

## FORBO SARLIBASE T.E.

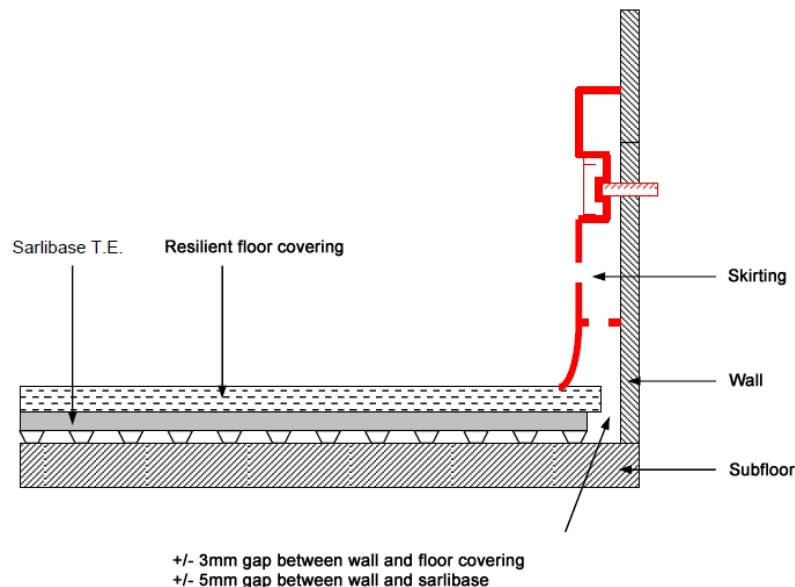

**Sarlibase T.E.** is a flexible subfloor sheet material designed to cope with moist surfaces under Forbo floor coverings. It is not designed as an acoustic underlay although it does achieve a 7dB rating. Either Corkment or Sarlibase Acoustique (indent only) should be used if acoustic performance is required.

The product has a smooth vinyl surface with a textured foam backing.

Due to this unique structure, moisture can still evaporate without damaging the floor covering above it.

**Sarlibase T.E.** is **loose laid** and in door areas or corners can be fixed with double sided tape. The floor covering is adhered to it using an acrylic plasticiser resistant emulsion adhesive e.g. Eurocol Ultrasafe or Uzin KE 2000S (see installation guide).

**Sarlibase T.E. Technical Details:**

Roll Size:	35 x 2m
Thickness:	1.5mm
Weight:	1.3kg/m <sup>2</sup>
Acoustic Rating:	7dB
Residual Indentation (EN433):	0.10mm
Dimensional Stability (EN434):	0.05%

**Sarlibase T.E.** is a stock item in Australia and NZ.
