Cleaning and Maintenance advice for Furniture Linoleum Desk Top processed on tables and desks

Desk Top features has water-based lacquer. This finish gives a Desk Top a durable and easy to maintain surface.

The cleaning and maintenance can be done as follows.

Remove dust and fingerprints using a microfiber cloth. Remove stains locally using a cleaning cloth and a spray cleaner. (E.g. Johnson Taski Exact 200)

Severely soiled surfaces should be cleaned wet. Clean the surface with a clean cloth and water with an interior cleaner. Next dry the surface with a well rinsed and wrung cloth. If necessary, a finish of Forbo Polish can be applied.

Removing stains

Remove stains immediately after the appearance

- Coffee, tea, alcohol, remove immediately before these can penetrate Desk top. Take precautions by using coasters.
- Ink stains removed with turpentine or spirit. Any dull spot this creates can be restored with Forbo polish, polish with a worn down green scouring pad.
- Water permitting flower pots and vases can cause calcareous stains. Therefore, use coasters.
