MOVEMENT SYSTEMS

Siegling – total belting solutions

## BELTING NEWS - ISSUE 27

**Dear Readers,**

Vacation season's just round the corner and Belting News is kicking off with some fun. Play the Prolink Beltway Battle to discover everything Prolink offers. Apply your product expertise to beat the high score. The new ProSnap quick-release system is equally fun. Use it for fast, tool-free opening and closing of plastic modular belts.

Read all about it in our newsletter. We'll also be featuring our homogenous belts from the Fullsan line and giving a few important updates. We wish you an entertaining read and a carefree and sunny start to the summer.

Kind regards,

Your Forbo Movement Systems team

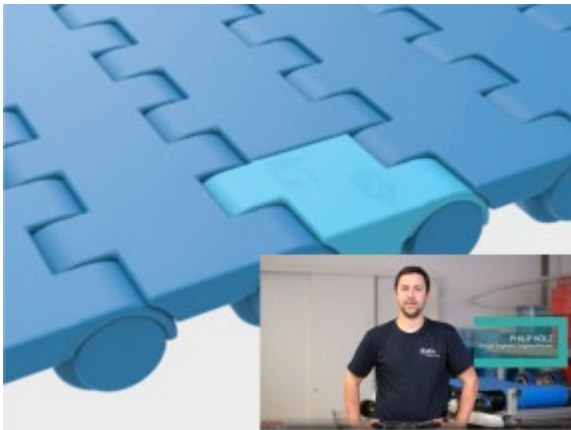

## BECOME A PROLINK CHAMPION

What do a palm tree, prawn and fortune cookie have in common?

They're all part of our game and conveyed on Siegling Prolink modular belts. Or perhaps not? Find the right products for each conveyor belt and beat the high score.

## OUR PROSNAP QUICK-RELEASE SYSTEM

Plastic modular belts often need to be taken off the conveyor for cleaning (COP = cleaning out of place). In this case, operatives want to be able to open and close the modular belt rapidly and with ease. And this is where ProSnap comes in. Philip Holz, our Prolink design engineer, gives a very clear explanation of its benefits in this video. (In German language, please activate subtitles)

## SIEGLING FULLSAN FOR TOP HYGIENE AND DURABILITY

Homogenous belts can withstand heat, mechanical stress, chemicals and are easy to clean. All of which makes them indispensable components. They are fully sealed, so oils, grease, moisture, or bacteria can't contaminate them. Find out more in our online

magazine.

## WARNING ABOUT FAKE PRODUCTS

Recently, fake Siegling Blizzard heating presses have been repeatedly appearing on the market worldwide. It's mostly Chinese companies that are offering them. They claim to be official partners and suppliers of Forbo Siegling Blizzard® heating presses. **This is incorrect. We are not collaborating with them.**

## WHITEPAPER: HOW TO SAVE ENERGY

The European Council of Airport Operators (ACI Europe) launched the global Airport Carbon Accreditation Program (ACAP) in 2009. Its goal is to cut airports' carbon emissions. In the past, the program didn't cover baggage handling systems. However, their potential to cut the carbon footprint is

huge. Our new whitepaper reveals interesting aspects of this innovative technology and how it can play a key role in cutting airports' carbon emissions.
