ALLURA DECIBEL SOFT ON SOUND, STRONG ON STABILITY

Allura decibel combines excellent acoustic performance with outstanding design. It reduces impact sound by up to 19dB while maintaining an exceptionally low indentation -- a unique combination for acoustic flooring.

With an extensive range of natural and contemporary designs, it creates quiet spaces without compromising the aesthetic and stability of the floor. Allura decibel delivers comfort, style, and performance in one smart flooring solution.

Looking for an even more sustainable flooring solution?

Allura decibel is also available, on demand, with an enhanced sustainability level, including bio-based PVC and a plasticizer from recycled origin. Discover what this means in practice and go to page 24 to read all about this option.

allura® decibel

THE TOTAL OFFER IN LUXURY VINYL TILES

The Allura collection has a wide range of options. Besides a broad design offer, you can also choose the installation method. Most designs are available in multiple executions as glue down and loose lay.

allura® dryback

FULLY ADHERED

- Total design freedom with the largest choice of shapes and sizes
- Most durable and reliable for applications of any size
- Maximum certainty and performance with a glued down product

allura® puzzle

PUZZLE CONNECTED LOOSE LAY

- Highest traffic solution with a long-lasting durable performance and stunning look
- Minimal subfloor preparation, quick to install and ready to use immediately
- Strong and stable puzzle connection between the large tile format, in woods and materials

allura® flex II

LOOSE LAY

- Easy and quick
- No need for any adhesive, up to 150 m²
- Tackified loose lay for larger applications
- The stable yet flexible solution for demanding applications of any size
- Special backing for extra comfort and improved acoustics

allura® click Flexcore

LOOSE LAY

- Fast Flooring; with the built-in underlay and easy click system
- a consistent 20 dB acoustic rating and is more quiet underfoot
- No subfloor preparation needed, even in the most demanding circumstances
- The floor is designed with sustainability in mind and is fully recyclable

allura® click pro

CLICK CONNECTED

- Clickable solution for any area up to 1000 m²
- Suitable for uneven subfloors and 100% adhesive-free
- Balanced high quality product that will continue to perform, year after year

ENHANCED SUSTAINABLE OPTION WITH ALLURA DECIBEL B+

We continuously work to reduce the environmental impact of our products. Allura decibel is already designed for a circular future: it can be installed with a tackifier for easier reuse or recycling, is produced using 100% renewable electricity, and meets the highest standards for low VOC emissions.

Going further with Allura decibel b+

For projects seeking an even more sustainable choice, there is an on demand option which includes bio-based PVC, plus a plasticizer from recycled origin. We call this Allura decibel b+.

Circular and renewable raw materials

Allura decibel b+ contains 31% recycled material. Part of the recycled content comes from recycled post production and installation waste of PVC flooring and filler from a recycled source. The additional use of recycled plasticizer (made from, e.g. recycled PET bottles) is unique for Allura decibel b+. Additionally, a bio-based PVC is used instead of a tradition fossil-based PVC. This increases the amount of renewable materials and reduces the impact on the environment even further. For both the recycled plasticizer and the bio-based PVC, a mass balance approach is used.

How does it work?

Bio-based materials originate from renewable, natural raw materials. When these materials are used in our production process, the product looks and performs exactly the same, the only difference is the origin of the raw materials. In mass-balance manufacturing, traditional PVC and bio-based PVC are not kept separate. Instead, they enter the same production stream. By purchasing the b+ version, you increase the share of bio-based content allocated within this production process. The same methodology is used for the recycled plasticizer.

This means:

- The more b+ products our customers choose,
- the more bio-based and recycled raw materials we can introduce,
- leading to a continued reduction of fossil resources in our supply chain.

A smart choice for people and planet

By choosing Allura decibel b+, you actively support the transition to renewable materials and help to reduce the use of fossil resources and the impact of CO₂-emissions on the planet. Together, we can move towards healthier buildings, lower emissions, and a more circular flooring industry.

THE PILLARS OF OUR AMBITION

Three words are at the foundation of everything we do:

Transparency, circularity and renewability

PRODUCT DEVELOPMENT AND DESIGN (PRODUCT DEVELOPMENT WITH CIRCULARITY AND USERS IN MIND)

- Allura decibel is installed with tackifier, increasing the possibilities for future end of life recycling.
- Allura is a 100% phthalate free vinyl
- Fully transparent choices by using the EPD's which are 3rd party verified, using only 100% safe and traceable REACH compliant materials
- All Allura products are manufactured with 100% renewable electricity and have very low VOC emissions emissions that are below the industry average
- Allura decibel is made with multiple specifications, fit for all kinds of purpose to meet the exact usage and maintenance needs for the application

SOURCING AND RAW MATERIALS (MAXIMIZING THE USE OF SUSTAINABLE AND RENEWABLE RAW MATERIALS)

- Allura decibel contains recycled content which we intend to increase over time; but without compromise on the performance of the product. The actual content is published in our EPD's
- Choosing Allura decibel b+ with bio-based and recycled material contributes to a reduction of fossil raw material usage
- Controlled supply chain certification – ISO 14001 and ISO 9001 standards and SA8000 for ethical supply chain
- Use of recycled materials back into our own products, all our raw materials meet the strictest health requirements

PRODUCTION AND DISTRIBUTION (CARBON NEUTRAL AND ZERO WASTE PRODUCTION)

- Allura production is based on the zero waste principles. All production waste goes back into our products
- We evaluate the best way to reuse waste so it does not have any impact on product performance of our high quality
- Allura is produced in an environment where substantial reductions of CO₂ emissions have been achieved and additional improvements are planned toward our ambition to be net-zero by 2050 at the latest

LONG LASTING & EASY TO MAINTAIN (HIGHLY DURABLE AND FIT-FOR-PURPOSE SOLUTIONS)

- Modular solutions such as Allura decibel deliver reductions on installation time and waste, saving money and positively impacting the environment.
- 100% functional product build up, including proven PUR protection for long lasting performance, even under demanding circumstances
- Forbo Flooring Systems offers compatible Coral entrance flooring to keep Allura cleaner for longer and reduce cleaning by up to 65%

RECYCLING AND END-OF-LIFE (RECREATING VALUE AT THE END)

- Back to the floor projects – returned floors can be recycled to close the materials loop, vinyl is a very suitable material for at least recycling up to 10x
- Every year our portfolio of products with the potential to be easily recycled in the future is growing. Allura decibel is part of this trend like most Allura products: easy to install and remove with traceable materials

THE DYNAMICS OF A BUILDING

There is an increase in demand for transitional environments; spaces need to be able to evolve and adapt to new functions. These constantly changing spaces require walls and floors that can perform as a chameleon, with timeless colours and basic materials. The trends and changing mindsets inspired the Forbo Design team to analyse the different dynamics taking place within a building. Five themes were identified; **receiving, moving, connecting, concentrating and recharging**, with each one referring to the different identities a space can have. They express a certain state of a person or an activity taking place within the building.

RECEIVING

The theme 'receiving' describes the scenario of a person entering a building; making a transition from the outdoors to the indoors. A space where one should feel welcome and is accessible and transparent as first impressions are key. This is the area of the building that should clearly represent the 'feel' of the brand and meet the expectations of the client to make them feel comfortable and at home.

MOVING

'Moving' represents the action towards the destination and the purpose of why someone is in a building. Orientation is priority, so these areas need to be clear to read and offer guidance even when one is stressed. The space needs to be legible and aid with wayfinding.

CONNECTING

The dynamics of a 'connecting' space signifies areas where you will connect with other people within a building, such as open public spaces for spontaneous interactions or semi open spaces for dialogues or brainstorming. These areas allow for an extrovert energy boost or to give the brain time out.

CONCENTRATING

For 'concentrating', the attention is on the individual and avoiding unwelcome distractions. These are secluded spaces for privacy and focus, and while concentrating, people need a muted ambiance. Therefore, colour palettes in this area of a building should be subtle and quiet.

RECHARGING

'Recharging' is connected to mindfulness and describes relaxed environments where people can let down their guard and be themselves. This area of the building should reflect a home-like setting, to allow people to refresh and recharge. Light and fresh shades should be used here, encouraging people to take a break, breathe and escape.

HOW CAN WE HELP YOU?

We have given you all the benefits as to why an Allura decibel floor is the best solution for your project. We are happy to help you specify this further. Use our various tools or contact us directly.

More information about Allura

Read the full Flotex story on our website.
www.forbo-flooring.com/allura

Floor visualizer

Would you like to visualize the floor you have in mind in a specific room or even your own project? Please go to our floor visualizer and play around with designs and images.
www.forbo-flooring.com/floorvisualizer

Sample service

Would you like to receive a sample, please go to our website or contact our local customer service.

Installation, cleaning & maintenance

On our website you will find videos, PDF downloads and more to help you find the best way to install Allura or to learn how you clean and maintain your floor. Our technical teams are just a phonecall away should you still have questions.
