

Installation tools

General

- 106 Forbo Overall
- 114 CM dampness meter
- 123 Tool bag, leather
- 145 Knee protectors, 1 pair
- 157 Mixing paddle Egaline

Transport

- 104 Forbo Marmocar
- 134 Forbo Carryset

Preparation

- 168 Egaline spreader 56 cm (+169)
- 172 Bucket 30 l.
- 173 Spiked roller (for liquid levelling system)

Installation

- 101 Long scribe
- 102 Short scribe
- 103 Forbo Trimmer
- 108 Disc and ruler
- 110 Mitre box
- 113 Folding rule
- 121 Retractable ruler
- 137 Chalk line
- 141 Robbertblade straight 100 pcs
- 142 Robbertblade hook 100 pcs
- 143 Dolphin knife
- 176 Forbo Former
- 177 Forbo Former (scratcher head)
- 179 Forbo Compass
- 180 Forbo Compass - extension bar

Adhesion

- 111 Hand roller
- 161 Adhesive spreader, A2 (fine), 5 pcs.
- 162 Adhesive spreader, B1 (normal), 5 pcs.
- 228 Forbo Roller, 70 kgs.

Welding

- 105 Forbo Thermogroover
- 115 "P" type groover
- 117 Spatula
- 118 Slide
- 119 Speed welding nozzle
- 120 Concave-cutting gouge
- 126 Hot air welding gun
- 131 Marmoleum Cork knife
- 133 Forbo Groover

Spare parts

- 116 Spare blades for hand groover, 10 pcs
- 122 CM Calcium carbide ampoules 100 pcs
- 132 Spare blades concave-cutting gouge 2 pcs
- 135 Spare wheel Forbo Groover
- 136 Spare spindle Forbo Groover
- 138 Spare block Forbo Groover
- 139 Spare strips Forbo Trimmer
- 146 Welding Heater element 220V
- 149 Scriber pins, 100 pcs.
- 154 Pressure gauge CM meter
- 155 Refill for chalk line
- 156 Blades for short and long scribe, 6 pcs.
- 169 Egaline spreader - 2 spare blades
- 170 Adjusting screw long scribe
- 171 Adjusting screw for pin of long scribe

As world leader in linoleum Forbo Linoleum is pleased to support you in the installation of our products. Based on our experience in the market and our continuous research we can recommend a complete assortment of high-grade installation tools. These will help you to achieve a simple and professional installation of our floor coverings.

Basic kit installation

101	Long scribe	137	Chalk line
102	Short scribe	141	Robbertblade straight 100 pcs
103	Forbo Trimmer	142	Robbertblade hook 100 pcs
108	Disc and ruler	143	Dolphin knife
111	Hand roller	149	Scriber pins, 100 pcs.
113	Folding rule	156	Blades for short and long scribe, 6 pcs.
121	Retractable ruler		

Basic kit welding

105	Forbo Thermogroover
115	"P"Type groover
117	Spatula
118	Slide
119	Speed welding nozzle
126	Hot air welding gun
133	Forbo Groover

Forbo Marmocar

Forbo Carryset

Forbo Compass

Forbo Former

Forbo Thermogroover

Forbo Marmocar

The Forbo Marmocar is a very useful aid for the transporting and unrolling of 2 metre wide rolls of floor covering. Because of the sliding mechanism of the upper tipping part, little effort is required for one person to load and unload the rolls. The upper part (slide) can be separated from the lower part, which is particularly useful for transporting the Forbo Marmocar. Maximum weight of the roll: 300 kg. Maximum diameter of the roll: 40 cm

Forbo Carryset

The Forbo Carryset enables easy and comfortable carrying and unrolling of rolls of Marmoleum (2.0 and 2.5 mm). It is a safety tool that will be useful on any project. The Forbo Carryset consists of two halves, each provided with a carrying handle and a foldout support. To be used for cores of 2 metres width, internal diameter at least 100 mm. Maximum roll diameter 40 cm.

Forbo Trimmer

The Forbo Trimmer is ideally suitable for:

- trimming edges
- cutting strips (width of strip 10-15-20 and 30 mm)
- cutting seams in one operation.

Forbo Trimmer

Forbo Compass

Making circular and circle strips in the floor covering is straightforward when using the Forbo Compass. When connected to a hot air gun it can also be used for routing. Any diameter between 6 and 200 cm can be scribed, cut or routed.

Forbo Former

This toolkit allows the installer to achieve a decorative floor quickly and efficiently. By combining shapes, all kind of figures can be cut. The Forbo Former consists of a scratching head and a set of templates: 2 triangles, 2 squares and 2 circles, in selected size between 10 and 20 cm.

Forbo Groover

Seams and decorative welds in Marmoleum can be routed out by hand with the Forbo Groover. This is a unique tool for preparation of the welding procedure. When routing linoleum, the Forbo Groover is used in combination with the Welding gun. Width of the groove is approx. 3.5 mm; depth is adjustable.

Forbo Groover

Forbo Thermogroover

In combination with the speed welding nozzle and the Welding gun, the Forbo Thermogroover is a useful tool for grooving seams and apparent or decorative welds in Marmoleum by hand. The Forbo Thermogroover is particularly useful in preparing the groove for more difficult welds, such as curved lines, or in less accessible areas, e.g. for decorative welding in linoleum.
