

A circular gauge with a scale from 0 t to 3220 t. The needle points to 738 t, which is highlighted in green. The gauge has a dark blue outer ring and a lighter blue inner ring.

The figure consists of two bar charts side-by-side, comparing CO2 emissions for Scope 1 and Scope 2** in 2026. The left chart for Scope 1 has a y-axis from 0 to 150. It shows a dark green bar for 'Status 2026' at 28,52 and a light green bar for 'Target 2026' at approximately 125. The right chart for Scope 2** has a y-axis from 0 to 500. It shows a dark green bar for 'Status 2026' at 0 and a light green bar for 'Target 2026' at approximately 450.

Scope	Status 2026	Target 2026
Scope 1	28,52	~125
Scope 2**	0	~450

Category	Value
Status 2026	159,3
Target 2026	~145

** Scope 2: district heating, this target has been met by switchin to renewable energy (wind/solar tbc)
