On 8 October 2010 Eurofins Product Testing A/S received a sample of textile floor covering with the name

**Flotex 200 “Classic”**

**Forbo Flooring Systems**

The floor covering sample has been selected by Forbo Flooring Systems as being representative.

The emissions were tested according to AgBB and the guidelines of the DIBt (AgBB - Committee for Health-related Evaluation of Building Products, DIBt – German Institute for Building Technology). Sampling, testing and evaluation were performed according to ISO 16000-3, ISO 16000-6, ISO 16000-9, ISO 16000-11, ISO 16017-1 in the latest versions, see the test report no. G02097.

**Evaluation of the test result according to AgBB:**

- Carcinogenic substances were not detectable after 3 and after 28 days.
- The sum of VOC (“TVOC”) after 3 days was below the limit of 10 mg/m³.
- The sum of VOC after 28 days was 0.12 mg/m³ and below the limit of 1 mg/m³.
- The sum of SVOC after 28 day was below the limit of 0.1 mg/m³.
- After 28 days the value R was calculated from the detected VOC with single concentrations above 5 µg/m³. This value R was below the limit of 1.
- The sum of VOC without LCI-value after 28 days was below the limit of 0.1 mg/m³.
- Formaldehyde after 28 days was below the limit of 120 µg/m³.

The tested product complies with the requirements of DIBt (October 2010) in combination with the NIK values from AgBB (May 2010) for use in the indoor environment.

17 November 2011
