creating better environments

The best performing logo mat!

Your entrance flooring system can be enhanced by using Forbo's Coral Logo, expressing your logo or identity.

For this we offer:

- Highest functional performance on the market
- Unlimited possibilities
- Hassle free order process
- Guarantees the best investment for any building
- Available in standard and custom dimensions

Where other logo mats tend to fade and get dirty very quickly, a Coral logo mat will retain its looks and continue to impress for many years because it has all the qualities and performance characteristics of our standard Forbo Coral products. The secret of its success is in the construction. Unlike many other bespoke mats, Coral logo is produced with high quality matt yarns which prevent tracking and soiling.

Choose your product

Depending on the colours and designs required to suit your corporate identity, you can make a choice between a printed or an inset logo mat. Please contact your local customer service department to find out how easy it is to personalise your entrance or promotion area.

Inset logo mat

- Best to use for extreme traffic conditions and maximum functional performance.
- Any colour from the standard Forbo Coral collection can be used for the base background and logo colours.
- Easy to combine as inlay in larger Coral installations.

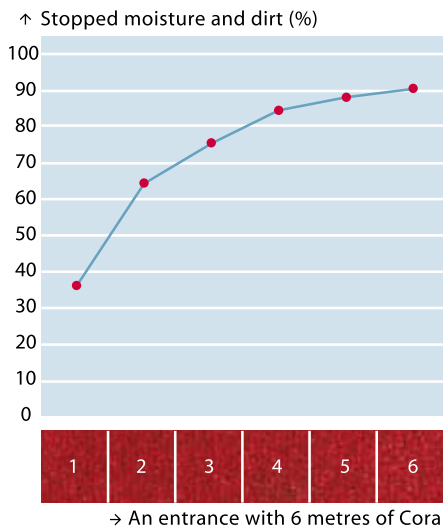

Printed logo mat

- Excellent visual quality and bright colouring
- Best to use for complicated designs with multiple colours
- Any of the 42 colours mentioned on the next page can be used. Also pantone and ral colours can be matched.

Colour collection for printed logo

Moisture and dirt trapping Coral

A good quality entrance matting system incorporating a Coral clean-off zone provides a very effective way to reduce this expenditure. By stopping up to 90% of walked in dirt and moisture, it can reduce cleaning bills by up to 65% and prolong the life of interior floor finishes and coverings. For over 40 years Forbo Coral has been the international leader in advanced clean-off textile entrance systems, maintaining its position at the forefront of the market through continued investment in research and development.
