# FAST FIT

*Quick, Easy & Economical*

Allura Puzzle

Colorex plus

## IS YOUR BUSINESS **AFFECTED BY LOST WORKING DAYS** DUE TO DOWNTIME NEEDED FOR FLOORING INSTALLATIONS?

*We all know the old saying, 'Time is money', and with this in mind we've created Fast Fit, a collection of genuinely loose lay floor coverings including entrance and interior flooring ranges in sheet, tile and plank format for maximum flexibility. By using the truly adhesive free products in this collection rather than their traditional 'stick down' counterparts, the total installation time can be reduced by over 50%.*

### Speed and convenience

Time consuming sub-floor prep can be avoided in many cases thanks to the dimensional stability and forgiving nature of the floor coverings in this range. No wet trades on site obviously means less mess and disruption for you, the end user.

Because **absolutely no adhesives** are needed, no application or drying times need to be factored into the project, and there's no need for an installer to bring any special tools or heavy rollers on to site in order to deliver a perfect finish.

Your newly laid floors can be walked on straight away as soon as your installer has completed the installation. That means the amount of downtime is minimised helping to save you time and money.

### Ease of installation

Eliminating adhesives doesn't just save time. It also makes the job so much easier. It completely sidesteps a range of potential application and curing issues and also avoids emissions and odours that might be an issue in sensitive areas.

### Reassurance

You can be reassured by the fact that contractors around the world have already installed over 1 million m<sup>2</sup>.

### The Fast Fit collection

- **Coral Click** – 'Off-the-shelf' modular entrance matting system that is simply assembled on site
- **Modul'up** – Innovative adhesive free sheet vinyl, offered in three high performance constructions – **Decibel** (19 dB) where impact sound reduction is needed, **Compact** for heavy and wheeled traffic areas, **T.E.** for damp subfloors with up to 97% RH
- **Allura Click Pro** – LVT collection of tile and planks in realistic wood and stone designs that can be quickly and easily installed thanks to our proven and patented 'click' system
- **Allura Ease** – Fast to install as the planks or tiles simply butt together. Also suitable for reuse
- **Allura Puzzle** – Interlocking 96 x 96cm tiles that are ideal for large scale installations and quick and easy to install
- **Allura Colour Plus** – High performance product with a dovetail construction for a strong and stable connection which smoothly seals the floor surface
- **Colorex EC plus** – Permanently conductive tile floor covering in a loose lay tile format for when downtime or poor sub floors are an issue
- **Colorex Basic plus** – Loose lay tile format ideal for when downtime or poor subfloors are an issue.

## See how Fast Fit products save you time and money

*Here we have compared a standard vinyl installation against a Fast Fit vinyl installation.*

### REFURB USING STANDARD DIRECT STICK VINYL

- Uplift existing floor coverings and transport to skips
- Remove existing adhesive and latex
- Apply 3mm thick smoothing compound
- Preparation of sub floor to accept adhesives and vacuum
- Apply adhesive, leave to cure
- Install new vinyl and weld
- Wait 48 hours before using heavy traffic

### REFURB USING FORBO FAST FIT VINYL

- Ensure existing floor covering is good condition, vacuum
- Install Forbo Fast Fit product using tape or mallet
- Weld Forbo Fast Fit sheet products

### AND THAT'S NOT ALL!

When the time eventually comes to replace a Fast Fit floor, there are even more time and money savings to be made. It's easy to remove and recycle Fast Fit floor coverings at the end of their life as there's no adhesive residue on back of the material, and subfloors are left clean and sound, ready for a repeat installation.
