Report

Project number: T11-32653
Report number: T11.32653.01br

Received:
A vinyl floor covering, marked as: Novilon LVT 0.4.
TÜV reference: MT11-32653.01.

The floor covering has been received and tested in tile and sheet dimension. It is the same product, there is no significant difference found in the total thickness and mass. Also in the results of the fire behavior there is no significant difference. This report is valid for the product Novilon LVT 0.4, in sheet and in tile dimensions.

Request:
Classification of burning behaviour according to EN 13501:2007.

Test method:
Determination of overall thickness : EN 428
Determination of mass per unit area : EN 430
Ignitability (direct impingement of flame) : EN ISO 11925-2
Reaction to fire (radiant panel) : EN ISO 9239-1

Results:
See page two up to, and including three.
TEST RESULTS

- **Sample description**

  Type of manufacture    : heterogeneous PVC floor covering*
  Total mass per unit area, EN 430 kg/m² : 2.8
  Total thickness, EN428 mm : 2.0
  Thick of the top layer mm : 0.40*
  Backing                : black coloured compact layer*
  * = manufacturer’s declaration

- **Ignitability EN-ISO 11925-2:2010**

  Conditioning time, climate : 5 days, 23 ± 2 °C and 50 ± 5 %
  Date of testing           : 01-07-2011
  Description of substrate  : 6 mm. Fibre cement board, 1800 kg/m³.
  Flame application         : Surface.
  Application time          : 15 seconds.

TEST RESULTS - continuation

Radiant Panel test EN ISO 9239-1:2010

Conditioning time, climate: 5 days, 23 ± 2 °C and 50 ± 5%
Date of testing: 01-07-2011
Description of substrate: Fibre cement board, 6±1 mm, 1800±200 kg/m³
conforming to EN 13238

Sampling procedure: by contractor.
Description of cleaning used: none.

Remarks: no flashing, transitory- or sustained flaming,
* specimen extinguished naturally
Specimen 1 and 2 = sheet, 3 and 4 = tiles.

Conclusion:
According to EN 13501:2007 the tested sample of the aforementioned quality Novilon LVT 0.4 meets the requirements of Class Bfl - s1.

The test results only relate to the behaviour of the test specimens of the examined product under the particular conditions of the test in laboratory conditions; they are not intended to be the sole criterion for assessing the potential fire hazard of the product in use. The method might not be suitable if the product is exposed to much larger flames or heat radiant sources.
This test report has a validity of five years after date of issue.
