

Installation Guide: Sheet flooring site form covered with 20mm Cove Former & Capping Strip

Product Detailing

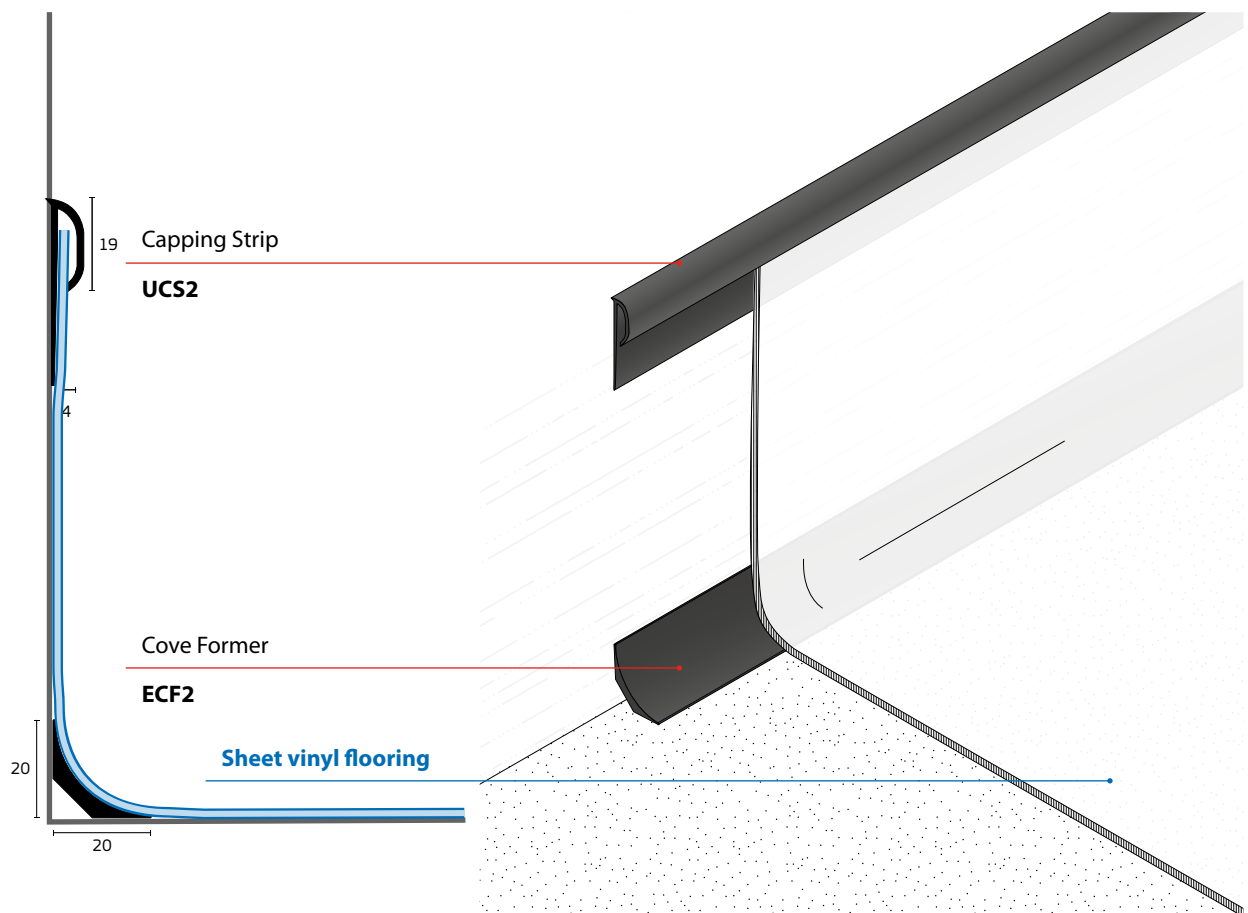

Shown example of a sheet flooring pulled up the wall with a cove former and a capping strip. Wall and floor should be clean, dust free and floor surface regularity to be SR1 according to BS8203:2017 (Section 6.2.3) with wall flat and a consistent 90-degree angle to floor to achieve the best installation results. Flooring and PVC profiles are fitted against the wall, floor and each other with a contact adhesive in accordance with the recommendations of the adhesive manufacturer. Such coving should be constant in radius and care should be taken to ensure that they are straight and regular to minimize the formation of voids beneath the floor covering (BS8203:2017 Section 6.12).
