternative to Nuway tuftguard entrance matting and is an ideal solution in very heavy traffic entrance areas where aesthetic considerations are paramount.

These single sided rigid mats are attractive, tough and versatile. They enable specifiers to benefit from the strength and durability of an engineered entrance system, underpinned by a five year guarantee (or seven years if fitted by a FESSI contractor – see page 15).

	Nuway grid rubber	Nuway grid Textile
Outdoor application	✓	
Indoor application		✓
Wiper strip style	Black rubber	Coral classic, brush pure or burford
Scraper bars	Low lustre anodised Aluminium	
Depth to height of aluminium	12mm or 17mm	12mm or 17mm
Depth to height of insert	14mm – 23mm	14mm – 23mm
Mat construction	Closed	
Removes dirt	✓	✓
Removes moisture		✓
Guarantee	5 years (7 if installed by a FESSI see page 15)	
Level of traffic	Suitable for very heavy levels of traffic	

The carrier sections can be coupled with an exceptional choice of infill materials providing maximum design flexibility, allowing beautifully colour co-ordinated entrance areas to be created with primary and secondary entrance matting products that are perfectly matched.

These materials include strips of textile inserts (for internal use only) in 13 different colourways drawn from the Coral classic, brush pure and burford ranges. Other textile inserts from the Coral range are available to special order. Rubber inserts are also available, which allow grid mats to be used outside.

Like any other Nuway entrance flooring system, Grid mats are supplied to order and accurate measurements of the matting area are required.

Now available in a choice of 12 and 17mm depths Nuway Grid can be used in the majority of matwells and the unique dovetail construction allows for easy shaping on site.

For technical information please turn to page 52.

### Grid component structure

#### Inserts:

Extensive choice of standard inserts includes a selection of thirteen different textile inserts from the Coral classic, brush pure and burford ranges and rubber inserts (for exterior entrances).

#### Carrier section

Low lustre anodised finish complies with DDA requirements as detailed in the Equality Act. Patented crimping action firmly secures textile or rubber insert within the carrier section.

### Considerations

As with all aluminium matting systems of this type, in very brightly lit areas, the strong contrast between a light aluminium scraper bar and a dark wiper strip can sometimes create a strobe effect which should be prevented. To avoid disorientating pedestrians affected by this type of visual disturbance, consider using a less contrasting insert.

2 burford 1 rubber

2 Coral classic

4701 anthracite

4730 raven black

4727 navy blue

5710 asphalt grey

5714 shark grey

5721 hurricane grey

4764 taupe

4744 espresso

4750 warm black

5724 chocolate brown
