Marmoleum Fresco
3860 | silver shadow

Fresco

Fresco has a strong palette of subtly blended tone-on-tone items each creating a fresh, delicate and balanced aesthetic. The soft contrast of its refined marbled structure gives a gentle feel which sets the stage for calm and soothing interiors. The softness of Fresco enables it to sit well next to all Marbled as well as Striato items.

Real

Real is our classic blend, consisting of many carefully selected individual color tones that combine to create beautifully graded colors, from warm neutrals and calm greys to exciting brights and fashion shades. Developed to create choice, Real can be mixed together or combined with other Marmoleum designs to provide more imaginative compositions.

Terra

Our most recently developed blend is Terra. A close, tight and highly contrasting structure inspired by igneous rock types. Terra combines a sophisticated small-scale marbled structure with great soil hiding properties. Terra offers an authentic color mix creating an effect that is very versatile and combines well with other items in the Marmoleum collection. Terra's good appearance retention makes it ideal for use in high traffic areas and provides a natural feel to any environment.

Vivace

Vivace is our liveliest and most outspoken blend made with six to eight colors. The differentiated elements combine to create a chameleon-like product that adapts well to a multitude of interiors, coordinating easily with many other surface finishes and colors. The high-contrast construction of Vivace makes it a smart choice in areas prone to soiling where the superior appearance retention of the product is valued.

Splash

Marmoleum Splash is a new design in Forbo's Marmoleum portfolio. From a distance Splash appears light grey with a slight nuance in tone, yet from up close Splash is an overall light grey with hints of surprising colors peeking through. This modern and playful design is ideal for use on its own but can also act as a connector between the more classic marbled and uni-patterned visuals in the collection.

Concrete

The solid marble design of Marmoleum Concrete differentiates itself from the classic Marmoleum flooring with its subtle stone-like structure. The color palette is neutral with warm tones and cool modern concretes, yet with an extension of 6 bright colors for creating a powerful accent in your floor design.

Piano

Piano is the Italian word for gently, plain, smooth or soft. In our Marmoleum Piano design a subtle soft fiber feel is combined with a plain background creating a semi-plain design with dirt hiding properties.

Our Piano flooring is the perfect alternative for those who love the minimal and plain aesthetics of our Walton range but require soil hiding properties.

Marmoleum Slate
e3745 | cornish grey

Slate

Inspired by the natural texture of stone, Marmoleum Slate introduces a unique embossed texture that adds a new dimension to our Marmoleum flooring. The result is a surface that has the timeless aesthetic of stone with the warmth and purity of linoleum.

The slate look is sophisticated and refined and plays with the light making your floor come to life.

Marmoleum Striato
3573 | trace of nature

Striato

The Marmoleum Striato collection presents an exciting range of linear designs in contemporary neutrals to allow the floor to act as a backdrop to everyday modern interiors.

Striato Original and Striato Textura both respond to the trend for tactility and tonal finishes, Striato Color emphasis the bright and striking interiors that can be created using Marmoleum.

ACOUSTIC SOLUTIONS

Sound is noise pollution and it can have adverse effects on the human body such as sleeping disorders, stress, headaches, memory loss, aggressiveness and learning difficulties. In fact, the fight against noise is a question of public health, as well as keeping our surroundings comfortable and quiet. That's why acoustic performance is essential when designing a new building or refurbishing an existing one.

A materials impact on acoustics can be measured by how well it can lower background noise levels, serve as acoustical insulation, and reduce the transmission of impact sound, such as footsteps. Marmoleum can help to improve communication, block unwanted sounds, and lower overhead noise.

Marmoleum has one of the highest Noise Reduction Coefficients (NRC) for resilient flooring (sound absorption), provides excellent Sound Transmission Class (STC) (sound insulation) and can achieve an Impact Insulation Class (IIC) over 60 (Marmoleum Decibel six in slab with drop ceiling) reducing foot falls.

marmoleum® decibel
made to order

Marmoleum Decibel provides the highest impact sound reduction of 18dB. This sustainable acoustic flooring consists of 2.5 mm Marmoleum laminated onto a 1 mm layer of polyolefin foam. Marmoleum Decibel "made to order" allows the use of any color or structure in Marmoleum possible. Minimum order quantities and lead times apply. Please contact your local sales representative for more information.

Also available from stock in 14 colors selected from the Marmoleum Marbled collection and 13 colors from Marmoleum Concrete, please check with customer service for lead time. Visit www.forboflooringna.com for the full range of colors.

DEFINING NATURAL SPACES

Marmoleum allows you to bring the beauty of nature into your interior environment with warm, tactile surfaces, rich color palettes and natural light reflection properties. Available in a broad palette of colors and structures, ranging from soft and subtle to vibrant and bold, Marmoleum helps set the mood and define spaces intended for work, play and rest. Marmoleum's patterns and textures can be used alone, or effortlessly combined with other structures such as wood and stone for endless design possibilities. Marmoleum's natural matte finish minimizes glare and reduces eye strain, while allowing natural light into the space for a welcoming connection with nature.

BENEFITS OF MARMOLEUM

Ergonomics

Marmoleum provides the necessary stability and traction for comfortable foot traffic. Marmoleum offers low resistance to wheeled traffic, providing easier navigation while helping reduce pains and strains related to pushing and pulling when compared to other flooring types.

Infection Control

Marmoleum's ability to inhibit the growth of bacteria stems from the natural raw materials that go into its production. An inherent property of the product, the bacteriostatic qualities of Marmoleum won't diminish over time, giving peace of mind and constant protection from the moment it is installed.

Marmoleum is a supplement to and not a substitute for standard infection control practices and has been shown to reduce microbial contamination*, but does not necessarily prevent cross contamination or infections; users must continue to follow all current infection control practices.

*Based on Independent Laboratory Testing

Non Heat welded Marmoleum

Marmoleum, which is naturally PVC and Plasticizer free, no longer requires heat welding to achieve hygienic, water tight seams when installed with Forbo adhesives. This is due to continuing advancements made by Forbo Flooring Systems over the past decades in our water-based adhesive technologies, combined with Marmoleum® TopShield™ occupancy ready factory finish. Independent 3rd party research shows that non heat welded Marmoleum seams are as hygienic as heat welded sheet vinyl saving precious installation time and money.

Cost-effective

Marmoleum is cost-effective. Marmoleum with TopShield2 delivers long-lasting appearance retention and provides the lowest cost of ownership flooring solution over its lifetime.

Marmoleum is engineered to withstand heavy foot traffic and has superior scuff and scratch resistance, coupled with the ability to repair the surface if damage occurs. These features, combined with a 10-year no-finish warranty, allows for an industry lowest cost of ownership* (*please view Forbo Cost of Ownership calculator at www.floorcostcomparison.com).

DURABLE

Adhesive

Marmoleum is installed into wet adhesive, ensuring a 100% bond to the substrate. This type of installation helps prevent damage from topical moisture, providing a physical barrier to the intrusion of maintenance chemicals. This secure type of installation also helps prevent damage caused by pivot point movements of casters. Forbo offers a wide variety of high moisture resistant adhesives to fit the needs for many projects.

Naturally PVC, Phthalate and Red List Free

Marmoleum does not contain PVC, Phthalates, or Styrene providing a safe and low emitting floor. Marmoleum can help with LEED, Well, and ILF Living Building Challenge credits.

Durable

Thanks to its natural ingredients, Marmoleum gets more durable over time and features a 30-year System Service Life and a 30-year warranty.

Scratch resistant

Marmoleum is protected by TopShield2, a double UV cured, water-based finish that provides occupancy-ready, clean-and-go installation and is repairable. In addition to Marmoleum's 30-year warranty, it also features an excellent 10-year no-finish warranty.

Marmoleum Ohmex is a static dissipative floor covering that meets higher requirements for electrical conductivity. With an electrical resistance of $1-10^6 < R1 < 1-10^8 \text{ Ohm}$, conforming to EN 1081, Ohmex ensures personal safety and protects equipment that is sensitive to static discharge. Ideal for computer rooms, server rooms and areas with sensitive equipment. Marmoleum Ohmex is 2.5 mm thick and available in six colors. Marmoleum Ohmex is a non-stock item, longer lead times apply.

Pre-cut panels sized 24"x 24" of all Marmoleum colors can be made for raised floor manufacturers. These are available on request and minimum order quantities and lead times apply. Please contact your local sales representative for more information.

FINISHING TOUCH

Designing with Marmoleum

Are you looking for something unique on your floor? That is also sustainable and durable? Our Designing with Marmoleum selection offers you just that. With our Waterjet technique we can create the most precise and detailed floor designs. From laser engraved Marmoleum tiles to exciting designs created by international designers. Explore your options online.

marmoleum® borders & corners

Marmoleum Borders and Corners are exceptionally precise, water-jet cut, made-to-order design elements that can be used to add unique, custom features to your floor design. Choose your individual color palette in any of our standard configurations. Once a request form is filled out and the product is ordered, standard delivery is within 4-6 weeks. Minimum order is one linear meter of border or one corner.

forbo wall base

Forbo Wall Base is available in seventy colors in a 4" height* that will put the finishing touch on your Marmoleum installation.

visit www.forboflooringna.com to view the full selection of colors

* Select colors also available in 6" height and straight toe, please contact customer service for minimum order requirements.
