# BELTS FOR THE FOOD AND PACKAGING INDUSTRIES

## BLUE, SAFE AND ELASTIC

With homogenous structures and easy-to-clean surfaces, our new elastic types are ideal conveyor and processing belts for the special challenges the packaging sector presents.

- Huge benefit in terms of hygiene to food industry users processing cheese, meat, seafood and poultry
- Excellent tracking characteristics
- No take-up system required
- Highly resistant to animal fats, cleaning agents and ultra-violet light through use of new/modified raw materials
- For use e.g.: in check-weighers, labelling machines, packaging machines, buffer conveyors and slicers; as accelerator belts and machine tapes

Type	Article number	Total thickness approx. [mm]	Weight approx. [kg/m <sup>2</sup> ]	d <sub>min</sub> approx. [mm]**	Shaft load at 1% elongation [N/mm belt width]	Permissible operating temperature [°C]	Standard width supplied / max. width supplied [mm]	Particular good grip (Grip Star™Types)
