

marmoweld ETU color chart

EZvations by Forbo Flooring Systems

Marmoweld ETU is a color matching paste weld used to complete the installation of Forbo Marmoleum products as our preferred method of welding. The application of Marmoweld ETU is faster and easier than traditional heat welding while providing a hygienic watertight installation*.

- Cost savings over traditional heat welding
- EZ to use
- The elimination of likely damage caused by grooving, burning and scalping seams from traditional heat welding
- Improved aesthetics and performance over standard heat welded floors

*Due to the developments and advancements made over the last decades with the combination of Marmoleum® TopShield (Forbo's factory finish for Marmoleum®), improvements in water-based adhesives and with our commitment to education of proper installation, care and maintenance procedures and environmental stewardship, heat welding is no longer necessary for most applications.

Do you consider your current flooring an asset or a liability?

We have listened to your frustrations and developed EZvation Solutions, a system that will turn your next floor from a liability into an asset. Forbo's EZvation Solutions include our Forbo 100 adhesive system, ArmorCove and Marmoweld ETU products which focus on reducing costs through efficient use of materials and improved labor efficiency.

- Provide immediate-on occupancy
- Reduce installation downtime
- Make the existing labor more efficient by simplifying labor skills required
- Eliminating moisture mitigation costs
- Provide hygienic, watertight floors
- Eliminate cracked and punctured coving problems
- Assist in the prevention of infection control concerns
- Increase long term flooring performance
