New Flotex Cityscape collection, a three dimensional tile collection inspired on the urban landscape

Innovative embossing technique creates a new world for Flotex tiles

The new Flotex Cityscape collection is inspired on the lines and intersections that can be found in today's modern urban landscapes as it captures the movement and dimensions of our cities. Referencing both their portrayal on maps as well as the grids that are formed by the architecture.

This Flotex collection builds on the innovation of a unique embossing technique that adds a striking 3D effect to the textile surface, that was first introduced on Forbo's new collection of Flotex planks. Flotex city scape makes use of existing linear designs for the tile collection which are subsequently treated with precision embossing plates to create the 3D effect. Flotex Cityscape is available in two basic design "Integrity and 'Complexity' with in total 14 different colourways. The end-result is a striking, comfortable, hygienic textile floor which is both safe as well as extremely durable.

Flotex planks feature a surface of densely packed Nylon 6.6. fibres that provide an indestructible yet comfortable floor to walk on. Flotex is hygienic as the fibre catches and release fine dust to standard cleaning appliances.

Flotex Cityscape tiles are easy to install and can be combined with other floorcovering products from Forbo Flooring Systems such as the Allura flex loose lay tile and plank collection.

Forbo Flooring Systems, responsible market leader

Forbo Flooring Systems is a global market player in Linoleum, project vinyl, carpet tiles, Flotex flocked flooring, Coral entrance systems and vinyl floor coverings. In addition to floor coverings, Forbo develops, manufactures and markets a full range of professional service products. All Forbo products combine high levels of functionality and durability. Forbo Flooring Systems is committed to environmentally responsible production and to far-reaching customer service. Forbo Flooring is part of the Swiss Forbo Group and owns twenty manufacturing plants and branches in 32 countries worldwide.
