entrance flooring

creating better environments

FLOORING SYSTEMS

The first steps in protecting your building

There's a way to keep your floor and premises looking clean and presentable year in year out, as well as a way to offer your visitors and employees a safe and hygienic environment. All you need is a well thought-out entrance system.

Forbo Coral entrance flooring delivers superior performance in even the toughest environments. Whether facing rain, snow, sand or soil, Coral keeps the outside from getting inside. Coral entrance floors are highly functional and, through their design options, always form an integral part of the building's design scheme.

Coral has been the international market leader in textile entrance flooring for almost 50 years and now offers you more choice than ever before. Each individual range in the collection has been designed to interact with different soiling behaviour as every entrance is a unique environment.

With our products we aim to create better quality interior environments in which people can live, work and learn. Our Coral entrance products help to ensure that buildings are safe and hygienic in all weather conditions.

The WELL Building Standard® also recommends the use of entrance matting as an important tool to reduce pollutants entering the building.

WHY CHOOSE CORAL?

coral®
removes soiling
Up to 95% of dirt
within the first 6 steps

coral®
retains soiling
Unique yarns have the
ability to hold onto
dirt and water

TWO SIMPLE STEPS ARE
ENOUGH FOR CORAL
CLASSIC TO ABSORB...

1 2

...up to half the water
that would otherwise
be carried inside.

A few steps more and your feet are as dry
as possible. This has clear benefits. First,
the interior floor coverings stay cleaner,
longer. Second, resilient floors like vinyl,
linoleum, wood and concrete are less
likely to become slippery and dangerous.

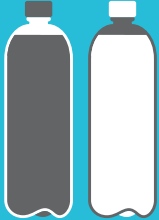

coral®
releases soiling
Cut pile construction allows
the dirt to be easily released
on vacuuming

coral®
recovers as new
Coral can withstand
intense cleaning
regimes

AFTER CLEANING

coral® welcome
Primary backing is made
from recycled PET bottles

coral®
+
nuway®

Coral can be used
alongside Nuway entrance
flooring to further protect
your interior space.

customise
coral®

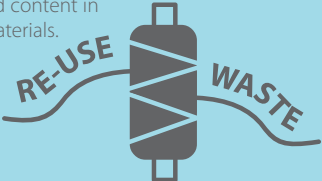

Enhance your entrance
flooring by using
Coral Logo to express
your logo or identity.

Produced with
100%
green electricity from
renewable resources

All the electricity we buy comes
from renewable sources. This
means our Coral production site is
part of an effective environmental
management system and has
achieved ISO 14001 certification.

**Re-use waste. All the waste yarn
from Coral production is re-used
by the yarn supplier.**

Our search for new ways to reduce our
environmental impact has led us to work very
closely with forward thinking suppliers who
are able to incorporate ever higher levels of
recycled content in
their materials.

RE-USE  **WASTE**

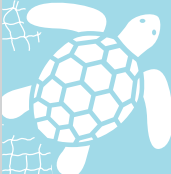

Virtually
ZERO
landfill

Virtually zero landfill is
achieved by the Coral
manufacturing plant.

Bfl-S1

Many Coral ranges are
available with an FR version
for fire sensitive areas.

Many Coral products
use Econyl® yarn which
is made from used and
abandoned fishing nets.

 Using Econyl® is a way
to reduce existing
waste, avoid additional
manufacturing-related
pollution, and keep the
consumption of natural
resources and energy
to a minimum.

MODULARITY

coral® classic and **coral®** brush
are available in tile format
for increased flexibility and
reduced installation waste.

95%

**6 metres of Coral
can stop up to 95%
of dirt and moisture
entering a building.**

REDUCTION in cleaning time

Cleaning Research International has shown that the
cost of maintenance is 86% of the total life cycle
cost of commercial floor coverings. A well
designed Coral entrance flooring system
incorporating a 3-step clean-off zone is a
highly effective way to cut your future
maintenance costs. By stopping up to 95%
of walked-in dirt and moisture from reaching
your building's floors, Coral can reduce cleaning
time for floor coverings by up to 65% and prolong
the life of your floor finishes and coverings.

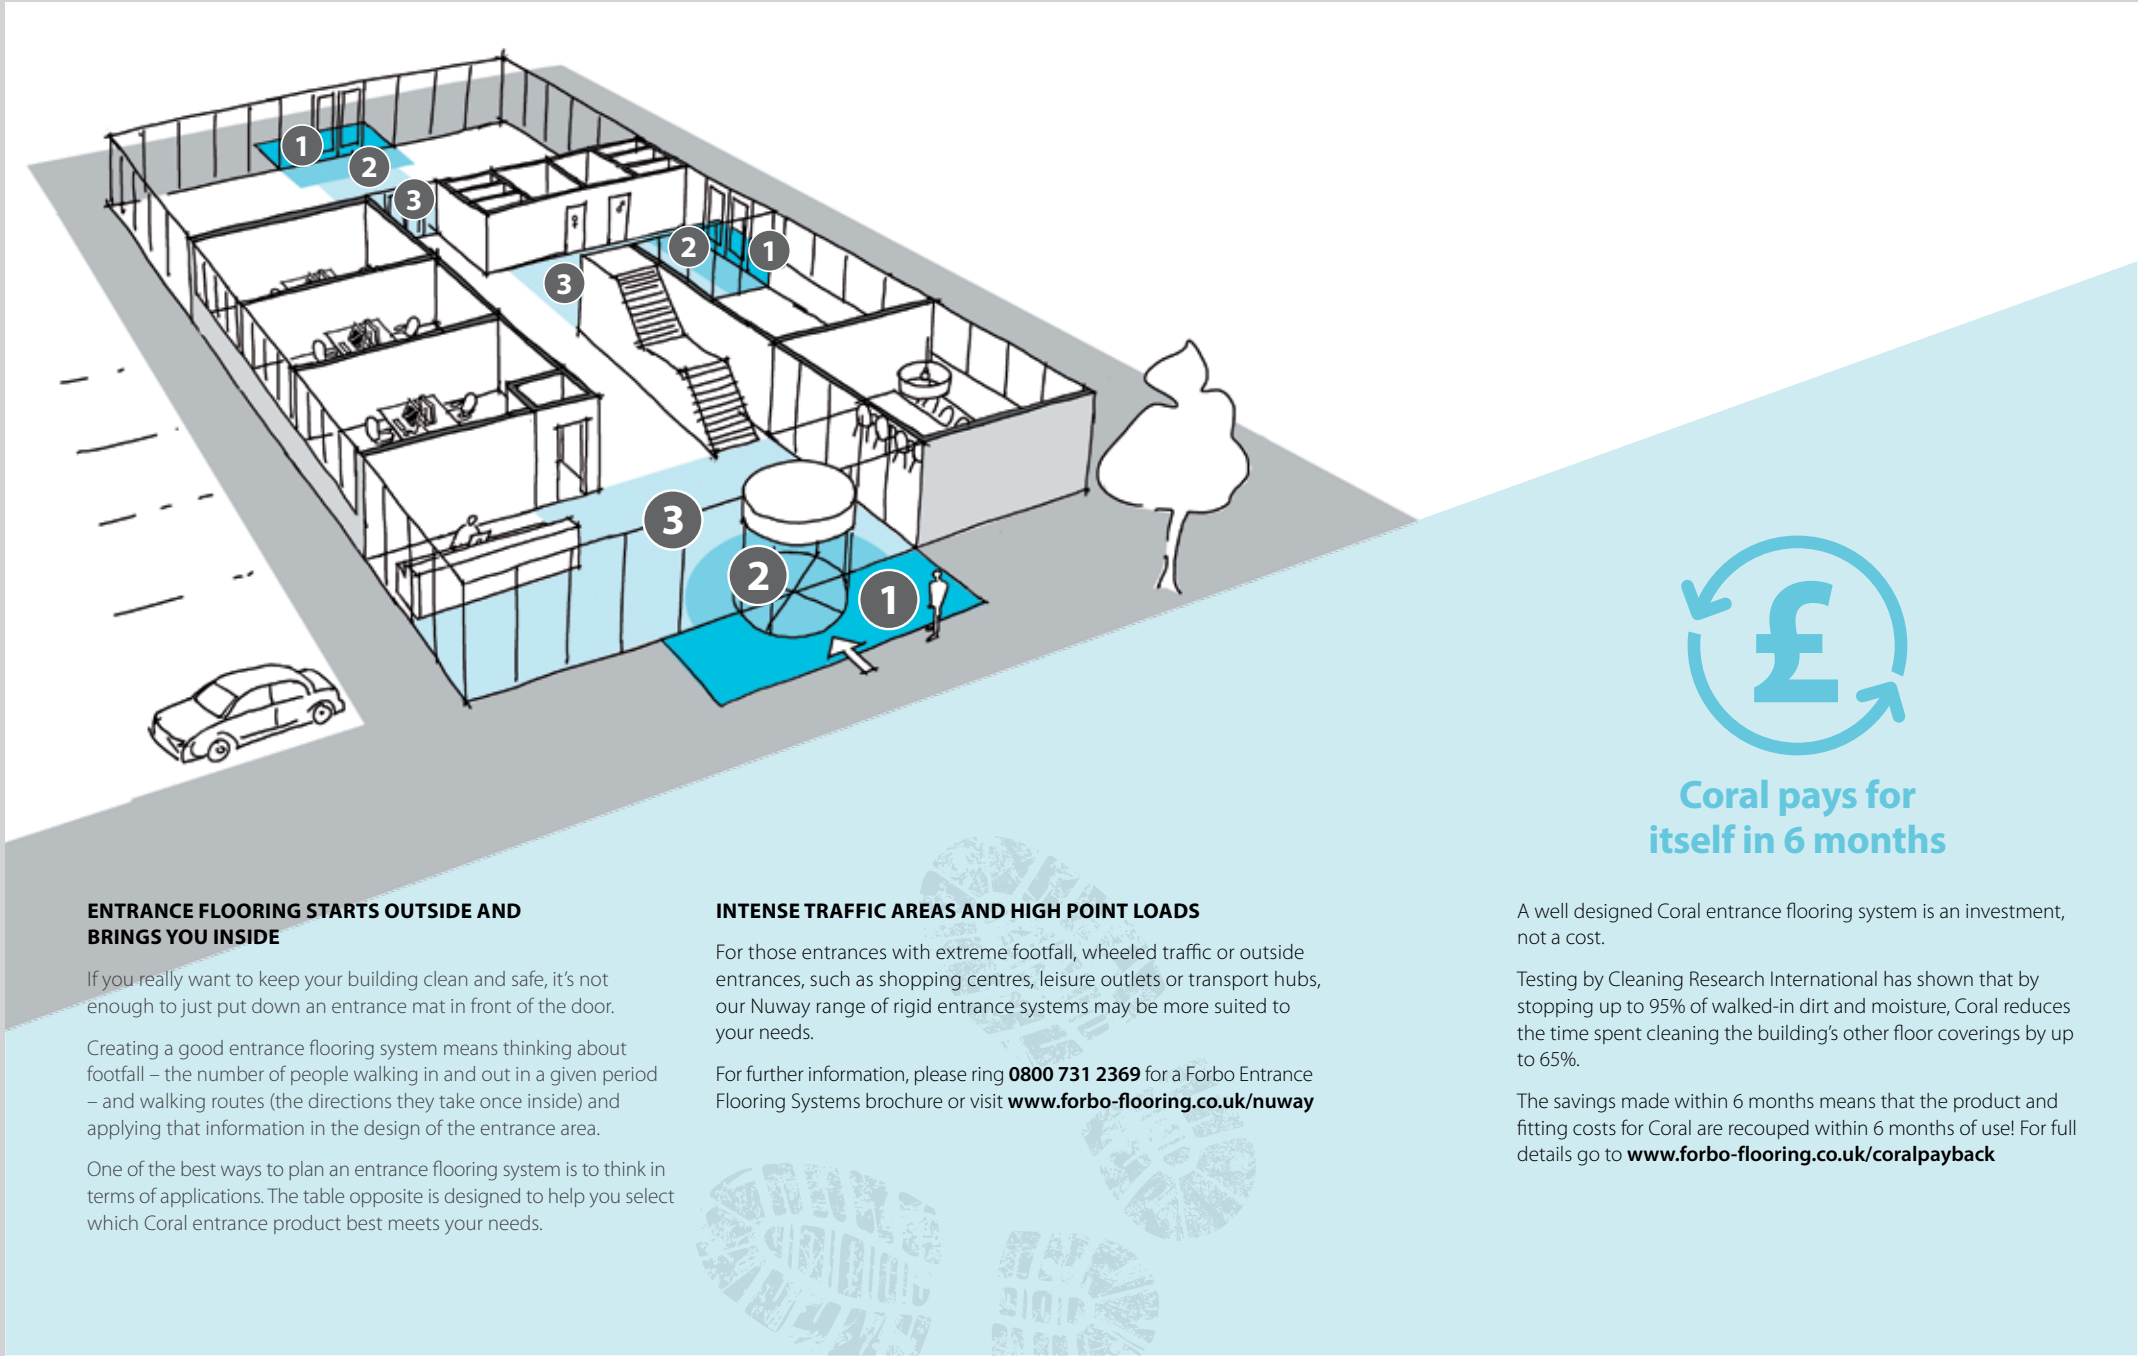

<65%

**Coral pays for itself
within 6 months**

ENTRANCE FLOORING STARTS OUTSIDE AND BRINGS YOU INSIDE

If you really want to keep your building clean and safe, it's not enough to just put down an entrance mat in front of the door.

Creating a good entrance flooring system means thinking about footfall – the number of people walking in and out in a given period – and walking routes (the directions they take once inside) and applying that information in the design of the entrance area.

One of the best ways to plan an entrance flooring system is to think in terms of applications. The table opposite is designed to help you select which Coral entrance product best meets your needs.

INTENSE TRAFFIC AREAS AND HIGH POINT LOADS

For those entrances with extreme footfall, wheeled traffic or outside entrances, such as shopping centres, leisure outlets or transport hubs, our Nuway range of rigid entrance systems may be more suited to your needs.

For further information, please ring **0800 731 2369** for a Forbo Entrance Flooring Systems brochure or visit **www.forbo-flooring.co.uk/nuway**

A well designed Coral entrance flooring system is an investment, not a cost.

Testing by Cleaning Research International has shown that by stopping up to 95% of walked-in dirt and moisture, Coral reduces the time spent cleaning the building's other floor coverings by up to 65%.

The savings made within 6 months means that the product and fitting costs for Coral are recouped within 6 months of use! For full details go to **www.forbo-flooring.co.uk/coralpayback**

3

entrance flooring applications

APPLICATION
1

OUTSIDE USE (NUWAY ONLY)
Any matting placed outside the building entrance creates the first line of defence against foot-borne soil by scraping the coarsest dirt from the soles of shoes before they cross the threshold.

APPLICATION
2

INSIDE USE
Moving inside, the next line of defence, is used to remove moisture and finer dirt particles from all feet entering the building.

APPLICATION
3

OTHER CIRCULATION AREAS
Other areas in the building also suffer from soil and moisture; reception areas, corridors, walkways to other parts of the building, elevators, staircases, exits, etc. All these areas are prone to residual soiling and will benefit highly from a purposely designed Coral entrance floor to absorb this soiling.

Where design meets environment

With its contemporary linear design and rich, deep pile, Coral Welcome packs the style and aesthetic appeal of a luxury carpet. It makes an unequivocal statement in any entrance area.

Coral Welcome is more than just a fabulous looking floor covering – it’s an environmentally advanced one as well. The secret lies in its use of ECONYL® 100%-regenerated yarn, which is made from regenerated industrial and post-consumer waste. Abandoned fishing nets are one of the sources. Taking the environmental aspect even further, the primary backing is made from recycled PET bottles.

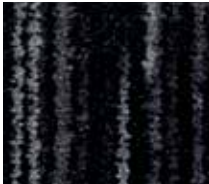

- 100% of the yarn in Coral Welcome is Econyl® regenerated solution dyed polyamide
- Primary backing made from recycled PET bottles
- Prevents moisture and dirt being tracked onto interior surfaces
- Striking linear aesthetic which makes a design statement in any entrance
- Complies with the highest fire class standard for a textile product: Bfl-s1
- Suitable for heavy contract use: wear class 33
- Ideal for interior entrances and circulation areas

Forbo works closely with suppliers who share our determination and ambition to make ever-greater use of regenerated and recycled materials.

The great all-rounder

Coral Brush is suitable for all types of entrance areas, absorbing moisture and removing dry soiling as the weather demands. Created around simple, solid and linear designs, this collection works well with any interior, serving as an eye-catcher or self-effacing support for the rest of the floor design.

Coral Brush is made of three types of yarn, each offering a different benefit, while the space between the yarns serves to hide dirt, which ensures a clean appearance for longer.

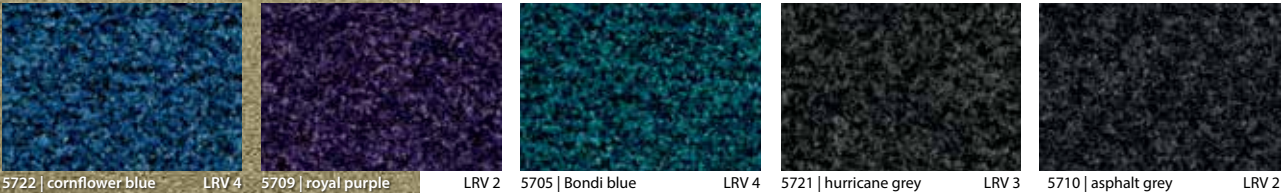

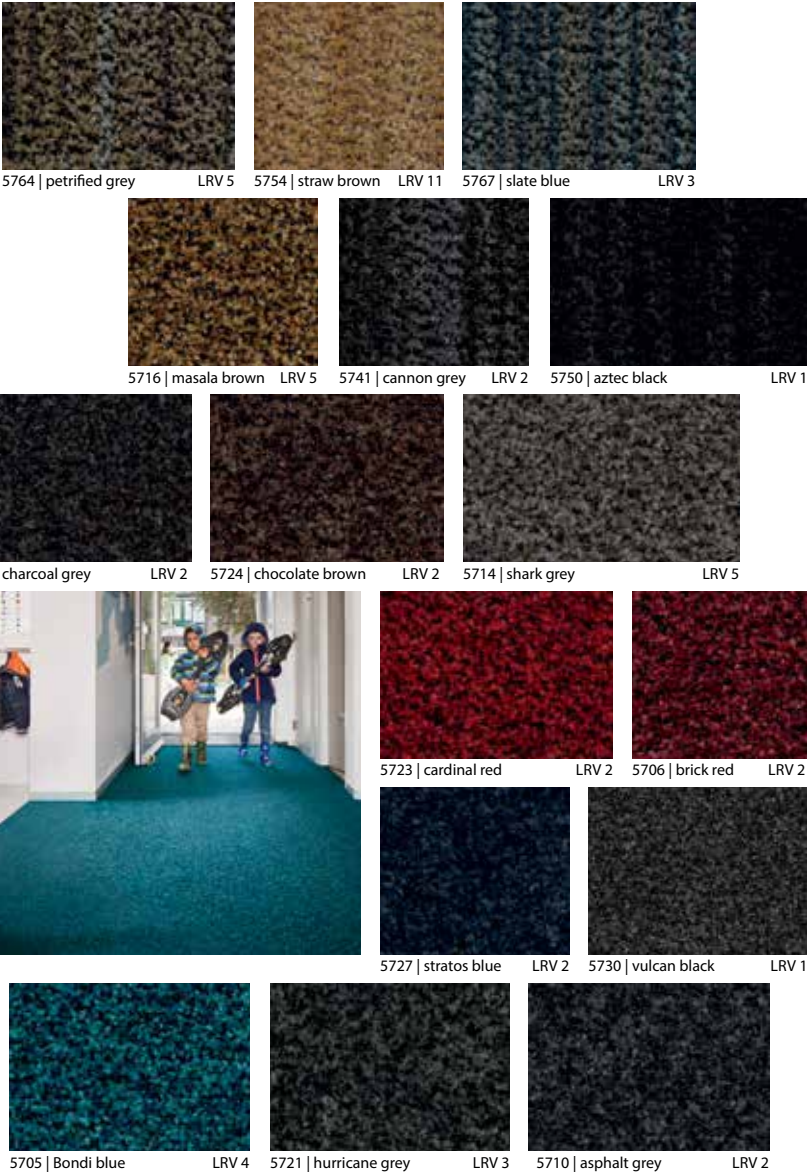

The Coral Brush range is also available in tile format for increased flexibility. See page 18 for more information.

- Functional all-rounder that removes both moisture and dirt
- 100% of the yarn in Coral Brush is Econyl[®] regenerated solution dyed polyamide
- Appealing solid and linear designs
- Complies with the highest fire class standard for a textile product: B_{fl}s1
- Suitable for heavy contract use: wear class 33
- Ideal for interior entrances and circulation areas
- Available in sheet, mats and 50 x 50 cm tiles

Coral Brush offers a choice of 18 colourways that can be used with each other or in combination with other Coral ranges.

5764 | petrified grey + Tessera Layout 2124 | pina colada

The ultimate moisture absorber

Research shows that taking just two steps on Coral Classic’s moisture absorbing yarns is enough to absorb half of the foot-borne moisture that would otherwise be carried inside on the soles of people’s shoes.

A few steps more and your feet are as dry as possible. This has clear benefits. First, the interior floor coverings stay cleaner, longer. Second, resilient floors such as vinyl, ceramics, wood and concrete are less likely to become slippery and dangerous.

Independent tests have shown that Coral Classic will maintain its performance – and appearance – for years to come thanks to the use of solution dyed yarns that guarantee its appearance throughout its lifespan.

The Coral Classic range is also available in tile format for increased flexibility. See page 18 for more information.

- Maximum moisture absorption and effective dirt removal
- Choice of practical colourways
- Complies with the highest fire class standard for a textile product: B_{fl}-s1
- Suitable for heavy contract use: wear class 33
- Ideal for interior entrances and circulation areas
- Available in sheet, mats and 50 x 50 cm tiles

Coral Classic will maintain its functionality and appearance for years to come thanks to the use of solution dyed yarns.

The ultimate dirt and moisture remover

A short entrance and clean interior floor coverings don't go together, do they? Well, yes, they can. Coral Duo is the ideal solution when you need maximum dirt removal, unrivalled dirt retention and exceptional moisture absorption, all in just a couple of paces.

Research has shown that Coral Duo retains 10% more dirt in the first few metres than any other textile entrance flooring solution on the market. Which makes it the best choice for smaller entrances. Featuring a ribbed construction. Coral Duo is not only functional, it also provides an aesthetically pleasing aspect to any entrance area and is easy to combine with our Coral Brush and Coral Classic collections.

The direction in which Coral Duo is produced is not the traffic direction. Coral Duo should be installed with the ribs at right angles to the direction of traffic.

- Ideal solution for most entrances and especially smaller entrances
- 75% of the yarn in Coral Duo is Econyl[®] regenerated solution dyed polyamide
- Unbeatable performance for moisture and dirt removal
- Complies with the highest fire class standard for a textile product: B_{fl}-s1
- Suitable for heavy contract use; wear class 33
- Ideal for interior entrances and circulation areas

Coral Duo is reinforced with alternating strips of strong, thick yarns with additional dirt-scraping properties.

Make a lasting impression

Forbo has the capability to offer a bespoke print or cut-out design service that can be tailored to your precise design specification, offering individuality and a unique point of difference.

Our Coral Logo collection offers a wide range of bright attractive colours. Depending on the colours and design of your corporate identity, you can choose between a printed mat or one with a cut inset logo. The Coral Logo collection is designed to the same standards as all other Coral products, which means it will retain its looks whilst keeping out dirt and moisture for years to come.

Cut inset logo mat

Printed logo mat

- Excellent visual quality and bright colouring
- Best to use for complicated designs with multiple colours
- 42 standard colours available
- Pantone and RAL colours can be matched

Cut inset logo mat

- Best to use for extreme traffic conditions and maximum functional performance.
- Any colour from the standard Forbo Coral collection can be used for the base background and logo colours.
- Easy to combine as inlay in larger Coral installations.

coral[®] tiles

Coral tiles combine all the moisture absorbing properties of Coral Classic and Coral Brush but with the flexibility that comes with 50 x 50 cm tile formats. Using Coral tiles can reduce cut off waste and also allows for quicker installation. This is particularly relevant when downtime or retail store opening times are at stake. In addition the increased flexibility of fitting 50 x 50cm tiles also allows easier storage and handling.

Coral tiles are available in all colours from the Coral Classic and Brush collection. The colours of both collections can be mixed for a very functional, though very attractive entrance at the same time. Coral tiles offer the same product features as the Coral Classic and Brush sheet range. The tiles can be laid monolithic or tessellated. Please visit www.forbo-flooring.co.uk/coral for further Coral tile installation images.

Coral tiles are packed 12 tiles in a box (3 m²). Coral tiles have a phthalate free PVC backing. (Coral Classic tiles also available with bitumen backing. Please visit www.forbo-flooring.co.uk/Coral for more details.)

nuway[®]

The recognised market leader in engineered entrance flooring systems, Nuway offers a wide range of rigid single and double sided made-to-order mats which provide an outstanding first line of defence against soil and moisture entering a building on the soles of shoes and the treads of wheeled traffic.

Double Sided Systems

- **Nuway Tuftiguard** – Our best-selling range with long term, dirt removal for intense traffic locations and now available with Bamboo and Black Anodised Aluminium variants.
- **Nuway Tuftiguard HD** – Removes soil in intense traffic areas, under the highest loads.

Single Sided Systems

- **Nuway Connect** – Versatile roll up system with a wide choice of inserts, including Coral and bristle. Suitable for shaping on site and very heavy traffic areas.
- **Nuway Grid** – Tough, economical and aesthetically versatile entrance flooring. Available in a wide choice of inserts including Coral Classic and Coral Brush.

Choice of construction

Most Nuway products are available in a choice of heights and in open or closed construction to meet the requirements of a wide range of entrances.

Integrated Entrance Solutions

By using Forbo Coral as the insert material in our single sided Nuway products, it's possible to design a Nuway rigid entrance system where the Coral textile clean-off area matches beautifully.

For more information on Nuway entrance systems, please visit www.forbo-flooring.co.uk/nuway

Forbo's Nuway collection offers value for money alternatives in entrance systems where the level of traffic is very heavy and where aesthetics are key.

More Forbo Flooring

Why deal with multiple suppliers when you can deal with one?
Forbo Flooring Systems is a global producer of commercial flooring solutions. Our flooring solutions offer includes:

- Environmentally friendly, functional and design-oriented linoleum.
- An extensive range of sheet project vinyl, acoustic vinyl and safety vinyl.
- High performing static control flooring for areas with sensitive electronic equipment.
- High quality European manufactured Luxury Vinyl Tiles.
- Carpet tiles for both public and commercial environments.
- Flocked sheet and tiles for areas that need the benefits of both textile and resilient floor coverings.
- Cushioned vinyl for the home environment in a wide range of designs.
- Entrance flooring systems that keep interior floors clean, dry and safe.

Please visit our website www.forbo-flooring.co.uk to see our extensive range of flooring products.

WHAT TO DO NEXT

London EC1 Showroom:
79 St John Street,
Clerkenwell
London, EC1M 4NR
Tel: 0207 553 9300

Opening hours:
Mon - Fri 9.00 am - 4.00 pm

Forbo's EC1 showroom is the ideal place to visit when you're looking for that 'perfect colour' or just want to see a wider range of products.

Our full portfolio of brands on display includes Tessera and Westbond carpet tiles, Marmoleum, project vinyl ranges, entrance flooring systems and designs from our Flotex collection.

Why not pop in and enjoy some hospitality while looking at the products or discussing a project with one of our advisors.

If you would like further information on any of the products shown in this brochure, or would like to discuss an entrance flooring project with our experienced advisers, please call our dedicated entrance flooring team on **01773 740 688**, email efs.flooring.uk@forbo.com or visit www.forbo-flooring.co.uk/efs

Samples can also be ordered by calling **0800 731 2369** or email samples.uk@forbo.com

If you are at the stage where you would like to discuss your project with an experienced contractor specially trained in every aspect of Nuway specification and installation, we would be delighted to put you in touch with an approved FESSI (Forbo Entrance System Specialist Installer) contractor who will be able to visit your site and provide further advice and a detailed quotation.

Please call us on **01773 740 688** for more information.

All available BIM objects for our Nuway and Coral entrance flooring systems can be downloaded directly from www.bimstore.co.uk
