

Certificaat Groen Garanties

-essent

Innovatieve en
duurzame energie

02

Essent hereby certifies that

Forbo Novilon BV

will make its electricity consumption greener during the period of
01-01-14 until 31-12-15, by purchasing Guarantees of Origin.

By doing so, Forbo Novilon BV shows that it is making a conscious choice within the scope of corporate social responsibility. Guarantees of Origin are proof of the generation of green electricity by means of sustainable sources such as water, wind or biomass. This environmentally conscious generation of electricity prevents CO2 emission and saves fossil fuels. And that helps to limit climate change.
