Forbo Flooring Systems is a global market player in Linoleum, project vinyl, carpet tiles, Flotex flocked flooring, Coral entrance systems and vinyl floor coverings. In addition to floor coverings, Forbo develops, manufactures and markets a full range of professional service products. All Forbo products combine high levels of functionality and durability. Forbo Flooring Systems is committed to environmentally responsible production and to far-reaching customer service. Forbo Flooring is part of the Swiss Forbo Group and owns twenty manufacturing plants and branches in 32 countries worldwide.

OUR MILESTONES

1928

Three linoleum manufacturers – German, Swedish and Swiss – form the Continentale Linoleum Union.

1950 – 1973

Diversification into related products such as carpets and vinyl flooring.

1973 and 1974

Adhesives activities hived off from linoleum business to be developed independently.

Continentale Linoleum Union is renamed Forbo to reflect the wider portfolio of activities.

1975 – 1994

Forbo evolves into a worldwide group operating on five continents: acquisition of a flooring business in Britain; diversification into wall-coverings and high-pressure laminates.

1994

Acquisition of Siegling, specializing in process and conveyor belt systems.

1996 – 1998

Divestment of wall-coverings and laminates activities.

2000 and 2001

New strategy focusing on four divisions: Linoleum, Vinyl, Belting and Adhesives. Divestment of industrial activities, including extruded profiles, decorative products and coated textiles. Carpet business spun off in management buyout. A series of minor acquisitions to strengthen Adhesives business.

2000 – 2003

Adhesives gains world stature by acquiring Swift, operating worldwide from the USA, Europe and Asia. Belting business expands in Britain. Linoleum and Vinyl merged to create Forbo Flooring. Now three strategic businesses: Flooring, Adhesives and Belting.

2004 – 2006

Strategic focus on three core divisions reaffirmed. Restructuring and measures to raise profitability. Acquisition of Chinese adhesives manufacturer specialized in hot-melt and water-based adhesives.

2007

New branding and growth strategy; three core divisions – flooring, adhesives and belting – renamed Flooring Systems, Bonding Systems and Movement Systems, operating under the Forbo brand with an integrated business strategy.

2008

Acquisition of Bonar Floors, a major European flooring manufacturer in the contract flooring sector. With this, Flooring Systems strengthens its leading position as a systems provider of resilient flooring solutions in the commercial market.

Forbo acquires the lightweight PVC conveyor belting business from Fenner Dunlop (Charlotte) Inc. North America as a further step to strengthen its Movement Systems division.

2012

Focus on leading market positions through the sale of the industrial adhesives activity, including synthetic polymers, which belonged to the Bonding Systems division.

2013

Forbo Eurocol Krommenie (NL), Erfurt (DE) and Stroitec (RU) Building & Construction adhesives join the Forbo Flooring Systems organization.

2014

Forbo Flooring Systems launches full Marmoleum modular program in plank and tile formats.

2016

Introduction of in-house manufactured homogeneous vinyl using the latest insights and technology from a state of the art zero waste greenfield factory in Coevorden, The Netherlands.

FLOORING SYSTEMS & THE ENVIRONMENT

Life Cycle Assessment

Forbo uses Life Cycle Assessment (LCA) as the independent methodology of measuring our impact on the environment. Standardized within ISO 14040, Life Cycle Assessment (LCA) is defined as a compilation and evaluation of the inputs and outputs and the potential environmental impacts of a product system throughout its life cycle, a cradle-to-grave-approach. Measurement against the specific impact categories focuses on efforts for reduction; it is the basis for Forbo's green development and our overall performance. The LCA is calculated for 1m2 installed floor covering from cradle to installation. We base our LCA calculation on the weighted mass of all the products we produce and also include the energy consumption of all our offices and warehouse worldwide.

Environmental Product Declarations (EPD's)

Forbo Flooring Systems has published Environmental Product Declarations for all of its individual floor covering products. An EPD presents quantified environmental data for a product, based on information from a life cycle assessment (LCA). An EPD is a report verified by the European Resilient Flooring Manufacturers Institute (ERFMI) that summarises and explains the data generated from an LCA.

Green design principles

We conscientiously apply green design principles to all our products and processes. In order to live up to our promise to reduce our environmental footprint by 25% in 2015, all our collections are engineered and designed to commit to this goal.

A project where we achieved a reduction of 23.1% and reduction of 23.1%. At the same time Forbo Flooring Systems' contribution to the global warming potential expressed in CO2 equivalents is reduced by 37,7%. The project continues globally on annually set targets.

Reduce, Renewable, Reuse, Recycle

The key to our success in implementing our environmental policies lies in the application of our "4 R's" : Reduce, Renewable, Reuse, Recycle. A number of initiatives have been rolled out across the business, and it is our commitment to continuing and improving ourselves to achieve our environmental aims.

Reduce: energy, landfill, raw material consumption

Renewable: electricity, natural & sustainable raw materials

Reuse: production waste across all sites

Recycle: product and sampling take back schemes

Forbo way to win

Forbo's internal awareness programme. In 2010 we rolled out our internal awareness programme - The Forbo Way to Win. We used this to introduce our sustainability policy and strengthen our employee's engagement by providing a platform for them to contribute to our efforts in reducing energy consumption, the use of raw materials and waste. We also asked them to look as ways of increasing recycling.

Realized examples of Forbo Way To Win

The programme generated over 1700 ideas, resulting in 600 possible projects, some of which have already been successfully implemented.

- Rewinding yarn ends and reuse in producing Tessera carpet tiles.
- Reduce the need of water to produce steam the Flotex production.
- Use different pre-cut lengths of paper for the backing machine.
- Elimination of the cardboard cores in the jumbo rolls of Flotex.

"Our target is to continuously minimise the environmental impact of Forbo Flooring Systems as measured by the weighted categories in our independently verified Life Cycle Assessment measurement system by 25% before the end of 2015 (cf2009)"

FORBO FOUND EVERYWHERE

Flooring Systems' floor coverings are to be found in a wide variety of buildings. In hospitals, schools, retail, offices, industry, in every space is another floor solution. For all these areas we have a suitable floor that meets all the requirements and conditions to create the right atmosphere, ambience and comfort. You can find us in ...

Commercial Offices

When it comes to refurbishing commercial properties, we know you need flooring. You probably are looking for a flooring design that will set your property apart or need a solution to cover the whole of your building. Our portfolio will make it easy to select the ideal floor covering to meet your needs.

Healthcare

With millions of square metres of our floor coverings installed in healthcare establishments, we are at the forefront when it comes to understanding the needs and concerns of the health.

Education

From nurseries to universities, educational establishments demand attractive, hardwearing, low maintenance safe and sustainable flooring solutions. Durability and hygiene are important in areas used by children and young adults.

Retail, leisure & hospitality

An experience in any retail, leisure & hospitality environment is about more than just the products you can buy or experience. Creating the perfect environment in which your customers feel relaxed and comfortable is key. From the first impression as they enter, to the ease of navigation, our portfolio of products makes it easy to select the perfect flooring to set the tone in your store, hotel or leisure environment.

Industry

Forbo stands for guaranteed performance in all kinds of industrial environments, from electronic and pharmaceutical production areas to laboratories. We offer a complete range of products with antistatic, acoustic, conductive, water-resistant, slip-resistant, bacteriostatic and bactericidal properties.

Transport

Forbo offers a variety of floor covering solutions for the transport industry. All are fully certified and combine durability, excellent fire resistant properties and a wide variety of designs and colours.

FORBO FLOORING SYSTEMS: COMMITTED TO THE HEALTH OF ONE

In today's world more than half of the global population is living in urbanized areas. Here we consume more than two thirds of the world's energy and use more than 80% of all its resources. Cities create over 70% of all CO² emissions and create billions of tons of waste. As Forbo, we are part of the urbanized society and as we are spending more than 80 to 90% of our time indoors we feel it is our responsibility to contribute to a better indoor environment and on top of that a better world to live in.

We do this by focusing on creating products that make a positive contribution to everyone health, safety and well-being. We run our plants on green energy, we manufacture products that are made from renewable natural resources and we act responsible in using the latest techniques and insight in constructing our products. Earth Day mean, standing with both your feet on the ground and creating the best solutions going forward. At Forbo Flooring systems we are used to do this, that is why Flooring Systems from Forbo are tomorrows responsible choice

THE FLOOR COVERINGS OF FORBO FLOORING SYSTEMS

Forbo Flooring Systems offers solutions for every conceivable application. Our high quality Linoleum-, Project Vinyl, Carpet tiles, Needlefelt, Flotex and Entrance Flooring systems combine functionality and design. We offer a full range solution for each application available.

LINOLEUM

A Natural Winner! Our linoleum products with the Forbo Marmoleum brand are natural floors associated with sustainability, durability, high quality and innovative design. Our Linoleum range includes solutions for virtually any type of application. Discover the versatile world of Linoleum with over 300 colours and more than 12 different structures to choose from, available in sheet and modular tile formats.

PROJECT VINYL

Forbo's project vinyl floors can be used wherever people work, learn, play or go about their daily business. Design, slip resistancy, acoustic comfort, easy maintenance and durability are a key consideration of our project vinyl floors. Our project vinyl offer is available in both sheet and tiles and contains a wide range of wood designs, all over designs, stone and metals. Suitable for professional environments in healthcare, schools, office and retail.

FLOTEX FLOCKED FLOORING

Flotex combines the practicality of a resilient flooring with the slip resistant and acoustic properties usually associated with textiles. Flotex is strong and hygienic, and, being completely waterproof, Flotex is also the only truly washable textilefloor covering.

CARPET TILES AND NEEDLEFELT

Carpet tiles are renowned for their aesthetic styling and outstanding performance in the most demanding heavy traffic environments. We offer a wide portfolio of carpet tile ranges, providing an extensive choice of design, colour, installation options and price points. The robust, hard-wearing properties of Needlefelt make it ideal for installations that meet high traffic or in those areas where chairs with castors are likely to be in use, such as in offices, administrative premises and retail establishments.

ENTRANCE FLOORING

Entrance flooring is fundamental to modern building design: Preventing walk in grit, dirt, dust and moist, minimizing maintenance costs, protecting a building's flooring and environment from pollutants and dirt.

LINOLEUM

TAKE A LOOK INTO THE FASCINATING WORLD OF COLOUR AND DESIGN

Marmoleum was created to complement and enhance the architecture interiors of tomorrow's buildings and construction.

Healthy flooring solutions inspired by nature that live up to their performance promise. Create a better environment. Choose a Marmoleum floor. Creating a new perspective.

Forbo Marmoleum stands for versatility, sustainability and durability. It combines ecological and economic values that help bring modern and contemporary architecture to life.

Marmoleum is a natural floor, created from all natural ingredients. It is the most sustainable floor in the resilient flooring category.

All Marmoleum floors include Topshield2, a double UV cured finish delivering floor performance in the real world, that result in the lowest cost of ownership over its life time.

The stereotype of traditional beige and grey marbled linoleum designs is in the past. Our collections offer a wide choice in colour and design with rich, warm, refined and contemporary looks. Marmoleum has been transformed for the modern office and retail environments.

Marmoleum is available in both sheet and tile with matching colours and designs for easy mix and match. Some designs have an additional texture to bring the floor alive and follow the trend of tactility. With our modular marmoleum tiles and planks you can play to create your own floor design.

SUSTAINABLE & DURABLE

With its 'all-natural ingredients', Marmoleum floor covering is almost like creating a floor covering with nutrients. As a matter of fact, the process of making Marmoleum is not unlike to that of preparing an oven-baked apple pie.

What makes Marmoleum special is that it is created entirely from raw materials obtained from their natural habitat right where they grow and renew, often in just 12 months time.

Jute and flax are annual crops that can be harvested just like wheat or corn. Extracting rosin is a continuous process, while wood flour, a waste material from the timber industry, is derived from European production forests. Limestone is available in abundance.

With Marmoleum, the simple, natural ingredient combination that creates the product. Marmoleum has no other additives to make it look better, no supplements to enhance its green profile and no artificial ingredients to improve stability or flexibility. Marmoleum is what it is and nothing else.

All this makes Marmoleum a natural floor that, after a long 30-plus year life cycle, can start all over again. Marmoleum can be scrapped, since it's biodegrade. Alternatively, burning Marmoleum delivers a higher caloric value and creates thermal energy that outweighs the energy used during production. This demonstrates the full life cycle circle from which nature benefits.

MADE FROM 97%
NATURAL RAW

CHARACTERIZED
AS COMING FROM
RECYCLED MATERIALS

TOPSHIELD2, FOR FLOOR PERFORMANCE IN THE REAL WORLD

The reality of day-to-day life for a floor covering is that it encounters both use and abuse without being able to balance its performance with prescribed cleaning and maintenance regimes. That means cleaning and maintenance is not always carried out exactly 'on time' or in the way prescribed by the manufacturer. The real world requires foolproof solutions.

Forbo Marmoleum is known for its track record in heavy-traffic environments such as schools, health care, offices and public buildings. In these applications, everyday use is characterised by high demands on hygiene, resistance to wear and the need for easy cleaning and maintenance. Dirt and sand carried into the building, hand disinfectant spills and the reality of the pressure of the economy on cleaning and maintenance regimes mean that floors today have to endure and withstand use and abuse to an even higher degree than before.

Topshield2 has been designed to ensure that Marmoleum meets the demands of everyday use, is even more resistant to dirt pick-up and less prone to wear with improved resistance to

scratches and stains to create a floor that gives you lasting performance over time.

Topshield2 provides you with a floor covering that:

- Is naturally bacteriostatic
- Resistant to hand disinfectants
- Has excellent stain resistance
- Is efficient, easy to clean and quick drying
- Soils less and picks up less dirt
- Has improved scratch resistance
- Is easy to maintain
- Can be renovated

AUTHENTIC & VERSATILE

The lowest cost of ownership

Marmoleum has a long and proud heritage. Whether looking for a traditional or more modern design, in sheet or tile, Marmoleum is used in a variety of application areas ranging from hospitals and schools to airports and designer shops. No matter the application, Marmoleum is versatile and has the proven lowest cost of ownership.

SUSTAINABLE & DURABLE

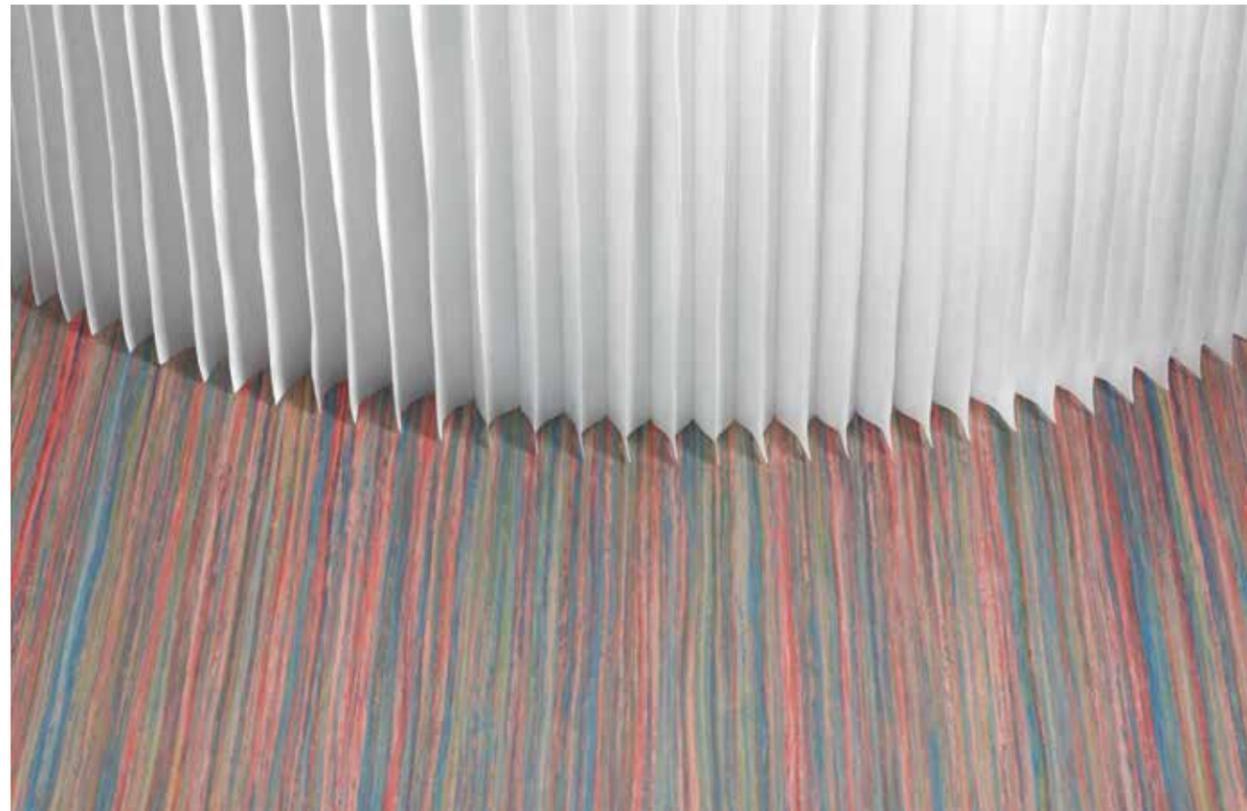

The most sustainable resilient floor

Created from natural, renewable raw materials, one could say that as long as the sun shines and the rain falls we can continue to make Marmoleum. There are no phthalates, plasticisers and no mineral oil in Marmoleum. It has in fact, 97% natural raw materials, 72% rapidly renewable and a 43% recycled content. Combine this with long cleaning and maintenance intervals, and there is no doubt that Marmoleum is the most sustainable resilient floor, bar none.

DESIGN & COLOUR

Designed to let you create the ultimate flooring

The breadth of our colour choice is vast. No other flooring collection offers you so many choices. Our marbled range includes exciting brights & bolds, while our solid range offers a wide range of neutral colourways. Our linear range makes a strong design statement while the patterned range includes both monochromatic tones and more outspoken colours for playful combinations. The modular range open the door to play with planks and tiles while the texture added to some ranges brings the floor to life.

LIFE CYCLE ASSESSMENT & ENVIRONMENTAL PRODUCT DECLARATIONS

We believe an open, honest and transparent approach to demonstrating a sustainable attitude is the only way to show the credits we attribute to our products and processes. Life Cycle Assessment (LCA) is a methodology we use to determine and measure the impact on the environment of any product during its creation, use and what remains when a product reaches its end of life by measuring a set number of impact categories.

The Environmental Product Declaration (EPD) is the outcome of the LCA, which is published in a 3rd party, verified report on a particular product. The EPD for Marmoleum verifies our claims and gives transparent insights into our test results and measurements.

Environmental Stewardship

Marmoleum is manufactured in a state-of-the-art environment where the traditional manufacturing process has been automated in efficient production lines that are run entirely on green energy. At Forbo, we actively steer our processes toward continuous improvement, maximising the use of recycled content in our Marmoleum and working with green design principles whenever new designs or structures are developed.

Marmoleum installation waste take-back schemes

With Forbo's 'Back To The Floor' scheme, installation off-cuts and waste are collected and returned to our factory for reprocessing into new Marmoleum products. On a smaller

scale, in our sampling, we take the same approach. This way, we can do our best to assure full-circle recycling even at points where our product reaches customers.

Labels and Certification, recognition that goes a long way

Marmoleum is among the most certified and environmentally sound floor covering. We value all our labels, whether it's the internationally recognised Swan label, the Blue Angel certification, the North American Sequoia Seal or more specific labels like Nature Plus or the Austrian environmental label. Next to labels and certification, Marmoleum brings real benefits when measured against BRE or LEED certifications. Here, using a Marmoleum floor helps you in the overall rating of your building.

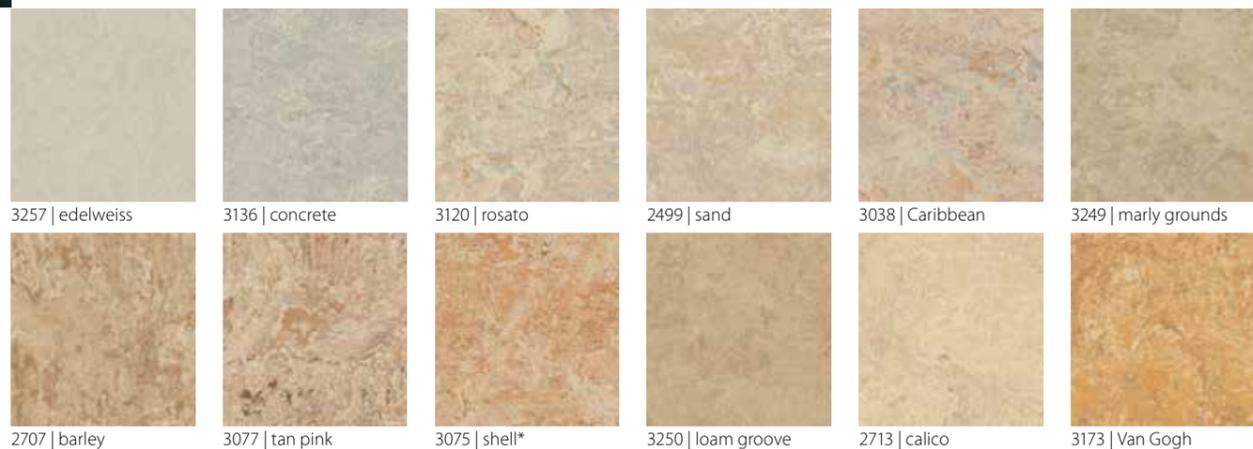

LINOLEUM

- 29 72 **marmoleum® sport**
For use in sports facilities Forbo specially developed Marmoleum Sport.
- 29 78 **furniture linoleum**
A linoleum surfacing material which has a multitude of applications providing a functional finish to walls, furniture, door panels and cupboards.
- 29 83 **bulletin board**
A linoleum surfacing material that is ideal for use on notice- and pin-boards.
- 30 **marmoleum® marbled**
The marbled collection is presented in a vast array of colours, combining stronger and subtler marbled patterns together.
- 34 **marmoleum® solid**
The secret spirit of this collection lies in colour nuances and subtleness. With reference to classic, heritage colours, a conceptual range of (almost) uni colours has been created.
- 44 **marmoleum® patterned**
This collection is a dialogue between the easily understood statement of the black, grey and white Graphics and the subtle, two-tone speckled pattern of Piano.
- 46 **marmoleum® linear**
Linearity is a modern and outspoken trend which we refined and brought up to the colour spectrum of the 21st century. Some colour references are offered with a textured top layer to enhance the tactility of the floor.
- 51 **marmoleum® acoustic**
Marmoleum Acoustic is a twin-layered Marmoleum designed to achieve 14dB impact sound reduction.
- 52 **marmoleum® ohmex**
Marmoleum Ohmex is a special type of Marmoleum with enhanced electrical properties.
- 56 **marmoleum® modular**
Our Marmoleum Modular tile collection takes linoleum out of its traditional environment. With a range of planks and tiles in different formats you can play endlessly to create the ultimate floor design.
- 72 **marmoleum® click**
Marmoleum Click presents a collection of easy to install Marmoleum panels made of HDF board with 2.5 mm Marmoleum on top and a sound absorbing cork backing.
- 78 **marmoleum® sport**
For use in sports facilities Forbo specially developed Marmoleum Sport.
- 84 **furniture linoleum**
A linoleum surfacing material which has a multitude of applications providing a functional finish to walls, furniture, door panels and cupboards.
- 89 **bulletin board**
A linoleum surfacing material that is ideal for use on notice- and pin-boards.

MAROLEUM SOLID

PRESENTING THE PURE NATURE OF LINOLEUM

Forbo proudly introduces Marmoleum Solid, a collection of 5 individual textures that provide the foundation for creating pure distinctive modern spaces. The Solid collection combines an attractive contemporary appearance with an unrivalled versatility that will bring integrity to any space.

PURE DESIGN

- Original and exciting designs with a sense of texture and tactility
- Extensive colour palette fitting the trend for neutral, solid colour experiences
- Designed to combine beautifully with interior finish materials such as wood, glass and metal

PURE EMOTION

- A versatile, authentic floor covering with a long and proud heritage that has a durable and sustainable relevance which is more pertinent than ever
- The deep colour tones and characteristic design elements connect easy with any interior
- It conveys the right first impression and contributes in creating an environment people feel comfortable in.

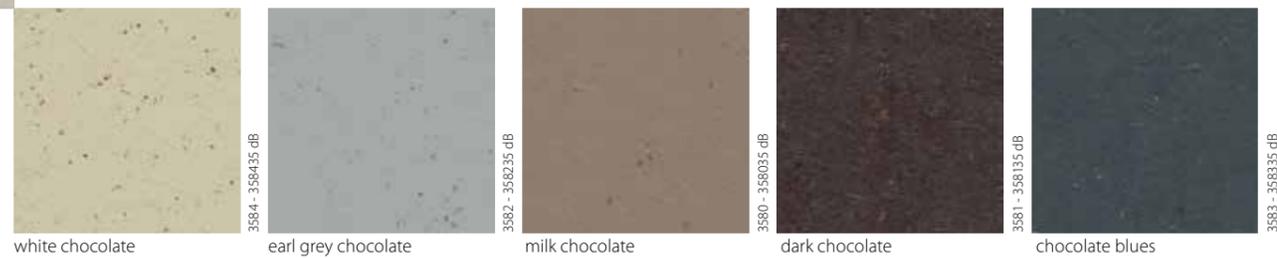

PURE MATERIAL

- Made from natural raw materials including linseed oil and wood flour
- Using modern recycled materials as cocoa shells to create an innovative product which is both relevant and authentic
- Co-created with nature; CO2 neutral and PVC free

marmoleum® patterned
piano

LINOLEUM

Marmoleum Piano's two-tone speckle effect on an almost solid colour structure results in a harmonious look & feel that emphasises the natural and the sophisticated as the floorcovering appears like a uni colour once installed on the floor. The collection is a diverse range of 20 colours including both bright and muted tones and neutral greys. The subtle speckle structure assures dirt hiding properties.

marmoleum[®] linear
striato textura

The all natural Marmoleum Striato collection presents an exciting range of linear designs in contemporary neutrals where the floor act as a modern backdrop of a natural environment. The naturalness of Striato textura and Striato original answers the trend for tactility and residential feeling. In contrast, the Striato colour items emphasises the brightness and colour that can be created with Marmoleum. Being the lively floor strongly present or the modest base where other elements can become the hero. In all cases Marmoleum flooring defines the space.

LINOLEUM

marmoleum® decibel

324735 | 322435

In the linoleum category, Marmoleum Decibel provides reduction of impact sound by 17 dB. Marmoleum Decibel is 3.5 mm sheet floor covering with a 2.5 mm Marmoleum Real laminated onto a 1 mm thick layer of polyolefin foam. Marmoleum Decibel is available in 25 colours that are taken from the Marmoleum Real collection. Alternative Marmoleum designs in a Decibel variety are available on request.

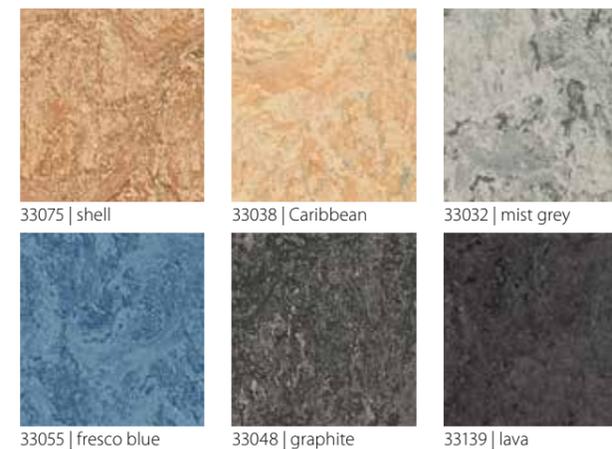

324735 | green

marmoleum® acoustic

33032

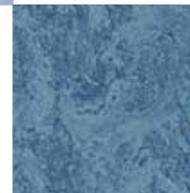

Marmoleum Acoustic is a linoleum with a corkment layer adhered to the back of the linoleum. The construction provides an additional acoustic quality to linoleum with a sound reduction of up to 14 Db.

73032 | 73055

Marmoleum Ohmex is linoleum that meets higher requirements for electrical conductivity. Electrical resistance is improved to $< 1-10 \text{ } 8 \text{ } \Omega$ (EN1081), ensuring personal safety and protecting equipment that is sensitive to static electricity.

PLAY WITH MARMOLEUM MODULAR NATURAL DESIGN TILES

Our Marmoleum Modular tile collection takes linoleum out of its traditional environment. It offers a playful experiment with colour & design, like no other floor covering has done before.

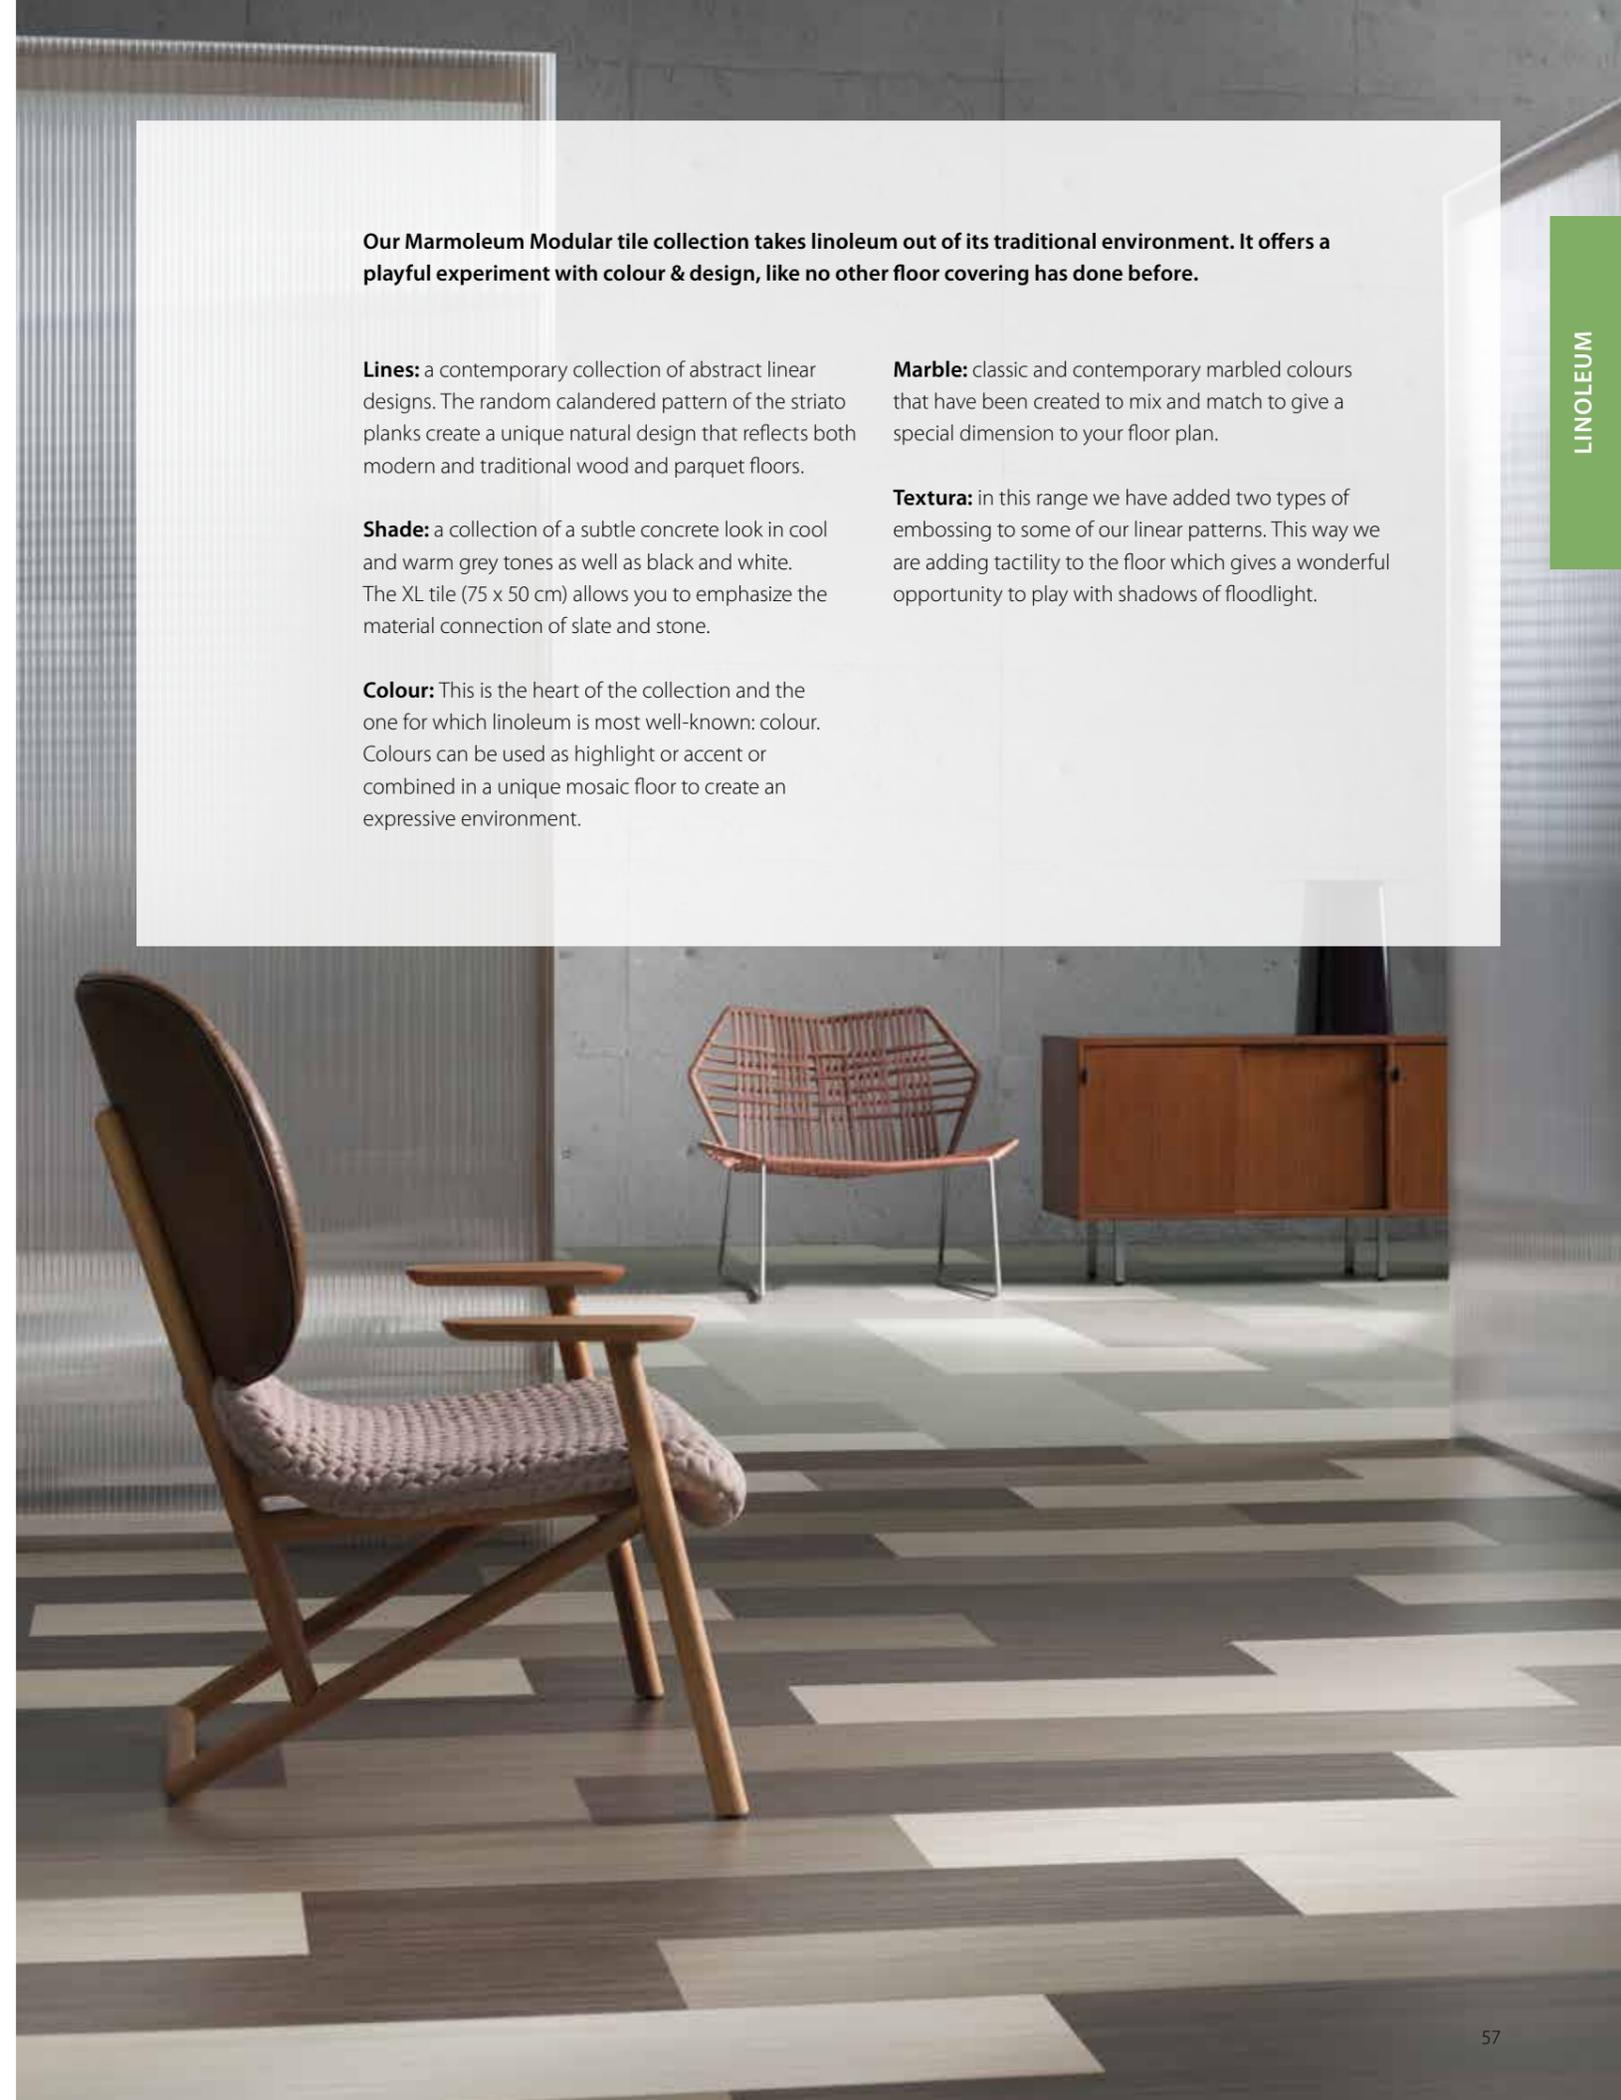

Lines: a contemporary collection of abstract linear designs. The random calandered pattern of the striato planks create a unique natural design that reflects both modern and traditional wood and parquet floors.

Shade: a collection of a subtle concrete look in cool and warm grey tones as well as black and white. The XL tile (75 x 50 cm) allows you to emphasize the material connection of slate and stone.

Colour: This is the heart of the collection and the one for which linoleum is most well-known: colour. Colours can be used as highlight or accent or combined in a unique mosaic floor to create an expressive environment.

Marble: classic and contemporary marbled colours that have been created to mix and match to give a special dimension to your floor plan.

Textura: in this range we have added two types of embossing to some of our linear patterns. This way we are adding tactility to the floor which gives a wonderful opportunity to play with shadows of floodlight.

MARMOLEUM CLICK

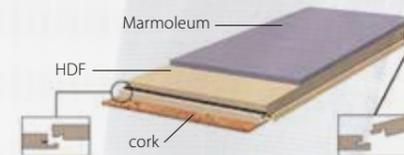

FUN TO DESIGN, EASY TO INSTALL

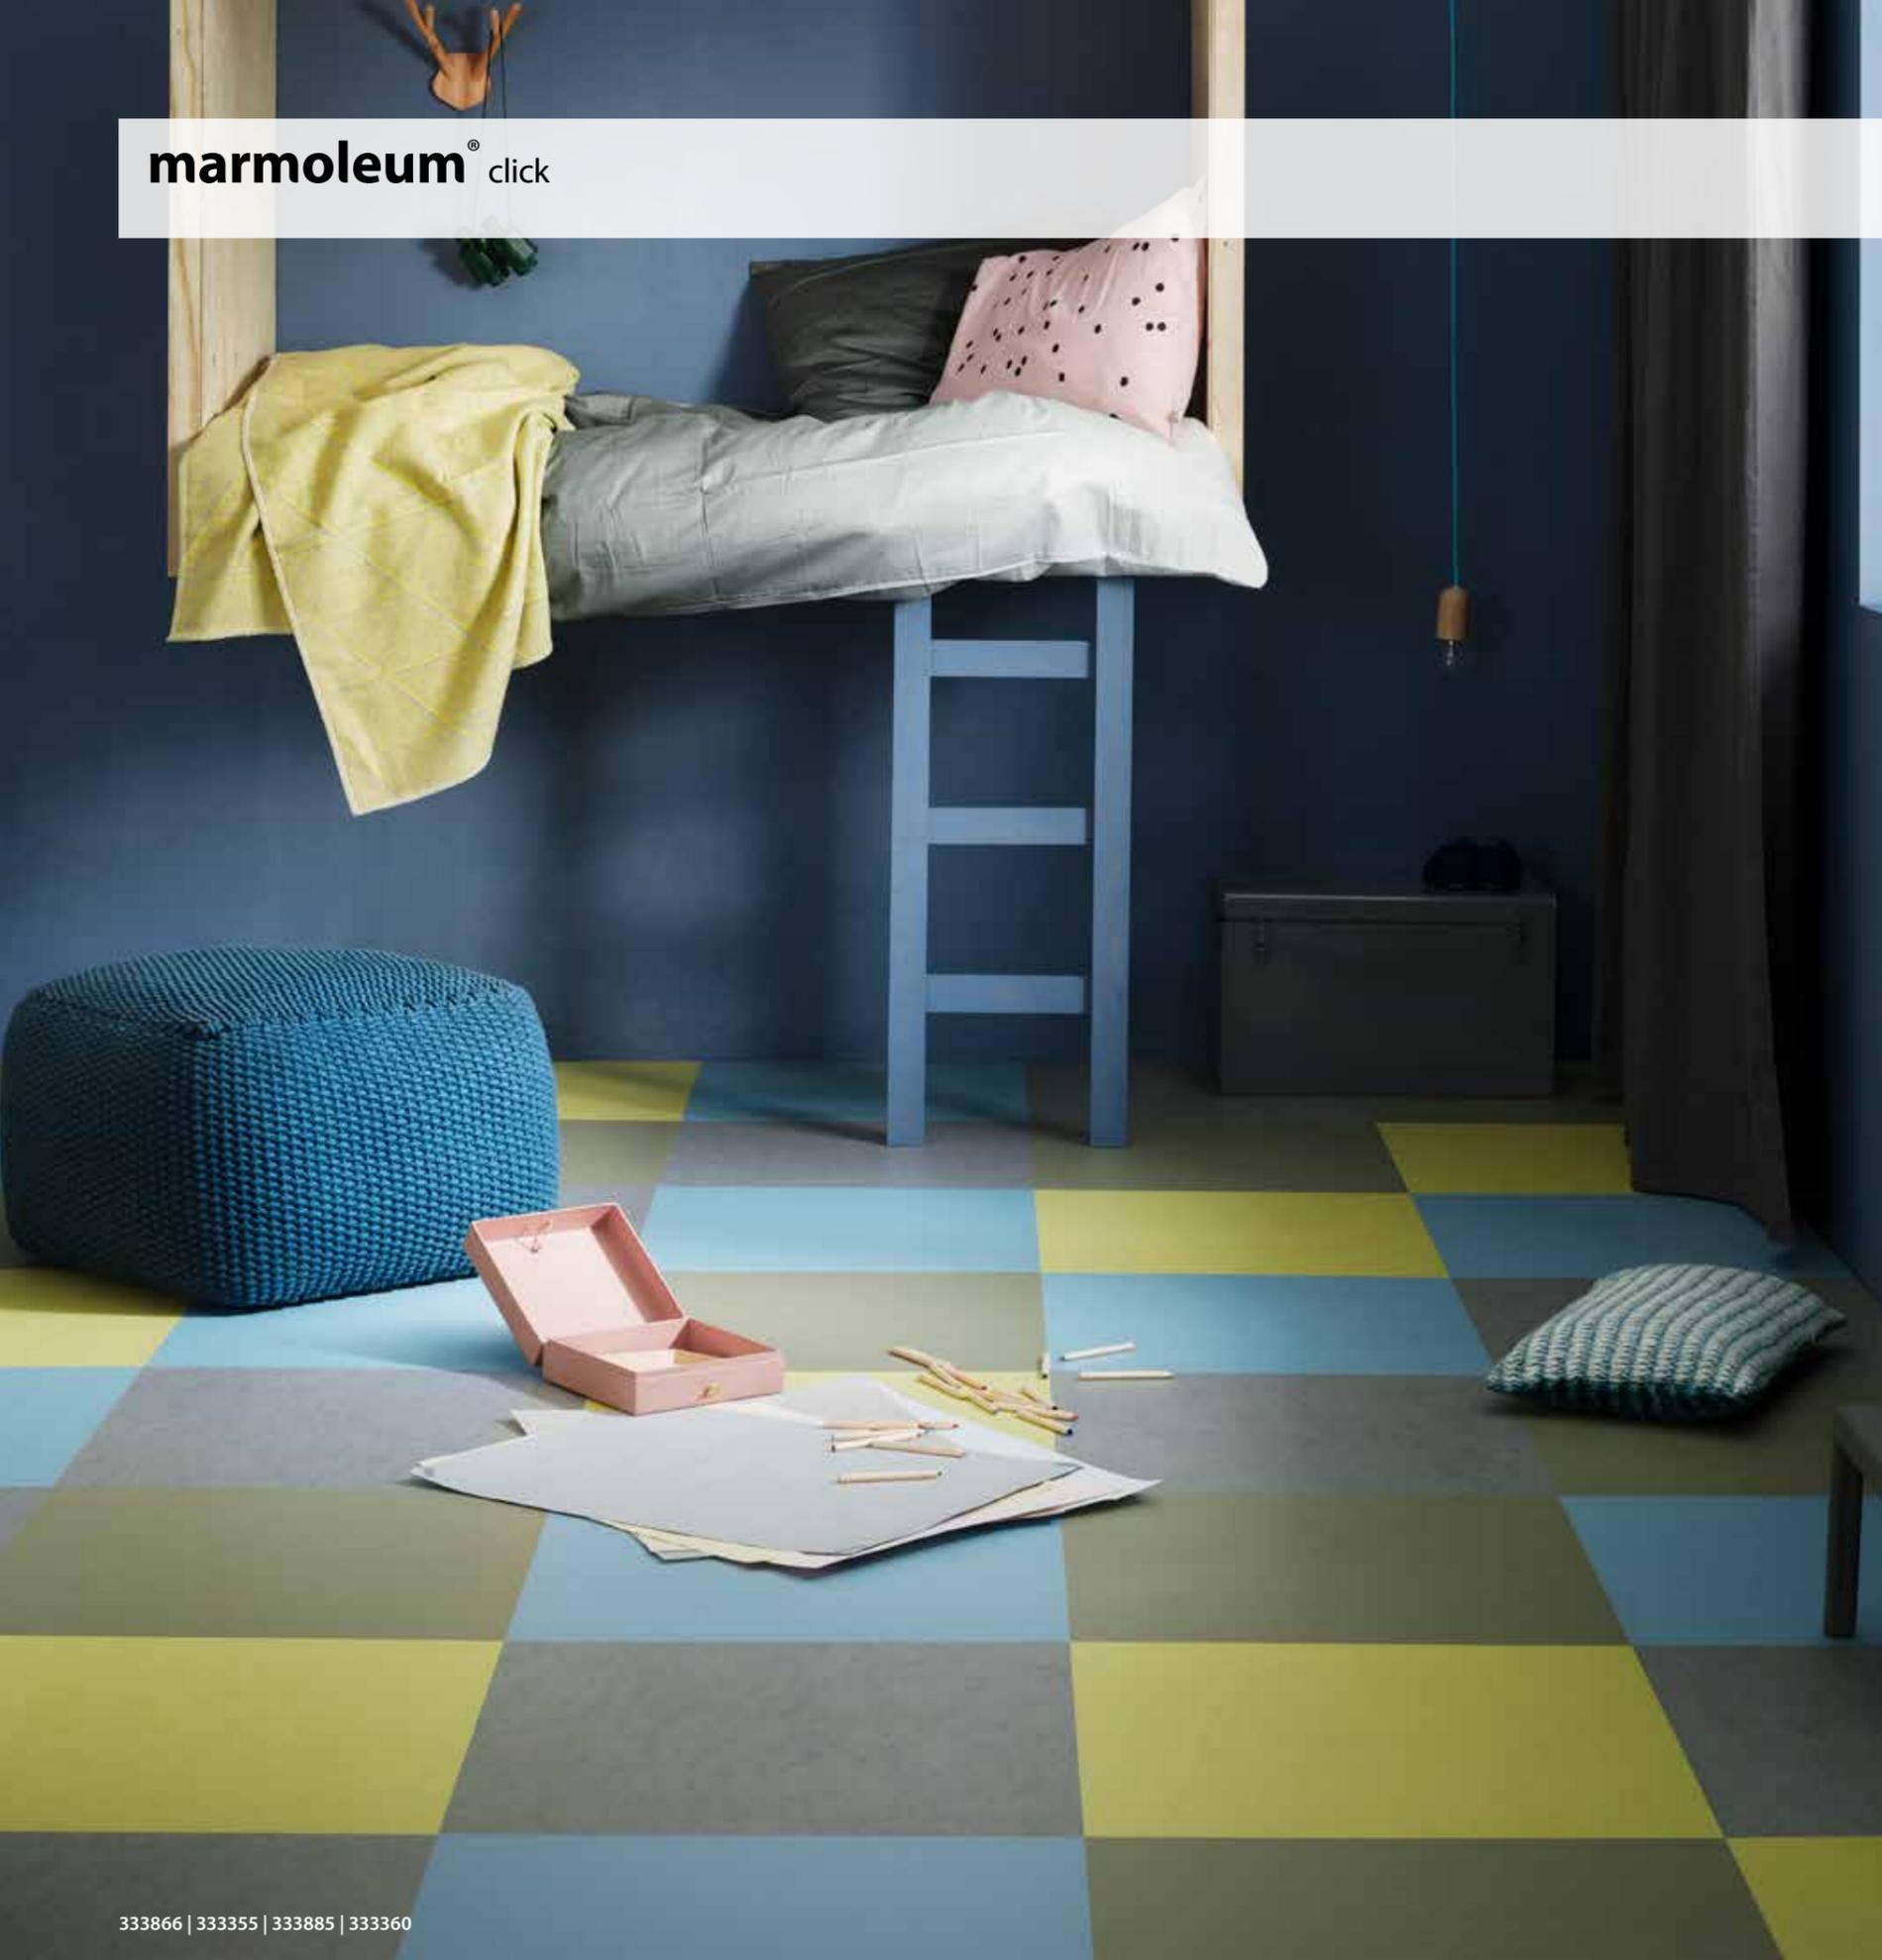

Marmoleum Click is a high quality, easy to install floor panel system made with a high density fibre board (HDF) core, a cork backing and Forbo Marmoleum on top and is available in a wide range of colours. It is ideal for kitchens, living rooms, hallways, bedrooms, playrooms and studies. (Marmoleum Click is not recommended for rooms that regularly get very wet, such as bathrooms and saunas). Marmoleum Click is available in 90 cm x 30 cm panels and 30 cm x 30 cm squares and features a patented click system, which guarantees easy, problem-free installation. With Marmoleum Click, it really is easy to turn your wildest dreams into a beautiful reality.

Marmoleum Click is a snap to install

Marmoleum Click also improves life for people with asthmatic allergies and similar disorders. Not only it is anti-static (which is why it's so easy to keep dust-free), but its lab-proven bacteriostatic properties inhibit microorganisms as well. And because Marmoleum is a natural product, it reaches room temperature quickly, ensuring your house is snug and warm. It can even be used with under-floor heating.

Marmoleum Click is a snap to install. Slot it together with the simple locking system and literally click the panels into place. Because Marmoleum Click panels are wide and leave no seams when connected, it's easy to get a nice smooth finish in no time. And there's no need to mess around with glue or waiting for it dry. Lay it, walk on it. Of course, your Marmoleum Click retailer can also fit your floor, if you prefer. Marmoleum Click can be installed over every type of surface. The only time extra preparation is needed is if the floor or underlay is very uneven (differences of 2 mm or more). We also offer a range of matching skirting finishes to give your room that extra touch.

333866 | 333355 | 333885 | 333360

Marmoleum Click lets you create endless design effects. Quiet shades for a neutral background. Cheerful colours to brighten up your home. Fresh colours that soothe. Light ones to make a room look bigger. Warm colours to make difficult spaces cosy. Marmoleum Click's colours are inspired by nature, but its beauty is more than skin deep.

MARMOLEUM SPORT

THE INNOVATIVE IN-DOOR SPORTS FLOORING

Marmoleum Sport is available in 12 colours that have been designed based on colour patterns commonly applied in sports halls and gymnasiums. The colours can be combined to add accented shapes in the floor for certain sports applications and are dirt concealing. Marmoleum Sport belongs to the category of area-elastic sports floor constructions and fulfils the latest European sport flooring standard EN14904 and the German standard DIN V 18032-2. Area-elastic floors minimise the risk of injury.

According to the German standard DIN V 18032-2 and European EN 14904 all sport functional and technical characteristics are covered. Taking into account the range of requirements in sports halls in these standards for linoleum sport floor coverings a material thickness of 3.2 mm is recommended. 3.2 mm corresponds to the latest state of the art performance requirements and is in accordance with applicable national and European Standards.

Marmoleum Sport meets the emission requirements and is AgBB by DIBt building approval: approval no. Z-156604-627]

Certification from sports associations, e.g. Fiba or IHF, is only provided on the surface layer in combination with the subfloor. There are examples in the market available of complete floor systems which use Marmoleum Sport that received certificates from either Fiba, IHF or other sport associations.

LINOLEUM FOR WALL AND FURNITURE SURFACE APPLICATIONS

The Furniture and Bulletin Board are linoleum products which have a multitude of surface application possibilities. Its properties make it ideally suited for use on notice boards, and it provides a functional finish to walls, furniture, door panels and cupboards. Both collections are produced from renewable raw materials.

Furniture linoleum

Forbo Furniture Linoleum is the finishing touch for everyone who wants to create breathtaking beautifully designed and functional furniture that will stand out from the crowd while also standing the test of time. A high-quality material with a proven pedigree, Furniture Linoleum is renowned for its elegance and durability and is suitable for countless stunning decorative surfacing applications. The unique aesthetic and tactile properties of Furniture Linoleum ensure that every object develops its own character. The combination of matt surface and a warm, soft texture are your guarantee for interior furniture with a truly distinctive, genuinely individual look and feel that really is unlike any other surface material available.

Bulletin Board

Bulletin Board is a linoleum surfacing material with exceptional durability that is ideal for use on noticeboards and pinboards. Bulletin Board is applicable wherever people communicate with one another. The strong, durable, resilient properties of Bulletin Board prevent crumbling and loss of grip often associated with traditional materials such as cork or soft board. Bulletin Board is hygienic due to the fact that it does not attract dust and is bacteriostatic.

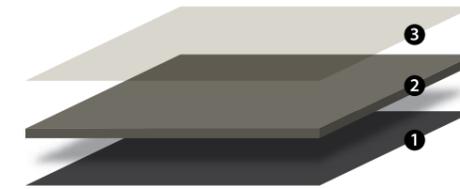

Bulletin Board can be applied to flat concrete walls, walls with a cement-stabilised plaster finish, gypsum walls, dividing walls and sheet materials such as hardboard, fibreboard, plywood, MDF and HDF. It can be applied to the wall in a vertical or horizontal direction.

bulletin board®

Pinboard linoleum, or Bulletin Board, offers a practical, simple solution to collect and exchange thoughts and ideas whenever people plan, create and meet. Simply share your thoughts by pinning your idea onto the wall. Bulletin Board is an all natural material that can be applied in framed pin boards or directly onto the wall. Its surface is tactile and colourful, creating a decorative element in your space, in addition to being a practical aid in your day to day activity.

A modern interior scene featuring a chair, a table with decorative objects, and a clothing rack. The room has a minimalist aesthetic with a light-colored wall and a dark floor. A long, low table holds several decorative items, including a cactus-shaped light fixture, a small clock, and two glowing spherical lamps. A chair with a dark seat and backrest is positioned in the foreground. In the background, a clothing rack holds a few items of clothing, and a pair of white sneakers sits on the floor nearby.

PROJECT VINYL

Luxury Vinyl Tiles

- 96 **allura**
Allura LVT floors present the ultimate finesse in realistic wood and stone designs that have been made with high end European based production techniques to create today's most realistic and natural look & feel in luxury vinyl tiles.
- 108 **allura flex**
Allura Flex loose lay tiles and planks are the ultimate LVT. High quality, dimensionally stable, heterogeneous vinyl tiles that have been specifically designed for loose lay installation.
- 114 **allura flex 0.55**
Allura Flex 0.55 loose lay tiles bring a new design concept to loose lay installation. This multi-layer dimensionally stable high tech vinyl tile is designed to reflect the latest flooring trends and offers unique designs and endless combination opportunities.
- 118 **allura flex decibel**
Allura Flex Decibel is looking stunning with an impact sound reduction of 19dB. It offers similar speedy installation properties and dimensional stability as regular allura flex products.
- 120 **allura click**
18 elegant designs in woods and stones which can be quick and easily installed thanks to the unique and patented click system. Realistic plank sizes, natural embossing and true tone colours make every item unique.

Homogeneous Vinyl

- 130 **allura colour**
The Allura Colour tiles are unique high density pressed flooring tiles with a homogeneous composition ensuring an outstanding performance under high traffic conditions.
- 134 **sphera**
Sphera is Forbo's new premium, homogeneous vinyl collection. Styled by our European design team and using the latest production technology in an advanced purpose-built manufacturing plant, Sphera comprises three distinct ranges, Element, Energetic and Evolution. Each range offers differentiated aesthetics to ensure that Sphera adds interest and style to floor designs across a broad range of applications.

Heterogeneous Vinyl

- 144 **eternal**
Eternal vinyl floors present an advanced range of natural wood, stone, textile and colour designs along with some exclusive digitally printed visuals. Eternal is a high tech heterogeneous compact sheet vinyl that fits all general purpose needs in various segments.
- 154 **digitally printed vinyl**
Our advanced digital printing technology has provided our design team with the tools to develop striking visuals that cannot be achieved with conventional print techniques but also has the option to design your own floor.
- 158 **step**
Step safety vinyl floors have guaranteed life time slip resistant performance and also offer unique solutions for wetroom applications, providing the best 'bare foot', as well as 'bare foot / footwear' non slip solutions. The collection comprises various subranges each with it's own properties, offering a solution for any area that requires a safety floor.
- 176 **sarlon acoustic vinyl**
Takes sound reduction to the next level. Acoustic floors have an important contribution when it comes to reducing noise in buildings. Forbo Flooring is a specialist in acoustic floors with more than 30 years of experience. In our Sarlon acoustic vinyl range we offer floors with an impact sound reduction of up to 19dB in a wide variety of colours and designs.

ESD Floor Covering

- 190 **colorex**
The Colorex collection offers a premium brand of conductive and static dissipative high density dimensional stable tiles. Colorex is an advanced technical flooring system specifically designed to control static discharge in sensitive areas such as cleanrooms, operating theatres and the electronics industry.

allura

means more choice...

Allura is Forbo's brand of Luxury Vinyl Tile (LVT) and over the past decade, it's established itself as one of the most popular brands in our extensive product portfolio. There is no other LVT in the market today that can match Allura in terms of design, technology and sustainability. Designed and produced in Europe, Allura uses advanced production technology to ensure maximum dimensional stability so that the appearance of the floor remains as seamless as the day it was installed. Protected by our exclusive lacquering system it will stand the test of time.

The Allura design signature is inspiring, offering over 100 different designs in a wide variety of different sizing. This including our widest collection of wood designs. The range of stone and abstract designs ranges from classic marbles and concretes to eye catching galaxy and space designs. Allura is the Luxury Vinyl Tile of choice, take a look and see for yourself what Allura has to offer you and get inspired by the endless possibilities.

For increased flexibility, a selection of 34 designs are available in both fully adhered, click and loose lay (tackified) formats.

DESIGN INNOVATION

- Beautiful wood, stone, metal and abstract designs offered in many different sizes of planks and tiles
- Each wood and stone design reflects true life
- 14 embossing structures make Allura come to life, choosing the right structure for every design
- Striking new LVT designs such as Hungarian point and XXL planks

DURABILITY PERFORMANCE

- Embossed lacquering systems ensure lasting appearance retention
- Scratch and stain proof by hard, yet flexible top layer
- 100% dimensionally stable avoiding gaps between tiles appearing over time

SUSTAINABLE EASY

- Manufactured with green electricity and 100% phthalate free
- Over 20% recycled content in the backing
- Easy to clean and maintain through specially embossed top-layer

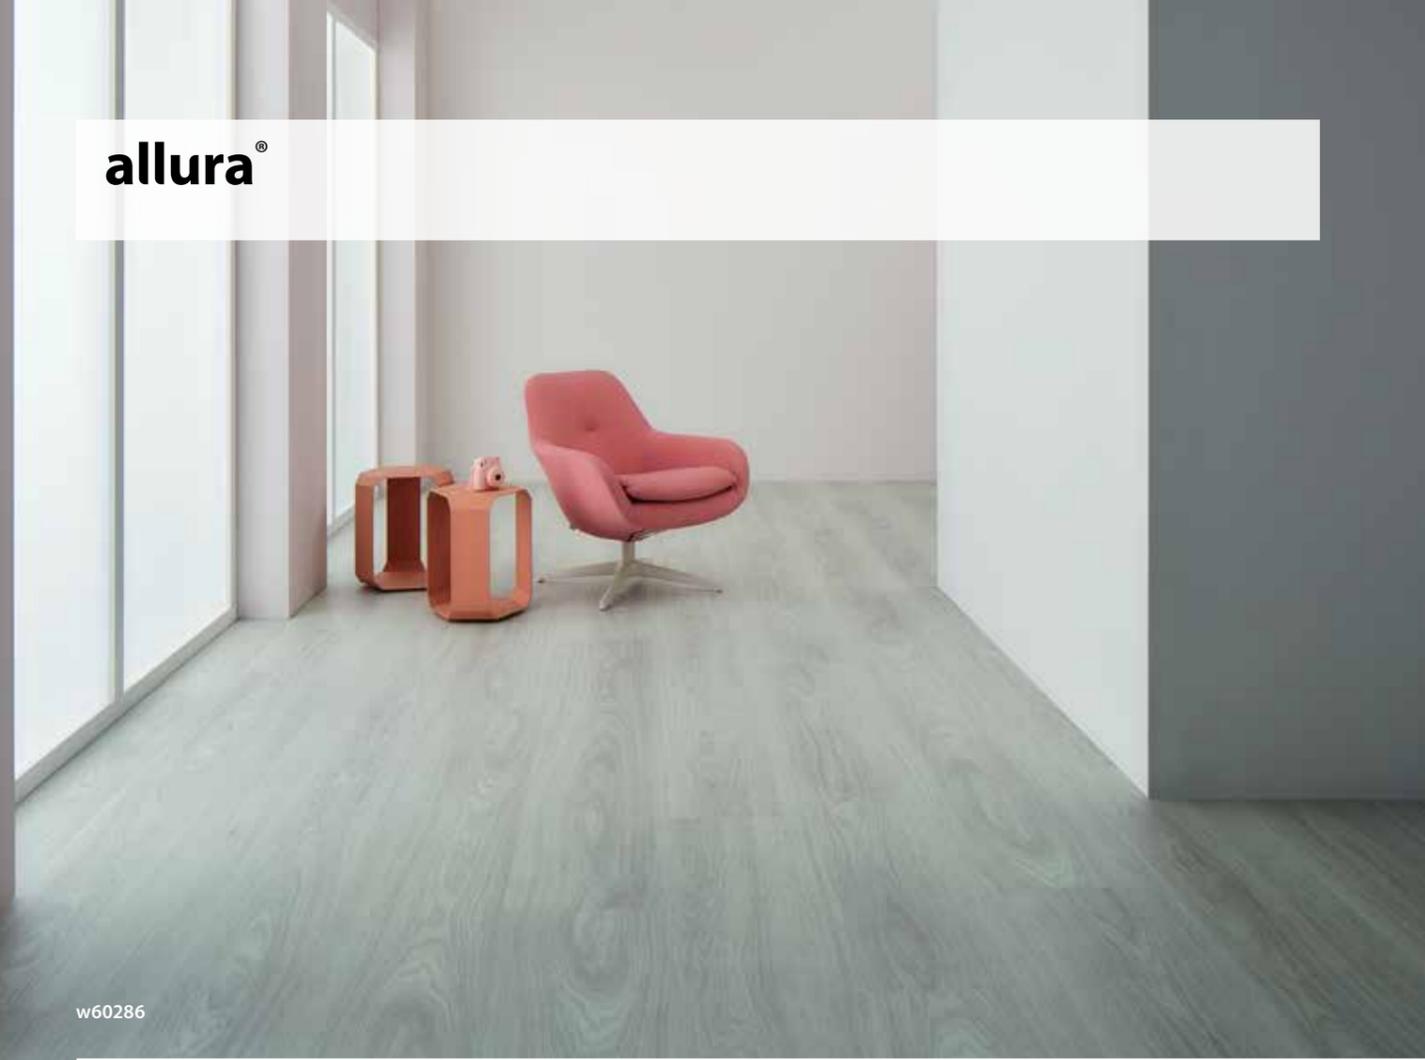

The phthalate free Allura collection is REACH* compliant and produced in Europe with low emission levels.

The excellent dimensional stability ensures safe and hygienic floors as dirt isn't trapped in the seams. Available in natural stress reducing designs and high LRV's, choosing Allura means you are choosing to create better indoor & outdoor environments.

* Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) address the production and use of chemical substances and their potential impacts on both human health and the environment.

Allura strips are used to either simulate partitions in certain designs, such as grout lines or accentuate the tile section in f.e. a ship plank design.

allura flex

Premium loose lay tiles

Allura Flex is a collection of high quality, dimensionally stable, heterogeneous loose lay vinyl tiles and planks which are adhered with tackifier that allows post use removal. The design concept of Allura Flex consists of the most realistic wood designs in the market, but also essential concretes and interesting textile and colour effects. The 43 designs offer a large design freedom; also in larger sizes and the specific Hungarian Point format and are easy to combine. The collection offers something for all commercial floors, also in use alongside carpet tiles because of the 5 mm gauge. Allura Flex has a 1 mm transparent wear layer and proven PUR finish.

The Forbo exclusive combination of functional layers, including a strong glass fleece carrier, makes Allura Flex unprecedented in dimensional stability, strength, performance and quality. Beautiful designs in wood, stone and brights that are easy to install, resulting in stunning and reliable floors.

For increased flexibility, a selection of 34 designs are available in not only loose lay but also fully adhered and click formats.

DESIGN INNOVATION

- Beautiful wood, stone and bright designs offered across 43 plank and tile formats
- Realistic embossing structures bring every Allura Flex design to life
- Available in a variety of sizes, including XL tile and plank formats

DURABILITY PERFORMANCE

- Scratch and stain proof by hard, yet flexible top layer with best appearance retention
- Best dimensionally stable avoiding seam gaps appearing over time
- Only functional layers that enhance the performance of the product

SUSTAINABLE EASY

- Manufactured with green electricity and 100% phthalate free
- Over 50% recycled content in the backing layer
- Easy to clean and maintain through specially embossed top-layer

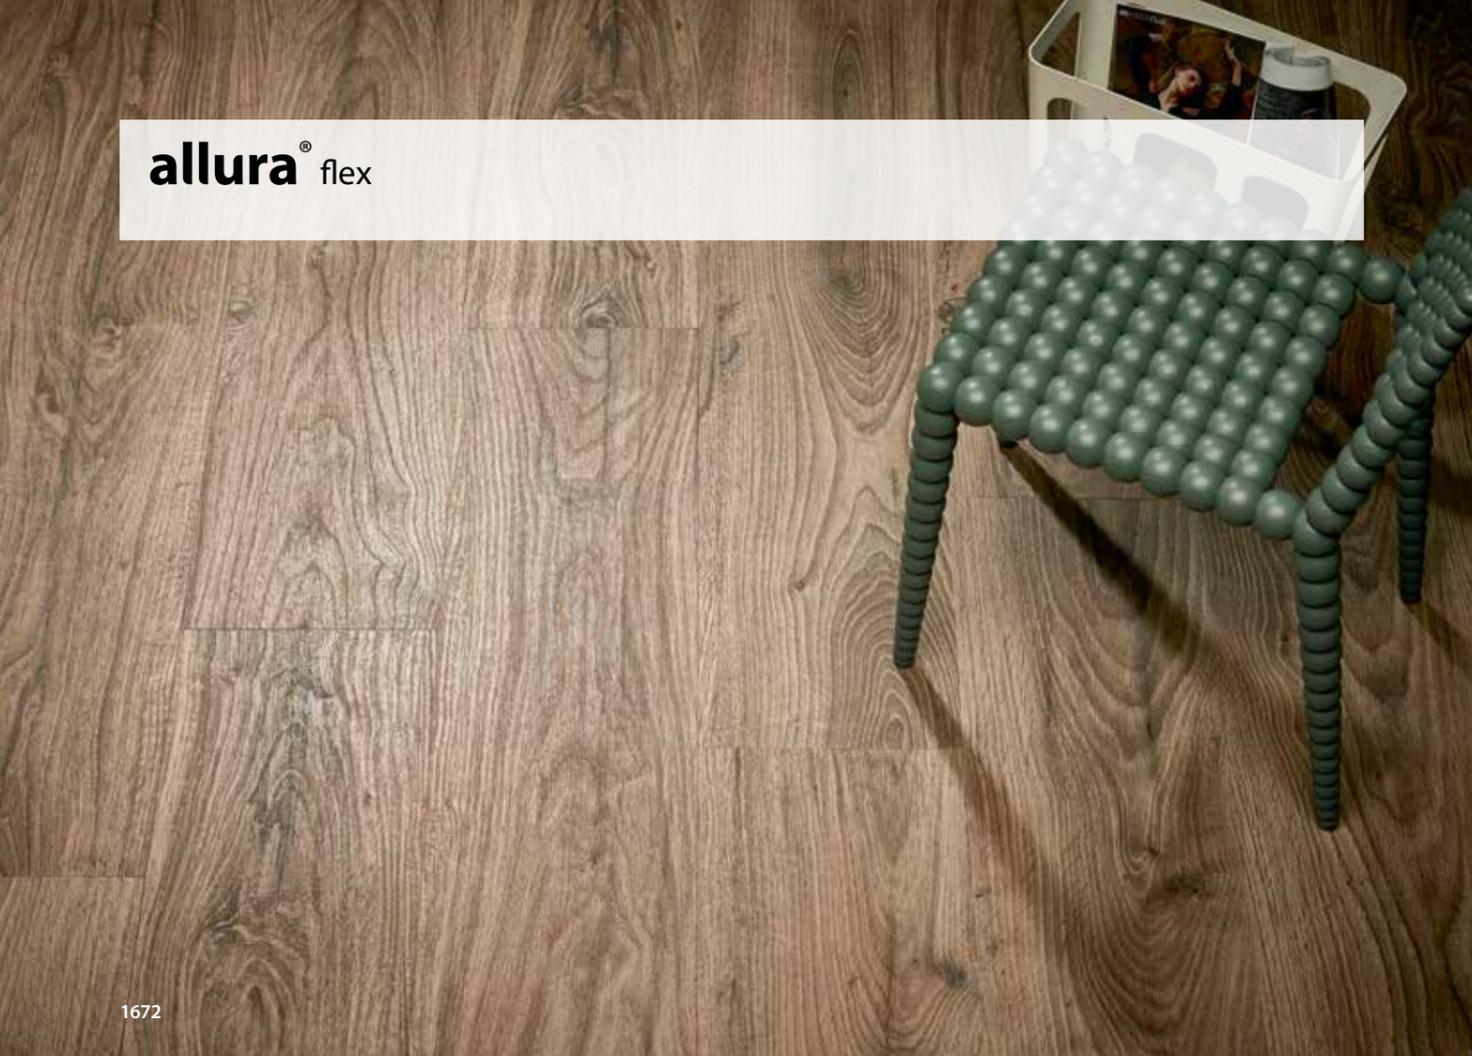

The phthalate free Allura collection is REACH* compliant and produced in Europe with low emission levels.

The excellent dimensional stability ensures safe and hygienic floors as dirt isn't trapped in the seams. Available in natural stress reducing designs and high LRV's, choosing Allura means you are choosing to create better indoor & outdoor environments.

The inviting realistic Wood designs complement office, retail, leisure and hospitality spaces. Allura Flex 0.55 Wood planks are available in 3 plank sizes: 20 x 100, 20 x 120 and 28 x 150 cm.

With 18 energetic colours Allura Flex Decibel is looking stunning with an impact sound reduction of 19dB. Although it is a much lighter product than conventional loose lay tiles, the innovative double glass fleece construction offers similar speedy installation properties and dimensional stability. Flex Decibel offers a quick installation solution in, for example, busy offices, housing projects and communal and retail spaces.

45132

allura click

Allura Click, Luxury Vinyl Tile

The Allura Click collection consists of 38 elegant designs in wood and stone decors. Realistic plank sizes, natural embossing and true tone colours make every item unique. The Click planks and tiles can be quick and easily installed thanks to our proven and patented click system.

Protected by our exclusive lacquering system it will stand the test of time.

Allura Click is produced in Europe and includes Forbo's unique glass fleece construction for dimensional stability. The click system can be angled down, creating a perfect floor installation. Forbo always emphasizes a proper subfloor preparation as a guarantee that the product can be installed without any requirement for flooring adhesives, resulting in a beautifully finished and functioning floor solution.

DESIGN INNOVATION

- Exclusive wood and stone designs offered in different sizes
- Realistic embossing structures bring every Allura Click design to life
- Bevelled wood planks for enhanced realism

DURABILITY PERFORMANCE

- Embossed lacquering systems ensure lasting appearance retention
- Scratch and stain proof by hard, yet flexible top layer
- Best dimensionally stable avoiding seam gaps appearing over time
- Patented locking systems ensure a strong and lasting connection

SUSTAINABLE EASY

- Manufactured with green electricity and 100% phthalate free
- Recyclable and easy to repair
- Time optimal, quick and easy installation also suitable for mid-size installations
- Easy to clean and maintain through specially embossed top-layer

The phthalate free Allura collection is REACH* compliant and produced in Europe with low emission levels. The excellent dimensional stability ensures safe and hygienic floors as dirt isn't trapped in the seams. Available in natural tranquil and pleasing designs and high LRV's. A choice for Allura means a choice for creating a better quality indoor environment.

* Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH) address the production and use of chemical substances and their potential impacts on both human health and the environment.

Allura Click Decibel is an innovative combination of our regular Allura Luxury Vinyl Tile on top of a stable, noise reducing combination of HDF and Forbo PU underlay.

- LVT that brings acoustical impact noise reduction of 19 dB
- Time saving of 20% thanks to the integrated sub floor
- An economical solution to cover old soils, including asbestos (according to current regulations)
- Ideal thickness in combination with tiles or carpet tiles

↕ 4 sided bevelled ⊕ in register embossing

Magic things happen when our Allura luxury vinyl tiles meet our Step slip-resistant floors. Combining Step Crystals with our most appropriate Allura LVT designs, Allura Safety is the first flooring to combine the looks and performance of LVT with the safety properties of our Step floors.

Whether you are looking for a bright colourful floor, or where you would like to have a natural stone like appearance, Allura colour has the solution. The designs are available in 24 colours, each with a matching chipmix of coloured and transparent particles. Allura colour floors are vibrant and hardwearing, an ideal combination for tough environments that still want to show a difference.

SPHERA HOMOGENEOUS VINYL

Forbo Sphera is setting new standards in homogeneous vinyl flooring. It is produced in our brand new manufacturing plant where all the latest insights and technology have been used to create smart and innovative solutions. The result: a premium homogeneous vinyl floor covering!

Our Sphera flooring adds character and style to floors across numerous applications. Whether in demanding, hygienic healthcare environments, in flexible, multi-purpose modern public buildings or in education facilities and offices where durability and colour are key.

Design & colour

- A new technology delivers bright and saturated hues, resulting in striking colourtones, many with high light reflection values (LRV)
- Sphera offers a balanced palette of 62 colours that coordinates well with other Forbo floor coverings like Marmoleum and textile flooring.

Technology & sustainability

- State of the art steel-belt press and thermofix technology provide consistent quality
- Green energy and zero waste technology ensure efficient and sustainable manufacturing
- Sphera can contribute to a healthy indoor environment by phthalate free manufacturing & low emissions

Performance & durability

- A unique embossing process following lacquer application delivers durable performance
- In-line coating and subsequent embossing process provides superior appearance
- The evenly distributed top-layer provides superior all over protection
- The SMART-top surface finish ensures that Sphera has a high resistance to chemicals, scratches and stains
- Sphera achieves the highest abrasion wear rating group T tested to EN660-2

Forbo's homogeneous flooring **technology**

Uniquely embossed surface for optimal performance

SMART top
Resists stains and scratches

High LRV's and bright, saturated hues

Low emitting and 100% phthalate free

Produced in a zero waste environment

sphera element

Forbo Sphera is setting new standards in homogeneous vinyl flooring because of its design, technology and performance. Sphera Element offers a 62 fresh, light and contemporary colour palette which adds a sophistication to floor design. The collection includes warm and cool neutrals which complement interior finishes such as wood and stone along with pastels and bright accent colours for areas requiring way-finding or zoning.

ETERNAL DESIGN VINYL SHEET

The Eternal collection presents an advanced range of natural wood, stone, textile and colour designs along with some exclusive digitally printed visuals. Eternal is a high tech heterogeneous compact sheet vinyl that fits all general purpose needs in various segments. It is produced with the latest technology containing up to 50% recycled content and is phthalate free.

Product construction

Eternal is created around a nonwoven, fully impregnated, glass fleece core which provides dimensional stability and allows a lean-development approach, resulting in a sustainable compact, high tech base. Adding to stability and determining the high quality standard of Eternal project vinyl is the optimized calandered backing; a firm yet flexible layer to allow easy installation, even when coving is required or in wetroom applications. The unique and innovative embossed wear layer ensures maximum wear resistance and provides optimal appearance retention. The backing layer of the construction, contains up to 50% re-used content.

Authenticity

All of the Eternal designs are true originals, created by an in-house team of expert designers who translate the latest trends in classic, contemporary as well as modern and advanced flooring designs that cannot be distinguished from their original material expressions, like wooden and concrete floors.

PUR Pearl and PUR Wood Pearl

For the majority of our designs Forbo uses its proven PUR Pearl lacquering protection technique. The application technique for the lacquering layer assures an even amount of lacquering both on top and in the deeper areas of the embossing. It prevents the surface collecting dirt and is the best guarantee for quality and gloss consistency that ensures low maintenance costs.

New in this collection are 8 items that are introduced with a specific PUR Wood embossing, offering the best possible performance on an allover wood grain design with integrated Pearl effect. The mat embossed lacquer layer ensures the highest level of both chemical- and scuff resistance.

Phthalate free

All Eternal collections are created with the highest environmental stands in mind using the best qualified virgin materials as well as controlled recycled content creating a closed loop production. In addition all items in the Eternal range are phthalate free.

Digitally printed vinyl

Our design vinyl sheet collection contains a series of digitally printed flooring designs which offer a new dimension in colour and design whilst retaining the full performance specification of the Eternal core collection. This includes a 0.7mm wear layer that ensures maximum wear resistance and excellent appearance retention.

Our advanced digital printing technology has provided our design team with the tools to develop striking visuals that cannot be achieved with conventional print techniques: subtle colour gradients that run along the full length of a roll, a rainbow cascade of colours with no pattern repeat over a 10 metre length, or spectacular geodes of polished gemstones that are available in a custom scaling. In addition to the digital print designs in the core Eternal collection, we also offer bespoke, tailored flooring designs from as little as 12m². So whether you are designing a meeting room, retail interior or creating a spectacular atrium in a school or public building.

RAINBOW

The Eternal Rainbow design reveals a spectrum of colour gradients over a 10 metre length enabling a rolling cascade of rainbow hues as the first colour follows the last without any break in the pattern. This scale of pattern repeat is only achievable through digital printing technology. Eternal Rainbow is available in 1.95 metre wide rolls and the width can easily be extended to suit wider areas.

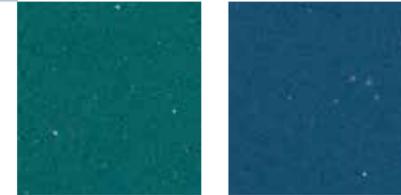

11912 | 44752

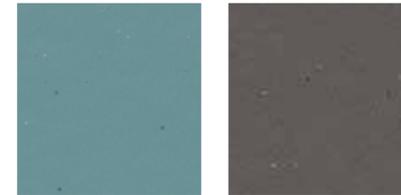

From Geodes that offer giant 'gemstones' to a 'Petrified Bark' effect that will form a centerpiece in any interior space, this collection brings nature to the floor in a scale not seen before. As each design can be scaled in size, Magnified Nature is ideal for those looking to create an eye catching feature on the floor. The Eternal Magnified Nature designs are supplied as an inset piece which can be inserted into any of the Eternal colourways in the collection. For bespoke flooring projects, the Magnified Nature designs can also be rescaled to fit the required floor.

STEP SAFETY FLOORING

PROJECT VINYL

BY CHOOSING A FORBO SAFETY FLOOR THE NUMBER OF ACCIDENTS CAUSED BY SLIPPING CAN BE REDUCED SIGNIFICANTLY.

Forbo's Step safety vinyl floors have guaranteed life time slip resistant performance and also offer unique solutions for wetroom applications, providing the best 'bare foot', as well as 'bare foot / footwear' non slip solutions. The collection comprises various subranges each with it's own properties, offering a solution for any area that requires a safety floor.

New & unique in the Step range are the slip resistant "Step Crystals", that provide security and contribute to a clean and fresh design, with proven easier cleaning. Step offers the widest range in design in safety flooring, without compromising performance.

Safety. Design. Confidence.

Our Step safety vinyl collection is unique in many ways. It's a durable floor covering combining outstanding slip resistance (up to R12) with a wide range of design possibilities. The PUR Pearl surface provides superior, long-lasting appearance and performance.

The collection is divided in 3 ranges:

Surestep (R10), Safestep (R11, R12) and Wetroom floors

Surestep

All Surestep floors provide R10 slip resistance, are non-slip particle enhanced and can be applied in all types of general walking areas where an increased slip

risk may occur. Typical areas are high traffic areas like corridors, ramps, coffee corners, washrooms, toilet, crafts class rooms and public rooms.

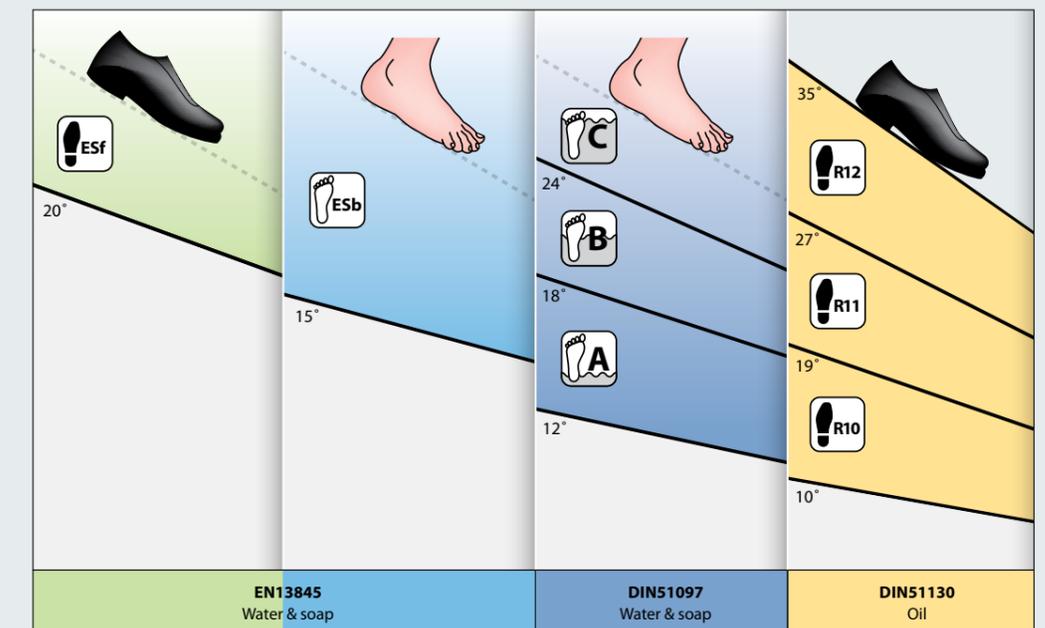

Safestep

Safestep floors are applicable in areas where a higher slip risk is identified when incidental, accidental or continuous active contamination of the floor occurs. In these areas it is simply not possible to prevent spillage, due to the type of work environment. Typical areas are: professional kitchens, light industrial food production, florist shops, garden centres.

Wetroom (Surestep Laguna, Safestep Aqua)

Wetroom floor coverings are developed for use in continuously wet areas, where water flows frequently and barefoot traffic is the standard, or a combination of barefoot and footwear traffic occurs. Typical areas are; shower rooms, spa/pool surroundings, changing rooms, locker rooms.

safestep aqua

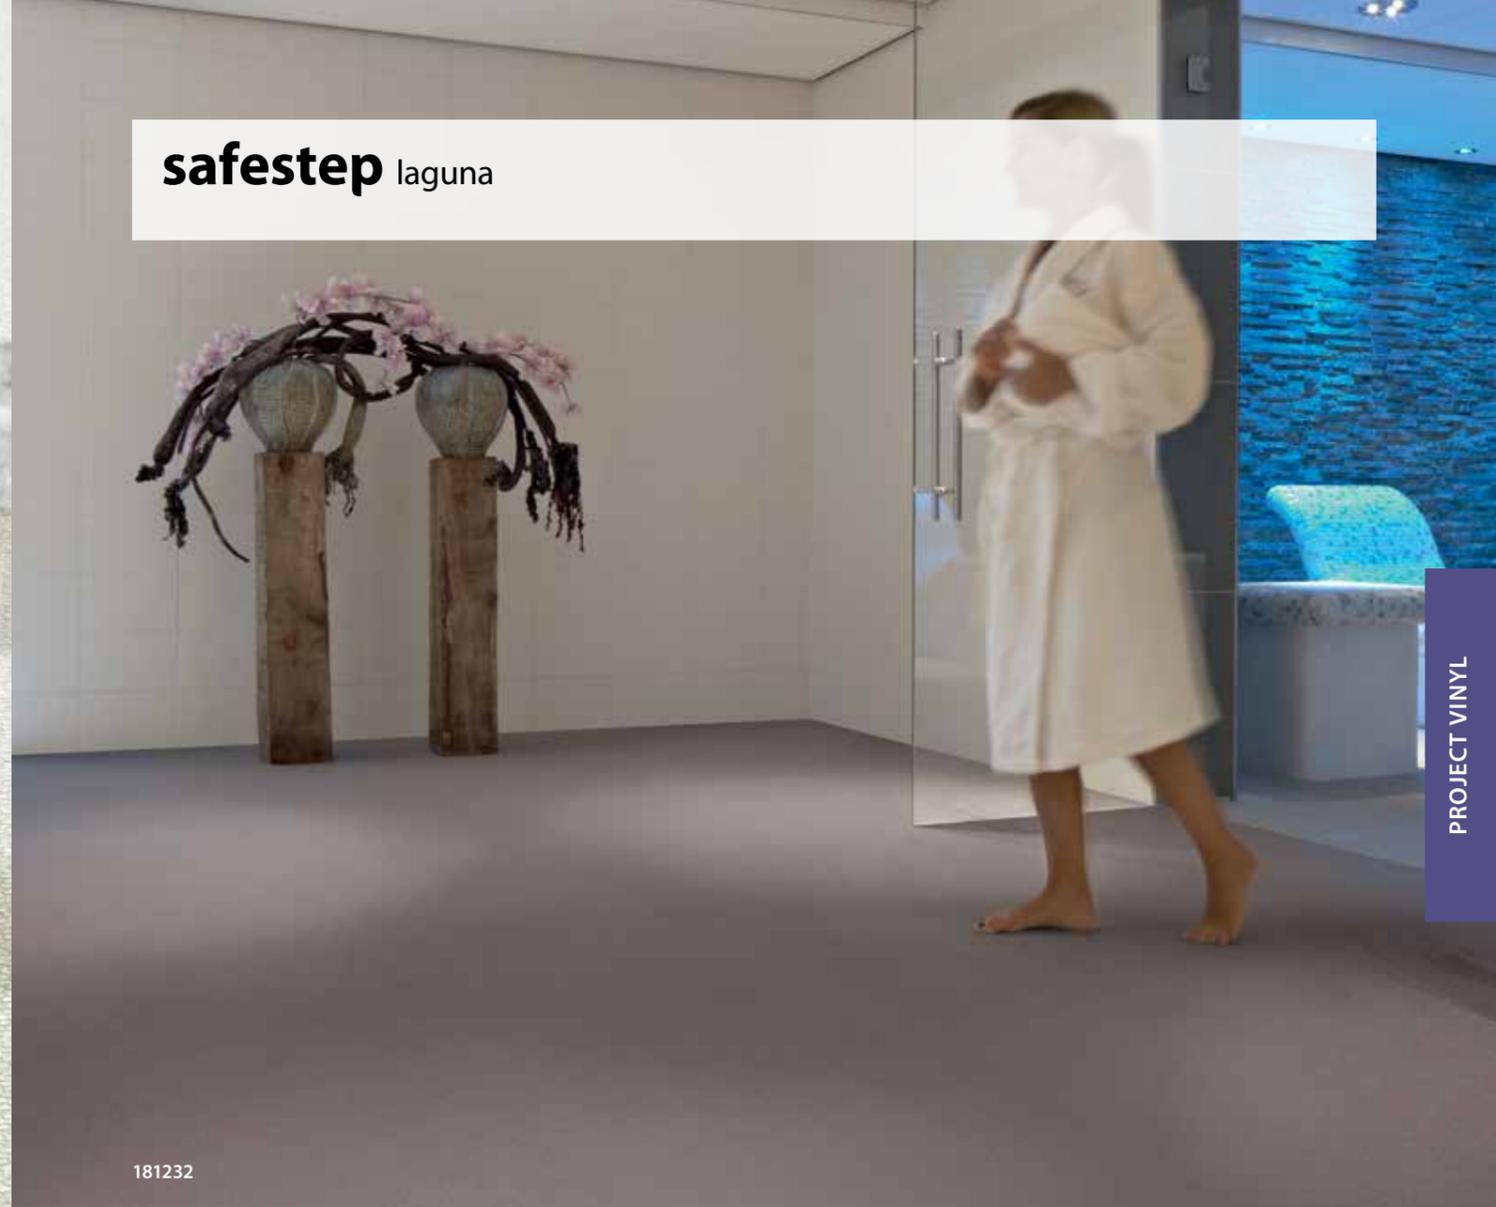

180012

This modern, organic design with a new and unique embossing shape is designed for barefoot (and soft soled shoes) areas. Safestep Aqua is a flexible floor, that can easily be installed to the specific requirements of these wetroom areas. And most importantly: it will perform on the highest barefoot class. The clean and modern collection fits the hygienic and sensitive requirements of the application areas, like bathrooms and swimming pool areas.

Specifications: Class B, R10, ESf + ESb, TRRL≥36, Rz≥20.

safestep laguna

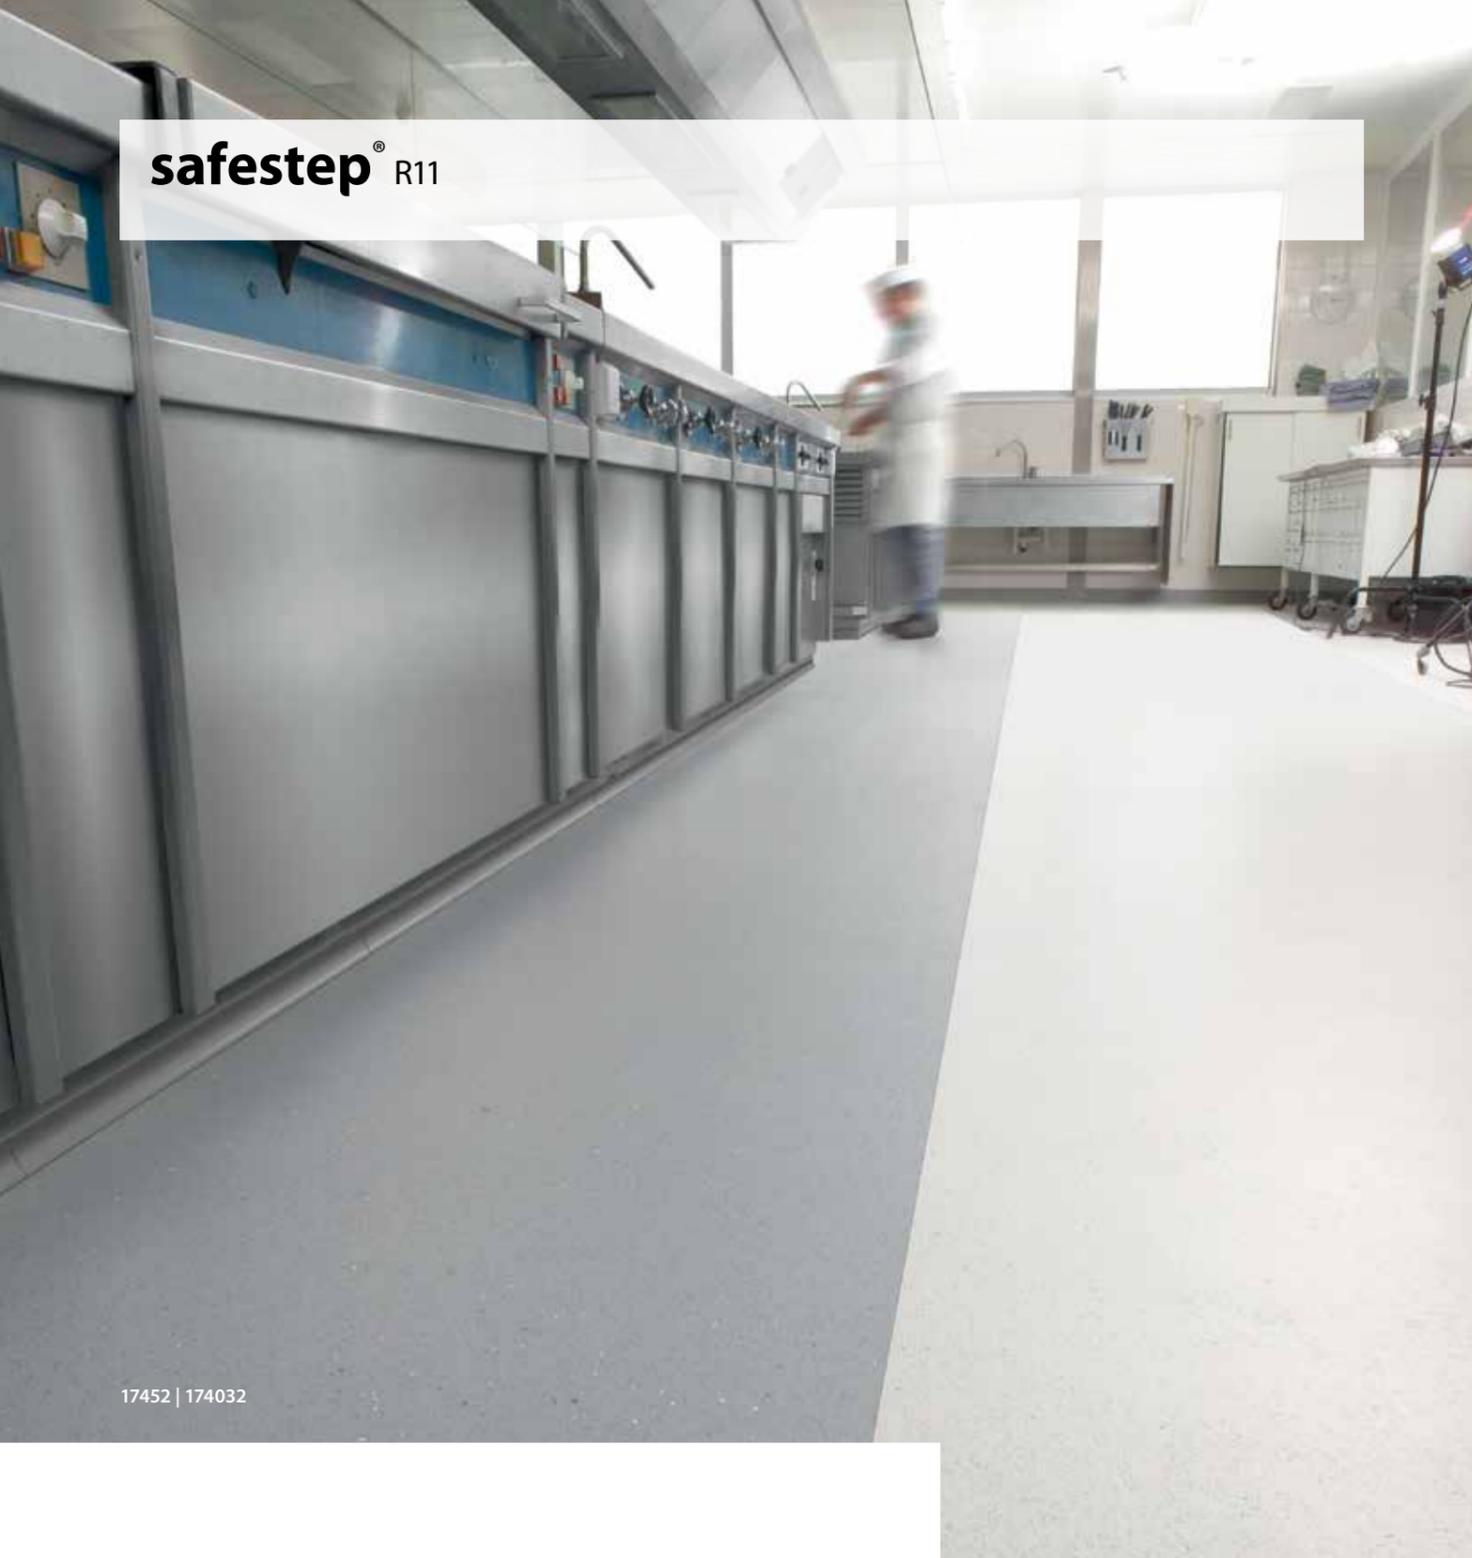

181232

Surestep Laguna safety flooring combines barefoot and footwear slip resistance, for areas where both are likely and frequently will take place. Complying to the relevant norms for both needs, Surestep Laguna can cover all transition areas, like changing rooms and circulation areas. The subtle, soil hiding particle is integrated in the visual, offering a clean and fresh looking floor.

safestep® R11

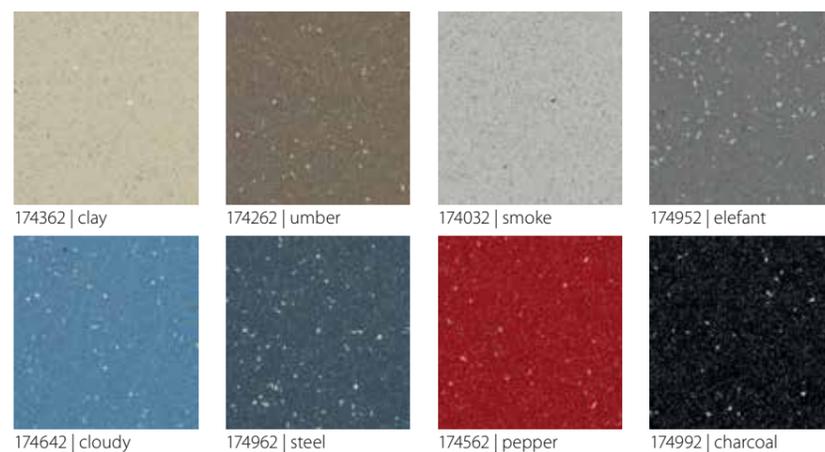

17452 | 174032

safestep® R12

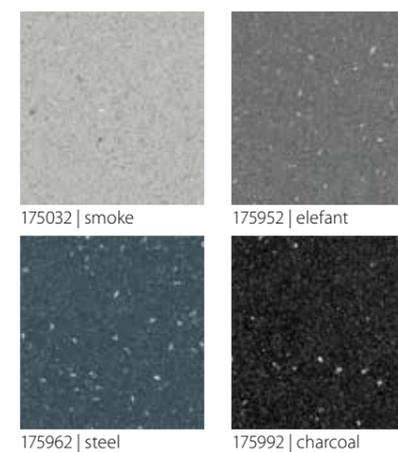

175032

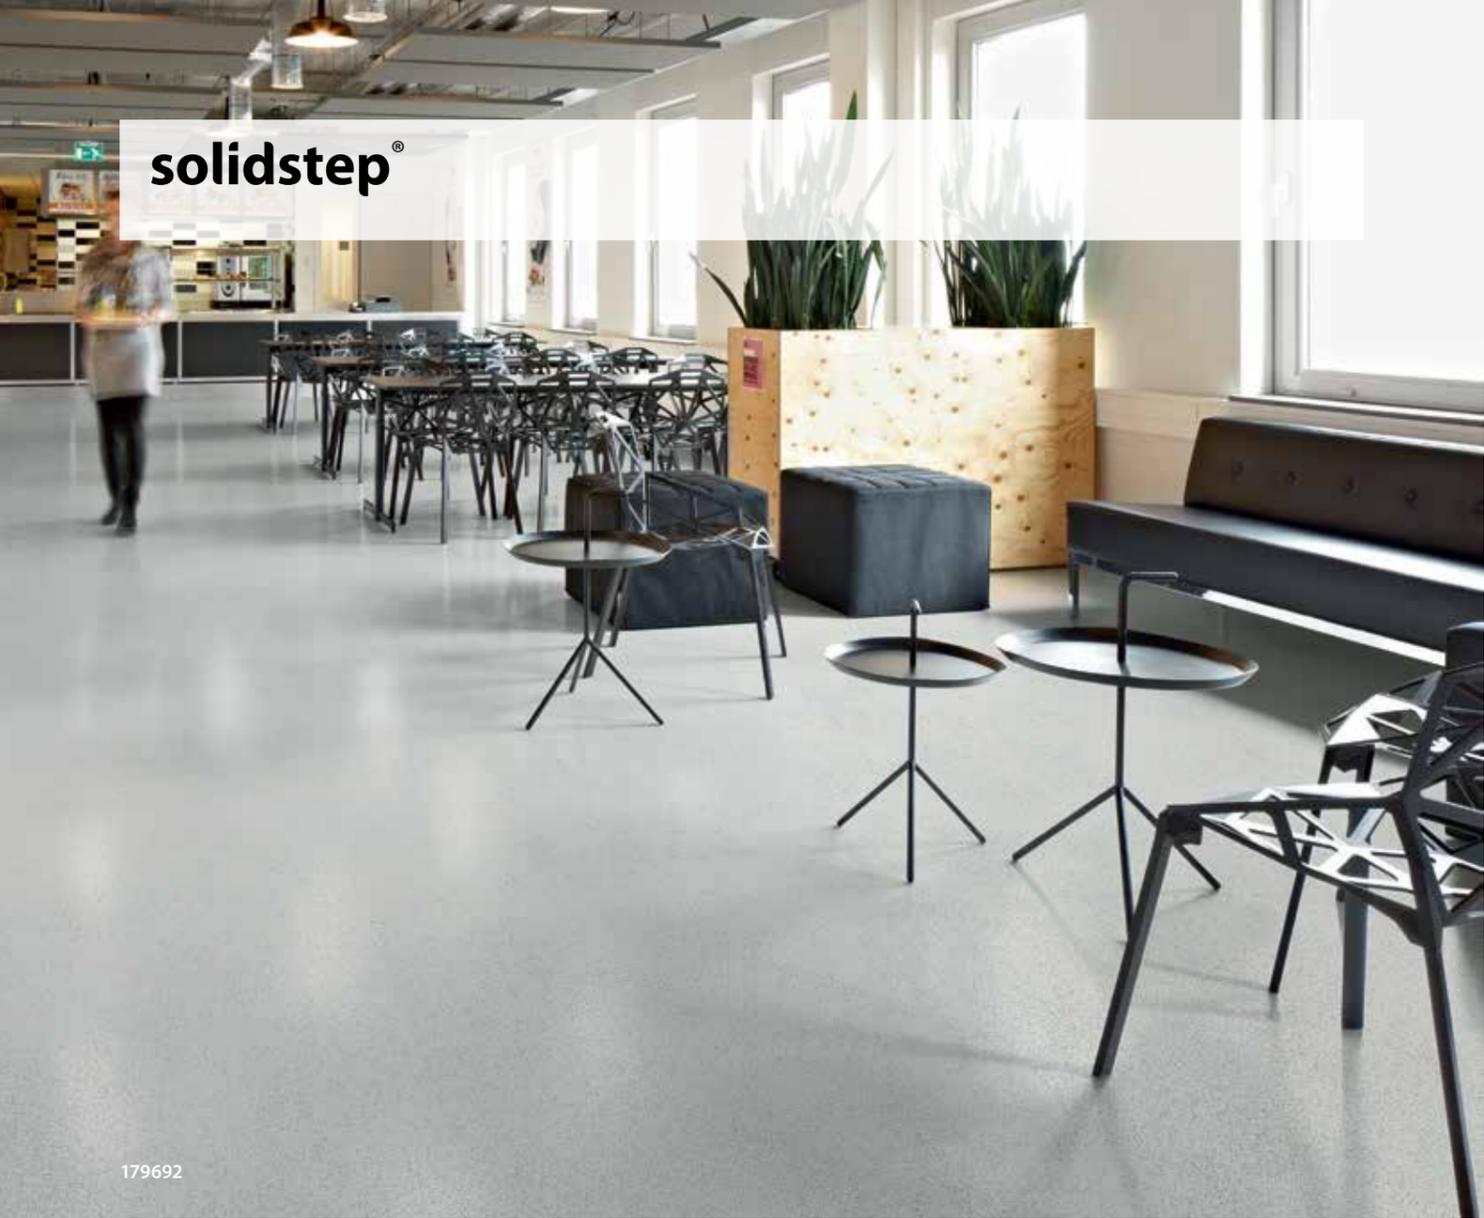

PROJECT VINYL

Forbo's Safestep R11 safety vinyl is applicable in areas where a higher slip risk is identified, like professional kitchens, light industrial food production, flourist shops, garden centres. Safestep R11 offers a combination of high slip resistance and high hygienic standards.

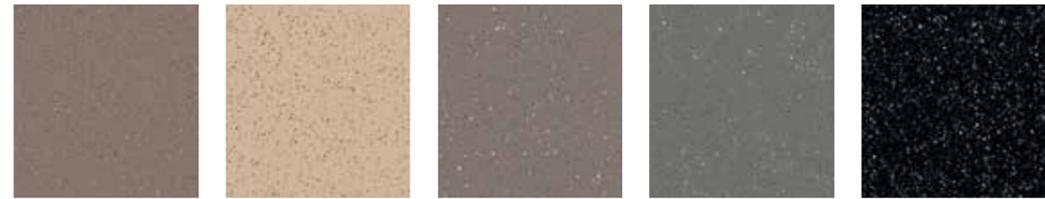

The Safestep R12 range offers soil hiding colourways and can also be colour matched with products in the Surestep collection and with Safestep R11. A high slip resistant R12 rated floor ensures slip resistance under even the most extreme conditions.

SARLON TAKES SOUND REDUCTION TO THE NEXT LEVEL

Reducing noise pollution to a minimum can prevent adverse effects on the human body, such as sleeping disorders, stress, headaches, memory loss, aggressiveness and learning difficulties.

Reducing noise pollution to a minimum can prevent adverse effects on the human body, such as sleeping disorders, stress, headaches, memory loss, aggressiveness and learning difficulties. That's why acoustic performance is essential when designing a building. Acoustic floors are key when it comes to reducing noise in buildings. The floor coverings in the Sarlon acoustic vinyl range have been developed and

tested to maximize impact sound reduction while meeting the needs of heavy traffic commercial areas. To suit all types of applications, our Sarlon acoustic vinyl range offers 2 levels of impact sound reduction: 15dB and 19dB. Sound reduction versus residual indentation. Each one of our floor coverings takes 2 key criteria into account: Impact sound reduction & residual indentation.

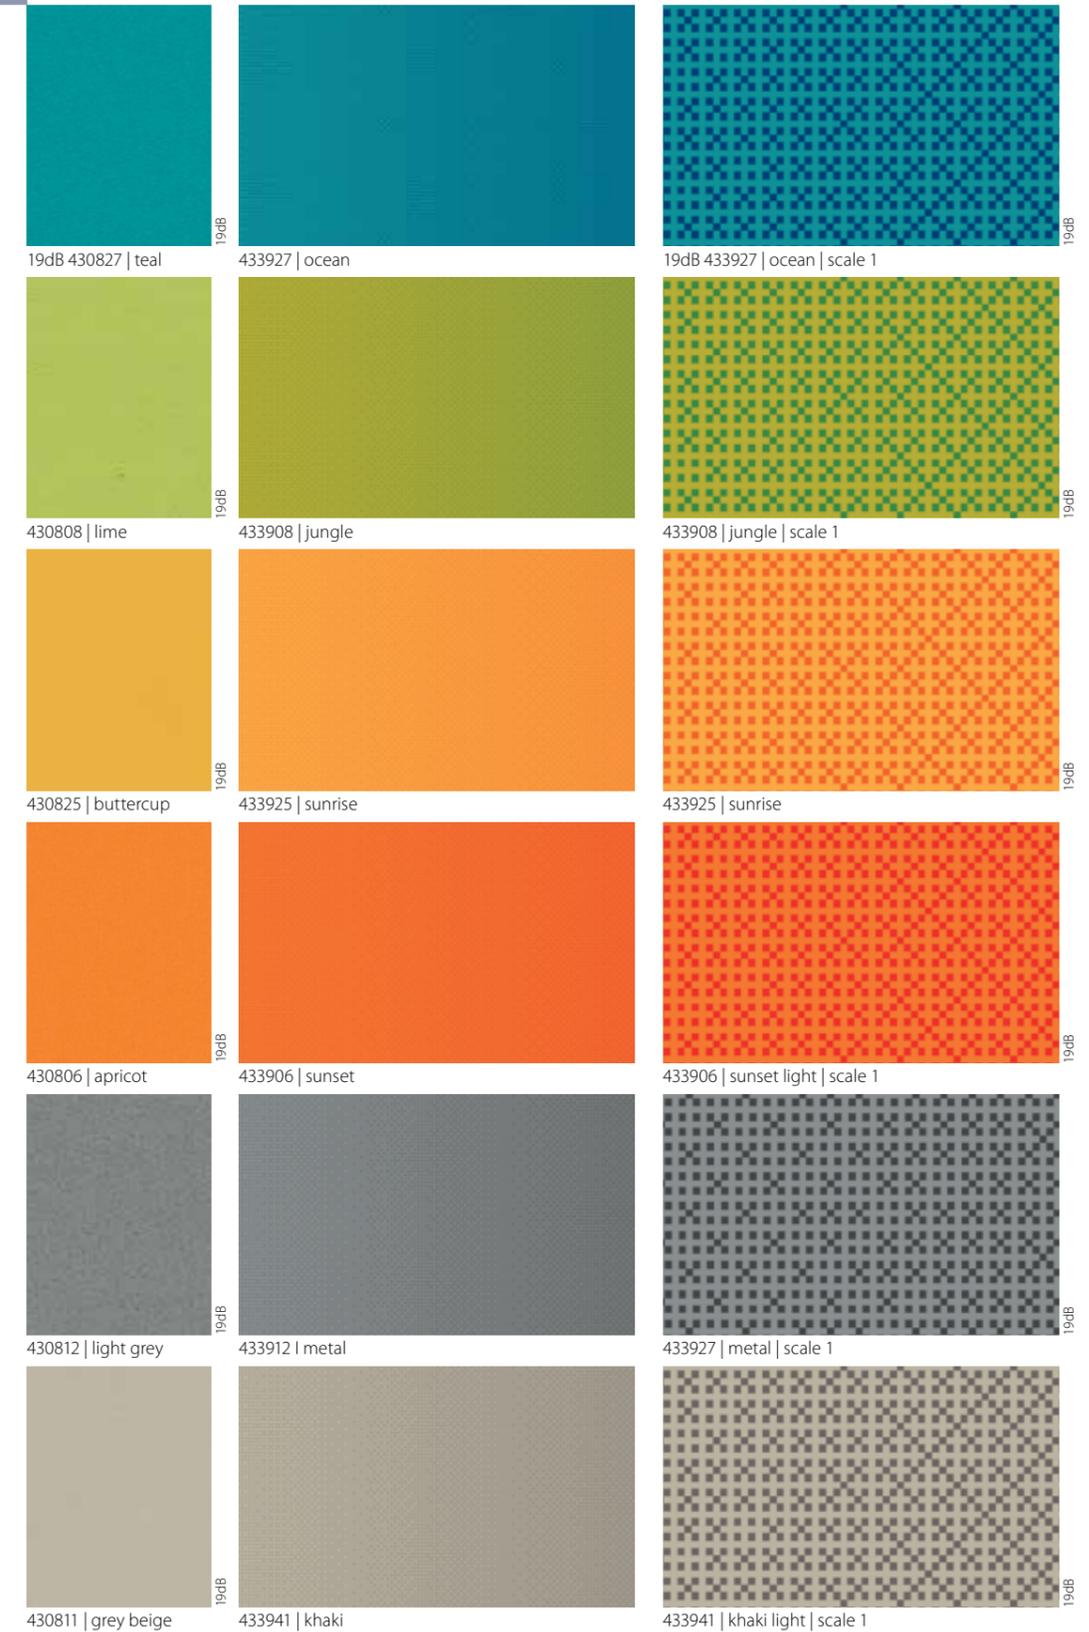

sarlon® dégradé 19 dB | uni 19 dB

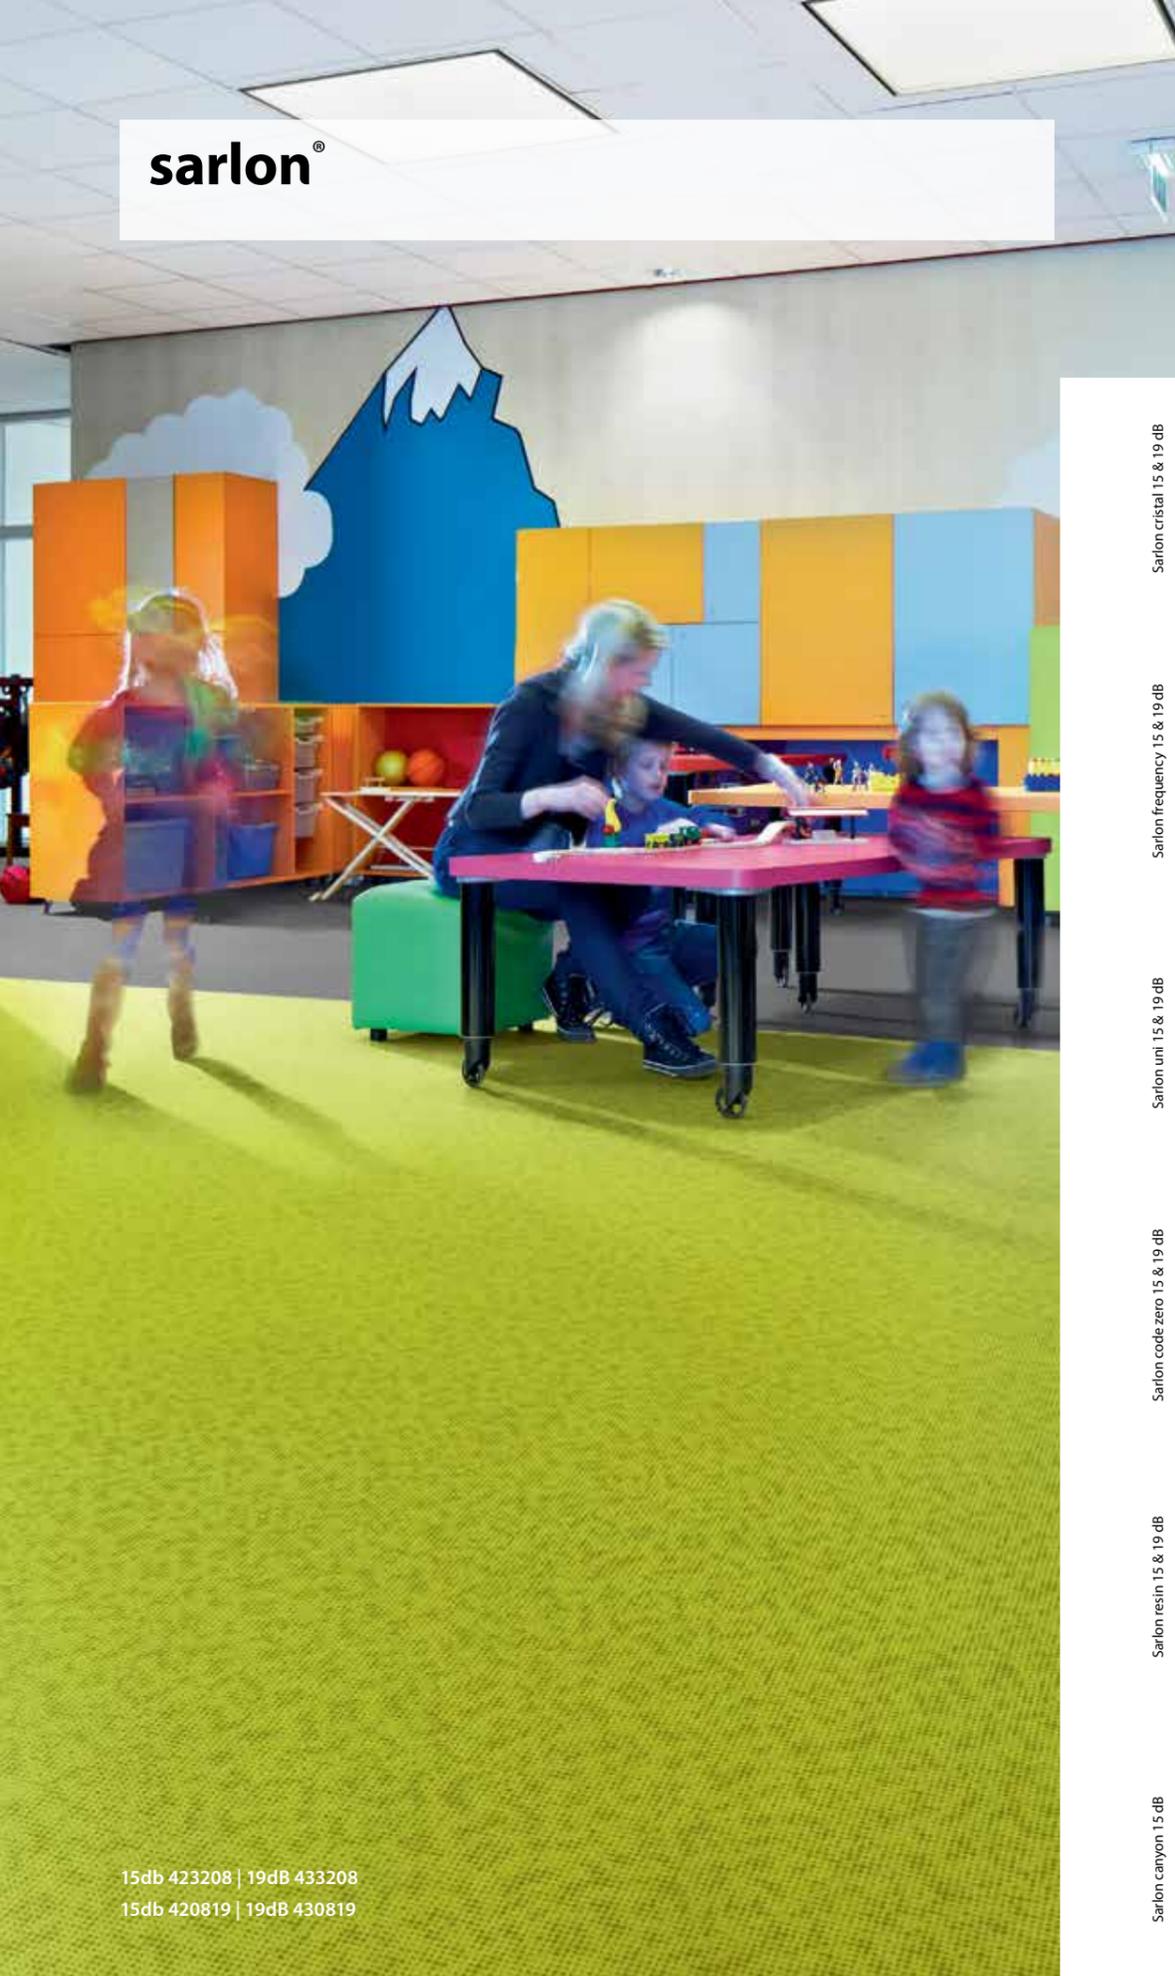

430827

433927

Sarlon dégradé is the inspiring in colour and design. The fluent colouration from in combination with the design pattern is an unique flooring in the Sarlon range With the 6 different dessins (all in 19 dB) this is truly a unique match. The lighter side of each Dégradé design is perfectly matching and can be combined with a Uni color.

COLOREX ESD FLOOR COVERING IS SAFE STAYS SAFE

PROJECT VINYL

Protecting your technology Colorex is an advanced technical flooring system specifically designed to control static discharge in sensitive areas such as cleanrooms, operating theatres and the electronics industry. Not only does Colorex provide an advanced technical solution, it is also aesthetically pleasing, enhancing any commercial interior from industrial to educational establishments.

Providing peace of mind Forbo Flooring Systems is an international market leader with a wealth of experience in providing ESD and clean room flooring with probably the best known brand in the market place - Colorex. You can have peace of mind that Colorex complies to every standard and norm that is required today and likely to be required tomorrow. Environmental credentials We constantly strive to produce sustainable flooring systems that create better environments everywhere. At the same time we help take care of the natural environment through our commitment to sustainable development, responsible raw material procurement and manufacturing processes. For example our Colorex collection contains 15% post industrial recycled content, is manufactured using green electricity and is REACH compliant.

The 8 benefits of Colorex

Colorex is the ideal flooring system for sectors such as electronics, pharmaceuticals, health, data centres and server rooms.

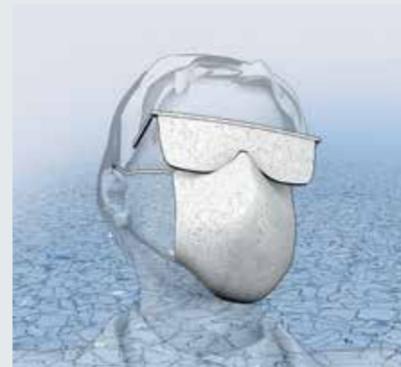

- 1** Colorex offers peace of mind as it fully complies with all ESD and clean room standards, including the Fraunhofer institute.
- 2** Colorex offers a life time conductivity warranty guaranteeing optimal performance throughout the life of the product
- 3** The dense construction of Colorex provides a porefree surface ensuring the highest hygiene properties
- 4** The low plasticiser content in Colorex tile creates a unique dimensional stability and prevents shrinkage
- 5** The low plasticiser content also ensures extremely low emissions and outgassing making Colorex the right choice for clean rooms
- 6** The surface of Colorex can be fully repaired extending the useful life of the product
- 7** The dense construction of Colorex provides excellent resistance to heavy loads making it an ideal solution for commercial and industrial environments
- 8** Colorex is available in tile format, a prerequisite for raised access floors found in many commercial environments such as data centres and server rooms.

ESD-floors

Healthcare-flooring

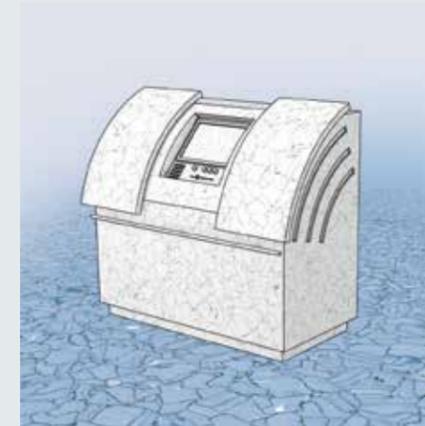

Cleanroom-flooring

Industrial-flooring

Colorex Basic Plus is a loose lay floor system with Colorex on top without conductive properties. This ensures all the benefits of Colorex like high density, easy repair and stain resistance. But also combines the benefits of a heavy duty loose lay tile.

colorex EC plus Highperform

Renovating an industrial floor can be a very costly and labour intensive endeavour. The downtime needed to move or disassemble heavy production equipment and the cost of a complex subfloor renovation can begin to add up before work on installing the new floor has even started. Colorex EC plus is a high performance floor covering system that consists of loose lay tiles. Suitable for applications where expensive preparatory measures and downtimes are not acceptable, it can be installed without any interruptions and is immediately accessible. There's no need for special subfloor treatments or preparations. The tiles connect to each other using a unique dovetailing system that remains hidden. As the tiles have a genuine Colorex surface you can still take advantage of its proven features and benefits.

- Functionality:** Permanently conductive
- Description:** Permanently conductive floor, connection between tiles through dovetails and connected to earth with copper strip. Compliant to IEC 61340-4-5 with appropriate ESD shoes.
- Application areas:** Renovation of ESD facilities, cleanrooms, pharmaceutical laboratories and production sites. Suitable when down time, damp floors or poor sub floors are an issue.

colorex basic plus

Colorex Basic plus is a loose lay floor system with a Colorex surface and limited conductive properties. This range provides all the benefits of Colorex, such as a high density, repairable and chemical resistant surface with the flexibility of a heavy duty loose lay tile.

- Functionality:** Resistant / repairable
- Description:** Excellent chemical resistance. Floor can be repaired in case of heavy damages.
- Application:** areas Shops, stores, warehouses. Suitable when down time, damp floors or poor sub floors are an issue

colorex R11 plus

The product has enhanced slip resistance, categorised as, R11 due to its strong surface embossed structure. Only available in colourway 601060.

- Functionality:** Slip resistant to R11
- Description:** Dirt hiding, slip resistant floor.
- Application areas:** Industrial areas, garages, warehouses. Suitable when down time, damp floors or poor sub floors are an issue

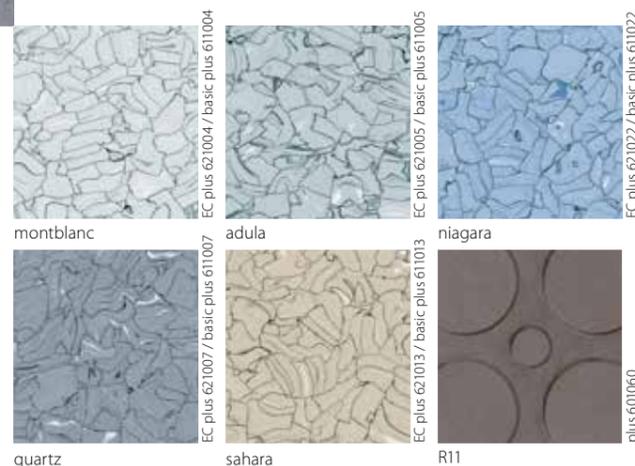

The Colorex collections offers a premium brand of conductive and static dissipative high density dimensional stable tiles. Colorex SD enables safe electrostatic discharge through the entire surface and mass of the tile. The conductive carbon black forms a dense network of tiny black veins. Colorex SD is **permanently static dissipative.

EC plus 621005 | EC plus 621005

Colorex Basic Plus is a loose lay floor system with Colorex on top without conductive properties. This ensures all the benefits of Colorex like high density, easy repair and stain resistance. But also combines the benefits of a heavy duty loose lay tile.

FLOTEX

FLOTEX, A UNIQUE FLOOR COVERING

Flotex is neither a true textile, nor is it an resilient and its unique construction succeed in combining the best of both worlds, suitable for use in commercial environments however demanding the conditions. Approximately 80 million minute nylon 6.6. fibres (flock) are as strong as a bamboo construction, yet creating the comfort of a moss surface. Precision printing technologies used to manufacture Flotex mimic the rich colour pallet that can be found in nature to the smallest detail. Slip resistant in wet and dry conditions (R13), imitating the functions of the Gecko's feet. Like a honey bee collects and distributes pollen on the stems by hovering between flowers, the Flotex surface captures fine dust and allergens from the air and releases this completely during a simple basic cleaning action.

As such Flotex is the high tech textile that offers bionic performance, available in both sheet and tile.

Fresh air:

- the nylon fibres capture allergens and fine dust from the air
- as easy to clean as any resilient floorcovering
- the anti microbial Sanitized® treatment ensures consistent protection against bacteria

FLOTEX, THE HIGH TECH TEXTILE

Flotex Flocked Flooring is a completely unique textile flooring that combines the hard wearing and durable characteristics of a resilient floor with the quality, warmth and comfort of a carpet.

Durable and comfortable
Discover the toughness and durability of Flotex which comes as a result of the 80 million nylon 6.6. fibres per square metre, while experiencing the quietness and comfort normally only associated with a carpet as a result of the impervious cushioned backing.

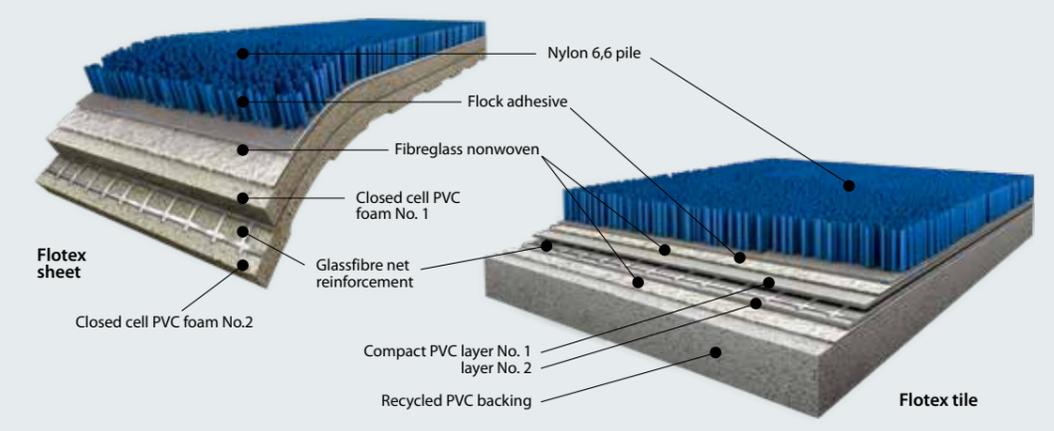

Quiet yet Hygienic
The nylon fibres not only perform in sound absorption and comfort, they also capture allergens and fine dust from the air, all of which they effortlessly release in any cleaning action in both dry and wet conditions. Through its construction Flotex is protected against mould and odour's whilst keeping up its appearance, as the floor restores to mint condition after every cleaning action.

Warm while washable
Simple every day vacuuming removes any dirt or dust trapped in the dense nylon surface. However also steam cleaning or deeper mechanical cleaning can be used after heavy soiling, requiring a minimum of traditional detergents. Simple cleaning action already restores Flotex to its original appearance. The wide array of colours and designs in which Flotex is offered, remain as vibrant and lively as the day the floor was installed.

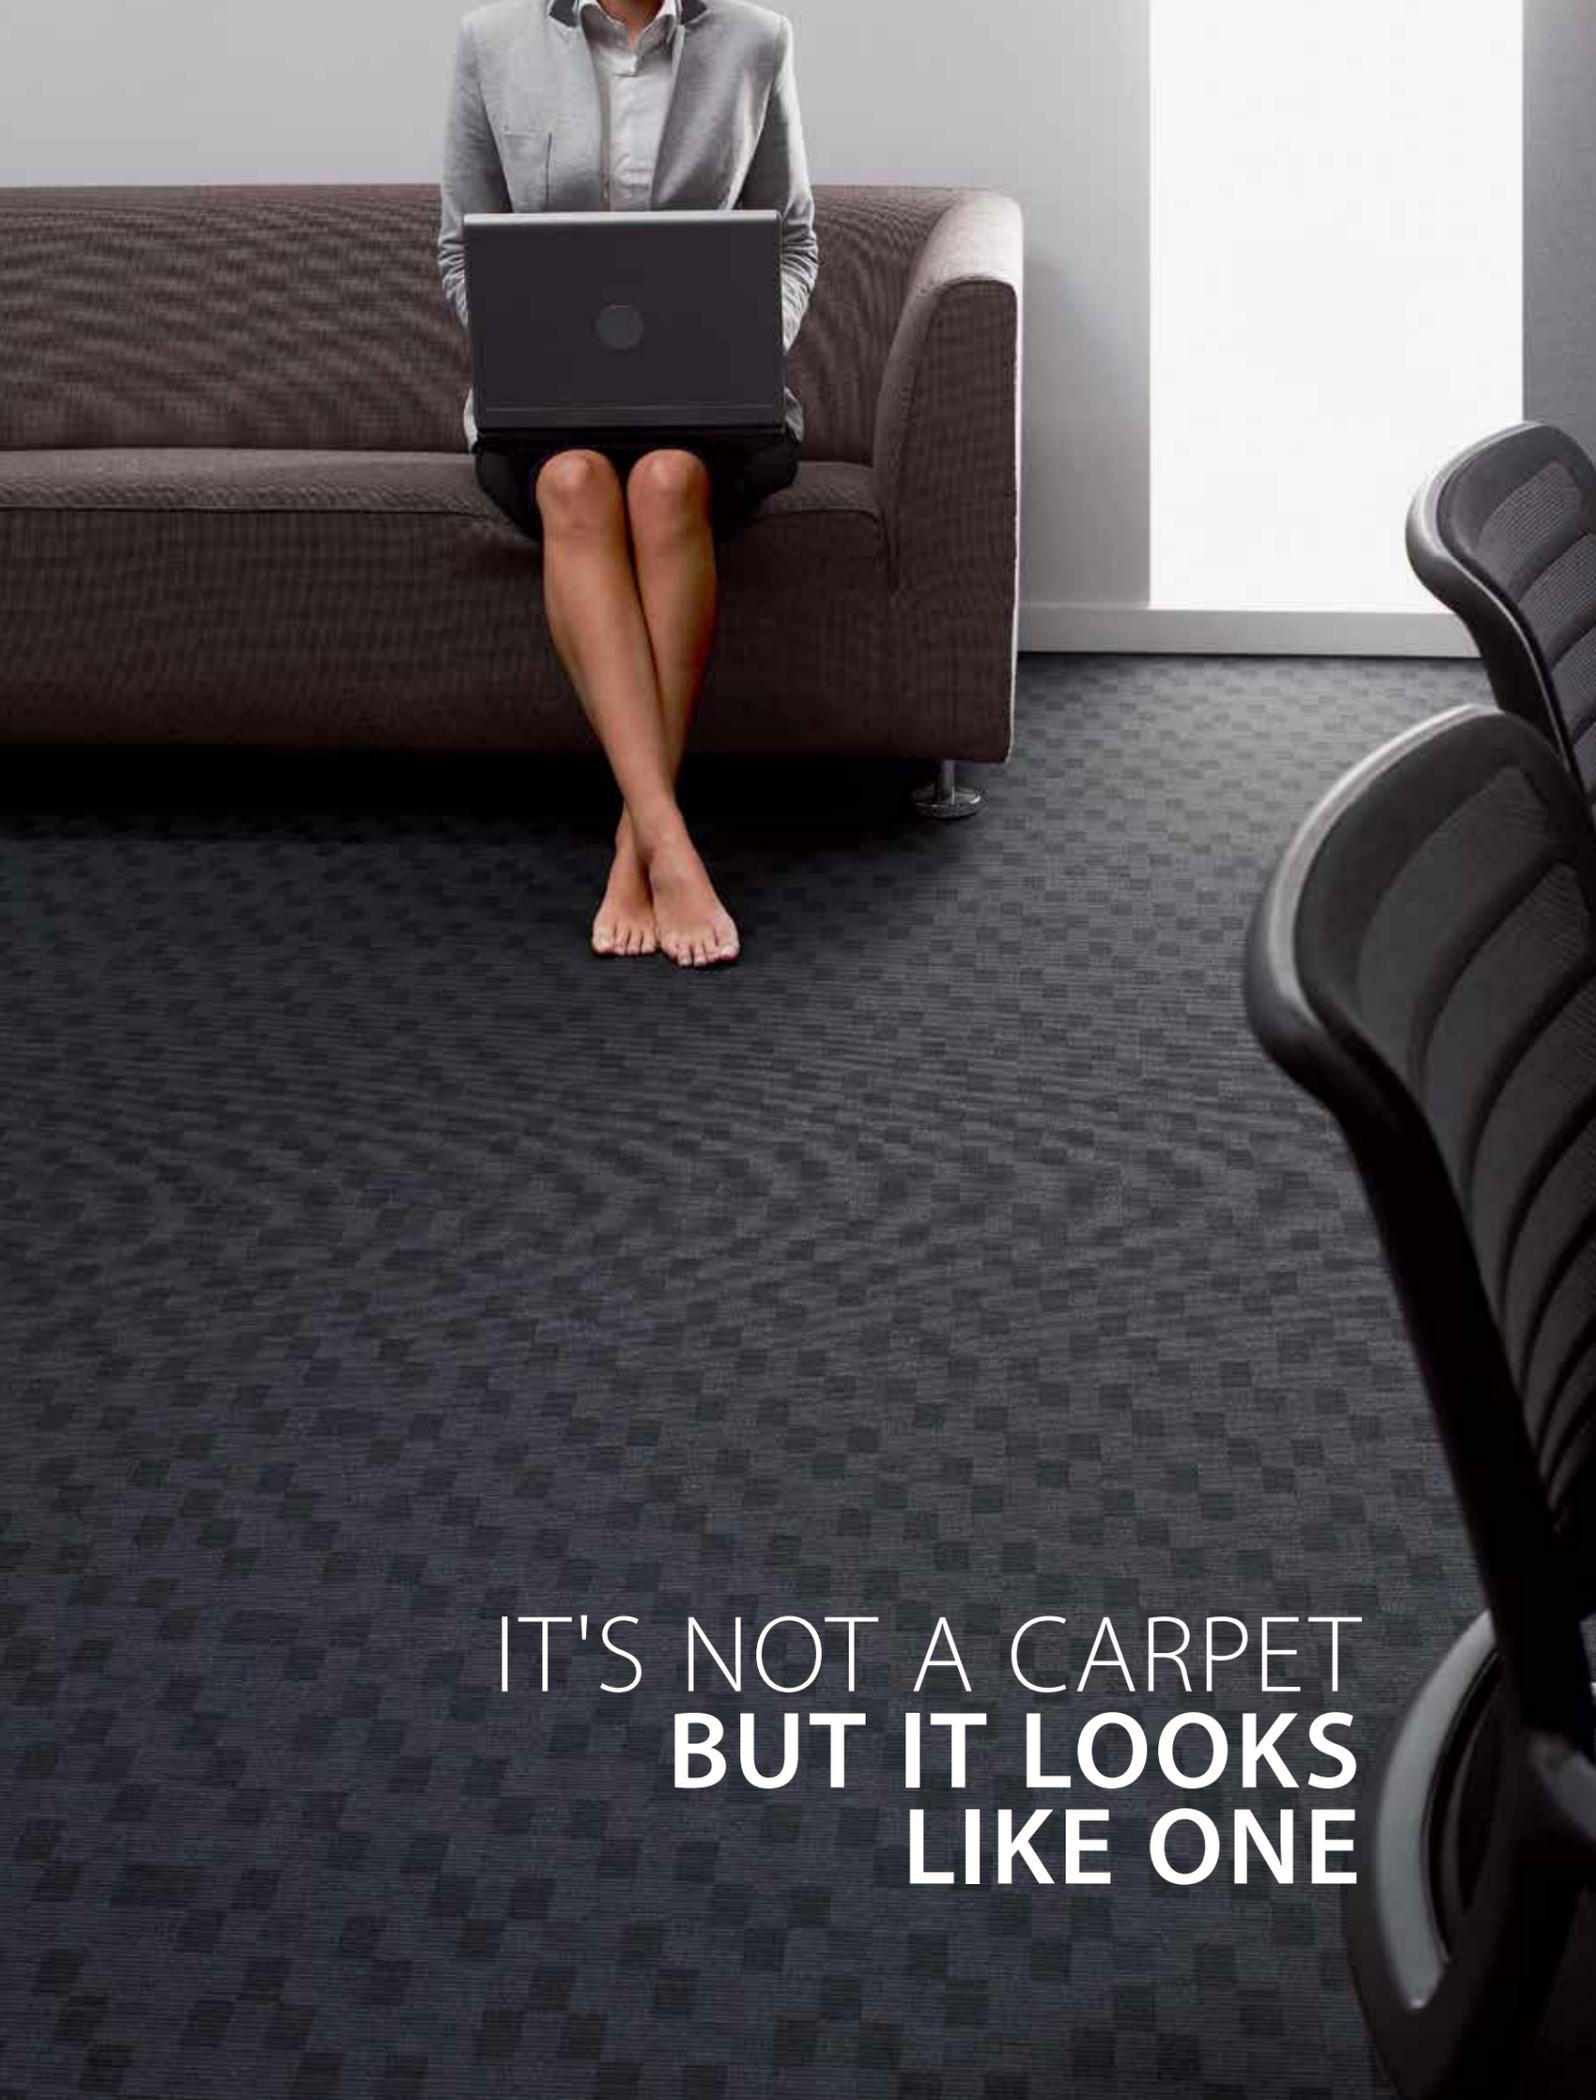

Safe but sound absorbing
Flotex provides both low in-room impact noise performance (class A) as well as good impact sound reduction (>20dB), meaning a quiet room and a quiet building. Flotex also meets the HSE wet and dry slip resistance classifications for use of flat surfaces and ramps.

Flotex, a choice, not a compromise

Flotex is a high tech textile which brings together the world of resilients and textiles connecting key performance indicators into one single product, that delivers all you can expect from an innovative flooring solution.

FLOTEX

IT'S NOT A CARPET
**BUT IT LOOKS
LIKE ONE**

FLOTEX

206 **flotex® colour**

Showing three individual designs in a rhapsody of colour that offers you the choice for selection of the detail and nuance that you are looking for.

216 **flotex® linear**

Represents a comprehensive choice of 5 linear designs in various colour ways that suit office environments, but also deliver playful effects for leisure, hospitality or retail spaces.

224 **flotex® vision**

An overwhelming choice of over 600 digitally printed designs to suit every taste or requirement, right down to a colour on demand option.

228 **flotex® sottsass**

A collection of 4 exquisite designs, created exclusively for Forbo by Italian design studio Sottsass Associati.

236 **flotex® planks**

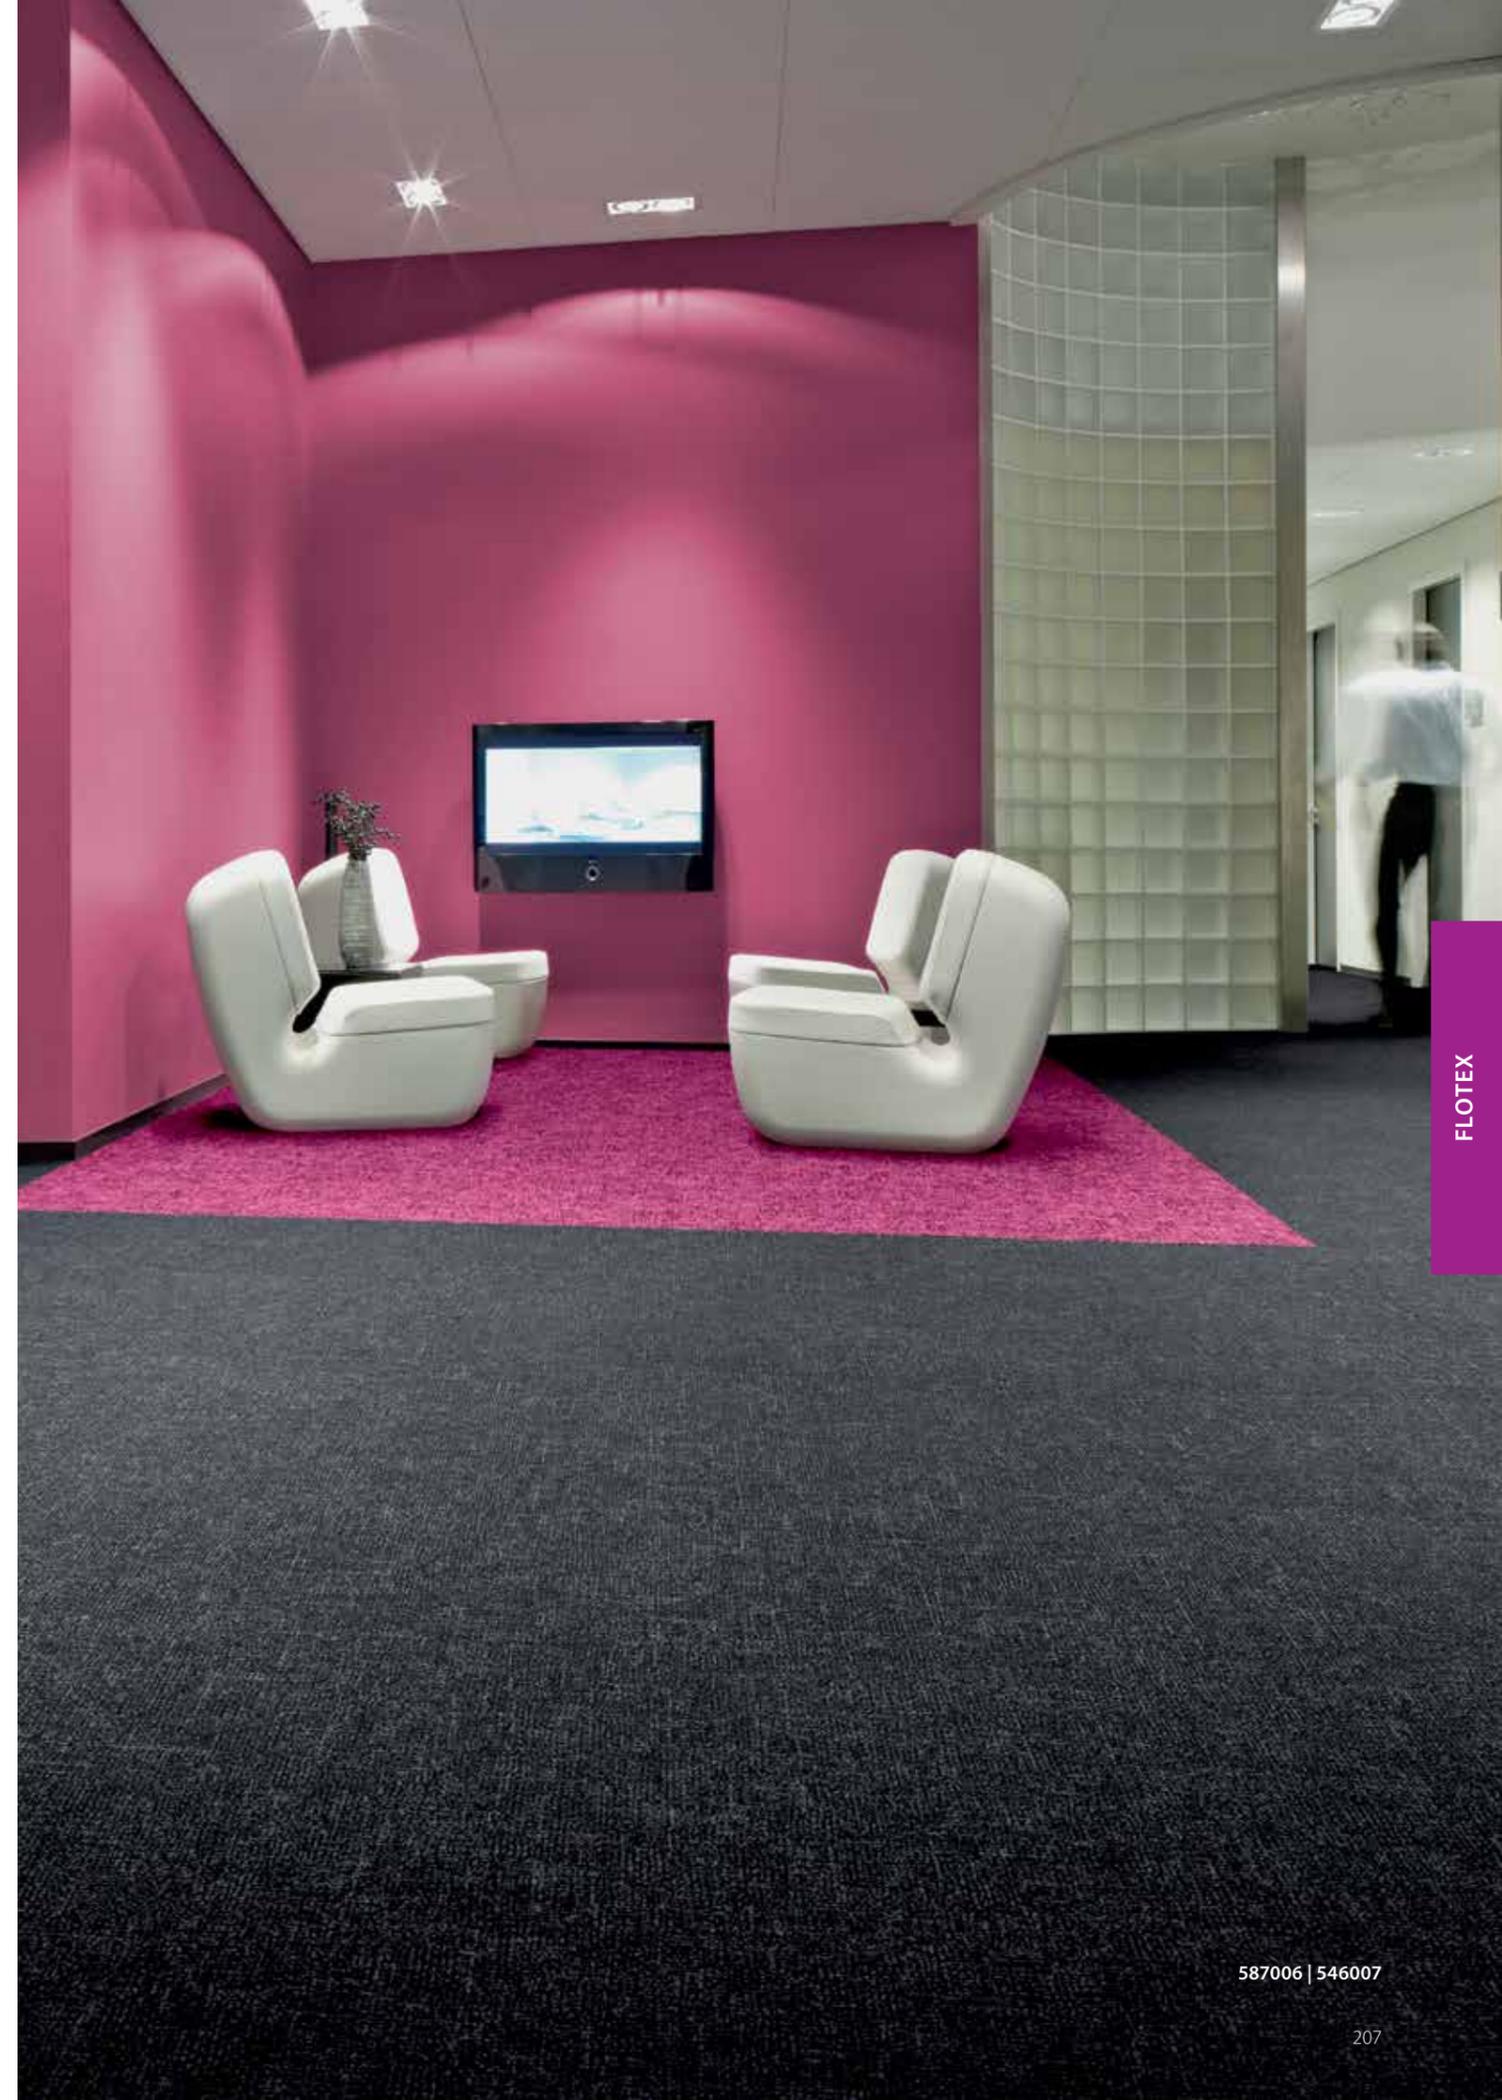

Flotex is neither a true textile, nor is it a resilient flooring. Its unique dense fiber construction succeeds in combining the best of both worlds: comfort & resilience. Flotex offers a flooring solution for areas where safety, hygiene and well-being are in high demand.

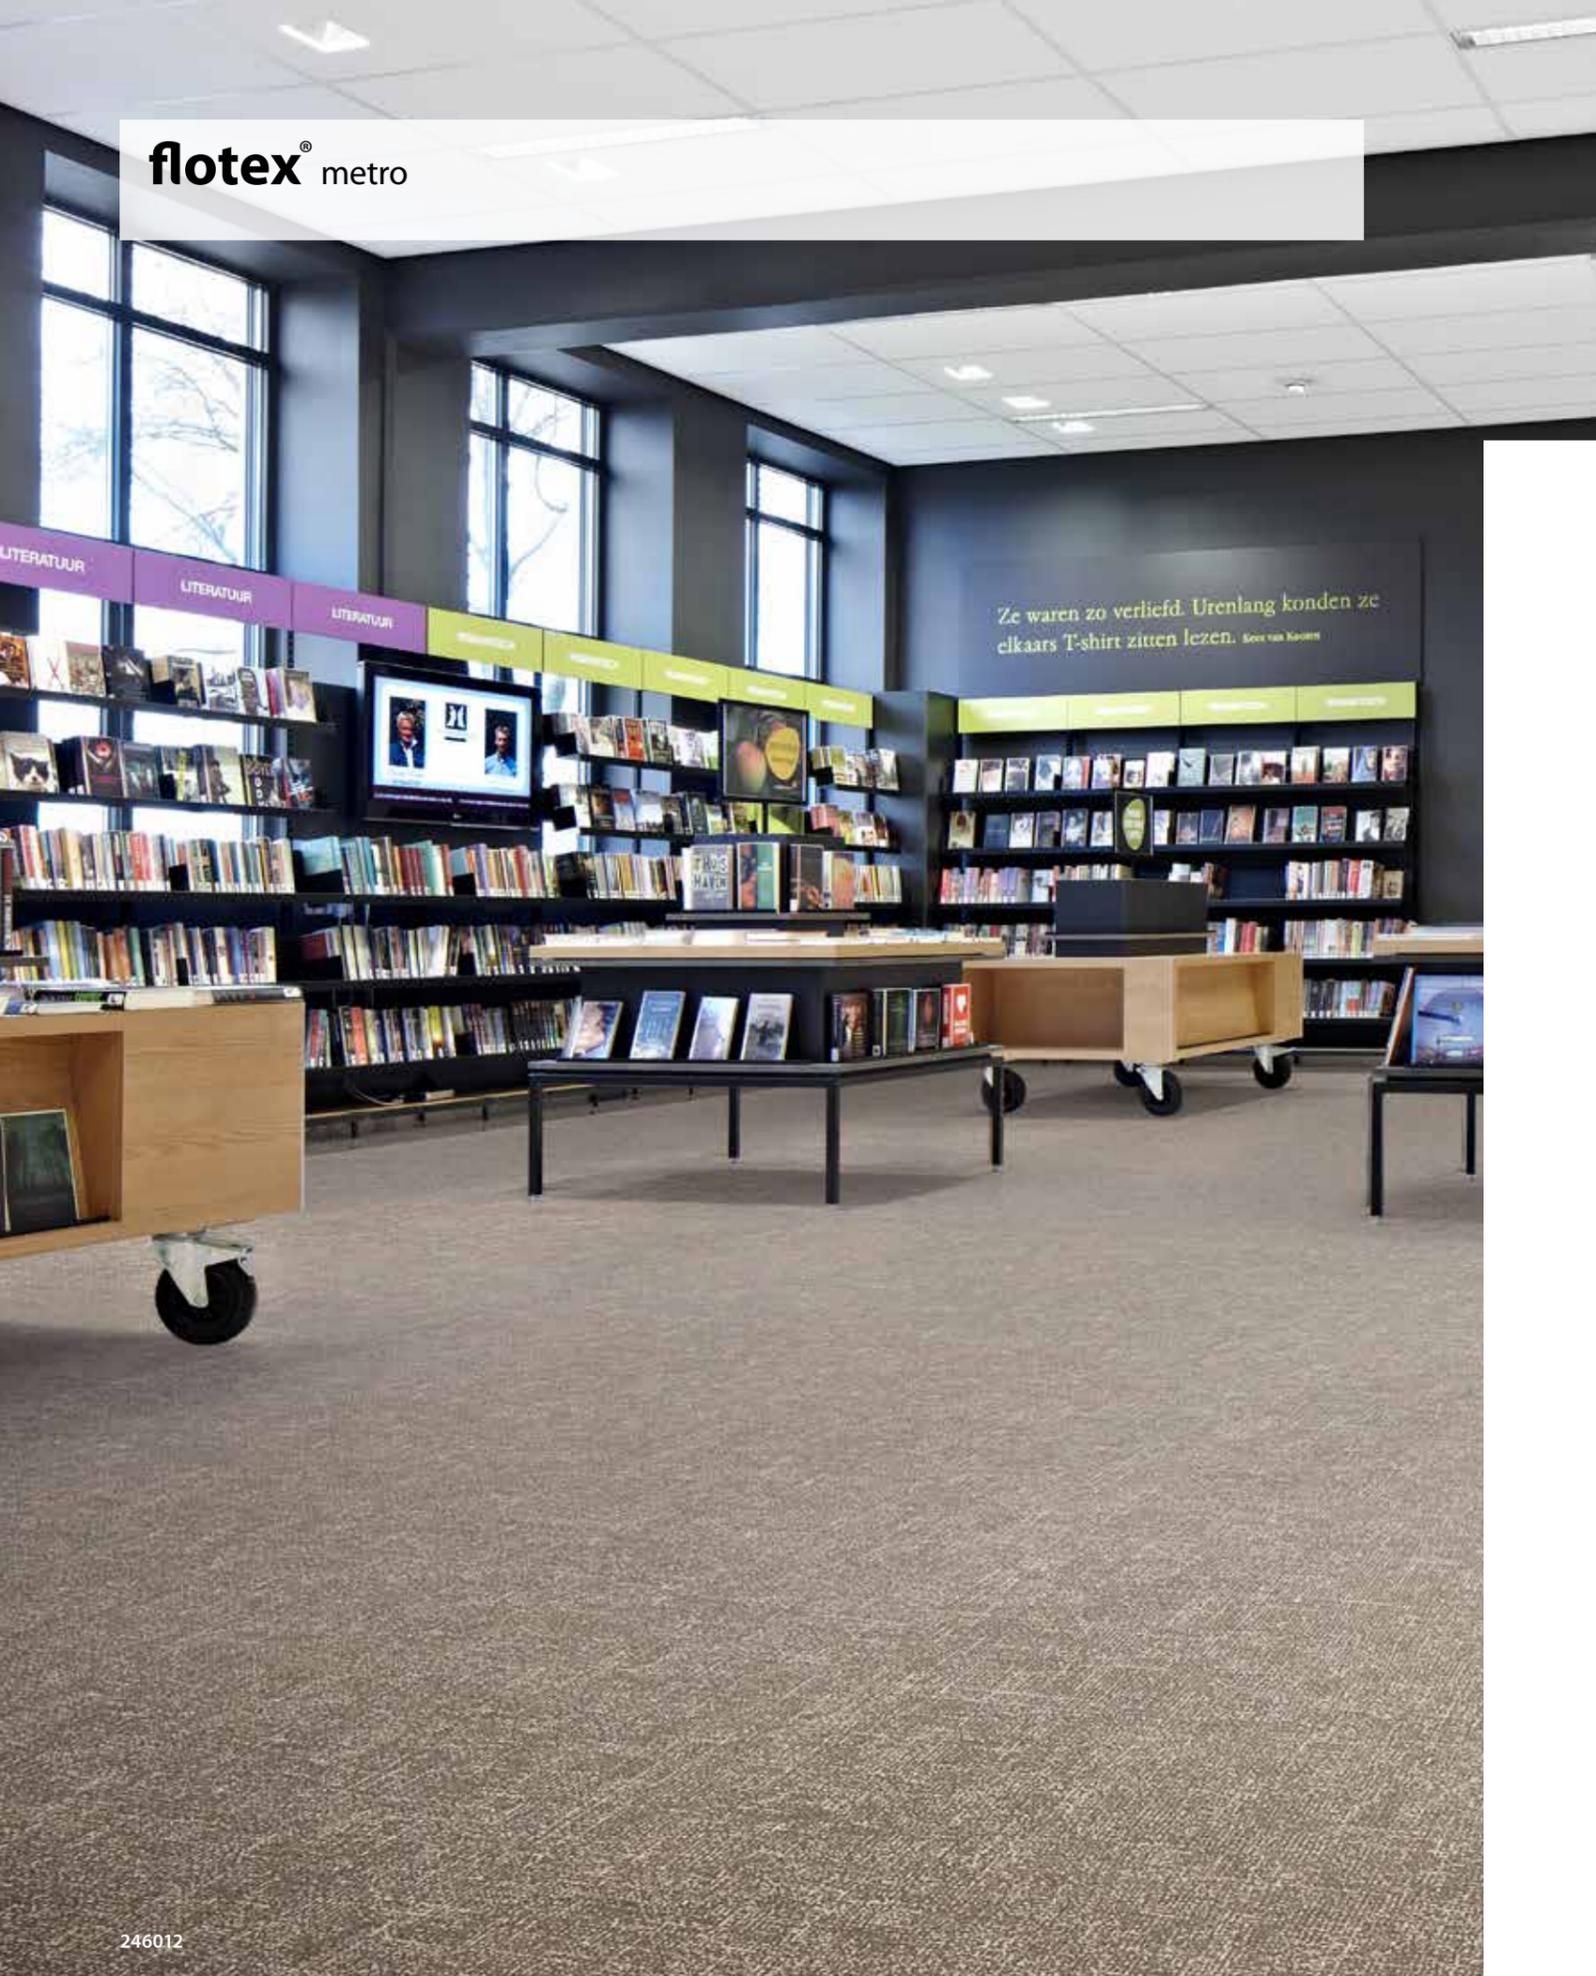

IT'S NOT A RESILIENT
**BUT PERFORMS
LIKE ONE**

flotex® colour

Flotex Colour is a collection with 3 designs which together form a rhapsody of colour across a broad spectrum. Ideal for education, health - and age care environments, leisure, retail and other commercial spaces.

Flotex Colour is a comprehensive collection of textile designs that are presented in 3 different all-over styles and subtle print nuances: Metro, Calgary and Penang. The Metro Neons add a special twist to this collection. All items are available in sheet or tile.

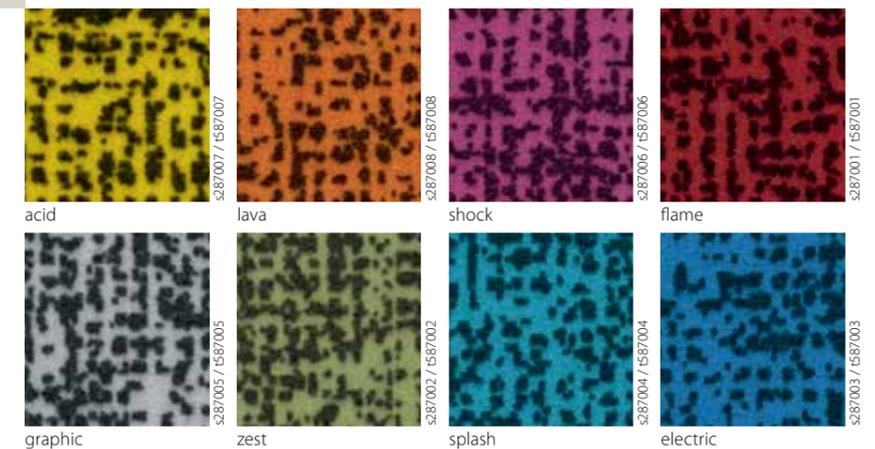

246012

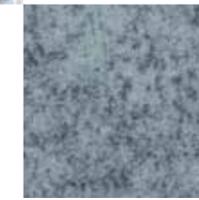

287002

Opening up a whole new dimension of design possibilities, the Flotex Metro Neon range offers 8 vibrant colours cleverly designed to work on their own or in conjunction with the standard Metro range. You can use them to create striking breakout areas, cut-outs and borders or delineate walkways and individual zones in open plan spaces.

flotex® linear

Flotex Linear represents a comprehensive choice of 5 linear designs designed to work together or on their own: Integrity², Complexity, Stratus, Cirrus and Pinstripe.

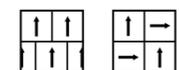

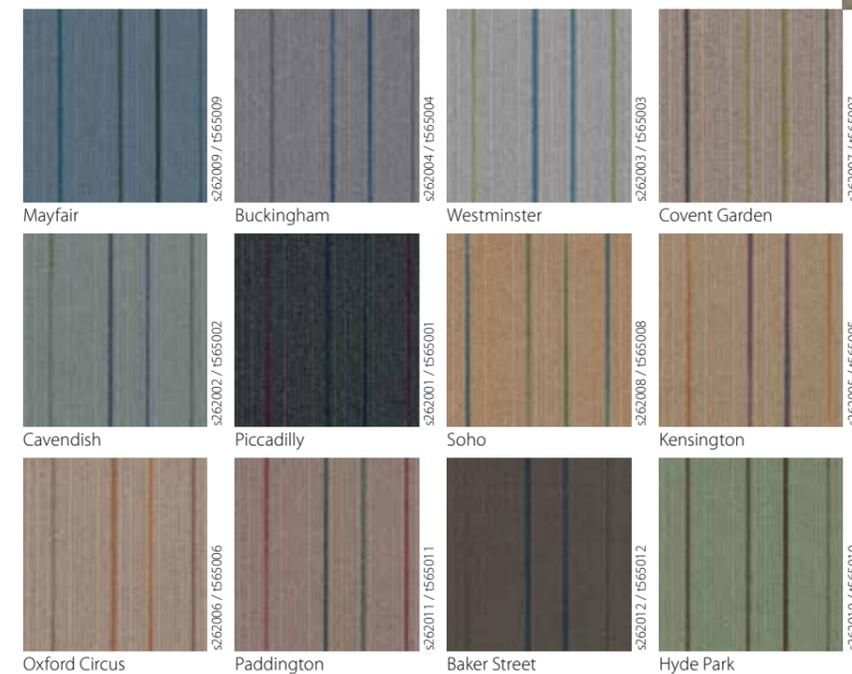

Across the 5 ranges there are sheet and tile options, most of which can be laid in a variety of fitting styles. For everyday installations, Flotex tiles can also be installed using tackifier.

THE DIGITAL WORLD OF **FLOTEX VISION**

With Flotex Vision, Forbo offers a **unique collection of high definition digitally printed designs**

Due to the fact that Flotex has up to 80 million fibres per square metre, it provides a uniquely high density substrate for printing. As a result vibrant designs and true to life visuals can be printed in high level photographic resolutions. All desired colour shades, -tones and -hues can be achieved.

Fantastic effects

Digital print offers an infinite number of design options ranging from abstracts with an intricate colour spectre to realistic images of grass, sand or water, or any pictures projected on your floor. Create 3D depth or a "trompe d'oeil" effect on your floor. Bring nature in your room by creating a pebble beach or moss surface on your floor.

Endless design options

Digital printing is also well suited for those collections that require visual detail and effects that cannot easily be reached through conventional print. Flotex Vision contains over 600 individual items, ranging from traditional to contemporary, including many with a wide choice of colourways.

Colour your own or design your floor

Like the design, but cannot find the colour you want, or matching a design to your corporate colour scheme? Flotex Vision offers a large number of designs that can be recoloured by selecting the colours you want to use. If you don't see anything you like, or you have your own idea of what you want on the floor, we also offer a bespoke design service on request.

The **flotex**[®] digital library

Like any library the Flotex Digital library gives you an opportunity to browse and wonder about the many opportunities that Flotex digitally printed floor coverings offer to you. We also would like to give you some guidance and offer you a logic design path to the items of your taste or choice.

We have created 6 initial entries to the library, each of them representing a design direction that might suit your taste. In addition to the items in the library there also are additional options for some designs where you can choose your own colour combination. Also there is an opportunity for bespoke, unique designs, they are not part of the library but can be discussed with your Forbo sales representative.

The designs in the library will be updated and new items will be added on a regular basis. At this moment the library contains 600 different designs and colour ways.

The entries to the library are as follows:

Floral

A selection of 8 different floral designs, ranging from abstract, graphic flower motives to romantic images of roses and butterflies or flower designs that fit very well into children's daycare centres. Each of the 8 design types comes in a variety of colour ways.

Linear

8 line or stripe designs with their own characteristics, ranging from plain and simple to very complex and multi-colour.

Pattern

The intricate play of networks and patterns that provides textured floors with a clear and non-directional visual. Each design can be chosen in a number of colour ways.

Shape

A collection of organic shapes and motives that result in beautiful all over patterns ranging from contemporary to traditional designs.

Image

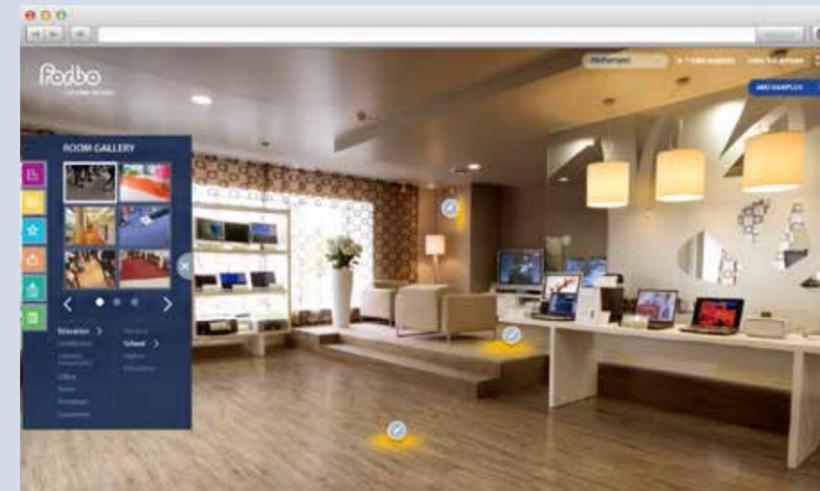

This section of the library contains a wide variety of photographic images that are transferred into interesting theme floors. Grass, sand, water drops, buttons or street maps are amongst the interesting options.

Naturals

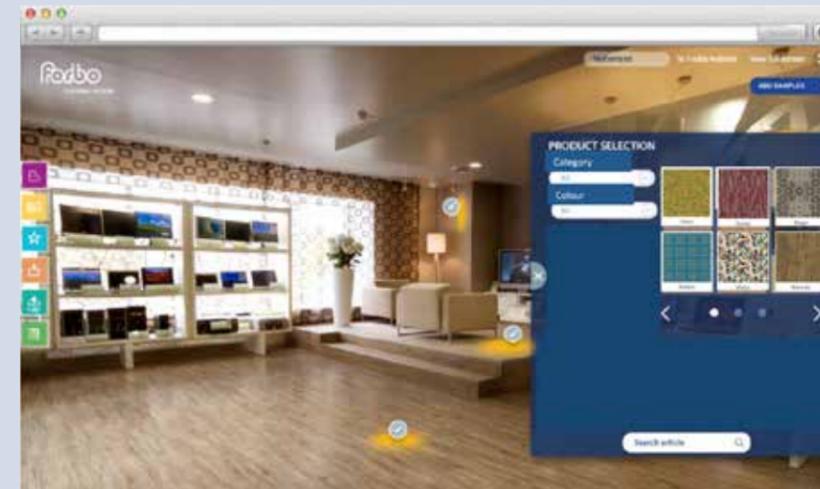

Floor images that represent materials like wood, stone, ceramics or cork floors. The design technology creates real and life like floors, with a twist for example wood planks that are acoustic and comfortable to walk on.

Go online and discover over 600 designs for your floor

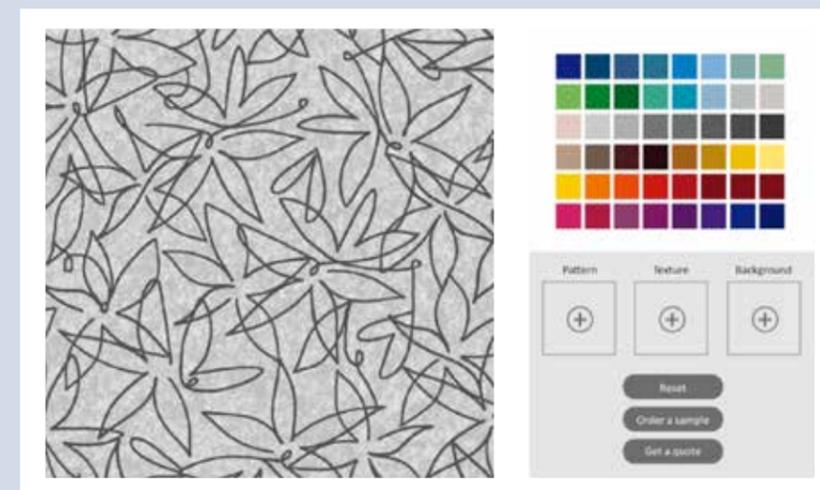

Find your design in 4 easy steps:

1. Access www.flotexvision.com
2. Choose your main design entry in the library (1 out of 6 entry options)
3. Choose the collection you like
4. Choose the colour you like... and order your sample online

View rooms in hundreds of floor designs

Explore online how you can customise your floor designs. Some designs can even be fully matched with your taste or branding colours.

Recolour designs

Some designs in the library you can colour as you wish. The colour bank offered can be used for the background and the pattern.

At the crossroads of art, design and architecture, the work of Ettore Sottsass represents the birth of non-conformist Italian design, somewhere between the industrial and the experimental. A prominent figure in Italian design since the 1950's, this ingenious free thinker sought to explore every creative avenue with a non-conformist attitude that was both assuming and audacious.

Whether designer, architect, sculptor, artist or photographer, Ettore Sottsass has left his mark and his commitment in his global view of the environment and space, through his sculptures, jewellery, artwork, furniture, and industrial objects. Today, many designers and architects emulate his spiritual heritage, radical in its stance against functionalism.

The exclusive design collaboration with Flotex was borne out of the desire to work with an innovative flooring technology and its precision HD printing brings to life the avant guard designs that clearly carry the Sottsass signature.

There are four designs: Terrazzo, Wool, Bacteria and Kasuri. These designs have features in common: irregular, apparently random and organic forms, and the "optical" features that play with scale. Thanks to the ease of printing, almost every design is possible. The collection is available in a wide range of different colourways and include hot fashion colours in strongly contrasting combinations.

990104

990105

flotex[®] bacteria

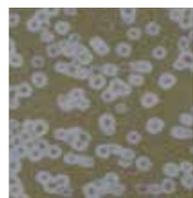

990101

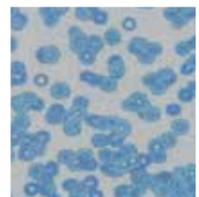

In Bacteria, Redfern has taken one of Ettore Sottsass's signature designs, created in the late 1970's, a prescient forerunner of the current modern age of nano technology and genetic engineering. Optically challenging, the design is open to wide interpretation, close up amoebic forms sway and shift, from afar it appears as a constellation of distant stars. Bacteria is available in twenty colourways on a combination of black, white and pale grey grounds.

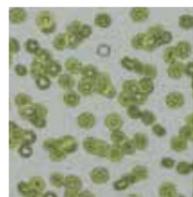

990403

990605

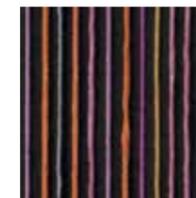

990606

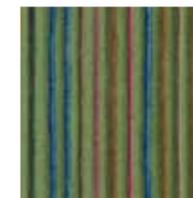

990607

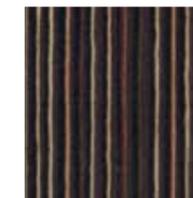

990608

990609

990610

990611

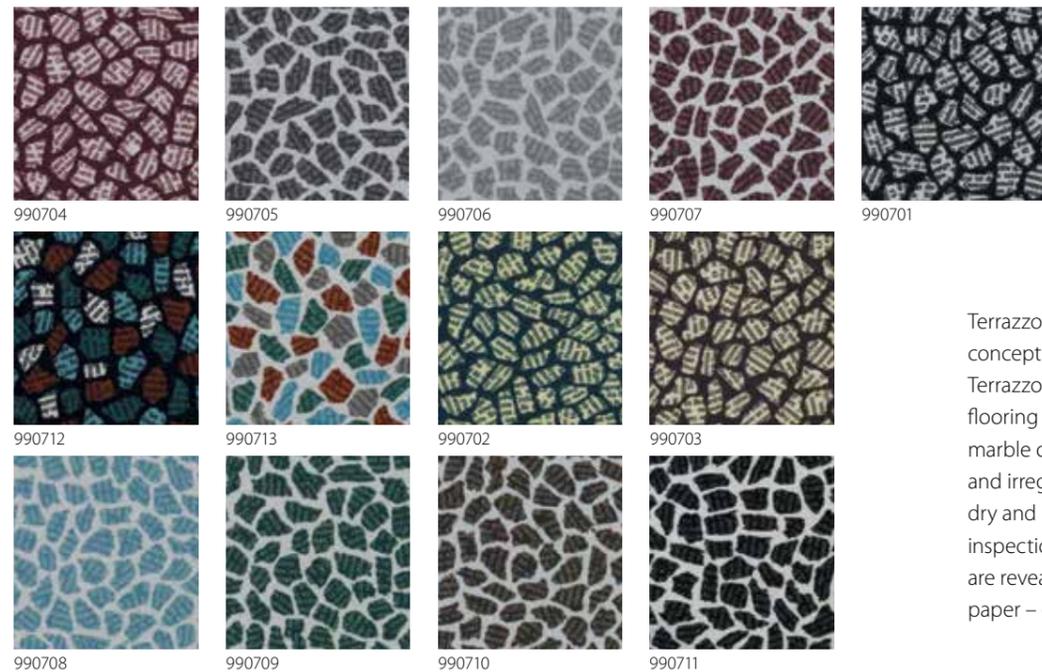

990612

The Wool design implies the texture and stranded feel of this natural material, whilst presenting a strongly impressionistic effect. Irregular coloured strands form linear (and roving) patterning, reminiscent of Bridget Riley op-art. When viewed from a distance this design dramatically shifts perspective and redefines the interior space.

flotex[®] terrazzo

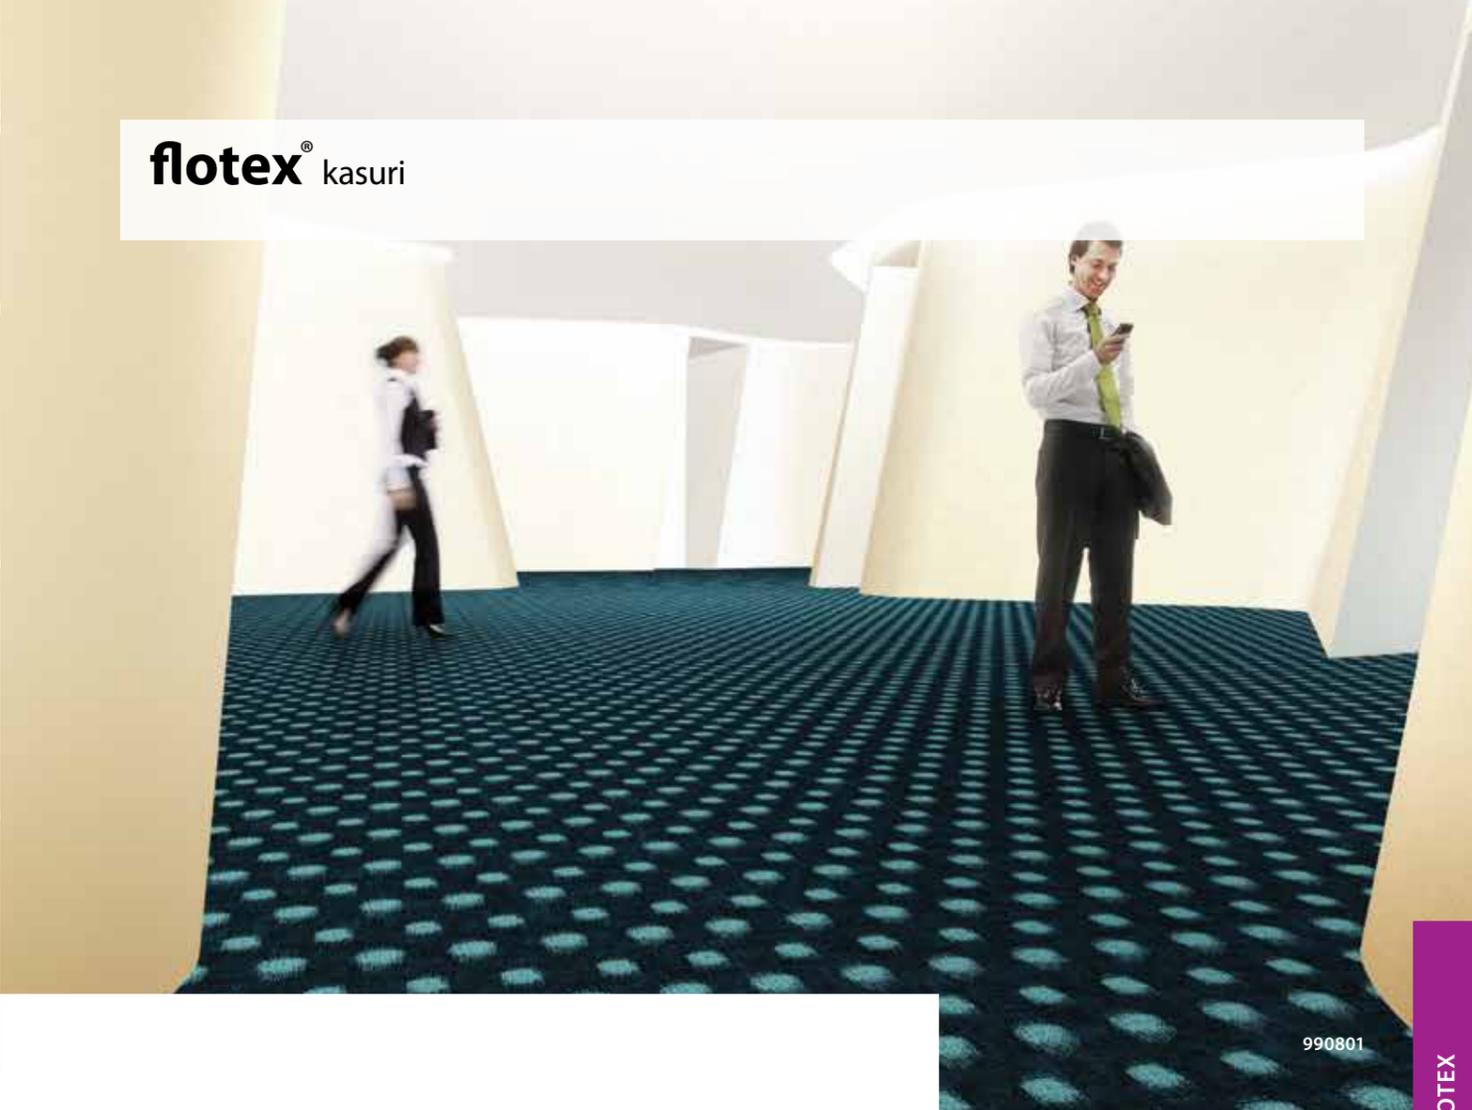

990701

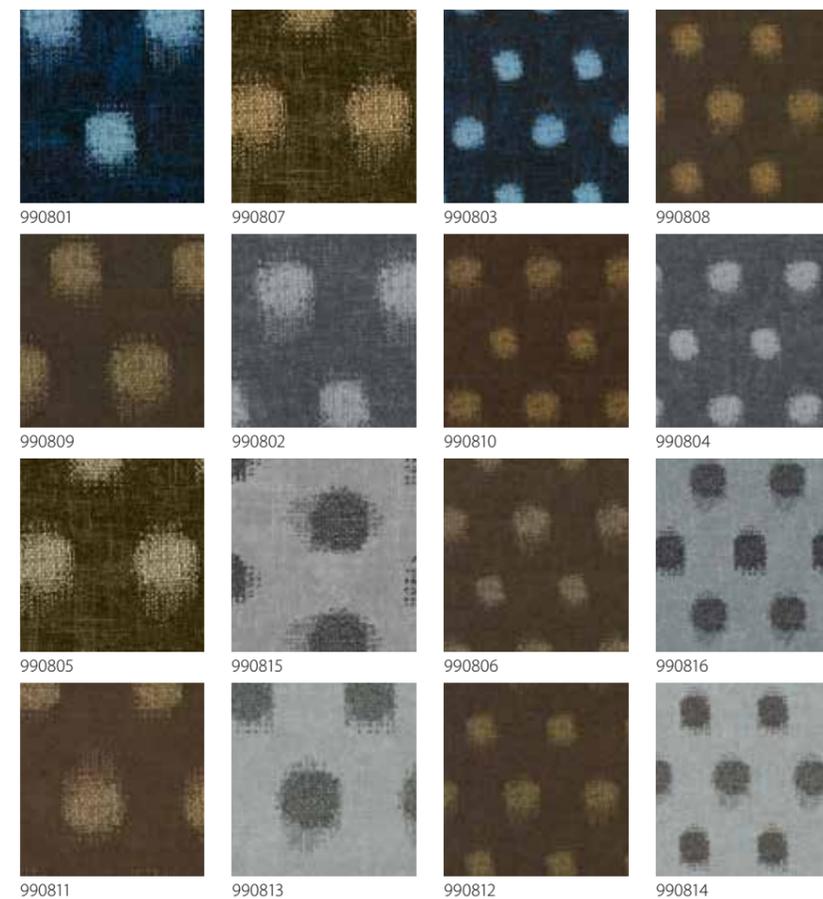

990704 990705 990706 990707 990701
 990712 990713 990702 990703
 990708 990709 990710 990711

Terrazzo is a witty “twist” on the concept of traditional Italian Terrazzo (a poured concrete flooring containing chips of stone, marble or glass with distinctive and irregular pattern when dry and polished); on closer inspection, the “chips” in Terrazzo are revealed as pieces of torn paper – each holds its own story.

flotex[®] kasuri

990801

990801 990807 990803 990808
 990809 990802 990810 990804
 990805 990815 990806 990816
 990811 990813 990812 990814

Kasuri draws its inspiration from the traditional Japanese woven textile technique used to create the eponymous fabric. Redfern uses the digital pixel in the fusion of contemporary and traditional references inherent in this design.

flotex® planks

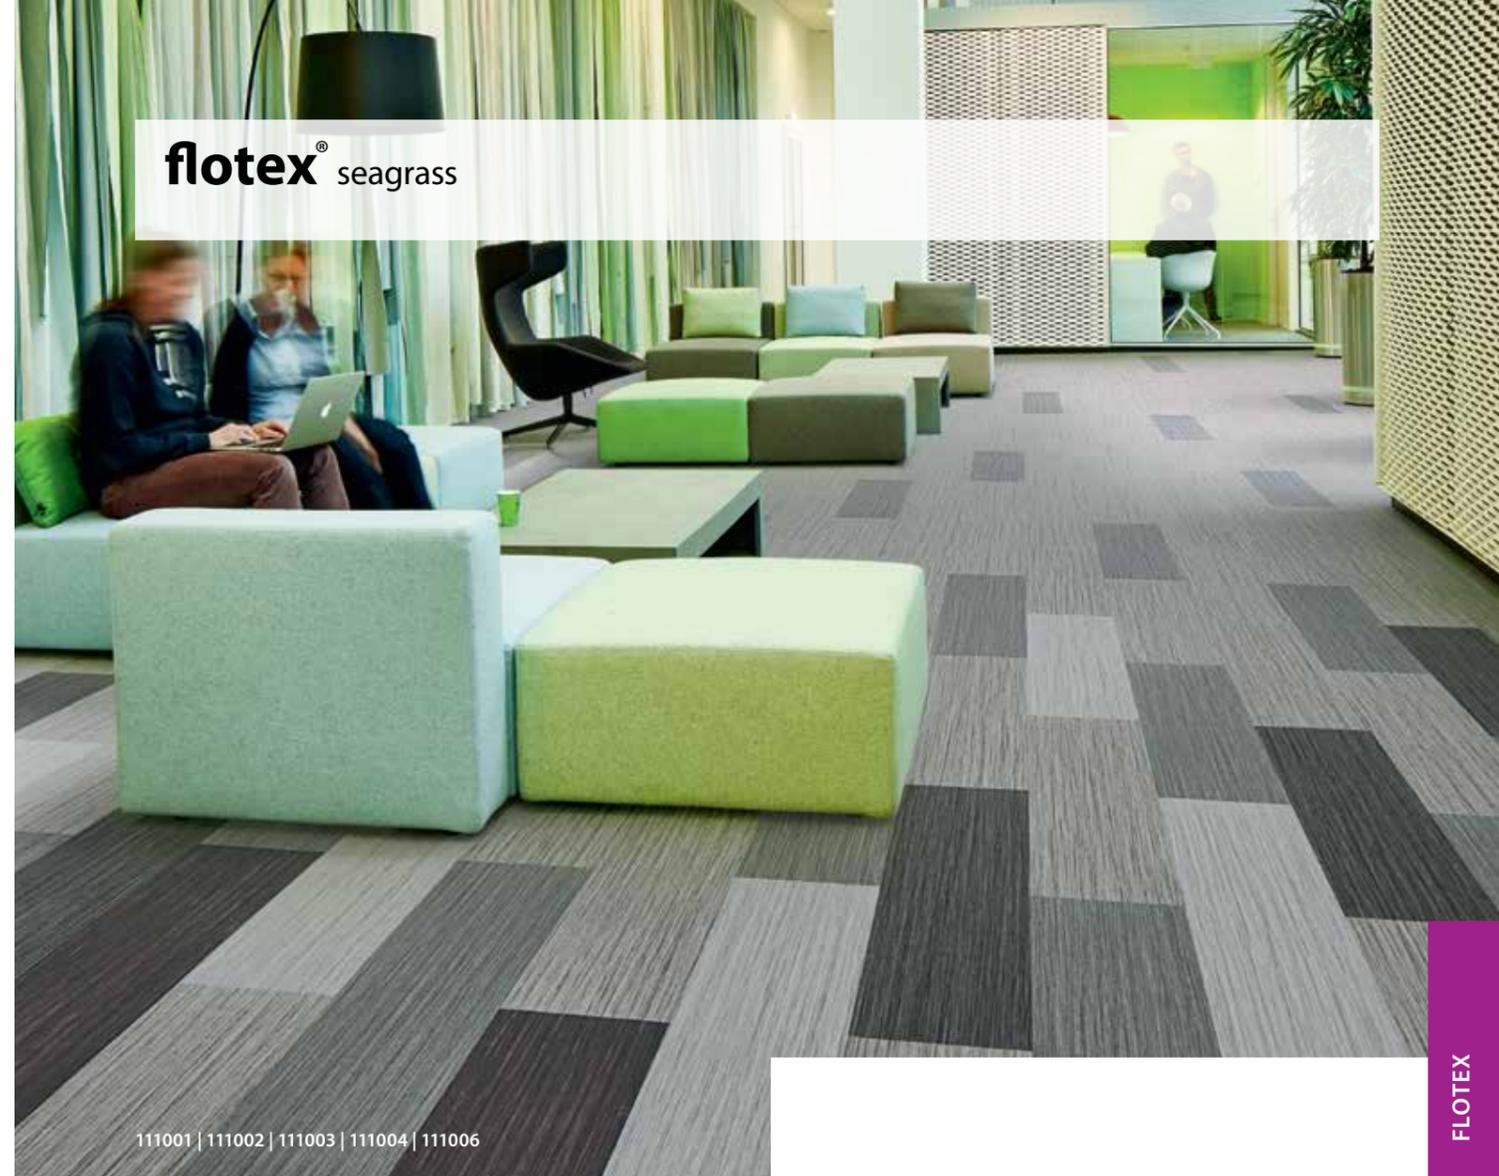

Flotex planks: sophistication & style

Flotex is neither a true textile, nor is it a resilient flooring. Its unique dense fiber construction succeeds in combining the best of both worlds: comfort & resilience. Flotex offers a flooring solution for areas where safety, hygiene and well-being are in high demand.

111001 | 111002 | 111004

flotex® seagrass

111001 | 111002 | 111003 | 111004 | 111006

Flotex Seagrass planks combine lasting performance with sophistication & style. Because of its natural and warm feel, the Seagrass design goes down well in homely environments like housing for the aged or care facilities. You can create stunning floor designs with Flotex Seagrass, whether it is laid as herringbone, brick or basketweave. Sophisticated in 1 colour, or stylish with 2 or more.

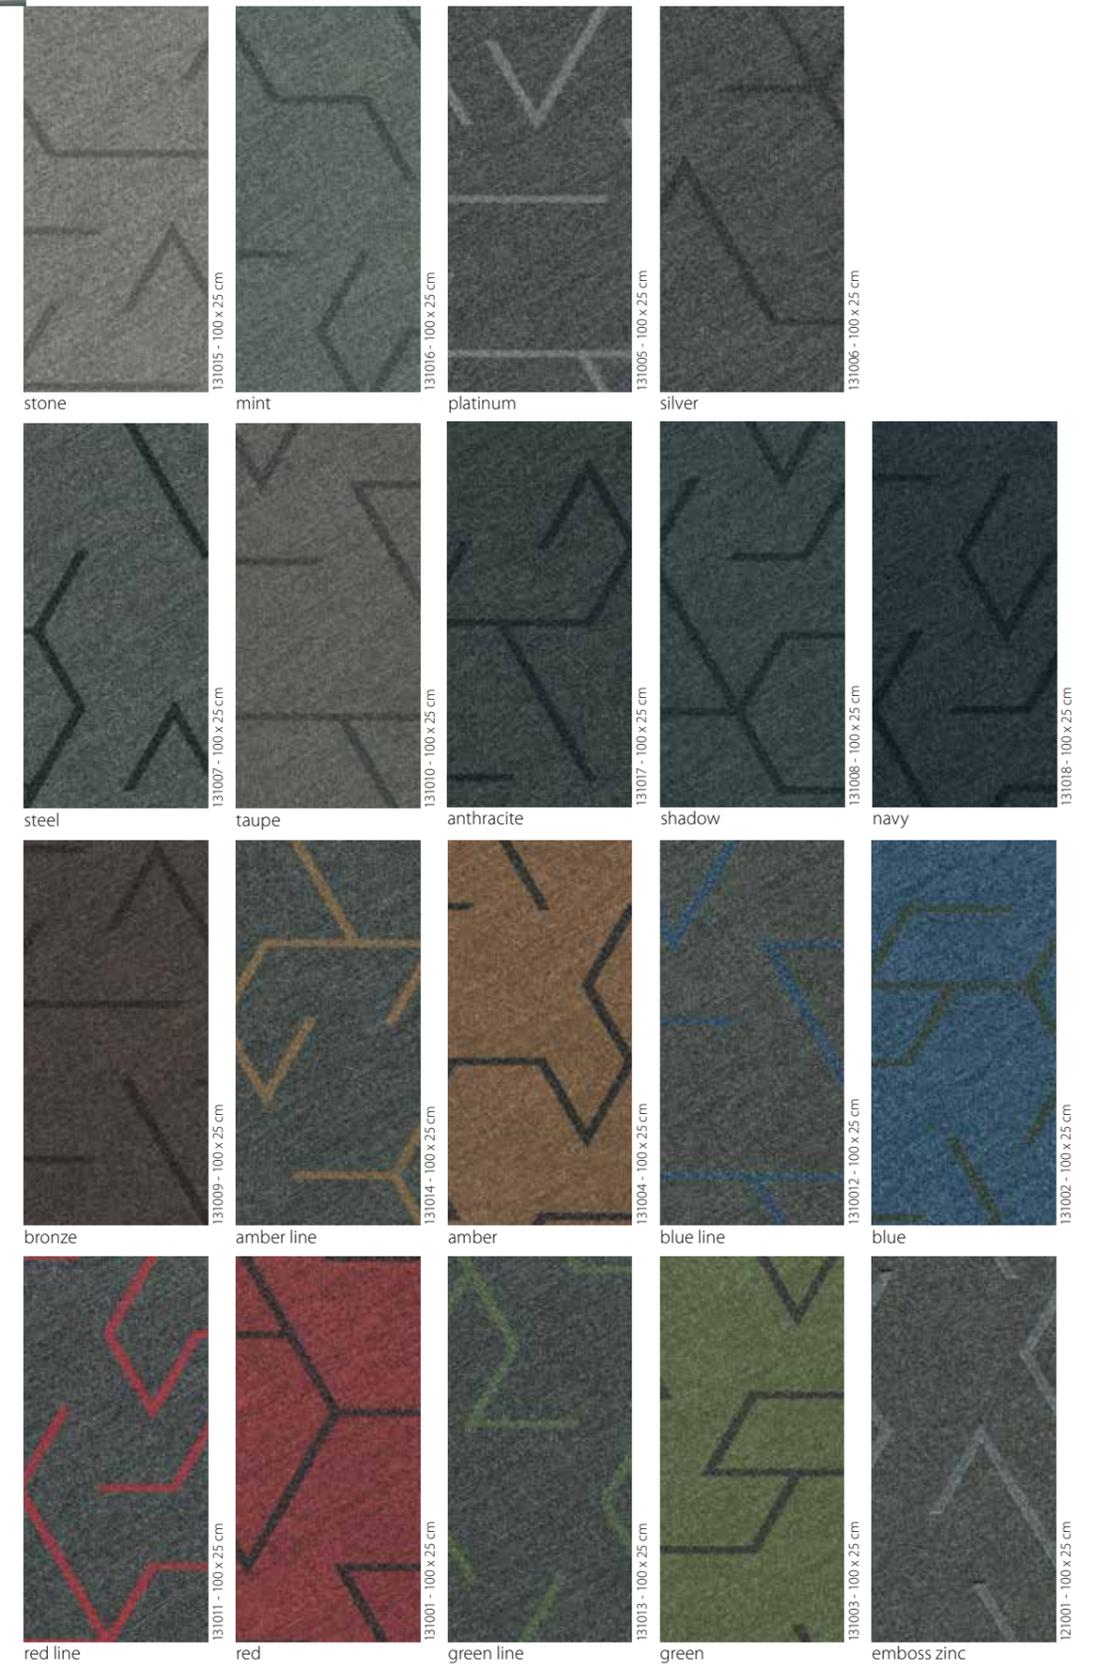

FLOTEX

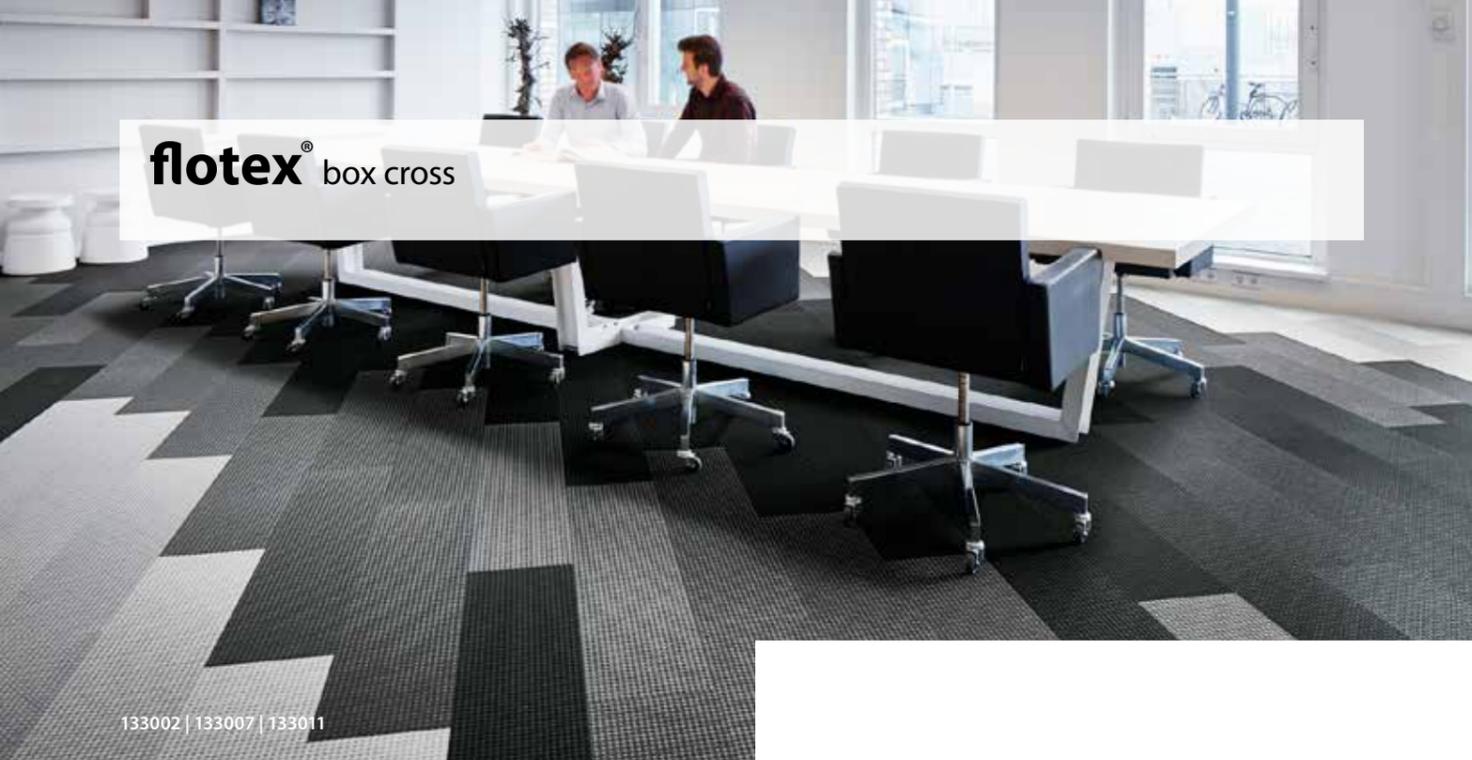

131005 | 131006 | 131011

Flotex Triad planks have an exciting graphical design and offer you the creative freedom to mix and match, combining colours and installation methods easily to customize your floor. It looks great laid brick, herringbone or basket weave and has a range of exciting colourways with highlight options and a unique embossed version to add more texture and tactility to your floor.

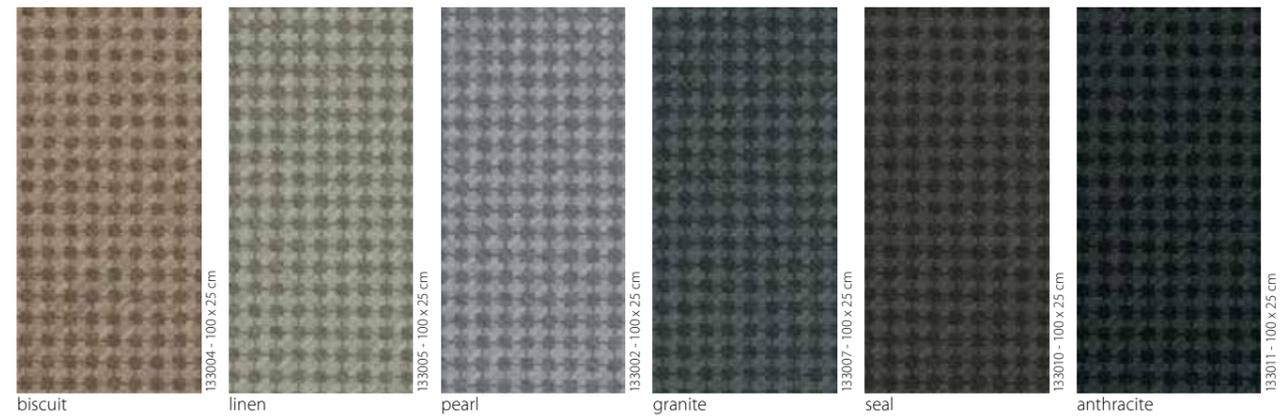

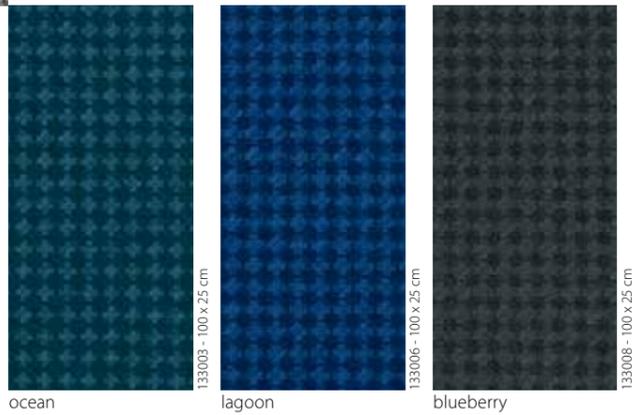

flotex® box cross

133002 | 133007 | 133011

With Flotex Box Cross planks you can transform a space. With Box Cross every plank is unique. It contains a pattern that subtly changes from cross to box fading one into the other along the length whilst a diagonal texture plays across the width blending the planks together. Box Cross planks can be laid random drop and half drop.

flotex® concrete

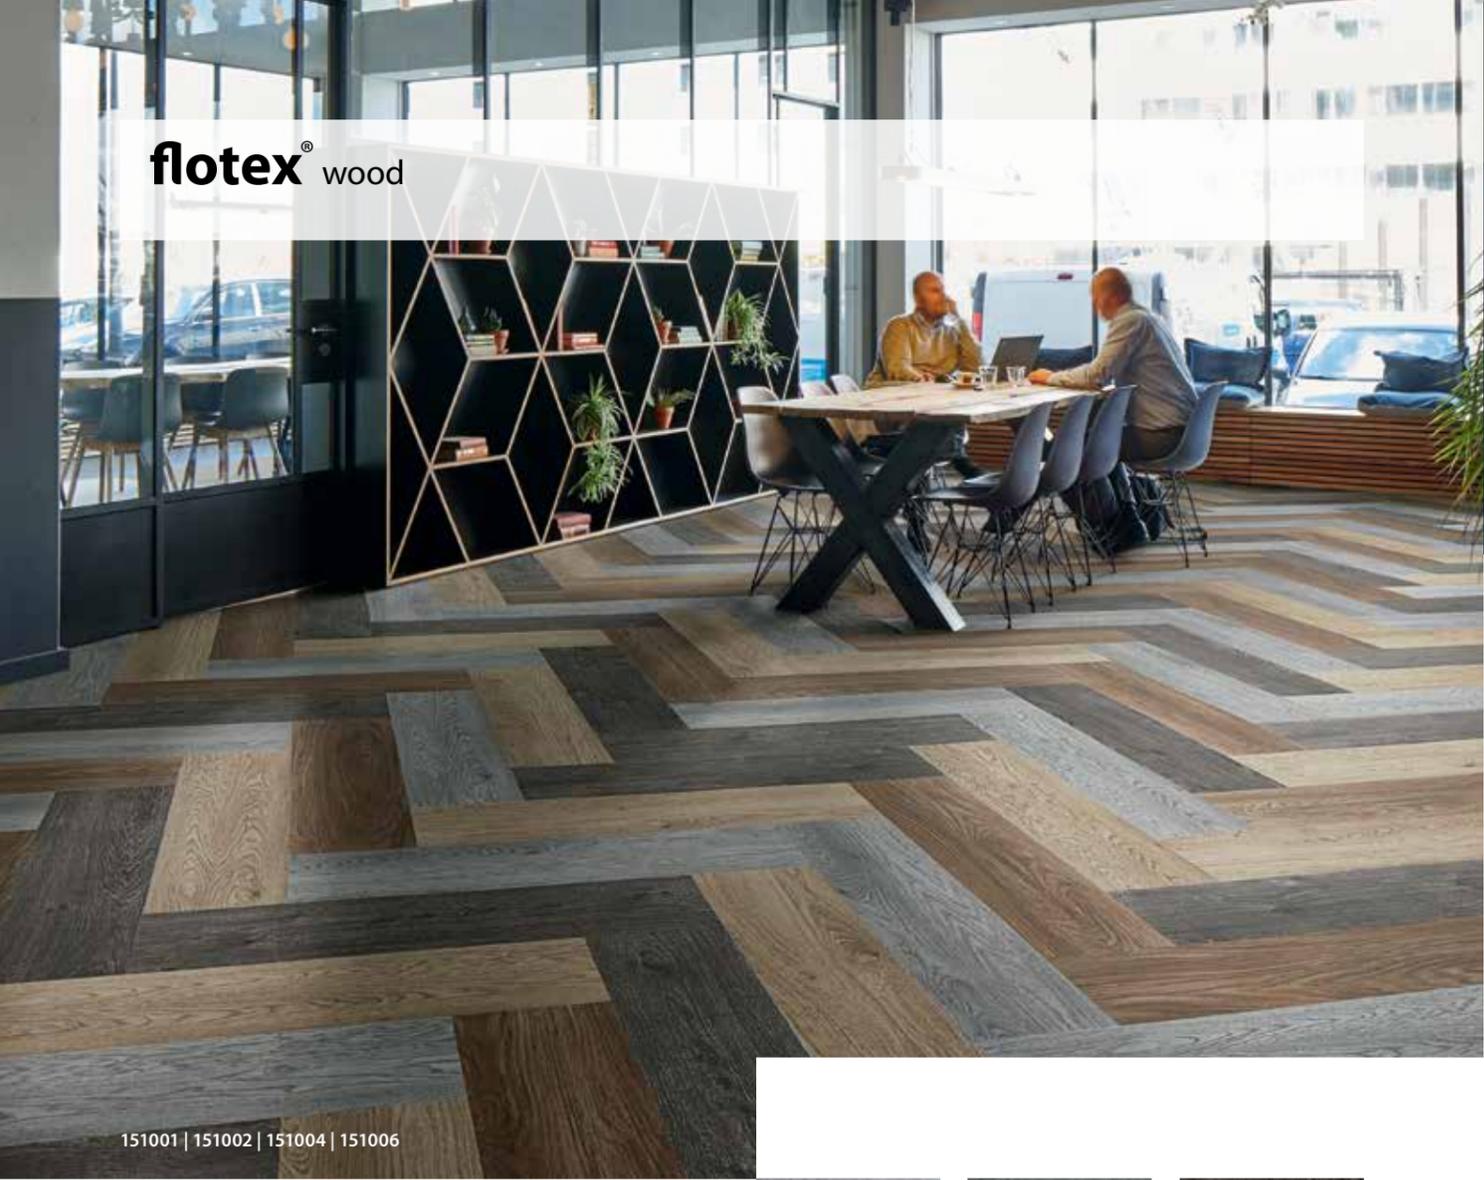

139001 | 139002 | 139003

Flotex Concrete planks offer a concrete look like you have never seen before in flooring. Highly detailed, warm and tactile but with a durability to rival a real concrete floor. Experiment with the 4 Concrete colourways to create sophisticated combinations with a timeless look.

flotex® wood

151001 | 151002 | 151004 | 151006

A wood pattern on a textile floor? You will be amazed on how it looks, feels and performs. A nice warm underfoot, no noise of ticking shoes and no wear. The ideal floor covering in offices, hotel rooms and elderly care locations. It is a mindset change. Get the looks of a real wooden floor with the advantages of comfortable textile flooring. All installation patterns are possible for Flotex Wood, use your imagination!

flotex® lava

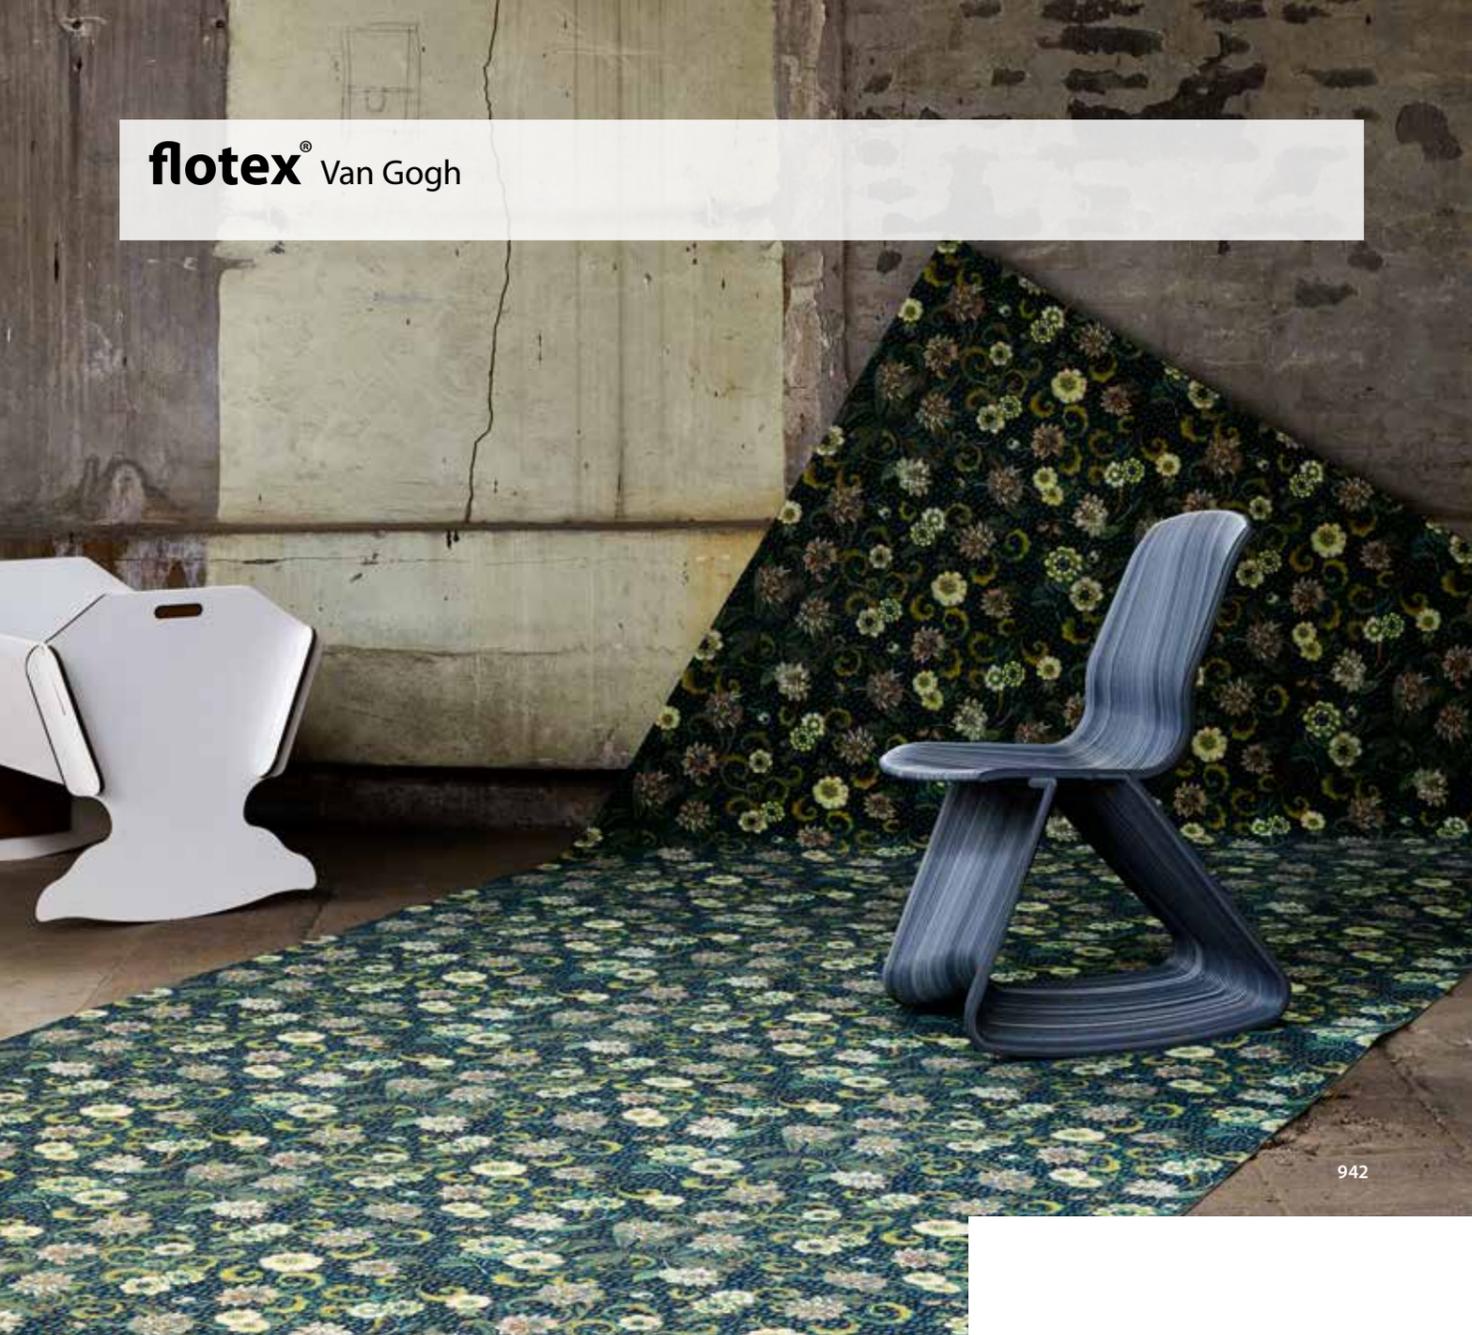

145002 | 145005 | 145007 | 145009 | 145010 | 145014

Flotex Lava planks are all about texture and colour. They give you the opportunity to define spaces, highlight areas and explore creative design combinations in every way possible. Flotex Lava offers you a large flooring choice with 18 colourways ranging from subtle shades to vibrant brights.

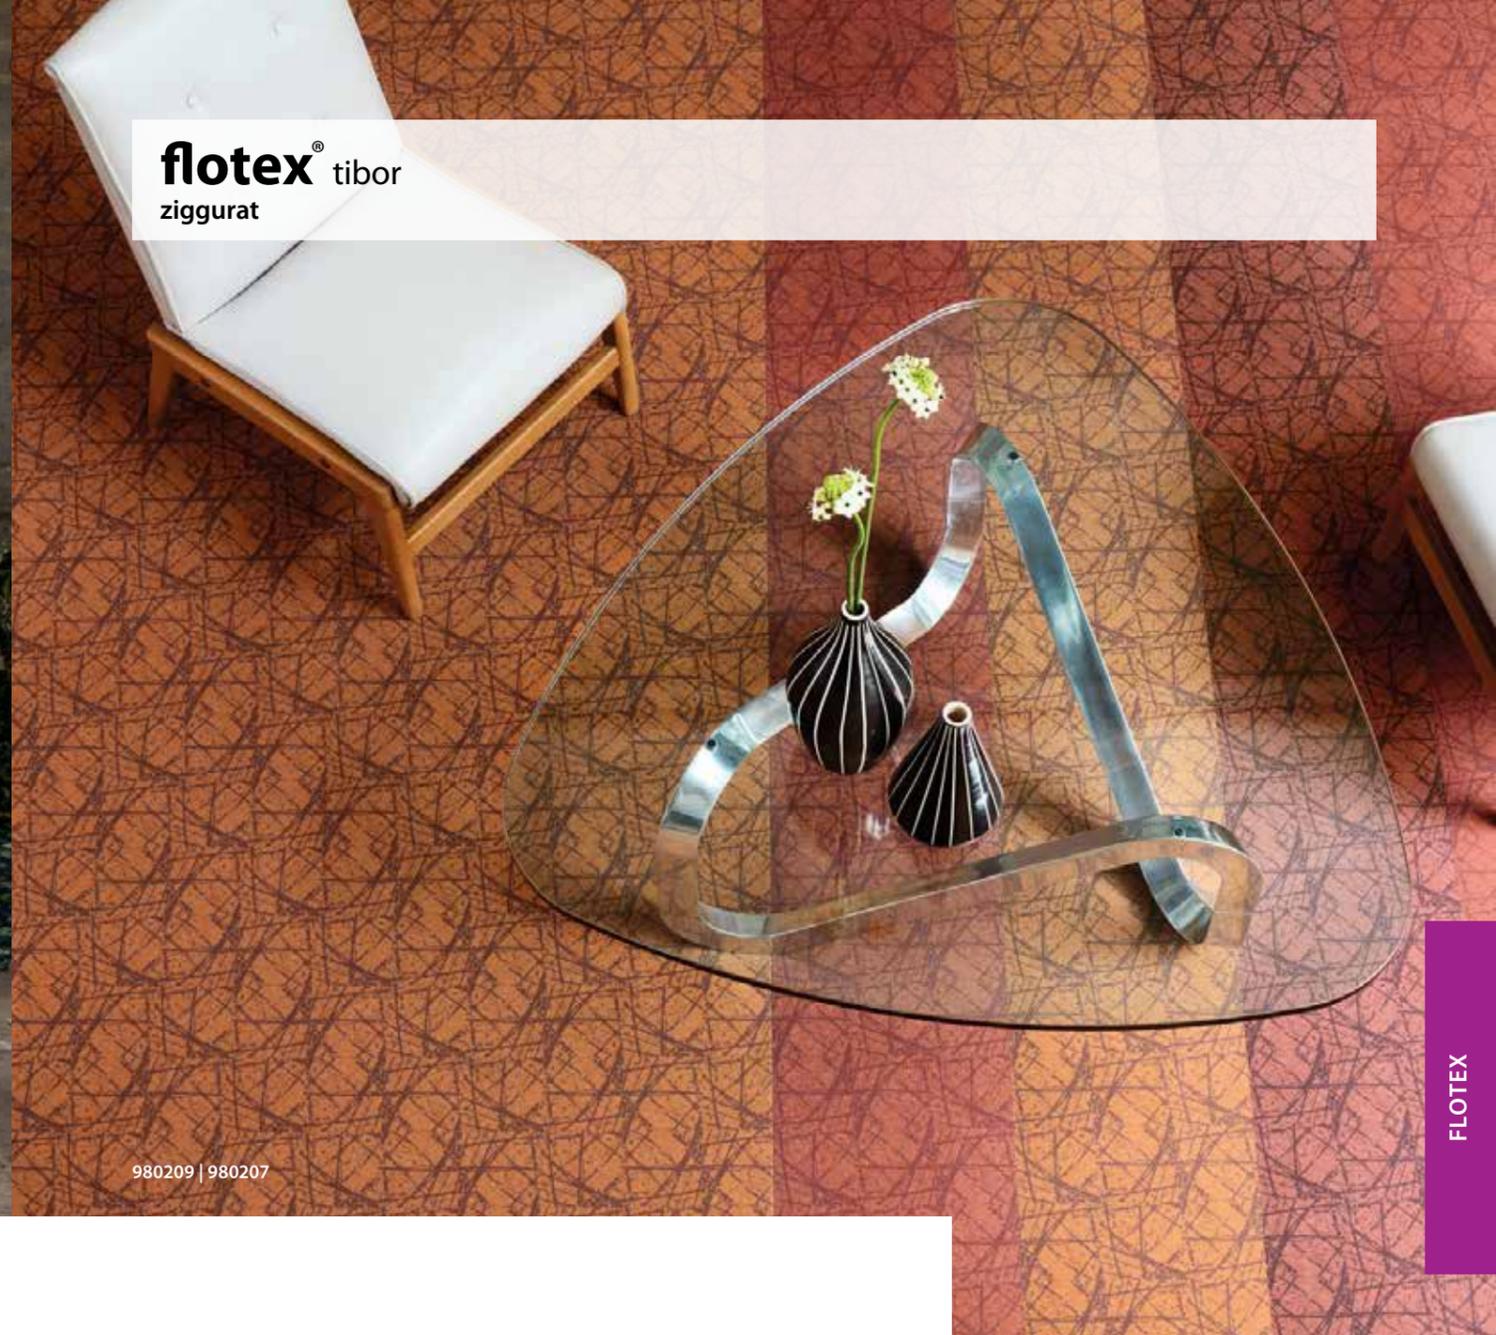

FLOTEX

flotex[®] Van Gogh

942

flotex[®] tibor
ziggurat

980209 | 980207

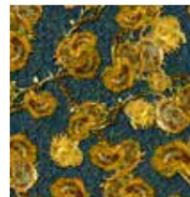

FLOTEX

Our designers have created 6 floor designs inspired by famous Van Gogh paintings. A tribute to Van Gogh, made possible by the unique characteristics of Flotex flocked flooring.

Thanks to the high density of the fibres, Flotex is ideal to print digitally and this allows for picturesque floors. Flotex is strong and durable, so despite intensive use the prints will remain beautiful over time.

942 | Lullaby La Berceuse

980208 | marine

980206 | aqua

980202 | teal

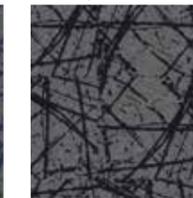

980204 | raspberry

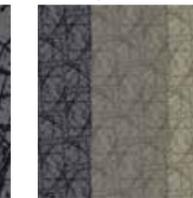

980210 | taupe

980205 | gunmetal

980201 | lead

980212 | grey

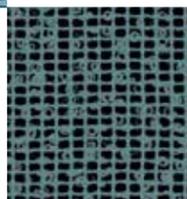

Through focusing on texture and line, Tibor's detailed photograph of straw inspired this famous pattern from the Flotex range. The photograph was taken in the spring sunshine to give the image greater definition and the design deliberately highlights the tonal contrast between light and dark. Co-ordinating broad stripes available in two colourways.

flotex® tabor
mosaic

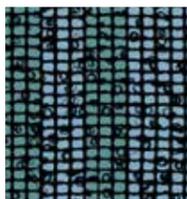

980406

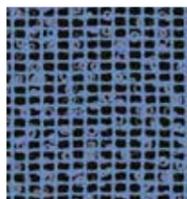

Tabor often incorporated richly-textured 'fancy yarns' into his weaves to create tactile effects. For this pattern Tabor photographed a sheer fabric made from slub yarn. The uniformity of the grid contrasts pleasingly with the randomness of the loops. Co-ordinating stripes available in two colourways.

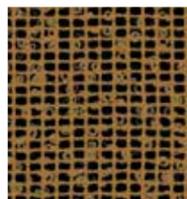

980406 | aqua

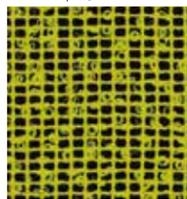

980411 | marine stripe

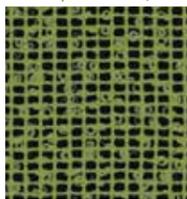

980402 | cornflower

980410 | saffron

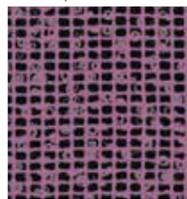

980409 | citron

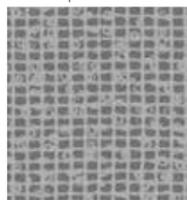

980404 | lime

980101 | black

980105 | orange

980105 | saffron

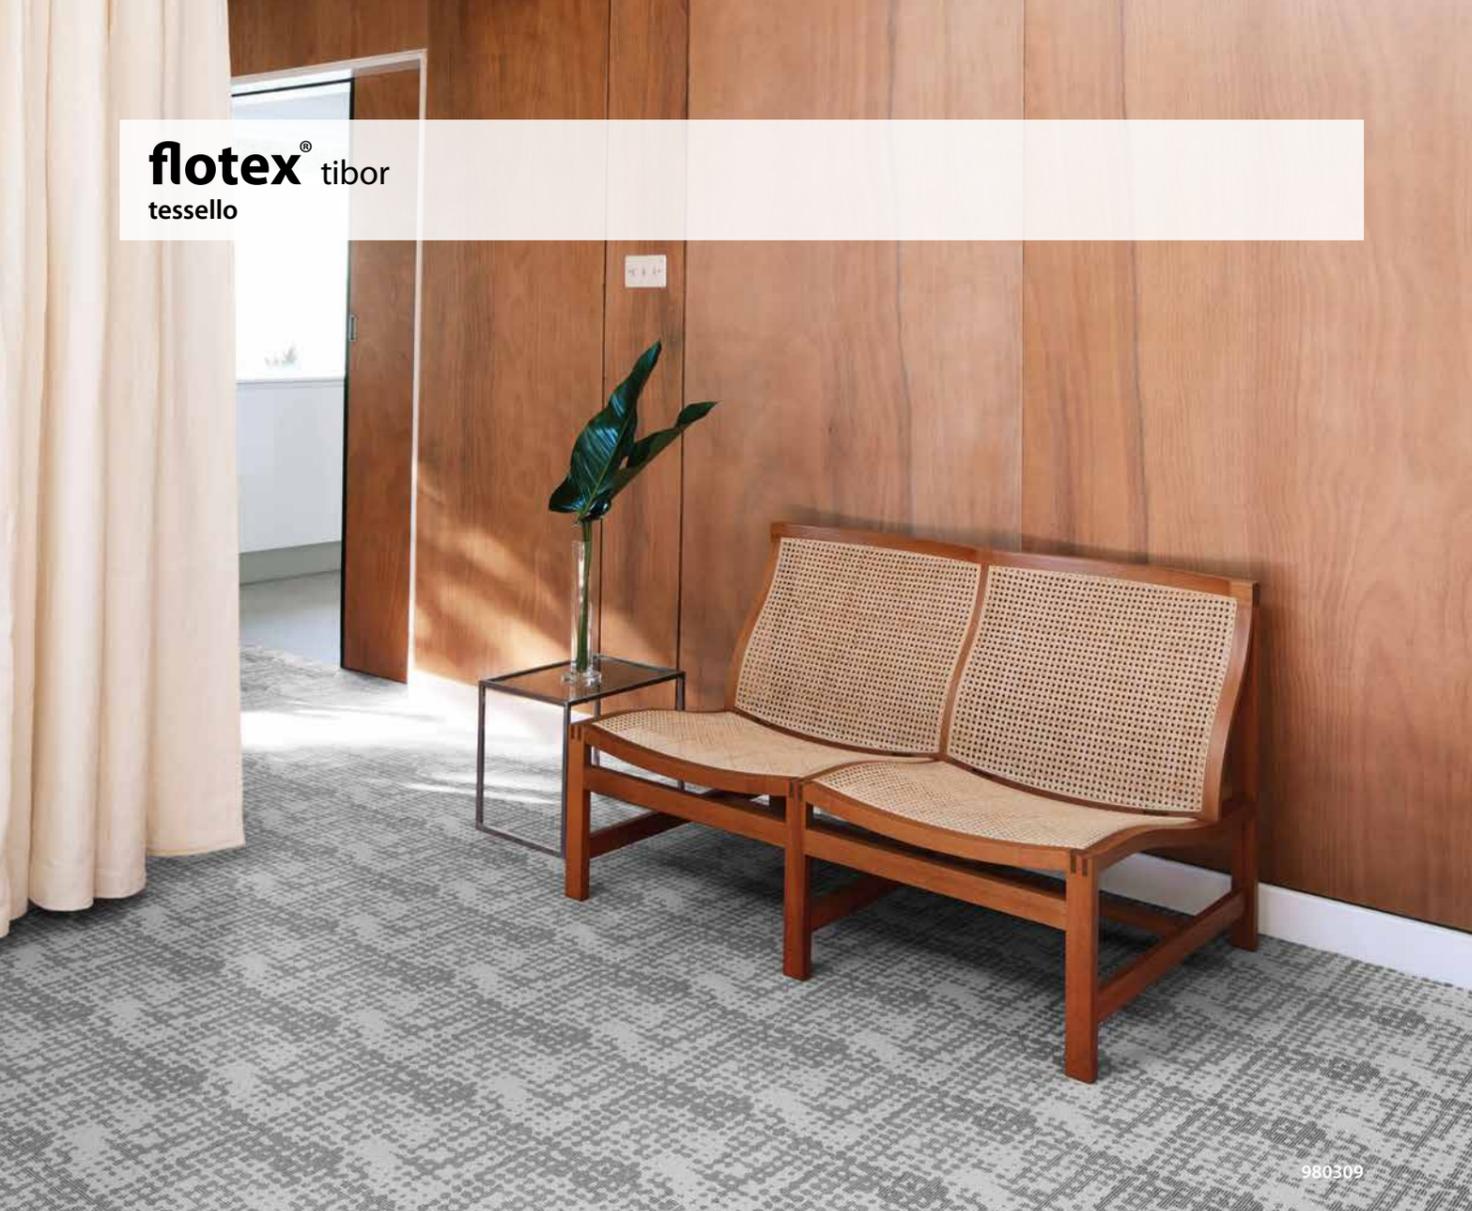

980102 | camel

980106 | cornflower

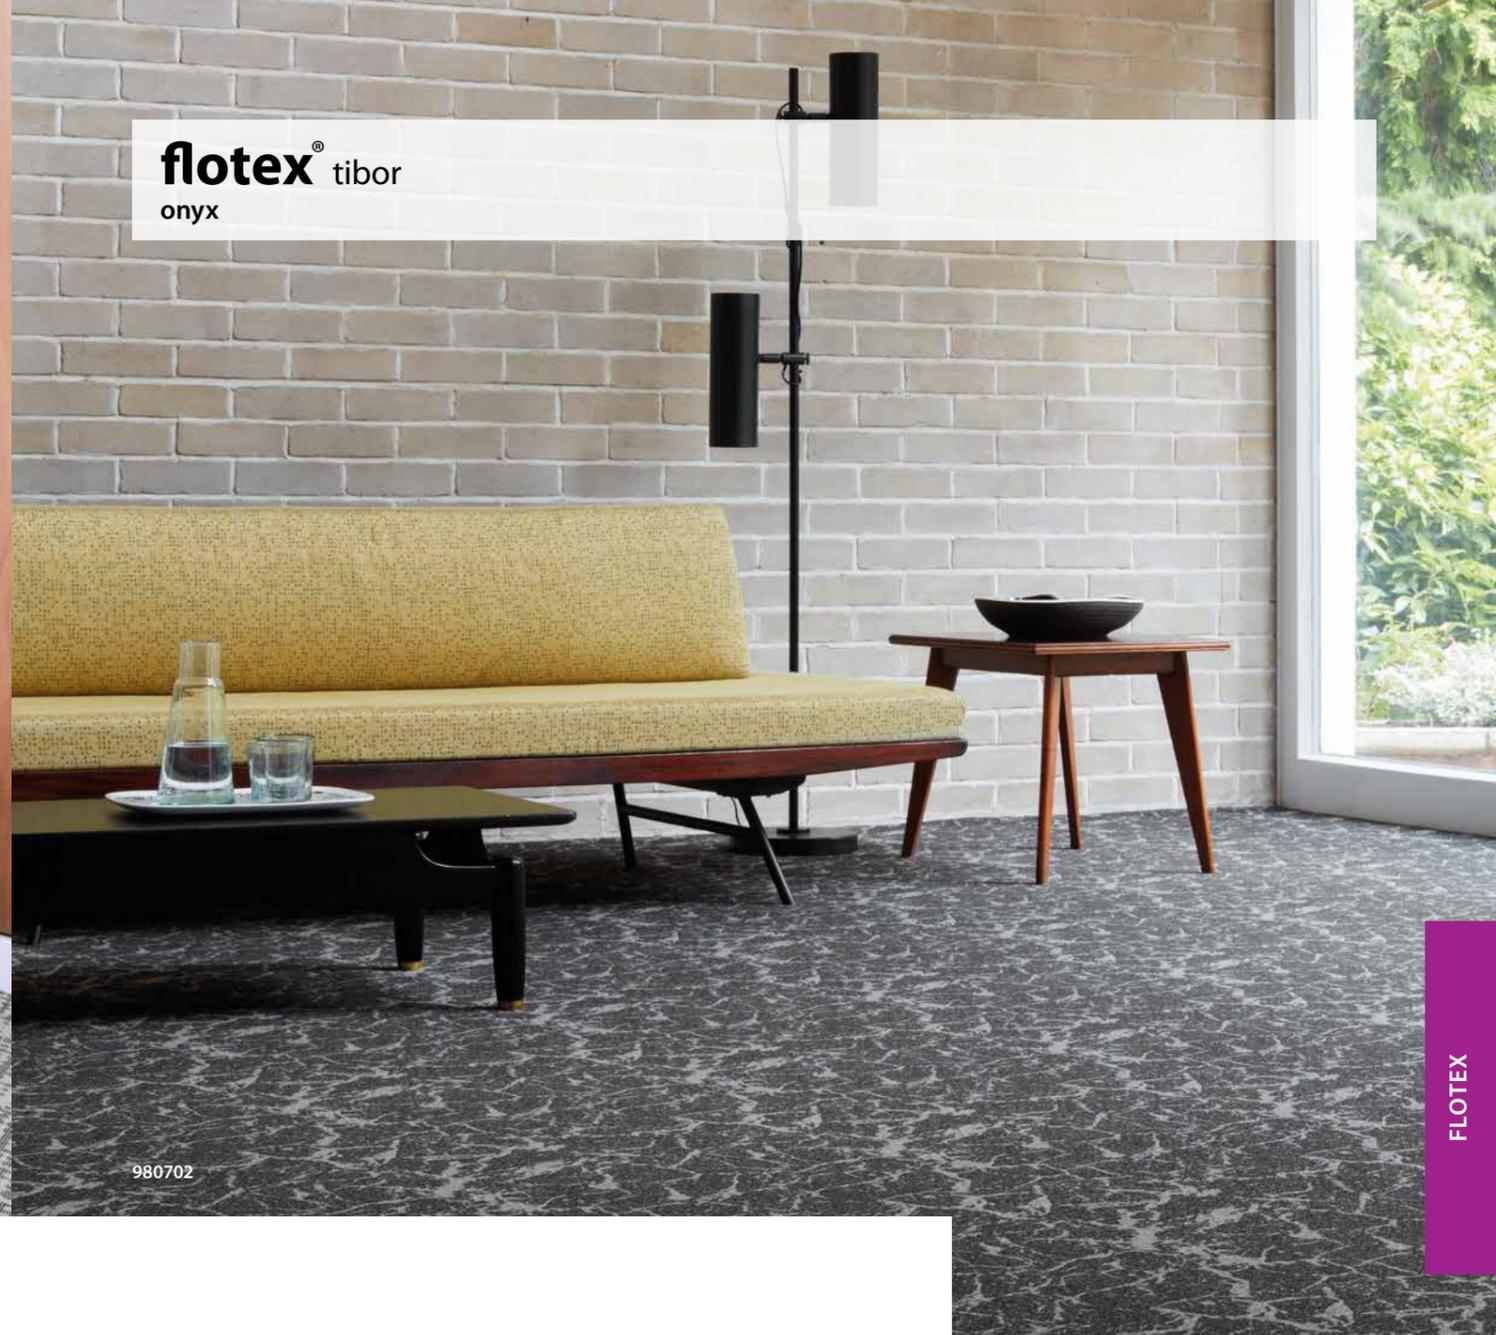

The natural world provided a great source of inspiration for Tabor and he photographed it extensively. This pattern depicts the granular composition of rocks and pebbles.

flotex[®] tibor
tessello

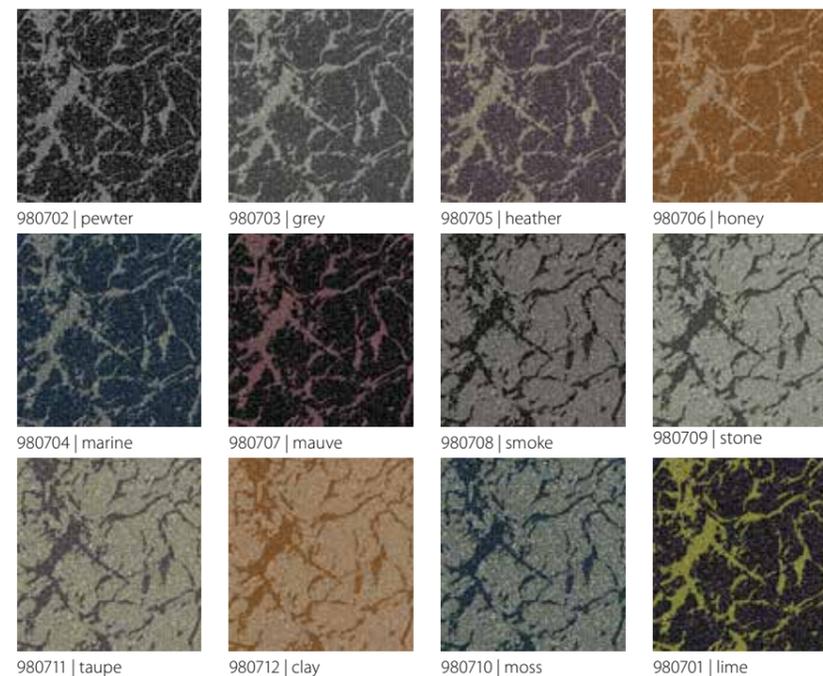

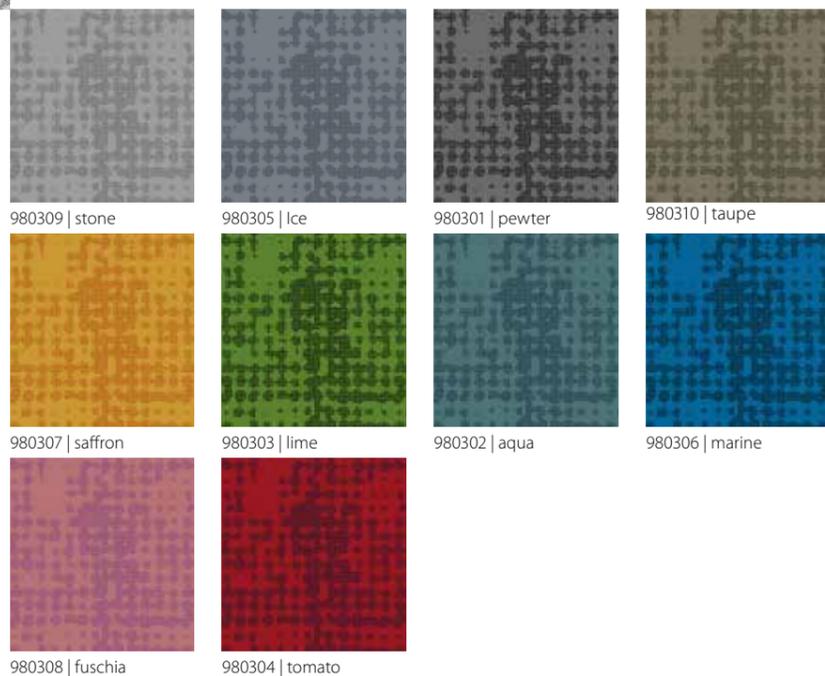

980309

flotex[®] tibor
onyx

980702

This ingenious Tibor pattern has two distinct layers: a fine mesh in the background, overlaid with a fragmented larger scale-grid. Structured yet informal, its subtle textures create a highly effective low-key flooring design.

Although this pattern resembles marble, it was actually inspired by a photograph of cracked mud in the riverbed next to Tibor's Clifford Mill. One of his most famous Fotexur designs, it was originally used for a woven carpet called Padua, so it is particularly apt that it is now being used for decorative flooring once again. The majority of colourways work in pairs as positive and negative variations.

flotex® tibor
tweedy

980504

flotex® tibor
arbor

980610

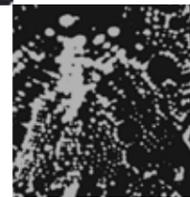

Tibor was unusual as a textile designer in creating both printed and woven fabrics. This pattern was inspired by a photograph of one of his celebrated Deep Texture weaves, in which irregular slubby yarns were used to create tactile fabrics with textural variety and depth.

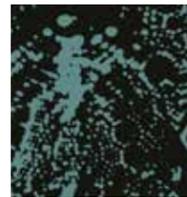

Like all Tibor's Fotexur patterns, the starting point for this design was a crisp black and white photograph taken by the designer himself. The image, recording the rough striated bark of an oak tree, is ruggedly textural, providing the perfect foil for varied coloured overlays.

980803

980803 | monochrome

980804 | aqua

980802 | saffron

980801 | raspberry

This design, derived from a photograph of an atomic structure, symbolises the period known as the Atomic Age. Part of the Colatomic range, launched in 1960, it reflects Tibor's dual interests in colour and texture. It also reflects the impact of Abstract Expressionism, which was very popular in the art world at the time.

CARPET TILES & NEEDLEFLET

1800, 1805, 1809, 1811, 1813

UNIQUE COLLECTIONS WITH SPECIFIC PROPERTIES

Carpet tiles

Today's office environments frequently accommodate layout changes, which is why carpet tiles, with their ability to quickly adapt to new requirements, can reduce the cost of reorganisation. Where carpet tiles are installed, telephone, network, electrical and other underfloor systems remain easily accessible for these changes to be made.

Fusion bonded

Fusion bonding is a sophisticated method of carpet tile manufacture where individual yarn pile is bonded onto the backing material to make an extremely dense and luxurious product. A high proportion of the yarn is in the wear surface providing a beautiful, rich velour carpet tile which gives an excellent broadloom appearance.

The carpet tile constructions

Our collections consist of different constructions, each with its own specific characteristics. The variety of tufting - the making of loops of yarn on a ground cloth - creates different constructions.

Loop pile

Carpet tiles with a loop pile construction are designed to maintain their good looks in the most demanding heavy traffic areas of buildings such as corridors and reception areas. There are various styles of loop pile products in the Tessera range covering level loop and multi-height loop pile constructions.

Cut and loop

Cut and loop pile tiles feature a clever hybrid construction that offers all the robustness of a conventional loop pile product but with the superior aesthetics and more luxurious feel of a cut pile carpet tile.

Westbond

The Westbond product range is synonymous with total flexibility and sophistication. Blending yarns to order and manufacturing premium quality fusion bonded tiles in an almost infinite number of colourways, with no minimum order quantity, Westbond allows customers to take control of the process of designing luxurious, bespoke carpet tiles with exceptionally heavy pile weights for the most prestigious installations.

Needlefelt

The robust, hard-wearing properties of Needlefelt make it ideal for installations that meet high traffic or in those areas where chairs with castors are likely to be in use, such as in offices, administrative premises and retail establishments.

CARPET TILES & NEEDLEFELT

- 260 **tessera**
Tessera offers stylish, sustainable and hardwearing tufted carpettiles in various pile constructions and textures, delivering specific performance and aesthetic benefits.
- 262 **tessera loop pile**
Carpet tiles with a loop pile construction are designed to maintain their good looks in the most demanding heavy traffic areas of buildings, even in corridors and reception areas. There are various styles of loop pile floors in the Tessera range, covering level loop and designer loop constructions
- 276 **tessera random lay. batchless**
A random lay tile is cleverly designed so that it may be laid in any direction to produce a totally individual installation. Different production consignments of 'batchless' tiles can be used together without the usual risk of visible batch variation.
- 278 **tessera cut & loop pile**
Cut & loop pile carpet tiles feature a clever hybrid construction that offers all the robustness of a conventional loop pile floor covering but with the superior aesthetics and more luxurious feel of a cut pile carpet tile. Tessera offers cut & loop pile tiles in various aesthetic styles, for all types of environments.
- 282 **tessera cut pile**
Softer and more luxurious than loop pile, cut pile carpet tiles are ideal for boardrooms and meeting rooms in addition to general office environments. Tessera offers one tufted cut pile tile range to meet different aesthetic requirements.
- 290 **westbond**
Westbond fusion bonded carpet tiles offer infinite colour possibilities and exceptional quality and luxury from as little as 1m².

NEEDLEFELT

- 302 **showtime**
This fine fibre needlefelt collection offers a large choice of uni colours which coordinate perfectly with the printed designs allowing the demarcation of individual spaces and the creation of different moods.
- 324 **forte**
Forte is the premium product in our needlefelt range, offering the maximum feeling of comfort that comes with a fibre weight of approximately 750 g/m². Forte is an impressive premium product.
- 328 **markant**
Markant is a high-quality, coarse-texture covering made of 100% polyamide fibres, equipped with all the characteristics required for hard-wearing performance in frequently used places. Markant comes with a fibre weight of approximately 600 g/m².

TESSERA

ENORMOUS DESIGN POSSIBILITIES

TESSERA & WESTBOND CARPET TILES

Forbo carpet tiles are renowned for their aesthetic styling and outstanding performance in the most demanding heavy traffic environments. Side by side these three long established reputable brands offer specifiers and their clients an unrivalled carpet tile offer to meet every possible design brief.

Carpet tiles

Carpet tiles are renowned for their aesthetic styling and outstanding performance in the most demanding heavy traffic environments. Forbo Flooring offers a wide portfolio of carpet tile ranges, providing an extensive choice of design, colour, installation options and price points.

Tessera carpet tiles

- Colour co-ordinated for maximum design flexibility
- Quicker to install than broadloom carpet
- Installation wastage is reduced
- Damaged or soiled tiles can be replaced
- Wear rotation to extend flooring lifespan
- Renovation with minimal disruption
- Compatibility with entrance systems

Materials used:

Basis, Format and Apex 640 are manufactured from 100% Aquafil solution-dyed nylon yarn, renowned for its low dust and dirt penetration and superior colour fastness. Accordingly, Apex 640

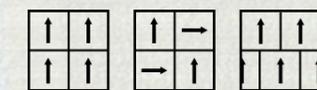

Inline is produced with 100% Universal polyamide. The use of high lustre Antron® 'metallic' yarn in Helix gives a restrained reflective quality to this distinctive multi-height loop pile tile

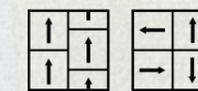

Designed for heavy contract installations and constructed using regenerated solution dyed ECONYL® polyamide, Create Space 1 carpet tiles are not only tough and durable but also respond to globally increasing environmental concerns. Up to 100% of the yarn (average 86% across the colour range) is regenerated from post-consumer and post-industrial waste streams including old carpets and discarded fishing nets.

Installation methods

Broadloom 1/4 Turn bricklay

ashlar random

tessera[®] atrium
loop pile

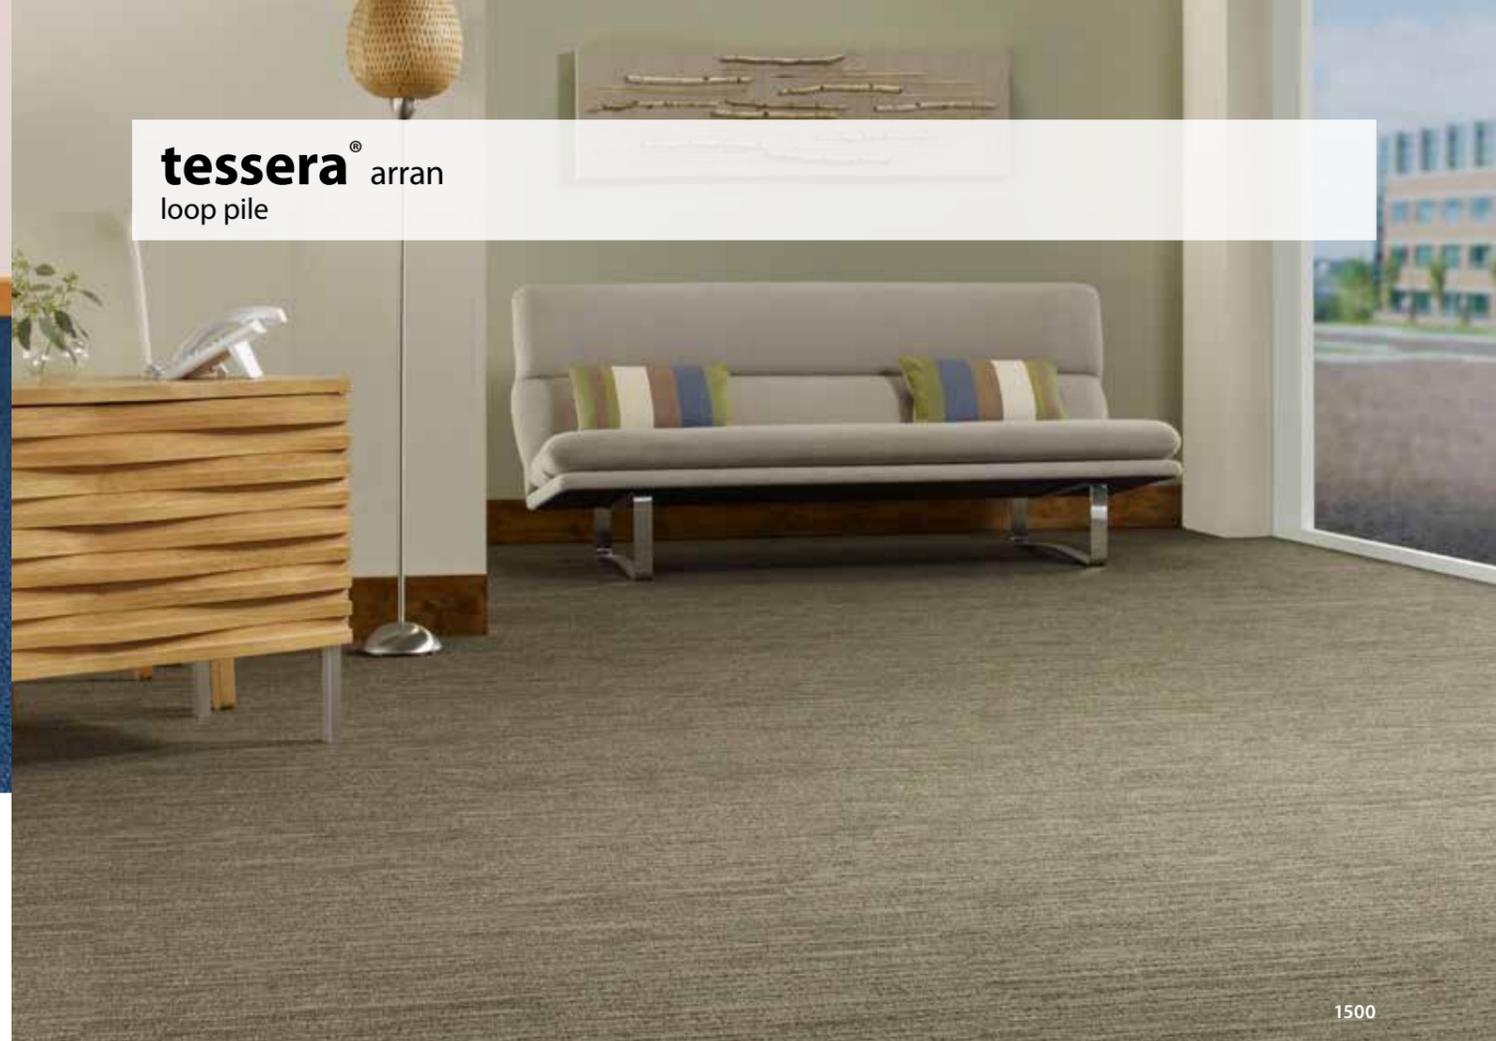

1460

Atrium is a heavy contract carpet tile at a very affordable price, providing an excellent choice for any office environment. A structured loop pile tile manufactured from 100% polyamide, this great all rounder offers outstanding wear performance and appearance retention, keeping its good looks year after year. Atrium comes with a broad palette of 24 bold colourways, providing an excellent choice for any office environment.

tessera[®] arran
loop pile

1500

Arran's natural, almost 'artisan' appearance belies the complexity of its multi-height textured loop pile design and the state of the art manufacturing technology behind it. Using CMC Infinity machinery Forbo's designers have developed a carpet tile with unashamedly irregular peaks and furrows which broadlooms beautifully to deliver an alluringly tactile linear design offering real warmth.

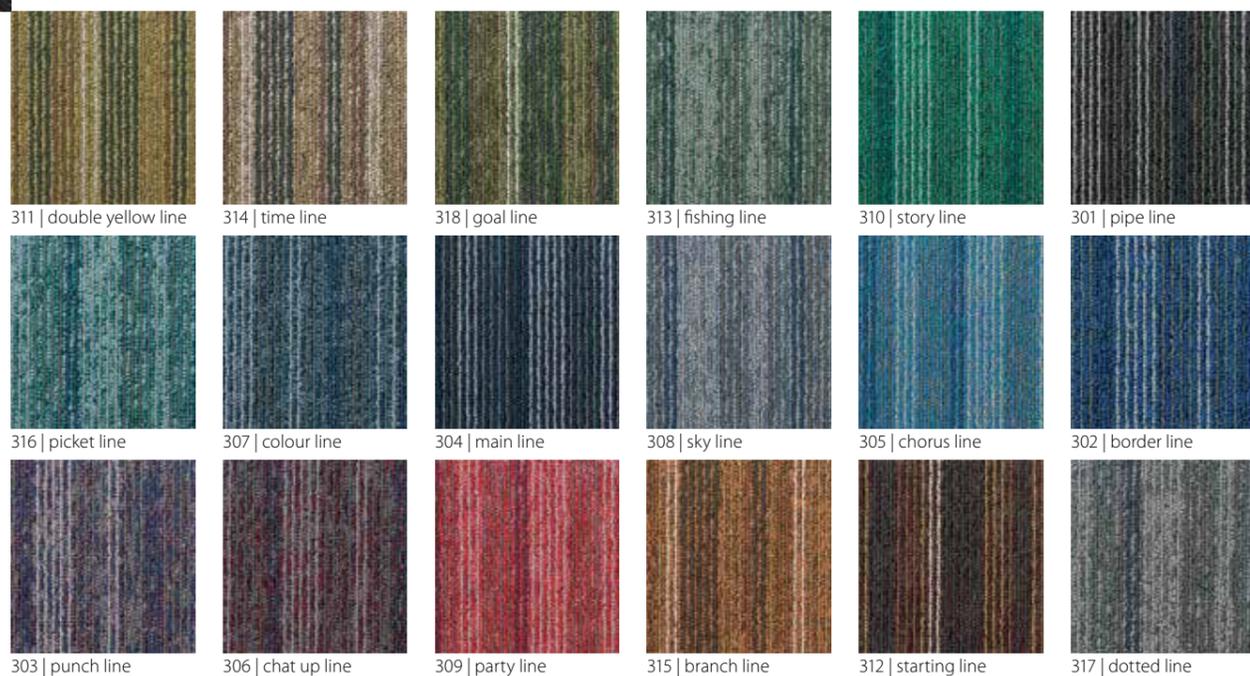

CARPET TILES & NEEDLEFELT

tessera[®] barcode
loop pile

304

Barcode challenges the uniformity and rigidity of conventional linear low level loop pile tiles and, with its confident bands of contrasting colours in varying widths, delivers a more eclectic and exuberant look that is right on trend for today's commercial environments.

tessera[®] format
loop pile

609

With a distinctive textured construction and a broad colour palette of 18 contemporary and commercially attractive tonal shades, Format has taken low loop pile tiles into a new dimension. This hardwearing heavy contract carpet tile, manufactured using new high tech tufting machines combines rich texture with densely packed low loops for superior aesthetic appeal and real added value. A universally attractive carpet tile suitable for heavy traffic environments in all types of commercial premises, Format boasts a high castor chair rating, making it an ideal and cost-effective solution for busy offices large and small.

tessera[®] create space 1
loop pile

1800 | 1805 | 1809 | 1811 | 1813

An exceptionally flexible range of 18 commercial colourways, Create Space 1 is suitable for any commercial spaces, large or small. Styled for today's interiors, Create Space 1 lends itself to single colourway installations, feature area designs and bespoke creative schemes.

CARPET TILES & NEEDLEFELT

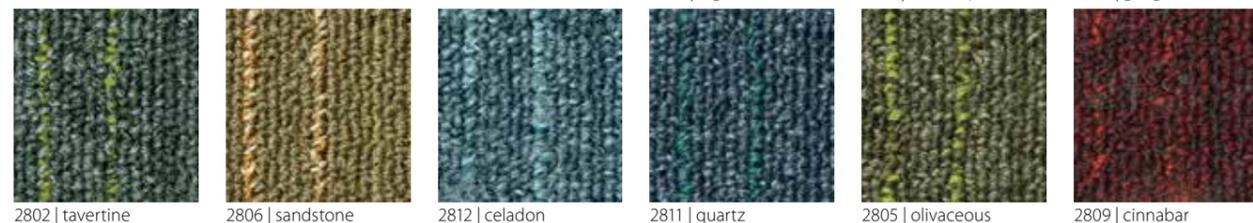

tessera® create space 2
loop pile

2805 | 1805

Featuring a versatile geometric stripe design and a contemporary palette of 15 colourways, Create Space 2 adds stylish and creative interest to any size of flooring scheme.

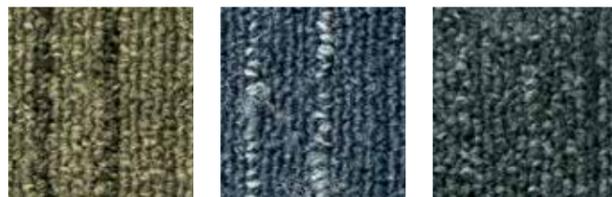

Create Space 2 carpet tiles are designed to provide the maximum flexibility in any installation as they can be fitted in a variety of styles including broadloom, non-directional (reduces installation waste to less than 2%), tessellated or half drop. Each creates a very modern and individual aesthetic.

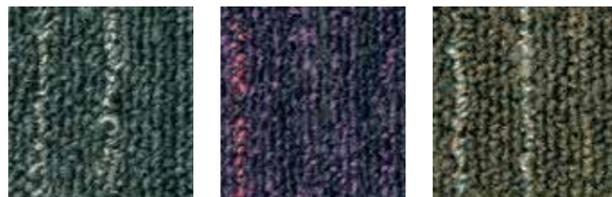

2802 | tavrntine 2806 | sandstone 2812 | celadon 2811 | quartz 2805 | olivaceous 2809 | cinnabar

2801 | argent 2814 | heliotrope 2804 | greige

tessera® helix
loop pile

812

805 | burnish

The use of high lustre Antron® 'metallic' yarn in Helix gives a restrained reflective quality to this distinctive multi-height loop pile tile. The silver coloured nylon thread is cleverly juxtaposed with Antron's solution dyed yarns drawn from a contemporary colour palette comprising greys, taupes, blues and beiges. Inspiration for these 13 muted and subdued colourways is derived from architectural materials and the hues of the modern urban landscape.

803 | clay 811 | cobalt 809 | copper 807 | glaze 808 | silica 806 | mortar

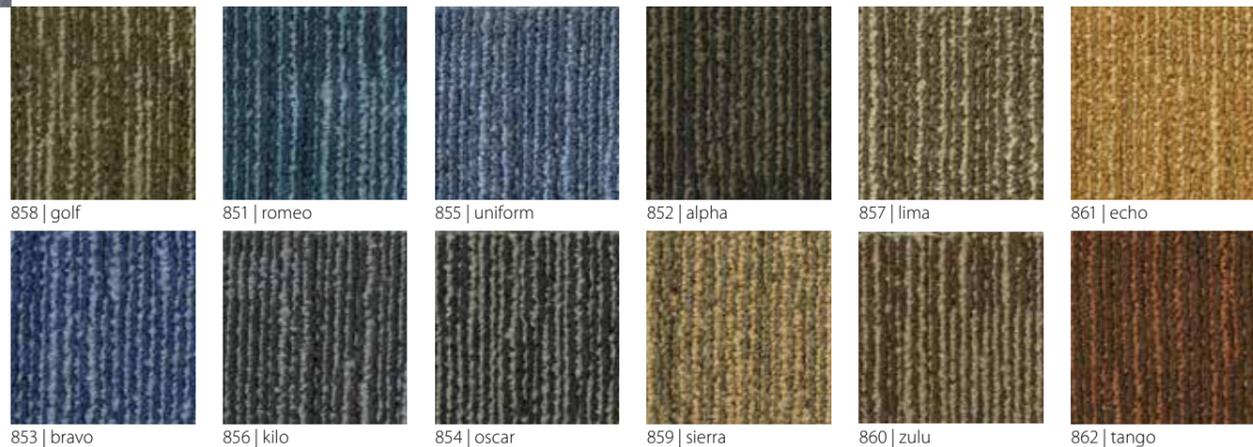

804 | taupe 812 | marble 801 | glass 813 | zircon 802 | oxide 810 | carbon

tessera[®] inline
loop pile

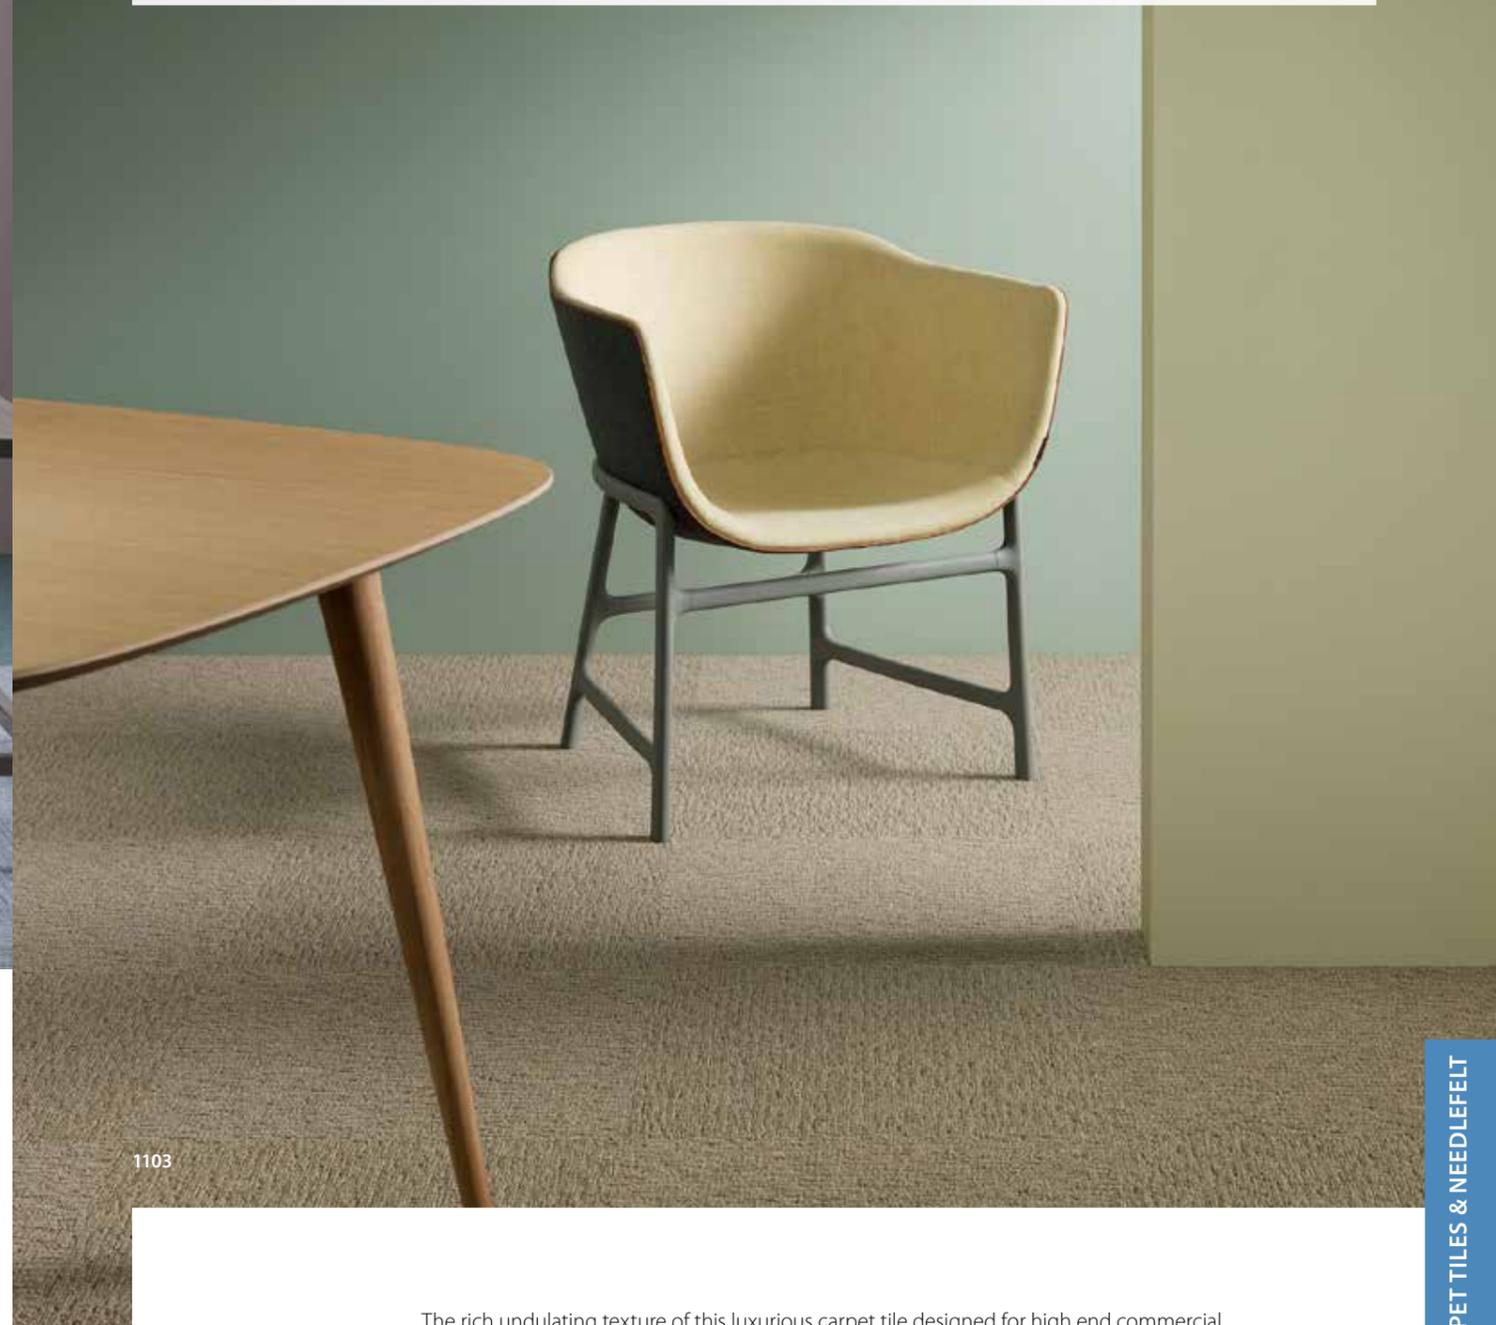

852

One of a new generation of cleverly textured loop pile tiles from Tessera, Inline adds a completely new twist to the concept of linear design. Featuring rich, differential texture. Inline provides a strong directional pattern, randomly interspersed with patches of tonal relief. This 'broken linearity' and combination of high and low level loops, delivers a visually interesting backdrop for any commercial interior design scheme. The forgiving design masks tile edges resulting in a broadloom appearance when laid in monolithic fashion.

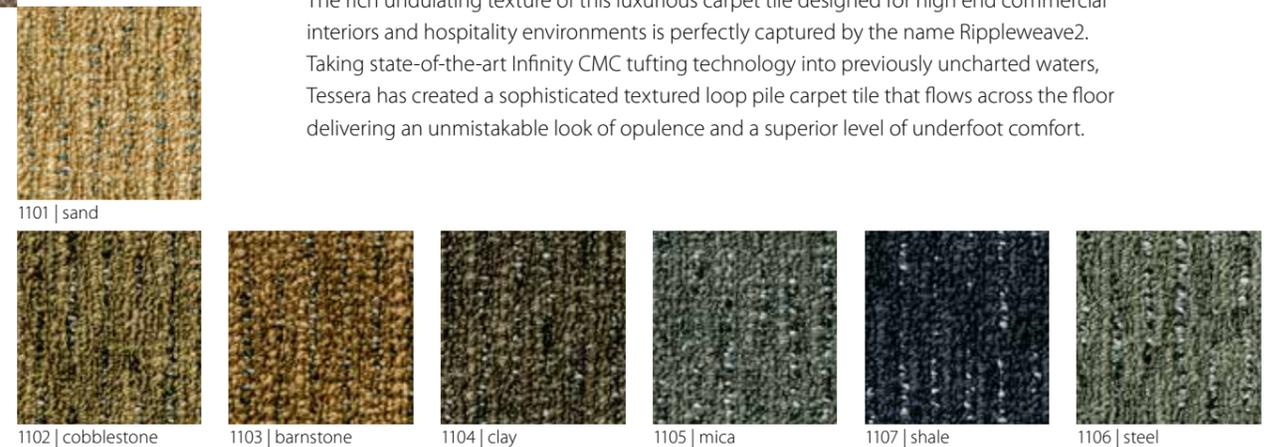

858 | golf 851 | romeo 855 | uniform 852 | alpha 857 | lima 861 | echo
853 | bravo 856 | kilo 854 | oscar 859 | sierra 860 | zulu 862 | tango

tessera[®] rippleweave2
loop pile

1103

The rich undulating texture of this luxurious carpet tile designed for high end commercial interiors and hospitality environments is perfectly captured by the name Rippleweave2. Taking state-of-the-art Infinity CMC tufting technology into previously uncharted waters, Tessera has created a sophisticated textured loop pile carpet tile that flows across the floor delivering an unmistakable look of opulence and a superior level of underfoot comfort.

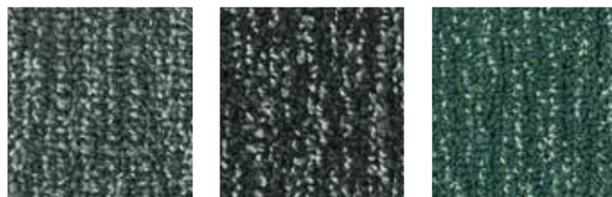

1101 | sand 1102 | cobblestone 1103 | barnstone 1104 | clay 1105 | mica 1107 | shale 1106 | steel

tessera[®] weave
loop pile

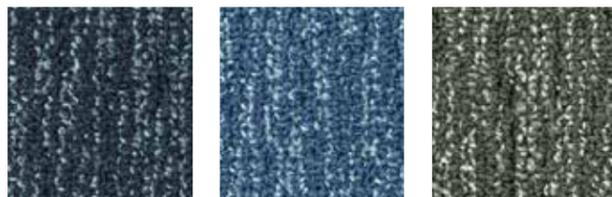

1700

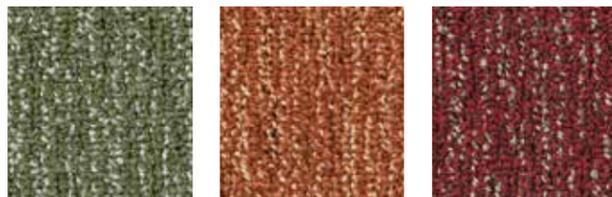

1701 | orbit 1700 | eclipse 1706 | zenith

1704 | meteor 1716 | quasar 1717 | cluster

1702 | satellite 1708 | lunar 1707 | moon

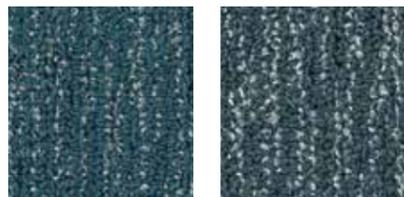

1709 | meridian 1711 | solar 1712 | burst

1714 | crater 1715 | galaxy 1718 | comet

A highly versatile textured loop carpet tile, Weave beautifully combines form and function. Practical and hard wearing, Weave features a subtle directional grain which is enhanced by the use of contrasted multi-twist yarn, creating a uniquely textured appearance. Designed for use in commercial, recreational, hospitality and public interiors, Weave is available in 19 tonal colourways and is suitable for broadloom, tessellated or quarter turn installation. Weave is made from 100% Econyl solution dyed nylon 6 ensuring that the product retains its appearance throughout the lifespan of the floor.

1703 | planet 1705 | universe

tessera[®] diffusion
loop pile

2014

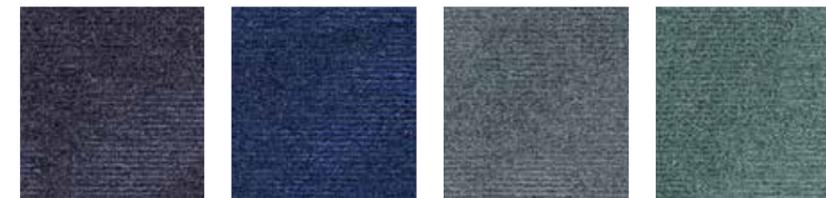

2000 | space quest 2001 | magnetic flux 2002 | paradigm shift 2003 | glacial flow

2004 | pivotal movement 2005 | nomadic journey 2006 | passing place 2007 | perpetual motion

2008 | forrest trail 2009 | continental drift 2010 | pendulum swing 2011 | border crossing

2012 | flight transfer 2013 | ocean cruise 2014 | skyfall 2015 | arctic voyage

Tessera Diffusion carpet tiles reflect an evolution towards softer, more organic geometry observed in nature. Inspired by crystalline structures, the fractal shapes fade in and out creating appealing contemporary floor spaces.

tessera® layout & outline
loop pile

2119 | 2112 | 2108 | 3102

Featuring a contemporary palette of 32 colours with 8 co-ordinated stripes, our Tessera Layout and Outline carpet tiles offer numerous possibilities for creative inspiration in any flooring scheme.

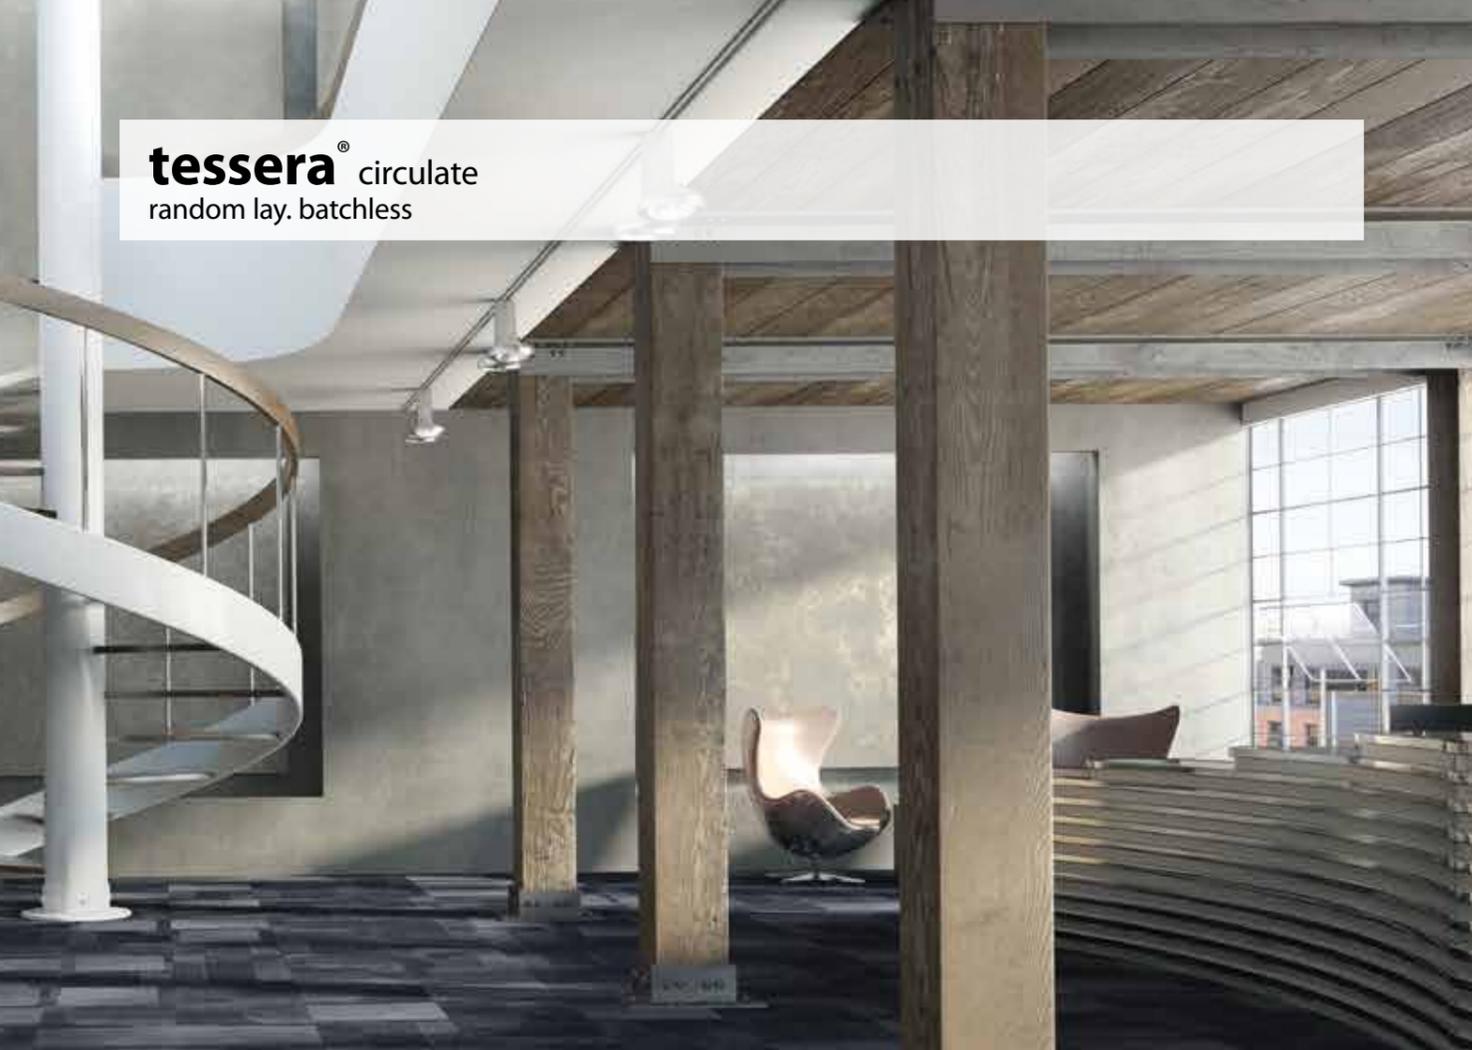

The dynamic colour palette of **Layout** is hugely versatile featuring a comprehensive choice of modern neutrals in combination with diverse and directional brighter shades.

Colours can be used independently or in combination to achieve a myriad of interior styles.

Outline is a subtly textured striped loop pile carpet tile with each colourway perfectly matched to 2 Layout colours. Combinations of Outline and Layout allow complete freedom of expression creating connections, highlights and transitions enhancing any style of scheme.

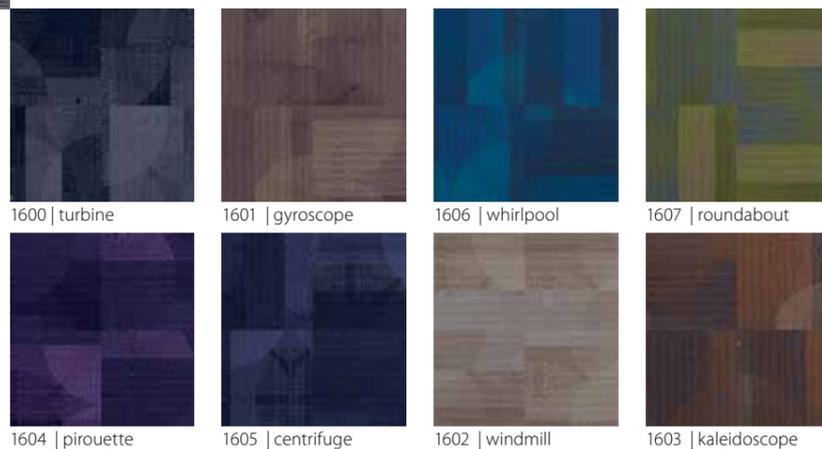

tessera[®] circulate
random lay. batchless

1600

Confident and unique, Circulate represents a fresh approach to the design of random lay batchless carpet tiles. Its random geometric aesthetic will bring life and excitement to interior floor spaces of any scale, from the narrowest corridors to the most expansive open plan environments. The random nature of the design in modular form creates contemporary floorspace environments which are modern and distinctive yet commercially attractive and highly accessible. Circulate is offered in a range of eight fresh colourways, with options available to suit all types of commercial interiors. The collection is complemented by the addition of 16 Westbond N9000 co-ordinates which offer the opportunity to enhance meeting, break-out or feature areas further.

964 | stone

970 | jade

An innovative, batchless, random lay carpet tile, Tessera Mix delivers a seamless installation appearance every time. Its soft geometric shapes cleverly disguise the tile edges and fitting direction and create its classic modern appearance. Mix combines tone and shade within an angular framework through the controlled use of multiple carpet construction creating a distinctive, attractive and highly complementary flooring solution. Designed for use in commercial, hospitality and public interiors, Mix is available in 15 contemporary colourways. Its random geometric aesthetic will improve interior floor space of any scale from intimate corridors to expansive open plan offices.

tessera[®] alignment
cut & loop pile

208

Alignment is a sophisticated and cleverly textured cut and loop carpet tile designed to complement the most contemporary commercial interiors. Multi-height loops give this distinctive floor covering a bold directional theme which is tempered by the introduction of intersecting random blocks of rich cut pile. The result is a highly effective broadloom appearance and a unique linear style, equally suited to open plan interiors and more modest enclosed spaces alike.

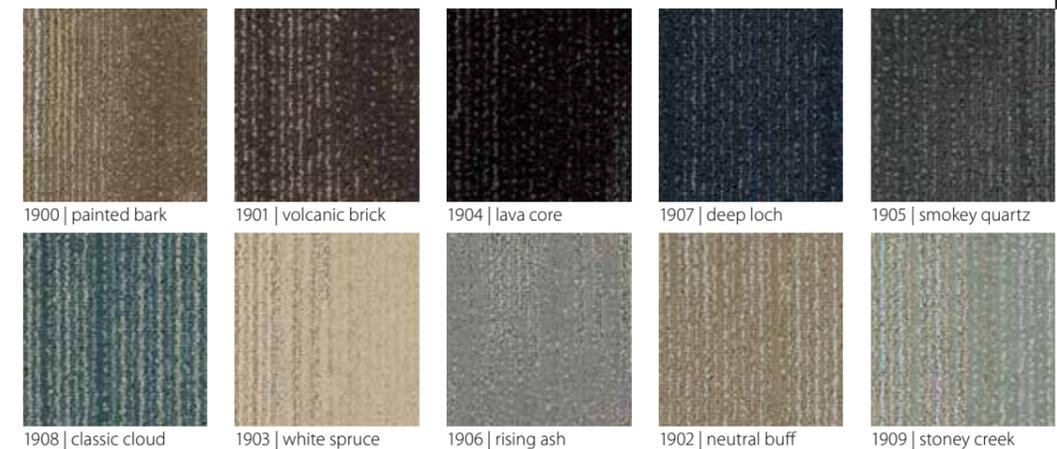

tessera[®] contour
cut & loop pile

1904

The controlled geometric background of Tessera Contour is heavily influenced by repeated shapes in architecture and urban settings. The structure is relieved and broken by a more softly striated cut pile overlay to reflect the diverse human and natural elements found in these landscapes. The palette is a tonal progression of diffused shades ranging from pale to very dark.

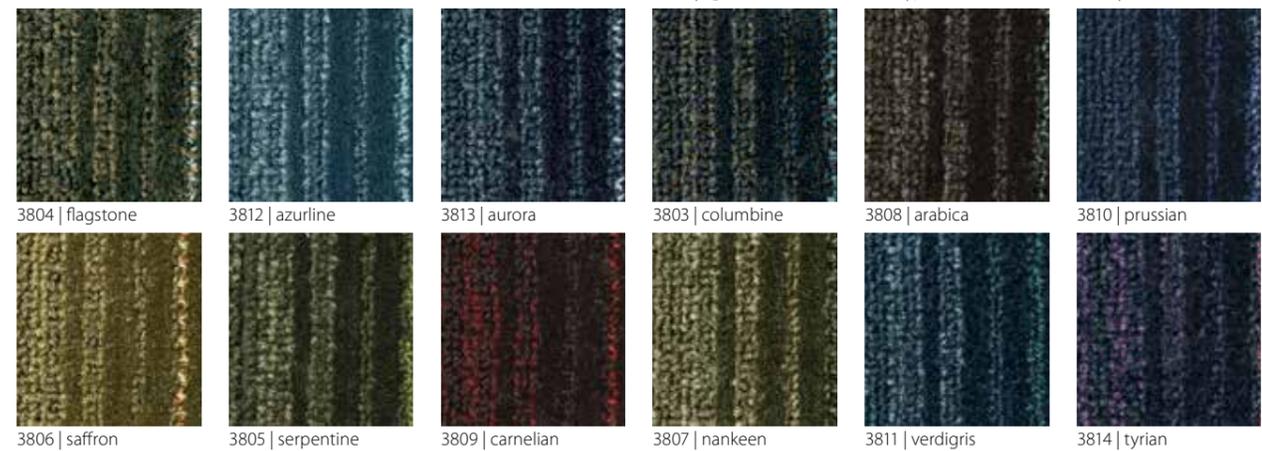

tessera® create space 3
cut & loop pile

3800

Featuring a luxurious velvet stripe design and contemporary palette of 15 colourways, Create Space 3 adds stylish and tactile interest to any size of flooring scheme.

Create Space 3 carpet tiles are designed to provide the maximum flexibility in any installation as they can be fitted in multiple options including broadloom, non-directional (reduces installation waste to less than 2%), tessellated or half drop. Each creates a very modern and individual aesthetic.

tessera® ethos
cut & loop pile

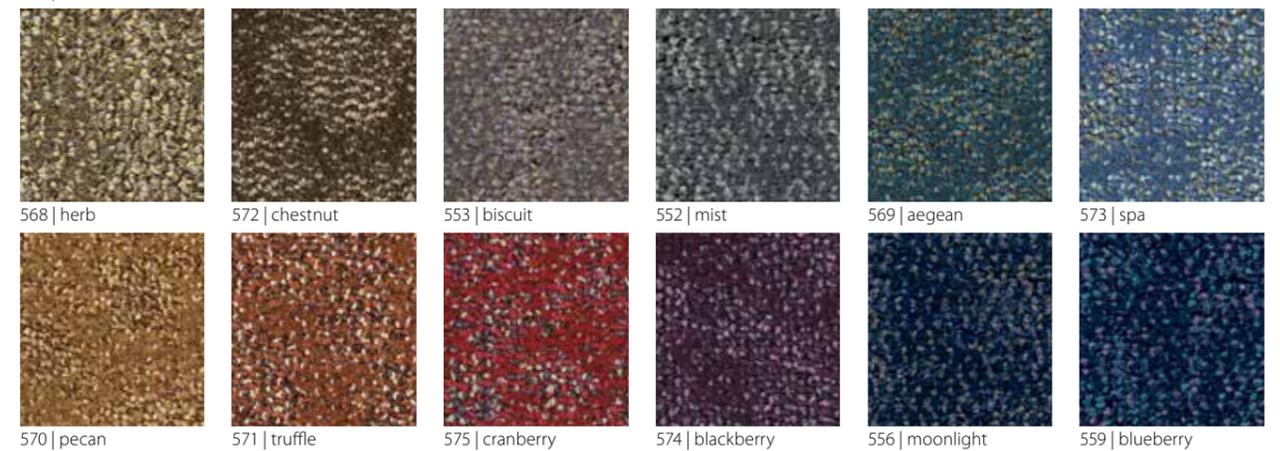

552

A textured loop pile carpet tile that has also been tip sheared, Ethos has a textured cut and loop effect that disguises tile edges beautifully and delivers a deceptive broadloom appearance. The cut and loop construction and the 800gsm pile weight combine to create a tile that will withstand the heaviest of foot traffic, making Ethos an ideal and practical solution for the busy office environment. The diffused visual pattern is created by a unique medley of solution-dyed yarns within the pile, ensuring that the 13 subtle colourations will not fade or dull over time, or through intensive cleaning.

tessera[®] acrobat
cut pile

Acrobat combines the sheer convenience, practicality and hardwearing features of a heavy contract carpet tile with the stunning appearance and tactile benefits of a traditional cut pile carpet.

Constructed from Invista Antron polyamide 6.6 yarn, with its generous pile weight and cut pile tufted construction, Acrobat offers superior underfoot comfort and a touch of luxury.

Following on from the success of our Tessera Layout & Outline 50 x 50 carpet tiles, we've extended the range with 100 x 25 cm planks to create even more possibilities for stunning floor designs. The collection consists of 14 sophisticated uni colours and 4 linear designs that offer endless possibilities to mix & match.

WESTBOND SOPHISTICATED FLEXIBILITY

Let the world inspire your creativity.

Realise it with Westbond.

Westbond carpet tiles are synonymous with total flexibility and sophistication. Blending yarns to order and manufacturing premium quality fusion bonded tiles in an almost infinite number of colourways, with no minimum order quantity. Westbond allows customers to take control of the process of designing luxurious, bespoke carpet tiles with exceptionally heavy pile weights for the most prestigious installations.

Fusion bonding is a sophisticated method of carpet tile manufacture where individual yarn pile is bonded onto the backing material to make an extremely dense and luxurious product.

Each tuft is individual and a high proportion of the yarn is in the wear surface providing a beautiful, rich velour carpet tile which gives an excellent broadloom appearance.

2 working days we'll send you a 'pom' that offers a realistic impression of the finished carpet tile. To create your own Flex combination, you can use our online Westbond Flex Creator WESTBOND FLEX CREATOR To stimulate your imagination, we have made a core collection of 30 Flex combinations, which are shown below.

westbond[®] ibond

The Westbond Ibond Naturals colour range is available in a variety of qualities including polyamide or wool, and pile weights up to 2400 g/m².

westbond[®] flex

Westbond Flex carpet tiles are the ideal solution for those seeking a truly individual look to the floor. Simply create your own Westbond Flex carpet tile by selecting up to 4 colours from the Westbond Ibond colour palette, or a colour you've created, and within

westbond[®] natural

Westbond Natural is a unique collection of commercial carpet tiles containing pure & natural undyed British wool. The range is the perfect answer to today's ecological concerns. The carpet tile backing minimises environmental impact through its use of up to 74% recycled materials and wool is a sustainable, natural and renewable resource.

westbond® blues

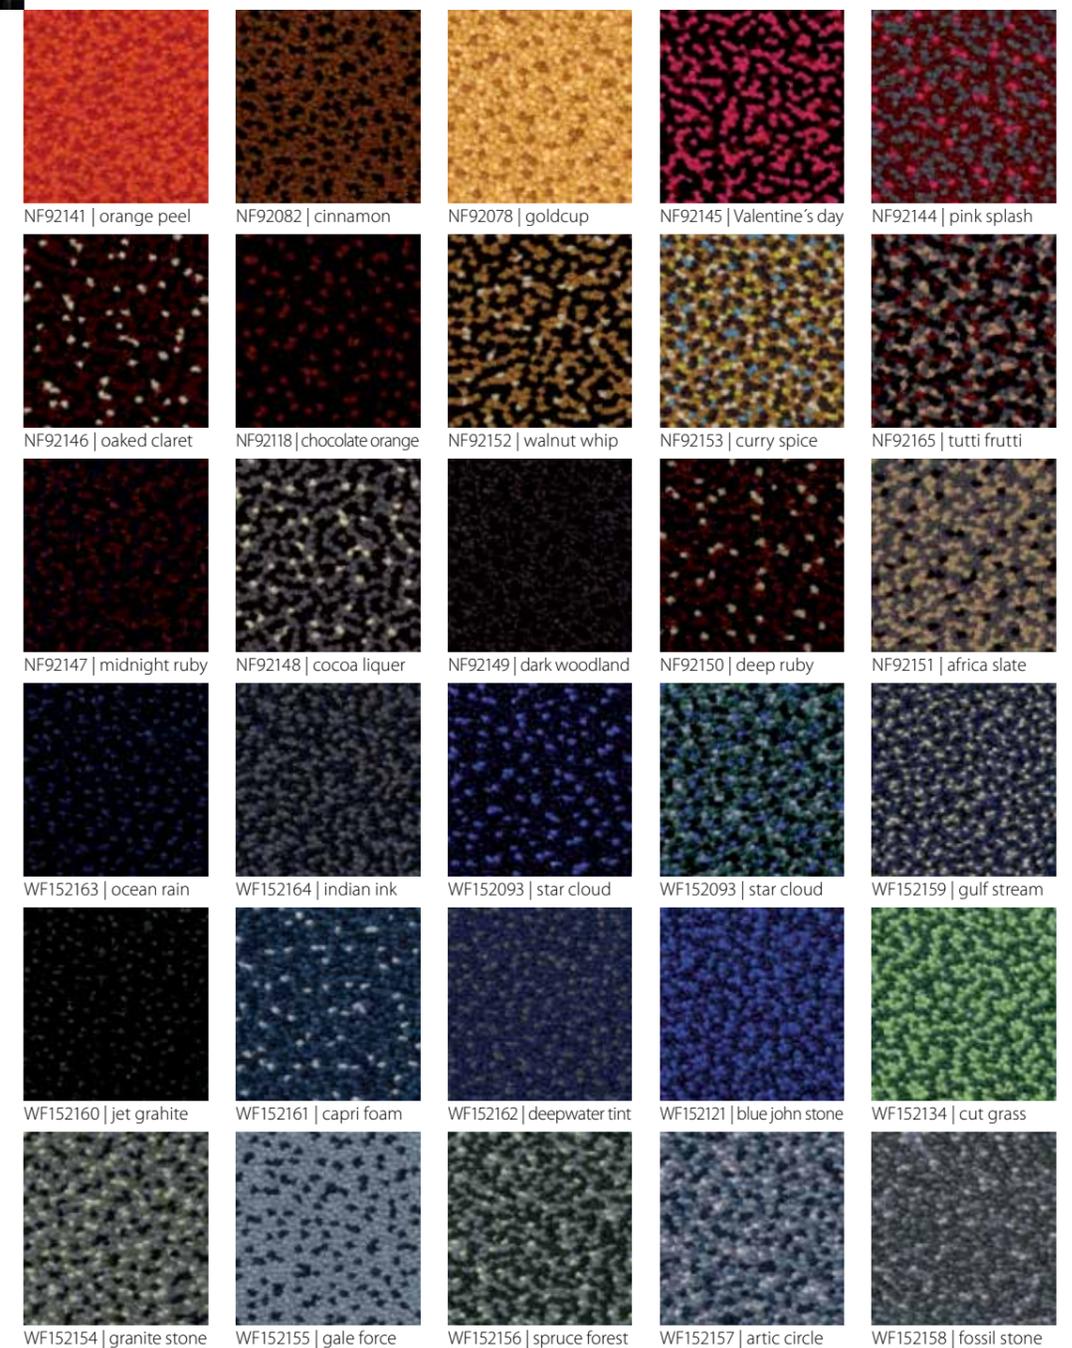

WF152164

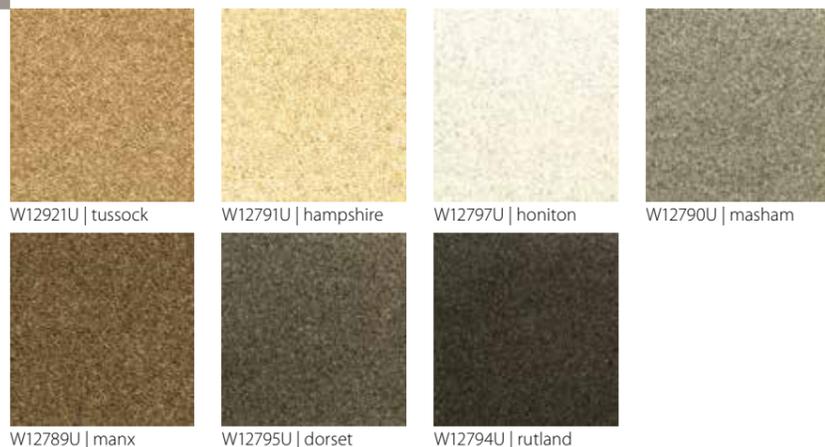

Westbond Flex carpet tiles are the ideal solution for those seeking a truly individual look to the floor. Simply create your own Westbond Flex carpet tile by selecting up to 4 colours from the Westbond Ibond colour palette, or a colour you've created, and within 2 working days we'll send you a 'pom' that offers a realistic impression of the finished carpet tile. To create your own Flex combination, you can use our online Westbond Flex Creator WESTBOND FLEX CREATOR To stimulate your imagination, we have made a core collection of 30 Flex combinations, which are shown below.

westbond® natural

W12790U

Westbond Natural is a unique collection of commercial carpet tiles containing pure & natural undyed British wool. The range is the perfect answer to today's ecological concerns. The carpet tile backing minimises environmental impact through its use of up to 74% recycled materials and wool is a sustainable, natural and renewable resource.

Technical specifications: **westbond®**

Westbond meets the requirements of EN-ISO 1307

		Westbond (Nylon)
Description		Fusion bonded cut pile carpet tile
	Dimensions	50cm x 50cm
	Total thickness	8.1mm ± 10%
	Pile height	5.0mm ± 0mm/-0.5mm
	Collection size	Any colour from 1m ² 4,5m ² per box
	Application	EN 1307 Class 33, Suitable for any type of heavy contract application
	Pile composition	100% polyamide 6.6
	Dye method	Hank dyed
	Stitch density	272,000 per m ² ± 10%
	Pile weight	950 gsm ± 10%
	Total weight	4,000 gsm ± 10%
	Primary backing	n/a
	Secondary backing	PVC incorporating at least 70% pre-consumer recycled content
	Castor chair use	BS EN 985:2001 Minimum R value: ≥2.4
	Light fastness	BS EN ISO 105 B02 ≥5
	Dimensional stability	BS EN 986 ≤0.2%
	Impact sound reduction	ISO 10140-3 (ΔL _w) 27dB
	Creating Better Environments	
	Renewable Electricity	All Tessera and Westbond carpet tiles are manufactured using 100% electricity made from renewable sources
	Recycled Content	Contains 43% recycled content by weight
	Indoor Air Quality	Westbond meets 01350 Indoor Air Quality standard
	Ska	Meets Ska Rating criteria for M12 soft floor coverings in both office and retail schemes
	Guarantee	10 years under heavy contract conditions Provided that they have been professionally fitted by a recognised contractor and regularly maintained in accordance with the Forbo requirements currently in force
	Installation method	Monolithic, tessellated or quarter turn

Tessera and Westbond carpet tiles meet the requirements of EN 14041

		EN 14041
	Reaction to fire	EN 13501-1 B _f -s1
	Slip resistance	EN 13893 DS: ≥0.30
	Electrical resistance	BS ISO 10965 & EN1815 <1 x 10 ⁹ Ω: Static dissipative. Body voltage: Pass (< 2kV). Lifetime protection through the use of permanent anti-static yarn and backing

Shades may vary from batch to batch and should be checked before installation. Except for Tessera Circulate, batches should not be mixed in the same location.

ROBUST AND INADVERTENTLY NEEDLEFELT

Needlefelt

The robust, hard-wearing properties of Needlefelt make it ideal for installations that meet high traffic or in those areas where chairs with castors are likely to be in use, such as in offices, administrative premises and retail establishments.

The textile look and typical range of colouring blend harmoniously and inadvertently into any interior-design scheme. Needlefelt carpet often provides a cost-efficient alternative to conventional broadloom carpeting in heavily-used areas that require a practical and durable textile-type floor covering. Forbo uses high quality polyamide fibres and a full latex impregnation for all its needlefelt carpets.

showtime®

This fine fibre needlefelt collection offers a large choice of uni colours which coordinate perfectly with the printed designs allowing the demarcation of individual spaces and the creation of different moods.

forte

Forte is the premium product in our needlefelt range, offering the maximum feeling of comfort that comes with a fibre weight of approximately 750 g/m². Forte is an impressive premium product. It is available in a range of 24 attractive colours. A very dense texture, with more than three million needle punches per square metre, guarantees a combination of attractive looks and hard-wearing performance for use in highly-frequented areas.

markant

Markant is a high-quality, coarse-texture covering made of 100% polyamide fibres, equipped with all the characteristics required for hard-wearing performance in frequently used places. Markant comes with a fibre weight of approximately 600 g/m².

akzent

Akzent is the value-for-money alternative and the only collection in the range that is made of a combination of 80% polyamide and 20% polypropylene fibres (fibre weight of 500 g/m²), which is nevertheless no lightweight when it comes to hard-wearing performance.

forte

96003

Forte is the premium product in our needlefelt range, offering the maximum feeling of comfort that comes with a fibre weight of approximately 750 g/m². Forte is an impressive premium product. It is available in a range of 24 attractive colours. A very dense texture, with more than three million needle punches per square metre, guarantees a combination of attractive looks and hard-wearing performance for use in highly-frequented areas.

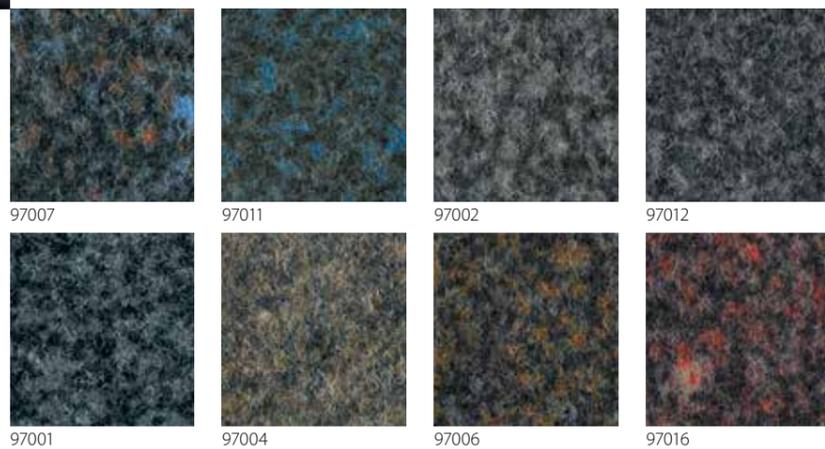

forte graphic reef

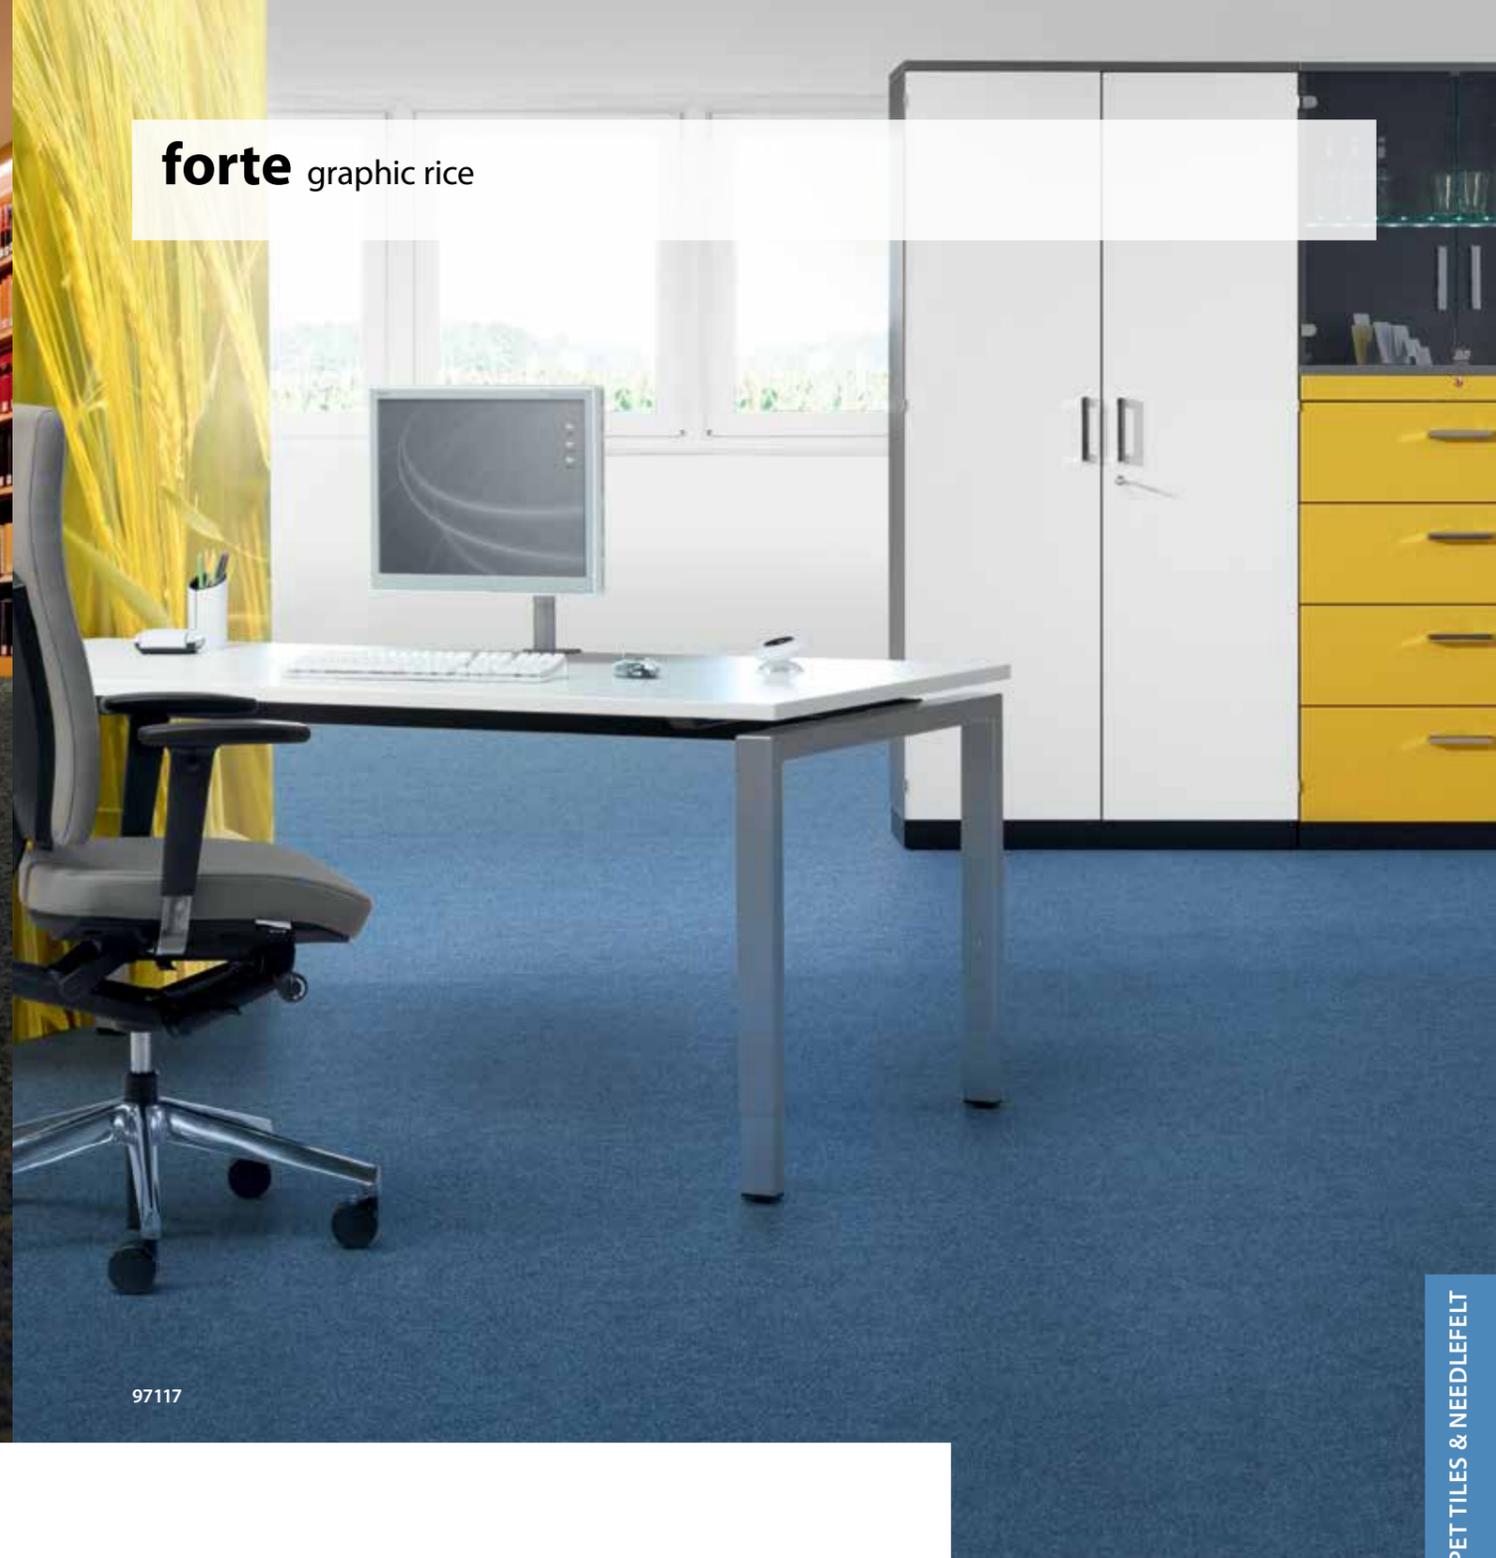

97006

Forte Graphic Reef provides the basis for this newly-developed print design, with colour contrasts that nevertheless work together in total harmony. The range of attractive colour shades shares the common element of varying grey background mottling.

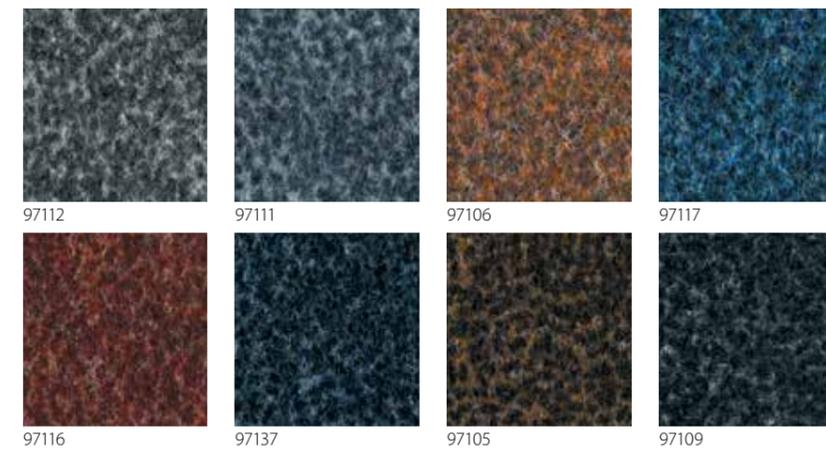

97007 97011 97002 97012
97001 97004 97006 97016

forte graphic rice

97117

97112 97111 97106 97117
97116 97137 97105 97109

The fine print design of this member of the Forte range accents the delicate texture of its textile-like finish. Forte Graphic Rice is available in 8 attractive colour shades.

markant

11117

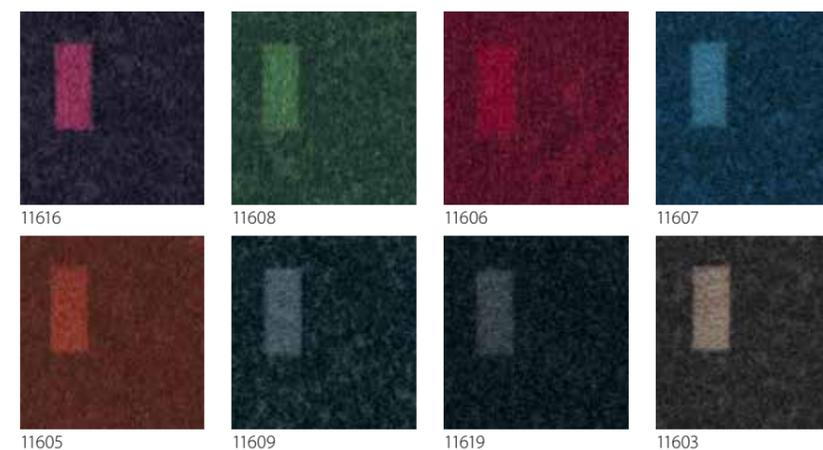

Markant is a high-quality, coarse-texture covering made of 100% polyamide fibres, equipped with all the characteristics required for hard-wearing performance in frequently used places. Markant comes with a fibre weight of approximately 600 g/m².

markant graphic city

11609

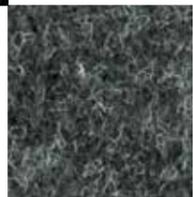

This modern print design, of Markant Graphic Rice as the basis, helps accentuate an interior designer's pure lines. The classical "box" pattern makes it especially suitable for use on large floor-areas.

ENTRANCE FLOORING SYSTEMS

3207

ENTRANCE FLOORING SYSTEMS

332 coral

Ever thought about slowing down or stop to wipe your feet when you walk into a store, an office, hospital clinic or school, or other public space? Chances are you don't. Most of us just stride on in, which is why it's important to install an entrance flooring product to keep the world outside, outside.

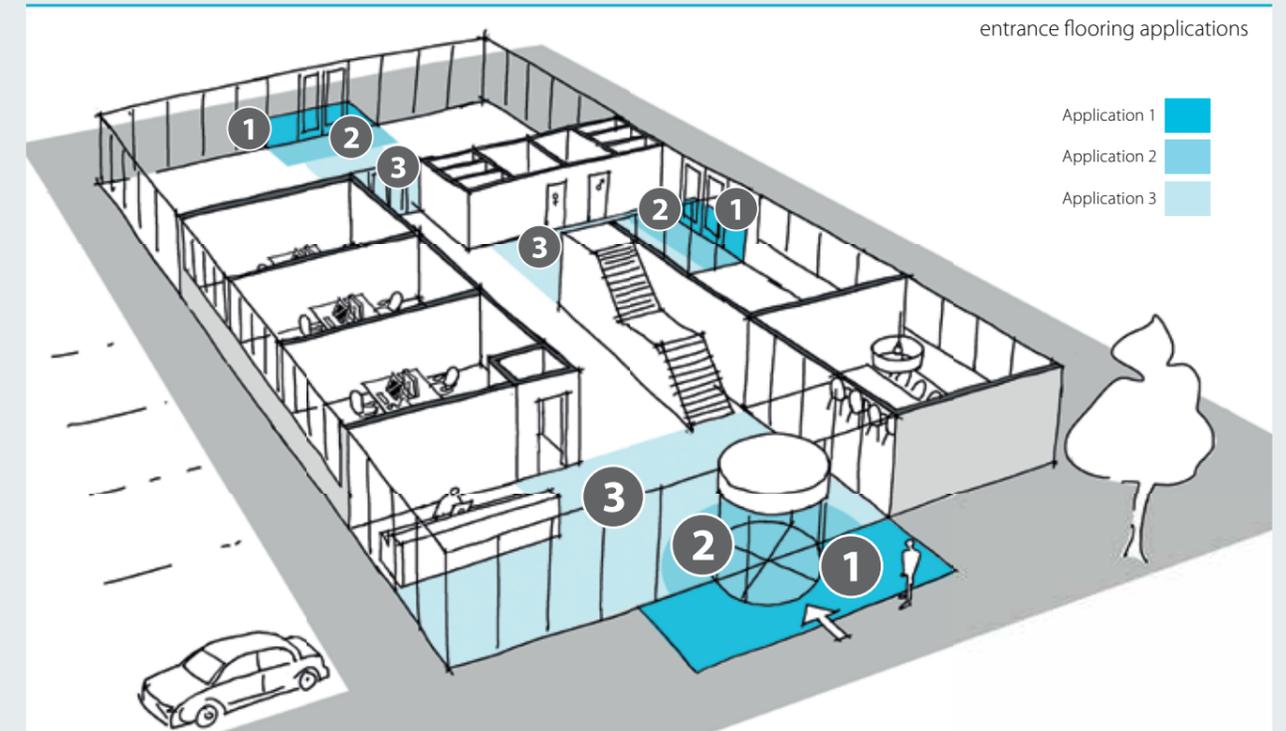

350 nuway

No entrance area is too big, too small or too awkwardly shaped for a Nuway rigid matting system. No level of traffic is too heavy and no level of soiling is too high. Whatever type of rigid engineered system you have in mind, Nuway's experienced sales and technical teams can guide you to a solution tailored perfectly to your needs.

CORAL ENTRANCE FLOORING SYSTEMS

THE FIRST STEPS IN PROTECTING YOUR BUILDING

ENTRANCE FLOORING STARTS OUTSIDE AND BRINGS YOU INSIDE

If you really want to keep your building clean and safe, it's not enough to just put down an entrance mat in front of the door. Creating a good entrance flooring system means thinking about footfall - the number of people walking in and out in a given period - and walking routes

(the directions they take once inside) and applying that information in the design of the entrance area. One of the best ways to plan an entrance flooring system is to think in terms of applications. The table opposite is designed to help you select which Coral entrance product best meets your needs.

Application 1: Outside use
Any matting placed outside the building entrance creates the first line of defense against feet-borne soil by scraping the coarsest dirt from the soles of shoes before they cross the threshold.

Application 2: Inside use
Moving inside, the next line of defense, is used to remove moisture and finer dirt particles from all feet entering the building.

Application 3: Other circulation areas
Other areas in the building also suffer from soil and moisture; reception areas, corridors, walkways to other parts of the building, elevators, staircase exits, etc. All these areas are prone to residual soiling and will benefit highly from a purposely designed Coral entrance floor to absorb this soiling.

Application	moisture removal	dirt removal	ECO	33

95%

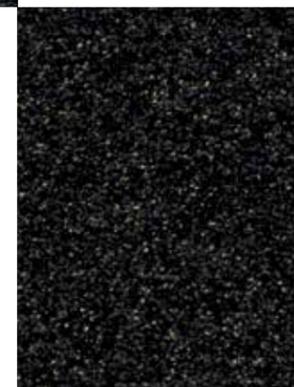

6 metres of Coral can stop up to 95% of dirt and moisture entering a building.

Coral Luxe is particularly designed to enhance the aesthetic appeal of entrance lobbies, corridors and reception areas. Because of its luxurious look and feel, this deceptive soil and moisture barrier blends particularly well with other carpeted areas of the building.

- Rich and elegant appearance
- Comfortable and soft feel
- Offers effective moisture and soil absorption
- Dries quickly for maximum functionality
- Complies with the highest fire class standard: B_{fl}-s1
- Suitable for light industrial use and private applications
- Ideal for circulation areas
- Produced with phthalate free technology

Even wachten tot andere deur gesloten is

3208

Primary backing is made from recycled PET bottles

With its contemporary linear design and rich, deep pile, Coral Welcome packs the style and aesthetic appeal of a luxury carpet. But Coral Welcome is more than just a fabulous looking floor covering – it's an environmentally advanced one as well. The secret lies in its use of Econyl® yarn, which is made from regenerated industrial and postconsumer waste. In the creation of Econyl® products our supplier is waste positive, which means the amount of waste removed from the earth is greater than the amount of waste resulting from production. On top of that, the production has a low environmental impact because we limit the consumption of natural resources and energy to a minimum.

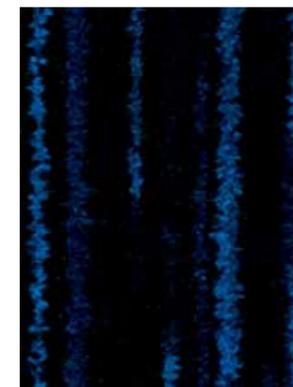

- Made with Econyl® 100% regenerated yarns
- Primary backing made from recycled PET bottles
- Produced with phthalate free technology
- Keeps out moisture and dirt
- Complies with the highest fire class standard: B_{fl}-s1
- Suitable for the toughest commercial use
- Ideal for inside entrance and circulation areas

coral® brush

5709

Coral Brush is suitable for all types of entrance areas, absorbing moisture and removing dry soiling as the weather demands. Created around simple, solid colours, this collection works well with any interior design, serving as eye-catcher or self-effacing support for the rest of the floor design.

- Good all-rounder that keeps out moisture and dirt
- Made with Econyl® 100%-regenerated yarns
- Appealing colours complement every floor
- Complies with the highest fire class standard: B_{fl}-s1
- Suitable for the toughest commercial use
- Ideal for inside entrance and circulation areas
- Produced with phthalate free technology

Many Coral ranges are available with an FR version for fire sensitive areas.

TWO SIMPLE STEPS ARE ENOUGH FOR CORAL CLASSIC TO ABSORB...

1 ...up to half the water that would otherwise be carried inside.

2

Research shows that taking just two steps on Coral Classic's moisture absorbing yarns is enough to absorb half of the foot-borne moisture that would otherwise be carried inside on the soles of people's shoes. A few steps more and your feet are as dry as possible. This has clear benefits. First, the floor coverings further inside stay cleaner, longer. Second, resilient floors like vinyl, linoleum, wood and concrete are less likely to become slippery and dangerous.

- Maximum moisture absorption and scrapes off dirt
- Choice of attractive contemporary colours
- Maximum colour fastness
- Complies with the highest fire class standard: B_{f1}-s1
- Suitable for the heaviest commercial and light industrial use
- Ideal for inside entrance and circulation areas
- Produced with phthalate free technology

coral[®] duo

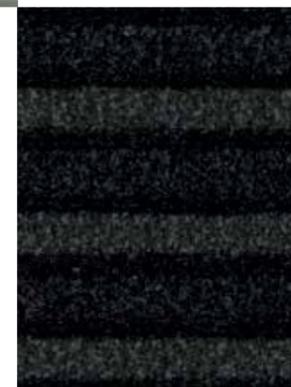

9727

Many Coral products use Econyl[®] yarn which is made from used and abandoned fishing nets.

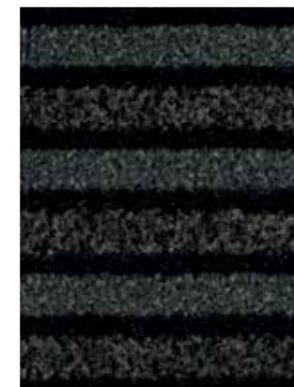

Coral Duo is the go-to solution when you need maximum dirt removal, unrivalled dirt retention and exceptional moisture absorption all in the short distance of just a couple of paces. Research has shown that Coral Duo retains 10% more dirt in the first few metres than any other textile entrance flooring solution on the market.

- Excellent solution for every entrance
- Made for 75% with Econyl[®] 100% regenerated yarns
- Produced with phthalate free technology
- Unbeatable performance on both moisture and dirt
- Complies with the highest fire class standard: B_{fl}-s1
- Suitable for the toughest commercial use
- Ideal for inside entrances with limited entrance floor space

Don't start your entrance floor protection inside, start outside – by scraping off the largest soil particles before your visitors even cross the threshold. Coral Grip is a versatile, non-woven clean off barrier mat for outdoor and indoor use that comes in medium duty (MD) and heavy duty (HD) formats.

Standard Coral Grip has an open, non-backed, pervious structure, though it can also be manufactured with an Everfort vinyl backing to make it impervious.

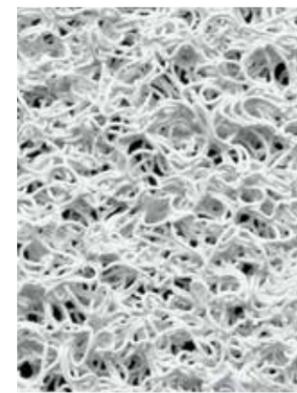

- Contains granulates for maximum non-slip performance
- Cleans off the worst dirt before it can get inside
- Helps protect an inviting interior design street-side
- Suitable for the heaviest commercial use
- Ideal for outside and inside entrance

Forbo has the capability to offer a bespoke print or cut-out design service that can be tailored to your precise design specification, offering individuality and a unique point of difference. Our Coral Logo collection offers a wide range of bright attractive colours. Depending on the colours and design of your corporate identity, you can choose between a printed mat or one with a cut inset logo. The Coral Logo collection is designed to the same standards as all other Coral products, which means it will retain its looks whilst keeping out dirt and moist for years to come.

Re-use waste. All the waste yarn from Coral production is re-used by the yarn supplier.

Printed logo mat

- Excellent visual quality and bright, attractive colours
- Perfect for complicated designs featuring multiple colours
- Choose from any of the colours shown plus Pantone and RAL colour matching
- Stays flat on the floor, causing less trips, due to heavy vinyl backing
- Long lasting and high resistance to sun light
- Excellent performance in removing dirt from your shoes
- Produced with phthalate free technology

Cut inset logo mat

- Ideal for extreme traffic conditions and maximum functional performance
- Choose from any colour from the standard Forbo Coral collection for the base background and logo colours
- Excellent performance due to use of Coral quality products
- Easy to combine as inlay in larger Coral installations
- Produced with phthalate free technology

NUWAY ENTRANCE FLOORING SYSTEMS

Nuway

The recognised market leader in engineered entrance flooring systems, Nuway matting has been efficiently removing dirt, grit and moisture from the soles of shoes and tyre treads in heavily trafficked entrance areas for over eighty years. No entrance area is too big, too small or too awkwardly shaped for a Nuway matting system. No level of traffic or soiling is too high. Whatever type of rigid engineered system you have in mind, Nuway's experienced sales and technical teams can guide you to a solution tailored perfectly to your needs.

The tough and durable rigid engineered mats can be integrated seamlessly into your interior design scheme and once installed appear to be part of the fabric of your building. They can be supplied to meet every conceivable aesthetic and technical specification, with an almost infinite range of designs, colour ways, sizes and constructions available for internal and external entrance areas. They can also be teamed up perfectly with Coral textile entrance matting to create stunning fully integrated, colour coordinated entrance areas.

nuway[®] tuftiguard

At the heart of the Nuway range, the standard Tuftiguard entrance mat is the most widely used rigid engineered entrance mat. It has the durability, strength and structural integrity to deliver excellent performance and appearance retention in very heavy traffic locations and where high levels of soil have to be removed from the soles of shoes and wheeltreads.

Each Tuftiguard mat is assembled according to the client's individual specification using their chosen combinations of aluminium (100% recycled), brass or PVC scraper bars, and buffed or unbuffed prime

rubber and polyamide fibre composite wiper strips. These wiper strips and PVC scraper bars are offered in a wide range of colours, enabling the Tuftiguard mat to be perfectly coordinated with a Coral clean off system or other surrounding floor finishes. The wiper bars and scraper strips are assembled in an open or closed construction with high tensile electro galvanised steel wire linkages running through the components to give the mat its structural integrity and superior load bearing capacity.

Linkages:

High tensile steel linkages give the system an engineered, constructional integrity.

Scraper bars:

As the name suggests scraper bars literally scrape soil from the traffic crossing the entrance system.

Wiper strips:

Wiper strips can be specified in both single and double format. Double offers twice the wiping area to increase moisture absorption over a shorter distance.

Reversible:

Tuftiguard are double sided mats which can be reversible, effectively doubling their lifespan.

Options available:

Height

Standard Tuftiguard mats incorporating aluminium and PVC scraper bars are available in 12mm and 17mm heights to suit the size of the matwell. Mats incorporating brass scraper bars are available in 17mm height only.

Wiper strips

Tuftiguard wiper strips can be specified in both single and double format. Double format offers twin wiper strips to increase moisture absorption over a shorter distance and enables more colour to be used to reflect the interior colour scheme. If the Nuway entrance system extends less than 3m into the building, we recommend that an entrance with double wiper strips is used.

Closed construction

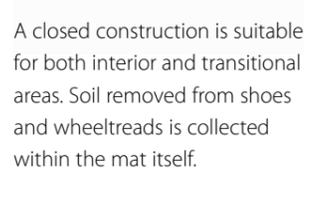

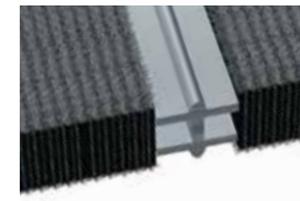

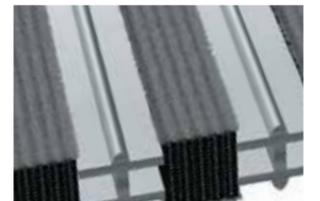

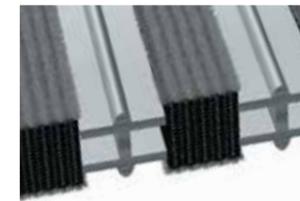

A closed construction is suitable for both interior and transitional areas. Soil removed from shoes and wheel-treads is collected within the mat itself. The gapless nature of the closed construction allows for maximum use of coloured wiper strips to complement interior design schemes.

Open construction

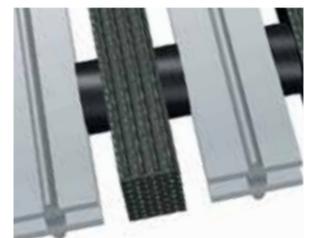

An open construction provides more storage capacity for wet and dry soil and is therefore particularly suitable for external use. Removed particles and moisture can fall through the open sections in the mat to be collected in the matwell.

Mix and match

As Tuftiguard is produced in modules to individual specifications, a single section of matting may contain any number of different combinations, including open and closed constructions, single and double wiper bars, unbuffed and buffed finishes, featuring any combination of colours.

Wiper strips can be specified in both single and double format. Double offers twice the wiping area to increase moisture absorption over a shorter distance.

An open construction provides more storage capacity for wet and dry soil. Removed particles and moisture can fall through the open sections in the mat.

nuway[®] tuftiguard HD

Nuway Tuftiguard HD is the ideal matting solution for all internal and external entrance areas where heavy duty loads and intense pedestrian and/or wheeled traffic need to be catered for.

Matting placed outside will defend against soil and the coarsest of foot-borne dirt. Inside it will defend against foot-borne moisture and finer dirt particles.

The location, type and level of traffic affects the choice of product. Tuftiguard HD is suitable for very heavy and intense traffic areas and for entrances with high point loads up to 900kg/cm²

Nuway Tuftiguard HD is double sided which means it can be reversible where the configuration of the entrance mat allows, effectively doubling its lifespan.

Nuway Tuftiguard HD offers products suitable for both internal and external entrances.

nuway[®] flameguard

Suitable for internal and external use, Nuway flameguard is specifically designed for particularly fire sensitive areas such as underground railway stations. Nuway Flameguard is suitable for both internal and external entrance applications. Flameguard is double sided which means it can be reversible where the configuration of the entrance mat allows, effectively doubling its lifespan.

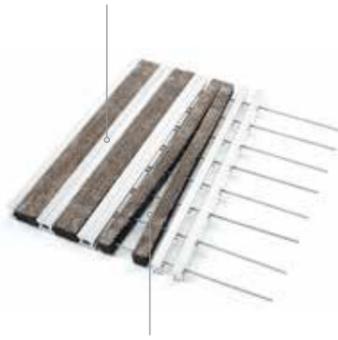

Linkages:

High tensile steel linkages give the system an engineered, constructional integrity.

Scraper bars:

As the name suggests scraper bars literally scrape soil from the traffic crossing the entrance system.

Wiper strips:

Prime rubber and polyamide fibre composite provides optimum removal of dirt and moisture.

Reversible:

Nuway Tuftiguard HD is double sided which means it can be reversible where the configuration of the entrance mat allows, effectively doubling its lifespan.

nuway[®] grid

Nuway Grid is a contemporary alternative to Nuway Tuftiguard and is ideal solution in very heavy traffic entrance areas where aesthetic considerations are paramount. Grid is also easy to shape on site.

Every Nuway Grid mat features 100% recycled, extruded aluminium interlocking carrier sections for durability, with infill strips joined together by rubber double connecting strips. The aluminium sections have a low-lustre anodised finish to comply with DDA requirements. Grid is constructed to spread heavy loads and to offer long lasting effective performance in demanding locations. The carrier sections can be coupled with infill materials providing maximum design flexibility, allowing beautifully colour co-ordinated entrance areas to be created with primary and secondary entrance matting products that are perfectly matched. These materials include strips of textile infill in 13 different colourways drawn from the Coral classic and brush activ ranges. Other textile inserts from the Coral range are available to special order. Rubber inlays are also available, which allow grid mats to be used outside.

	Nuway Grid rubber	Nuway Grid textiel
Indoor application	✓	
Outdoor application		✓

Scraper bars	Aluminium and brass	
Aluminium height	12 mm or 17 mm	12 mm or 17 mm
Inlay height	14 mm – 23 mm	14 mm – 23 mm
Mat construction	Closed	
Dirt removal	✓	✓
Moisture absorption		✓
Guarentee	5 year	
Level of traffic	Very heavy	

Component structure:

Inserts:

Extensive choice of standard inserts includes a selection of thirteen different textile inserts from the Coral classic, brush activ and burford ranges and rubber inserts (for exterior entrances).

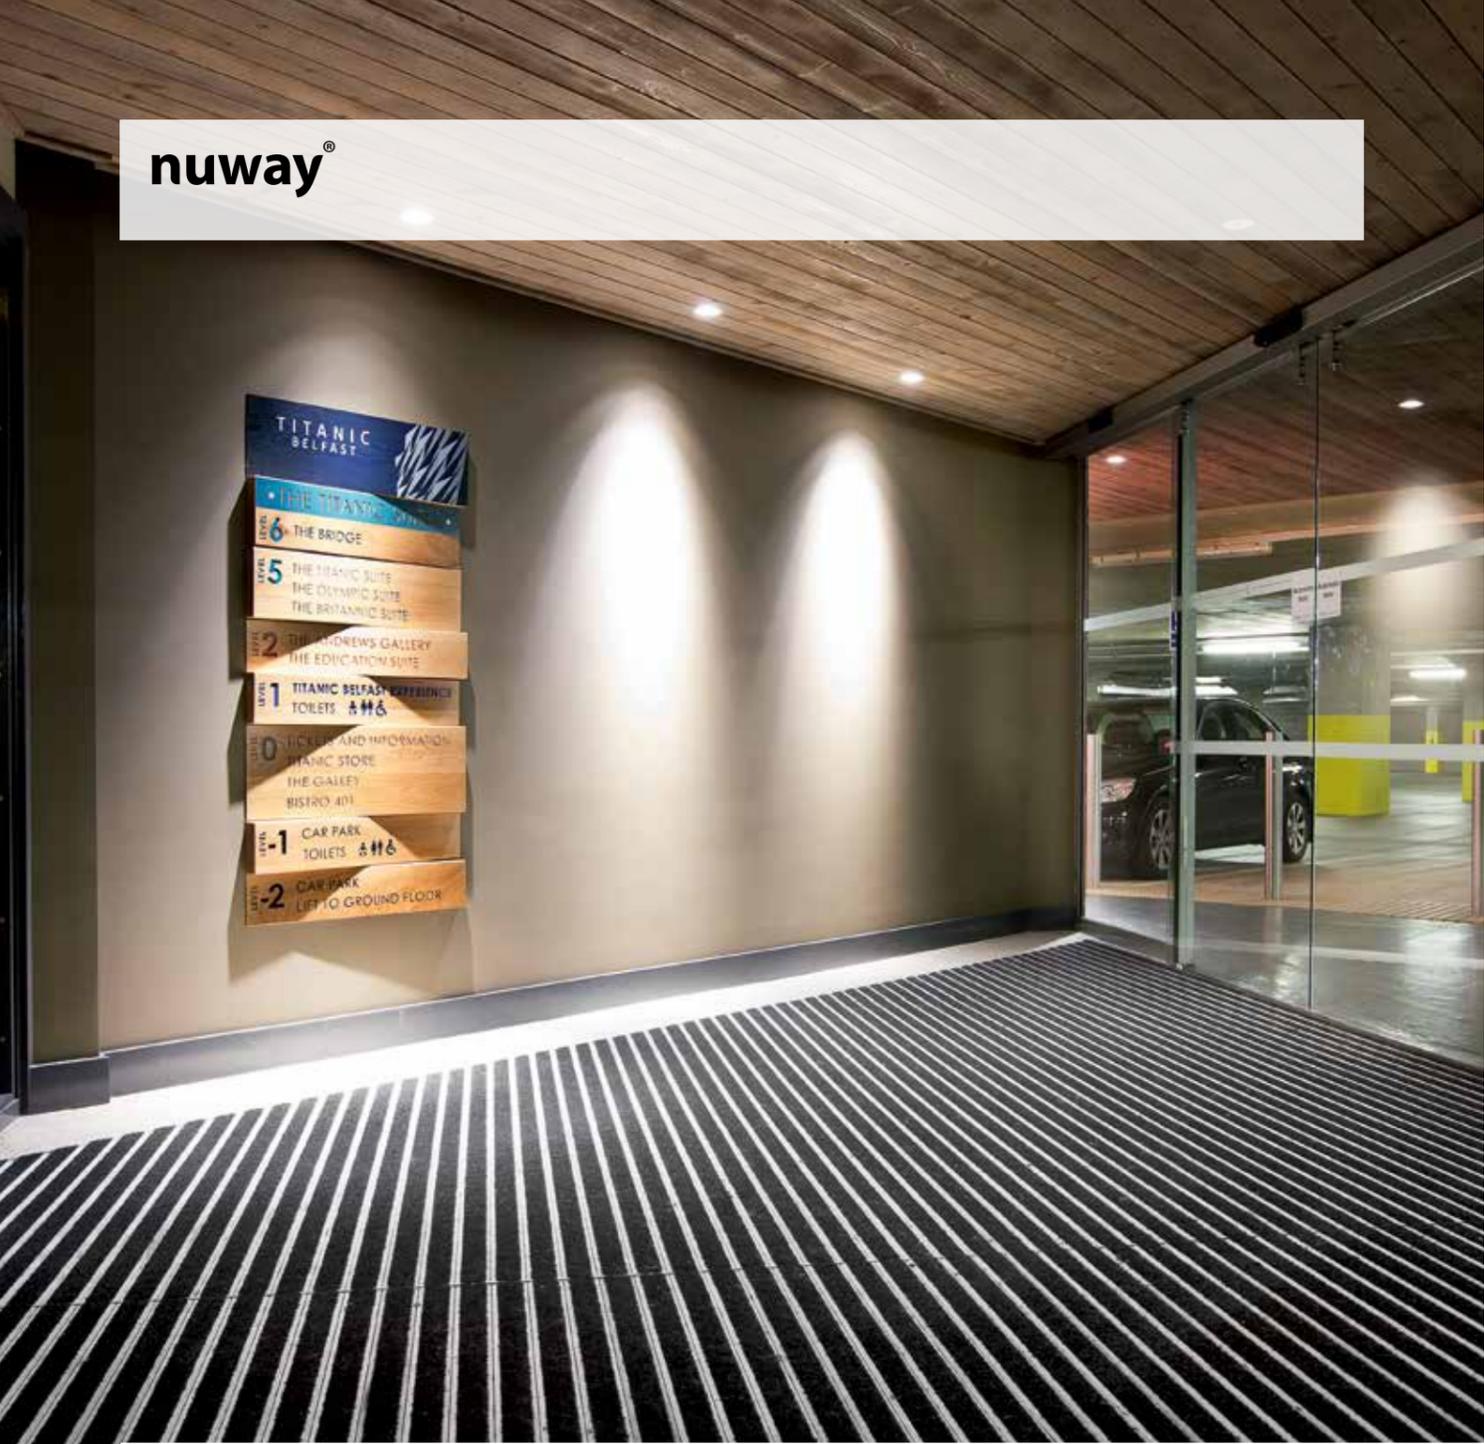

Carrier section:

Low lustre anodised finish complies with DDA requirements as detailed in the Equality Act. Patented crimping action firmly secures textile or rubber insert within the carrier section.

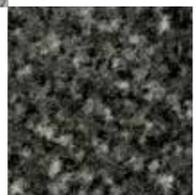

Considerations

As with all aluminium matting systems of this type, in very brightly lit entrances, the strong contrast between a light aluminium carrier and a dark coloured insert can sometimes create a strobe effect which should be prevented. To avoid disorientating pedestrians affected by this type of visual disturbance, consider using a less contrasting insert.

If you are considering using rubber inserts for an exterior mat in an exposed entrance we recommend using a combination of rubber and bristle or Ultragrip rubber for maximum slip resistance.

Coral Brush Pure

nuway® cable

Nuway cable is a versatile roll-up single sided entrance system that's available with a wide choice of inserts and accessories. It's also available in a MD format for areas that need a more robust single sided mat.

With a wide choice of inserts, Nuway cable allows the mat to be adapted to suit individual requirements. Bristles are available in single or three row options and they, along with the scraper accessory, can be used for exterior and interior entrances to remove coarse dirt. Rubber inserts are available for use in exterior entrances.

For the internal primary matting zone, Cable is available with a choice of four Coral classic inserts which allows the rigid entrance system to be colour co-ordinated to matching Coral classic sheet product used in the secondary matting zone. All four elements, Coral, bristles, scraper and rubber, can be mixed and matched to create the precise entrance system to meet your needs.

Cable is also available in a wide choice of heights from 10mm depth to 22mm with the 22mm option also available in a medium duty format. Open construction Cable mats can be rolled up for ease of cleaning of the matwell. Due to the construction of the mat, Cable mats are unsuitable for shaping on site.

Specials

There may be times when different colourways are needed. Different colours are available at a small price premium, but there is a minimum order quantity of 10m² and the lead time will increase slightly.

nuway[®] connect

Nuway Connect is a very versatile roll-up single sided entrance system that's easy to shape on site, making it ideal for awkwardly shaped entrances. It's also available with a wide choice of inserts allowing the mat to be adapted to suit individual requirements.

- Bristles can be used for exterior and interior entrances to remove coarse dirt.
- Rubber inserts can be used for interior and exterior use.
- Ultragrip rubber inserts have been tested using the Pendulum (the HSE recommended test method) in accordance with BS7976-2 and the UK Slip Resistance Group Guidelines and offer a low slip risk in wet and dry conditions.
- Ultragrip rubber offers excellent sure footing and is ideal for multi-directional entrances. Its high rubber content prevents it getting slippery when wet.
- Ultragrip rubber offers improved underfoot comfort and moisture removal due to its 'pocket' design. It also offers excellent fire rating properties.
- A choice of 6 Coral classic inserts allows colour co-ordination with matching Coral classic sheet product used in the secondary matting zone.
- All four elements, Coral, bristles, rubber and Ultragrip rubber, can be mixed and matched to create the precise entrance system to meet your needs.
- All inserts can also be replaced on site helping to extend the wear life of the product.
- Available in a wide choice of heights from 10mm depth to 22mm and in open or closed construction.
- Open construction Connect mats can be rolled up for ease of cleaning
- The patented product design ensures that the mat can only be rolled inwardly, helping to prevent the bow wave that can occur on other rollable products.

Material and manufacturing method	Anodised aluminium profiles with PVC connector profiles, stainless steel clips											
Wiper design	Ribbed rubber						Coarse rubber					
Wiper material	100% EPDM						Rubber					

Our footprint

How it's made

marmoleum®
is made from
97%
natural materials

100%
of tessera®
carpet trim is
reused in the UK

43%
recycled
content in
marmoleum®

<45%
recycled content in the
backing of our vinyl ranges

coral® welcome
primary backing
is made from
recycled pop
bottles

59%
recycled content
in **flotex®** tiles

100%
of aluminium
used in
nuway® tuftguard
is recycled

100%
of aluminium and
steel waste from our
nuway® production
is recycled

50+%
recycled content in all
tessera® carpet tiles
made in the UK

>70%
recycled content in
the backing of
westbond™
carpet tiles

All Forbo products
are made with
100%
Renewable
electricity

tessera®
allura and
flex Ultrasonic
cutting reduces
waste by
80%

100%
of **westbond™**
carpet trim
recycled in the UK

westbond™
natural carpet tiles
are made from undyed
wool from British sheep

THE CAMPAIGN FOR WOOL
PEOPLE LOVE THE PRINCE OF WALES

Save a Sample and reduce
the amount of virgin
material
used

Econyl® yarn made
from abandoned
fishing nets

All
our plants are
certified to
ISO 14001

Patron of
**Outward
Bound**
charity

65%
reduction in
cleaning costs
when **coral®**
is installed

94%
of dirt and moisture
can be kept outside
the building with
coral®

topshield²
reduces scuffing
so less cleaning

Our innovative
random-lay carpet tiles
reduce fitting waste
to less than
2%

marmoleum®
is biodegradable
in a controlled
environment

flotex® releases
twice as many
allergens on cleaning
than standard carpet

100%
of our packaging
is recyclable

marmoleum®
inhibits the growth
of MRSA, C Difficile
and other bacteria

50% LESS
CO₂ emissions
from **marmoleum®**
than other resilient
floor coverings

nuway® tuftguard
mats are reversible,
effectively doubling
their life

flex design
tiles can be easily
removed to recycle at
the end of their life

marmoleum®
and **flotex®**
are approved
by Allergy UK

back to the floor
recycling
Forbo's flooring

We work with Carpet
Recycling UK to clean,
reuse and recycle old
carpet tiles in the UK

Your footsteps

How it performs

Forbo Flooring Systems is part of the Forbo Group, a global leader in flooring, bonding and movement systems, and offers a full range of flooring products for both commercial and residential markets. High quality linoleum, vinyl, textile, flocced and entrance flooring products combine functionality, colour and design, offering you total flooring solutions for any environment.
