MOVEMENT SYSTEMS

Siegling – total belting solutions

BELTING NEWS - ISSUE 28

Dear Readers,

At Forbo, sustainable solutions take center stage. Which is why we're delighted to present two major innovations. Firstly, we're growing our Transilon ECOFIBER portfolio, which is now also suitable for the food industry. The belts with tension members made of recycled PET mean a better energy footprint. Secondly, we've commissioned new photovoltaic systems at the Wallbach and Garbsen sites – a further step towards green production. You can read all about these stories and much more in our newsletter. We hope you have fun reading it.

Kind regards,

Your Forbo Movement Systems team

NEW SUSTAINABLE CONVEYOR BELT FOR THE FOOD INDUSTRY

By growing our Transilon ECOFIBER portfolio, we're helping you to improve your energy footprint and actively protecting the environment. The new conveyor belt with tension member fabric made from recycled PET was custom developed for the food industry and has all the relevant approvals. Its clever design makes it ideal for many other industries.

MAXIMUM FOOD SAFETY WITH TIMING BELTS

In the food industry's hygiene-critical environments, timing belts need to meet exacting demands. Forbo Movement Systems has responded with its new Food Line timing belts. This series meets current FDA and EU/EC regulations and stands apart for its

first-class surfaces.

QUIET CONVEYOR BELT FOR EFFICIENT CONVEYING

Legislation worldwide stipulates compliance with noise exposure limits in workplaces and public spaces. OEMs are particularly interested in components such as conveyors that produce as little noise as possible. The new PVK125LN LRxFS-NA low-noise conveyor belt is an innovative solution for companies that need quiet and reliable conveyor technology.
