95%
of walked in dirt and
moisture can be kept
out with Coral

65%
reduction in
cleaning costs

coral[®]

Coral mats can:

- STOP up to 95% of the walk-in dirt and moisture
- REDUCE maintenance & cleaning costs by up to 65%
- MINIMIZE liability from slips and falls
- MAXIMIZE the useful life of interior finishes
- LENGTH MATTERS! longer walk off = greater protection

To see which products contribute to LEED[®] credits, please visit www.forboflooringNA.com for more information.

coral[®] mats

Coral mats are available in the following standard sizes:

(width of entrance x walkoff length)

3' x 5' 5' x 3' 4' x 6' 6' x 4' 6' x 10' 6' x 20'

note:

- **custom sizes available upon request**
- dimensions include the rubber-edge profile (1.5" approx.)
- 4' x 6' black mat available for quick ship, inquire for details

Made with 100% Regenerated Nylon

ECONYL[®]

Coral Duo and Brush are manufactured using ECONYL[®] regenerated polyamide yarns. Abandoned fishing nets are one of the unlikely sources of unwanted waste material which go to make ECONYL[®]. Using ECONYL[®] is a way to reduce existing waste, avoid additional manufacturing-related pollution, and keep consumption of natural resources and energy to a minimum.

coral[®] grip

Great for coarse dirt and grit removal, inside and out

A versatile non-woven clean-off barrier that can be used both inside and outdoors. Coral Grip prevents grit and coarse dirt from entering the building. It has a patented embossed design and durable, pliable vinyl filaments which perform a highly effective scraping action. The addition of granulated PVC chips add to the soil scraping properties of the non woven construction and help to create an anti-slip surface which is effective even on an incline. Coral Grip is available in medium duty (MD) and heavy duty (HD) formats. In its standard form, Coral Grip has an open, non backed, pervious structure, but it can also be manufactured with an Everfort vinyl backing.

coral[®] duo

Coral contributes to LEED® credits, please visit www.forboflooringNA.com for more information.

For unbeatable soil removal

Coral Duo provides unrivalled dirt removal and is particularly effective at trapping and retaining soil and moisture in the first few steps inside an entrance area. In fact, research shows that Coral Duo removes and retains 10% more dirt in the first few meters than any other textile barrier product, which makes it an ideal matting system for smaller entrances. Coral Duo is a combination product from alternating strips of scraping Coral Brush Pure yarns and moisture absorbing Coral Classic, reinforced with tough and resilient monofilament fibers.

coral[®] brush

The great all-round performer for dirt and moisture removal

Coral Brush can be used in all types of entrance areas and is an ideal solution when you need barrier matting that can simultaneously absorb moisture and remove dry soiling. Its unique construction consists of three types of yarn, each offering a different benefit. Capillary yarns with their large surface area, absorb moisture; active scraping yarns help to brush the soil from shoes and heavy duty textured yarns help Coral Brush to retain its good looks, providing the resilience needed to withstand heavy pedestrian and wheeled traffic. Coral Brush has the capacity to hide a lot of dirt from view.

All colors of Coral Brush are also available in 20"x20" approx. (50 cm x50 cm) phthalate free vinyl backed tile.
