creating better environments

Complete, ready made and proven flooring installations.

We've solved it!

**system solutions**  
*high tolerance*

creating better environments

# Successful installation on demanding surfaces

- Overcome cracks, moisture, roughness
- Floating floors, easy to remove
- Solutions for both Marmoleum and vinyl

## High Tolerance System Solutions

High Tolerance System Solutions from Forbo Flooring Systems create new possibilities for easy and fast construction on all kinds of untreated surfaces. Cracks and moist surfaces can both be overcome by applying one of these solutions, which cover tiles and sheets, in linoleum and vinyl. High Tolerance System Solutions are the answer for demanding subfloors. There are three systems:

- Quickfit subfloor
- Colorex Plus
- Sarlibase TE

### High Tolerance Quickfit System Solutions

The three layered Quickfit system can be installed quickly and easily without any telegraphing effects of the panels. The Forbo Foam mdf panel adhesive ensures excellent levelling of the floor construction, also acts as a perfect moisture barrier and has acoustic properties. High Tolerance Quickfit System Solutions are applicable anywhere and allow a free choice of floor covering materials. Marmoleum or vinyl floors are both perfectly compatible with this subfloor system. All High Tolerance Quickfit systems are floating floors and as such can be easily removed.

### High Tolerance Colorex Plus System Solution

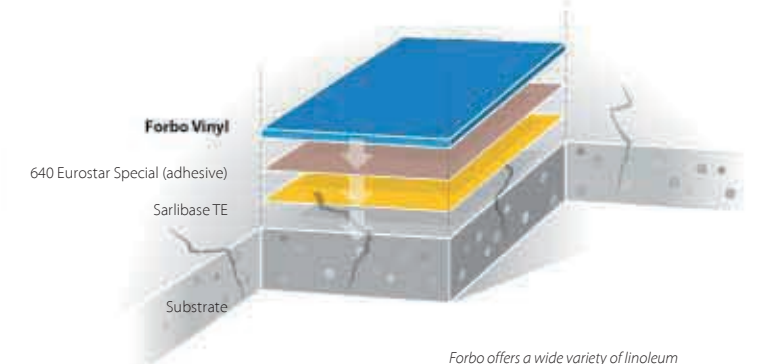

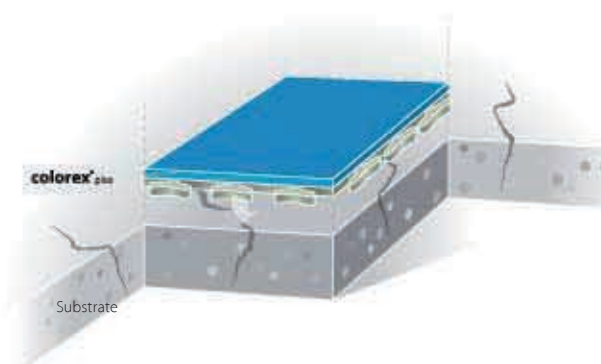

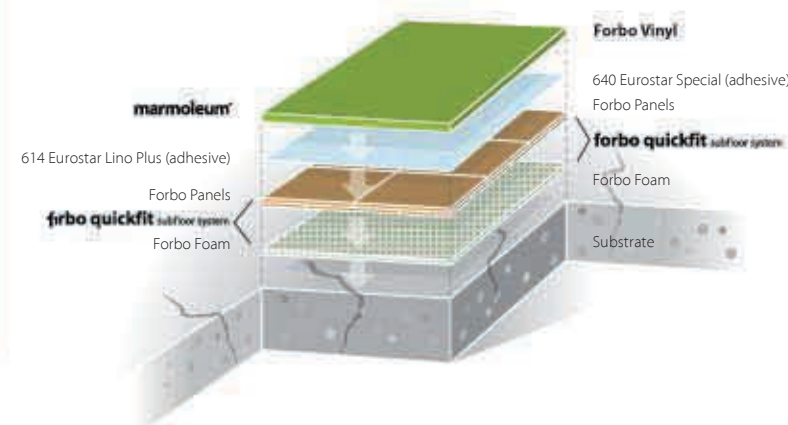

With High Tolerance Colorex Plus no adhesives, primers and levelling compounds are necessary. Colorex Plus can be loose laid on virtually every subfloor, regardless of its condition. Applications include ESD protected floors, high traffic floors, raised and hollow space floors, floors with high moisture and floors with higher slip resistance requirement. The PVC tiles are dovetailed and can be attached to each other. In hygiene-critical applications the tiles can be heat welded as well. Colorex Plus is available in three versions:

- ST textured and slip resistant
- AS genuine Colorex surface in various colours
- EC electrostatic conductive

### High Tolerance Sarlibase TE System Solution

The core of the High Tolerance Sarlibase TE System Solution is the flexible sheet material subfloor system. The Sarlibase subfloor is designed to cope with moist surfaces under Forbo vinyl floor coverings. Due to the unique structure of the Sarlibase TE sublayer in combination with the ventilating skirtings, moisture in subfloors can still evaporate without damaging the floor covering above it. Where moisture is present, High Tolerance Sarlibase TE, Forbo Vinyl floor covering and 640 Eurostar Special combine to form the perfect system.

Easy, fast construction on untreated surfaces, the High Tolerance System Solutions

*Forbo offers a wide variety of linoleum and vinyl floor coverings each with its own distinctive characteristics.*
