

Certificate

On 14 October 2008 Eurofins Product Testing A/S received a sample of a textile floor covering with the name

Flotex HD200 Bonar Floors Limited

The floor covering sample has been selected by Bonar Floors as being representative.

The emissions were tested according to the AgBB-scheme and guidelines of the DIBt (AgBB - Committee for Health-related Evaluation of Building Products, DIBt – German Institute for Building Technology). Sampling, testing and evaluation were performed according to ISO 16000-6, ISO 16000-9, ISO 16000-11, ISO 16017-1 in the latest versions, see the test report no. 766751.

Evaluation of the test result according to AgBB guidelines:

- Carcinogenic substances were not detectable after 3 and after 28 days.
 - The sum of VOC ("TVOC") after 3 days was below the limit of 10 mg/m³.
 - The sum of VOC ("TVOC") after 28 days was below the limit of 1 mg/m³.
 - The sum of SVOC after 28 day was below the limit of 0.1 mg/m³.
 - After 28 days the value R was calculated from the detected VOC with single concentrations above 5 µg/m³. This value R was below the limit of 1.
 - The sum of VOC without LCI-value after 28 days meets the limit of 0.1 mg/m³.
 - Formaldehyde after 28 days was below the limit of 120 µg/m³.
-

The tested product complies with the requirements of DIBt (June 2004) in combination with the NIK values from AgBB (March 2008) for use in the indoor environment.
