

Forbo Flooring Systems has different kinds of total system solutions, all designed to help save time and effort. The solutions vary from quick installation to acoustical better performance solutions to flooring solutions that can easily be installed and many, many more. Please contact us for more information or look at [www.forbo-flooring.com](http://www.forbo-flooring.com).

Forbo Flooring Systems is part of the Forbo Group, a global leader in flooring, bonding and movement systems, and offers a full range of flooring products for both commercial and residential markets. High quality linoleum, vinyl, needle punch and hardwood floors combine functionality, colour and design, giving you total flooring solutions for any environment.

creating better environments

Complete, ready made and proven flooring installations.

We've solved it!

**system solutions**  
*rapid*

creating better environments

# Saving time from installation to use

- Short waiting time after installation
- Use after one day
- Solutions for both Marmoleum and vinyl

## Rapid System Solutions

During the construction or renovation of a building, floor covering is usually one of the last materials to be installed. In many cases there is little time left before the completion deadline of the building, but there is little time to win within the installation process of resilient floors. The main contribution to this relatively long time is the time to level the subfloor and high risk of indentation if the materials have not completely hardened.

Forbo Rapid System Solutions are designed to offer a floor covering construction that allows to occupy the room more quickly.

There are two systems:

- fast dry primer, levelling compound and adhesive
- quick to install subfloor in combination with faster drying adhesive

### Rapid Bonding System Solutions

The Rapid Bonding System Solutions consist of a Marmoleum or vinyl floor covering combined with totally compatible installation materials. Whereas commonly applied water based installation materials initially soften the floor covering, leading to a drying time of 48 hours, the Rapid Bonding System Solutions contain cross linking components, shortening the drying time of the adhesive to only 16 hours. In fact the whole system can be applied within 1 day, while the primer and levelling compound only have a drying time together of approximately 4 hours.

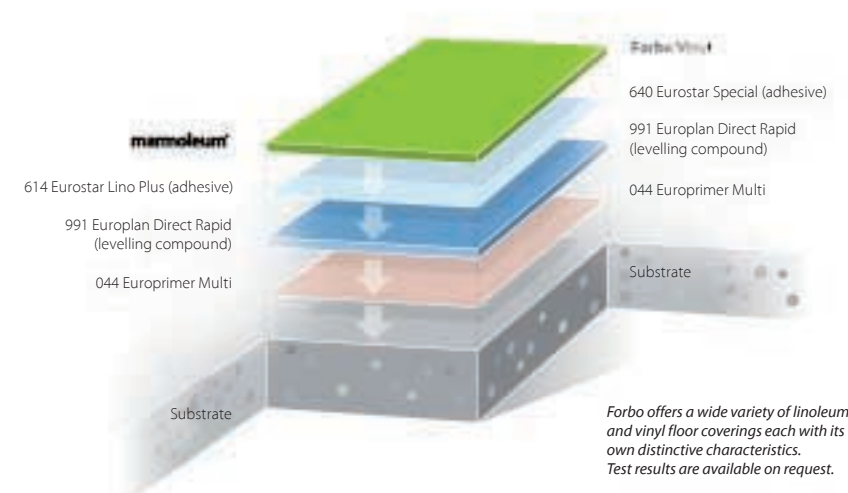

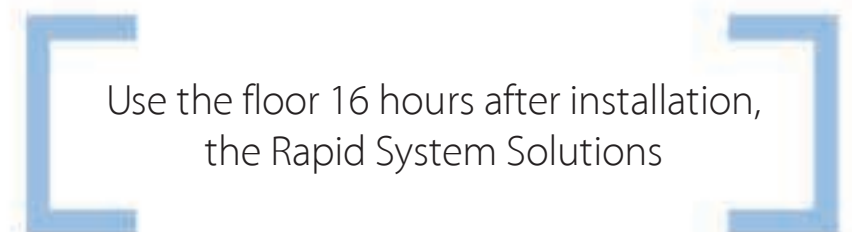

Of course, these solutions ensure the same properties for Marmoleum and vinyl about residual indentation, according the EN 433 standard. However, in order to simulate a practical situation the test method needs to be more severe. Therefore the Rapid Bonding System Solution has also been tested to internal Forbo standards requiring a load of approximately 400 kg/cm<sup>2</sup>, instead of EN 433 standard 50 kg/cm<sup>2</sup>. According to this method the residual indentation of the Rapid floor package just 16 hours after installation of the floor is less, compared to commonly used adhesives measured after 48 hours!

### Rapid Quickfit System Solutions

Rapid Quickfit System Solutions is based on a MDF panels/foam construction. This loose lay levelling system can be installed directly onto practically every subfloor and is easy to remove. In combination with Marmoleum and Forbo Vinyl ranges, this solution has a broad portfolio.

#### Forbo Quickfit offers:

- Smoothing
- Quick and easy installation
- No subfloor seams visible
- Excellent moisture barrier
- Easily removable
- Excellent acoustic properties

*Forbo offers a wide variety of linoleum and vinyl floor coverings each with its own distinctive characteristics. Test results are available on request.*
