A VERSATILE AND SUSTAINABLE MODULAR FLOORING CONCEPT

New and original

Marmoleum modular is a collection with a twist offering over 100 products that enable you to create individual, inspiring and high performing flooring designs. The collection includes tiles in four sizes ranging from extra-large (75x50cm) to small (25x25cm) and in between, the medium format square and rectangular tiles (50x50cm and 50x25cm respectively) complement the offer.

Creative freedom

The Marmoleum modular collection takes Marmoleum into new market sectors as the range offers a playful experiment with colour and structure, allowing you to enjoy creating individual flooring designs. Subtle nuances or stark contrasts - the choice is yours. You can create natural looking concrete or marbled floor designs. You can also play with tone creating designs featuring tonal progression or you can be bold and use the expression of colour to create your own design highlights. Marmoleum modular offers you the possibility to create the floor of your choice. The collection invites you to easily combine and connect various shapes, sizes and colours of tiles to develop a completely new and unique flooring design.

MODULARITY SURROUNDS US

Modularity is reflected throughout the natural and man made world, and in particular, urban architecture. Flooring finishes such as stone, ceramic, terrazzo or carpet tiles all offer the modular format and allow customers to create floors with a unique identity.

SHADE

COLOUR

MARBLE

THREE THEMES, ENDLESS POSSIBILITIES

Shade: a collection of concrete structures in cool and warm greys as well as classic black and white. The colourways are designed to complement each other and the colour range is presented in delicate steps of colour intensity and hues to create natural realistic stone and concrete patterns. The XL tile offer of 75x 50cm allows you to emphasize the material connection of slate and stone.

Colour: this collection features fashionable pastels alongside a modern mix of colourful concrete varieties and a full spectrum of bright warm colours which

liven up the palette. This is the heart of the collection and embodies one of the best known features of Marmoleum, that of colour on the floor. Colours can be used as focus, accents or as a different way to express the environment.

Marble: classic and contemporary marbled colours have been created to mix and match giving an extra dimension to your floor plan. Bring Marmoleum modular to life by combining marbles to reflect a stone like floor.

GRIDS ONLINE

MARMOLEUM MODULAR OFFERS YOU A LARGE CHOICE OF SHAPE, SIZE AND COLOUR OF TILES TO CHOOSE FROM.

This amount of choice lends itself to play with colours and patterns so we have created an online tool that allows you to create draft designs using a grid template as your base. Simply drop the product(s) of your choice into the online grid templates to see how your design transforms into a real floor.

The Forbo website offers you plenty of opportunities to play, design, combine and create great looking floors.

Just visit www.forbo-flooring.co.uk/marmoleummodular or scan the QR code below.

COLOUR

PC-10 t3242 - t3563 - t3883 tile size 25 x 25 cm

CREATE COLOURFUL, BOLD FLOORS, NAVIGATION MARKERS OR COLOUR POPS

Bold colours can become statement floors in their own right and they can also be a solid base for a designed space with a mixed palette. The traditional two tone chequerboard floor evolves into something very different when a third or a fourth colour is added and when an element of randomness is included into the design, the floor design can look spectacular.

Highlights and other combinations

The Colour collection can also be combined with either Shade or Marble, as elements from the Colour collection can provide subtle highlights or accents within a more muted floor plan.

MARBLE

t3048 - t3139 - t3407 tile size 25 x 50 cm

MARBLE – A MODERN CLASSIC

Experience traditional marbled Marmoleum in a new format. The collection of traditional and contemporary marbled designs offers a natural and realistic stone like effect. All of a sudden what looks traditional comes to life in a modern fashion. The marbled floor designs combine particularly well with wooden furniture and muted interiors but are also ideal for retail or hospitality environments.

MARMOLEUM MODULAR AND SUSTAINABILITY

88% NATURAL RAW MATERIALS
76% RAPIDLY RENEWABLE
58% RECYCLED CONTENT

Marmoleum modular tiles are produced from raw materials including linseed oil, rosin, wood flour and limestone. Raw materials that are either abundantly available or rapidly renewable, with annual crops or grow back schemes. Marmoleum modular is manufactured in the UK using 100% green electricity and it has a Cradle to Cradle silver certification. Installation waste can be recycled back into product at our plant in the UK and the product offers a generic BREEAM rating of A/A+ across all market sectors.

More than just good looks

Marmoleum modular is unique in that each shape and form is cut separately from the base material. Edges of the tiles are 'undercut' in order to provide a perfect joint that requires no welding, helping to achieve a

seamless fit. We recommend that for the best finish, Marmoleum modular tiles are laid tessellated. The polyester backing ensures the product is dimensionally stable, even when installed in larger areas. Marmoleum modular has a surface finish of Topshield2; a two layer acrylic water based finish, which helps to avoid scratching, staining and soiling, and ensures easy cleaning and excellent appearance retention of the floor over time. Marmoleum is also naturally antibacterial and has been approved by Allergy UK for the benefit it offers to allergy sufferers.

Flax Linseed Rosin Wood flour Limestone Pigment Jute

A SUSTAINABLE CHOICE, READY FOR USE

Marmoleum modular is a sustainable alternative to other modular design floors available in the market today. With the new Topshield2 finish, the floor is ready for use immediately after installation. The modular tiles are easy to install and easy to clean.

OTHER MARMOLEUM COLLECTIONS

marmoleum®

The Unexpected Nature of linoleum

cork linoleum®

touch

bulletin board®

furniture linoleum

Next generation of Marmoleum

A collection covering some 250 colours in 12 different designs. There are four sections in this collection, a marbled offer, which provides a colour bank in various marbled patterns. A concrete offer, which focusses on uni colour and stone/concrete like designs for modern environments. A patterned offer which provides an alternative to the classic marbles structures and hints toward the popular uni colours and finally a collection of striped designs with both stone and wood like design references.

Unexpected nature

This collection is made up out of unusual colour combinations in marbled and striped designs. The delicate colour balance and surprising combination all refer to natural phenomena and in a colour spectrum that is truly phenomenal.

Cork Linoleum

Forbo Marmoleum is created by combining linseed and rosin with wood flour and limestone. For Cork Linoleum, the wood flour component is replaced by finely ground cork particles. Cork enhances the shock absorbent quality of floors and gives warmth under foot. This makes Cork Linoleum the ideal surface for therapy rooms and rest areas in day care centres. Cork Linoleum is available in a range of natural colours ranging from sand and ochre to stone red and a selection of subtle greys.

Touch

Touch is a linoleum collection where both wood flour and cork flour have been mixed in order to create a delicate, matt / shiny tactile textured surface. The elegant tone in tone colouring is presented in a collection of earth colours. Each of the items in this collection is complemented by a plain uni colour.

Bulletin Board

From the floor to the wall, Forbo Bulletin Board is a linoleum surfacing material that's ideal for walls or vertical surfaces such as notice or pin-boards. It's also a functional aesthetic finish for walls, doors or cabinets. Bulletin board is also available in framed formats. Its bacteriostatic properties make it ideal for patient rooms and nurses' quarters.

Furniture linoleum

Forbo linoleum Desk Top collection presents a comprehensive balance range of fine uni coloured linoleum that can be used for application in furniture and OEM manufacturing such as surfaces for panels, doors, cabinets, tables, cupboards, desks or chairs.
