## BELTING NEWS - ISSUE 29

MOVEMENT SYSTEMS

The year is slowly coming to an end and we want to take this opportunity to thank you for your trust and our cooperative business relationship. We would also like to present several innovative developments in this, the last issue of our newsletter for the year. Developments that will help you stay on track to success next year.

Amongst other things, you can expect:

Energy-saving conveyor belts that combine efficiency and sustainability – all details in our Winning Solution. A whitepaper with the best tips for cleaning belts so as to ensure the highest of hygiene standards in the food industry. Or the expansion of our homogeneous conveyor belt portfolio.

Get inspired and get ready to start in a successful 2025 with us! We wish you and all you love a peaceful Christmas season and a good start to the New Year.

Your Forbo Movement Systems Management Board

## Cleaning belts properly

Find out what factors influence the cleaning intensity and how you can find the optimal methods for your special requirements – whilst always complying with legal regulations and safety standards.

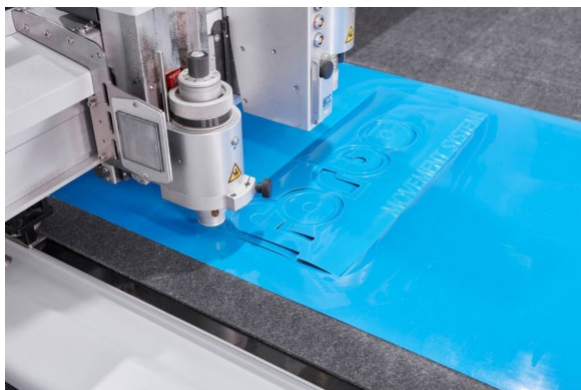

[TO THE WHITEPAPER](#)

## Even more hygiene with Fullsan belts

We have expanded our portfolio of homogeneous belts and now also offer positive drive belts in a reinforced version for precise and slip-free operation, in addition to the Flat belts.

## The perfect cutting process

We have supplemented our range for precise cutting applications with the new Novo HAP-HC+ black. Specially developed for vacuum systems, it will impress you with its high air permeability, reduced energy consumption and a robust, incision-resistant surface.

## Energy-savings made easy

Cost reductions, increase in performance and a longer belt life – our Amp Miser belts have been running for over 3.5 years without any issues! The success story of SSI Schäfer proves that intelligent solutions do make a difference.
