

Installation Guide: Sheet flooring site form covered with Aluminium Cove Former & Capping Strip

Product Detailing

Shown example of a sheet flooring pulled up the wall with a cove former and a capping strip. Wall and floor should be clean, dust free and floor surface regularity to be SR1 according to BS8203:2017 (Section 6.2.3) with wall flat and a consistent 90-degree angle to floor to achieve the best installation results. Flooring and aluminum profiles are fitted against the wall, floor and each other with a contact adhesive in accordance with the recommendations of the adhesive manufacturer. Such coving should be constant in radius and care should be taken to ensure that they are straight and regular to minimize the formation of voids beneath the floor covering (BS8203:2017 Section 6.12).

Benefits:

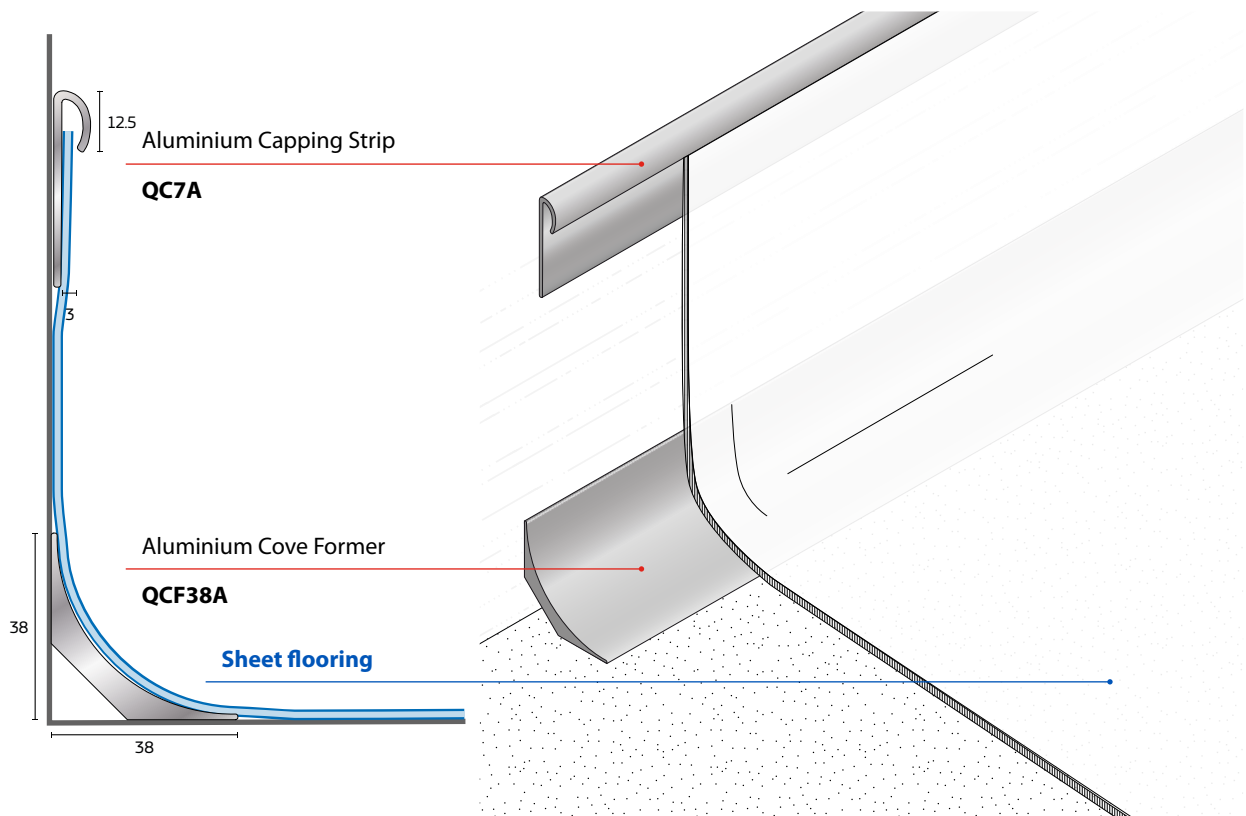

- For extremely heavy traffic areas
- None flammable & fire resistance

Specification statement

QUANTUM ALUMINIUM CAPPING STRIP & COVE FORMER

Cove formers and capping strips are used in conjunction to allow floor coverings to be continued up the wall for a neat and clean finish.

Benefits:

- Capping strips are installed where the floor covering ends, providing a neat and sealed finish to the installation.
- Cove formers create a hidden, curved support for the floor covering; installed at the junction between the wall and the floor.
- Available in aluminium, suitable for use with a wide range of floor covering gauges.
