The roll-up, versatile entrance system

Nuway cable is a versatile roll-up single sided entrance system that’s available with a wide choice of inserts and accessories. It’s also available in a MD format for areas that need a more robust single sided mat.

With a wide choice of inserts, Nuway cable allows the mat to be adapted to suit individual requirements. Bristles are available in single or three row options and they, along with the scraper accessory, can be used for exterior and interior entrances to remove coarse dirt. Rubber inserts are available for use in exterior entrances.

For the internal primary matting zone, Cable is available with a choice of four Coral classic inserts which allows the rigid entrance system to be colour co-ordinated to matching Coral classic sheet product used in the secondary matting zone. All four elements, Coral, bristles, scraper and rubber, can be mixed and matched to create the precise entrance system to meet your needs.

Cable is also available in a wide choice of heights from 10mm depth to 22mm with the 22mm option also available in a medium duty format.

Open construction Cable mats can be rolled up for ease of cleaning of the matwell. Due to the construction of the mat, Cable mats are unsuitable for shaping on site.

Choose your combination

Nuway cable not only allows a choice of insert and height, but there’s also a choice of accessory available such as a scraper or single row of bristles, so you can have the perfect customised entrance system.

1. Pick your insert

Coral
- For picking up moisture and fine dirt
- For interior use only

Rubber
- For exterior and interior use

3-row bristle
- For removal of coarse dirt
- For exterior and interior use

Specials

There may be times when different colourways are needed. Different colours are available at a small price premium, but there is a minimum order quantity of 10m² and the lead time will increase slightly. To find out more, please contact our Entrance Flooring System customer service team on 01773 740 688.

Considerations

As with all aluminium matting systems of this type, in very brightly lit areas, the strong contrast between a light aluminium scraper bar and a dark wiper strip can sometimes create a strobe effect which should be prevented. To avoid disorientating pedestrians affected by this type of visual disturbance, consider using a less contrasting insert.

The roll-up, versatile entrance system

The versatility of Nuway Cable can be easily seen through the ability to mix and match options.

Coral classic

Cable with rubber insert and scraper accessory
