

Installation Guide: Sheet flooring with Dementia Friendly transition profiles

Product Detailing

Transition profiles are used widely in schools, hospitals, commercial and public buildings. They are designed to protect the edge of floor coverings from damage, reduce trip hazards and provide a smooth transition at joints between different floorcoverings. Dementia friendly designed transition profiles are suitable for use to join different floorcoverings together or as a door bar. Available in a range of different colours and Light Reflectance Values (LRVs). To meet dementia friendly guidelines it is recommended the transition is specified with similar LRVs to the floorcovering.

Quantum Flooring Solutions

QTP38R dementia friendly ramp cover joint

QTP38T dementia friendly flat cover joint

Features and Benefits

- For internal use.
- Suitable for use in covering and protecting joints.
- Suitable for use as a transition between different floorcoverings, generally vinyl-to-carpet or vinyl-to-vinyl.
- Can be used to prevent worn and frayed edges from becoming a trip hazard.
- For use with resilient floorcoverings.
- Helps to meet the Dementia Services Development Centre (DSCS) guidelines.
- Wide range of colours.
- Easy to fit.
- No screw holes (secret fix or adhesive).

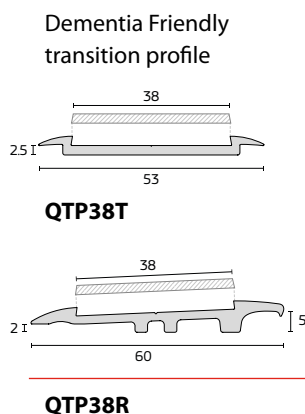

Forbo Flooring

QTP38T:

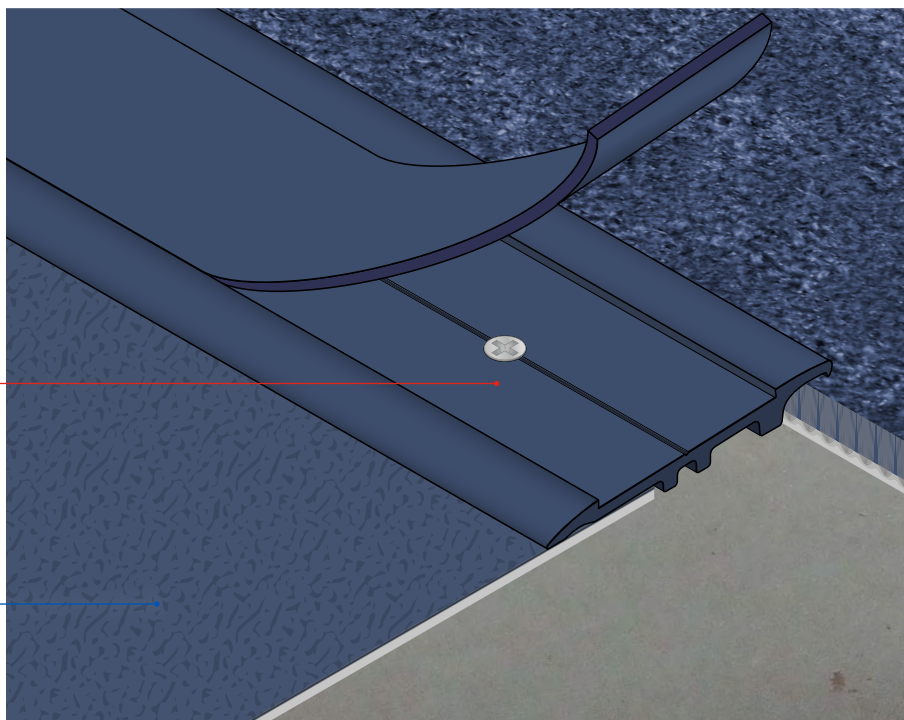

Forbo resilient products transition up to 2.5mm thickness.

QTP38R:

Forbo resilient products up to 2mm thickness to Forbo textile products up to 5mm maximum compression thickness.

Sheet flooring

Fitting

- 1) After laying floorcoverings, fit the Trim over the top.
- 2) Screw down through pre-drilled holes.
- 3) Peel off release paper and apply tread material into channel.
- 4) Start at one end and carefully roll into channel.
- 5) Apply pressure using a hand roller to ensure adequate bond.
