

# **Forbo Environmental Data Sheet**

| Product name           | Marmoleum Modular 2.5mm tile  |
|------------------------|---|
| Product description    | Marmoleum Modular tile is a linoleum floor<br>covering complying with all the requirements<br>of EN-ISO 24011: Specification for plain and<br>decorative linoleum |
| Manufacturing location | Assendelft, Netherlands<br>Kirkcaldy, United Kingdom  |
| Range names            | Marmoleum Modular   |

# Our footprint - how it's made

| Environmental data                          |      |
|---|------|
| Total recycled content of product by weight | 60%  |
| Post industrial recycled content            | 60%  |
| Post consumer recycled content              | 0%   |
| % renewable electricity used                | 100% |

# Your footsteps - how it performs

## Health and well being

| AgBB/DiBT                 | Pass  |  |  |  |  |
|---------------------------|---|--|--|--|--|
| CHPS 01350                | Marmoleum products comply to 01350 indoor air quality standard  |  |  |  |  |
| Air quality               | Approved by Allergy UK  |  |  |  |  |
| Impact sound reduction    | 5dB   |  |  |  |  |
| Bacteriostatic properties | Marmoleum has independent tests to prove that it inhibits bacteria such as MRSA, C Difficile, Norovirus, Acinetobacter baumannii  |  |  |  |  |
| Installation              |   |  |  |  |  |
| Recommended adhesives     | Forbo recommends the use of 414/696 Euroflex lino plus <b>low solvent</b> . Fast tack linoluem adhesive Where contribution to credits for BREEAM sections HEA2 and HEA9 are required then low emission adhesive Eurocol 614 Eurostar Lino plus should be used. If a permanent bond is required, please us Eurocol 640 Eurostar special. |  |  |  |  |
|                           | Installation off-cuts of Marmoleum can be collected via our <b>Back to the Floor</b> scheme and recycled  |  |  |  |  |

back into Marmoleum at our plant in Scotland.

## creating better environments

| Forbo design principles (Reduc  | e, Recycle, Reuse  | e, Renew)       |  |                                   |                              |  |  |  |
| Reduce  | Marmoleum's Topshield2 finish significantly reduces cleaning and maintenance costs in life. Reduced VOC emissions from calendering process by introducing rapeseed oil.  |                 |  |                                   |                              |  |  |  |
| Reuse   | All Marmoleum site offcuts can be returned to Forbo for reprocessing using our <b>Back to the Floor</b> initiative. After Marmoleum's long life it can be incinerated for landfill and this reclaims more energy that is used in production. It is also biodegradable in a controlled environment. |                 |  |                                   |                              |  |  |  |
| Recycle   | Packaging used to deliver raw materials is seperated and recycled externally.  |                 |  |                                   |                              |  |  |  |
| Renew   | All Marmoleum is produced using 100% renewable electricity. Marmoleum contains 88% natural raw materials, 76% of rapdily renewable materials, i.e. they can be harvested within 10 years of planting   |                 |  |                                   |                              |  |  |  |
