

marmoleum[®] FR²

LINOLEUM

marmoleum[®] real FR²

Real FR is our classic aesthetic, consisting of many carefully selected individual colour tones that combine to create beautifully graded colours, from warm neutrals and calm greys to exciting brights and trend led shades. Developed to create choice, Real FR can be mixed together or combined with other Marmoleum designs to provide more imaginative compositions.

marmoleum® fresco FR2

Fresco FR has a strong palette of subtly blended tone-on-tone items, each creating a fresh, delicate and balanced aesthetic. The soft contrast of its refined marbled structure gives a gentle feel which sets the stage for calm and soothing interiors. The softness of Fresco FR enables it to sit well next to all other Marbled and Striato FR items.

marmoleum[®] walton FR²

Presenting the pure character of linoleum. The solid identity of Marmoleum Walton FR with its smooth surface and minimal, unpretentious material expression makes it the ultimate and pure representative of our linoleum flooring. Its plain visual makes Walton FR easily adaptable to the context it is used in, and the subtle texture gives it a soft and natural look.

marmoleum[®] concrete FR²

The solid marble design of Marmoleum Concrete FR² differentiates itself from the classic Marmoleum FR² flooring with its subtle concrete structure. The color palette is neutral with both warm and cool tones, yet with an extension of 6 bright colours for creating a powerful accent in your floor design.

marmoleum[®] vivace FR²

Vivace FR² is our liveliest and most outspoken aesthetic made with six to eight tones in each colourway. The differentiated elements combine to create a chameleon-like product that adapts well to a multitude of interiors, co-ordinating easily with many other surface finishes and colours. The high-contrast construction of Vivace FR² makes it a smart choice for areas prone to soiling, where the superior appearance retention of the product is valued.

marmoleum[®] striato FR

Marmoleum Striato FR offers a palette that is neutral with warm tones and greyinfused hues spanning from light to dark, delivering natural looking floors that are great on their own and in combination with other floor coverings. The subtle linear pattern will easily pick up colours from its environment and works well with other materials.

Please ensure that ' FR^2 ' or 'FR' is clearly noted on all orders.

marmoleum[®] FR² / marmoleum[®] striato FR

Marmoleum has a track record of over 150 years. A natural floor covering that is associated with sustainability, durability, high quality and innovative design.

For the rail sector, Marmoleum FR² and Marmoleum Striato FR, offer total versatility in terms of colour and design, but what makes these floor coverings really stand out is the fact that they are created using a high percentage of natural raw materials, with renewable and recycled contents.

- · Homogeneous durable construction
- A sustainable floor covering
- Low life cycle costs can be renovated and repaired
- A floor covering that is naturally bacteriostatic
- Reaction to fire EN45545-2: HL3
- Lightweight at 2.9kg/m²
- Wide range of designs and colourways
- Aquajet cut to shape/size service available
- Suitable for use with underfloor heating

Environmental leadership:

71% natural raw materials*

29% of raw materials are rapidly renewable* 44% recycled material content*

*The above results are for Marmoleum FR². There is a small variation in results for Striato FR. Please ask for further details.

Infection control & Allergy UK

Independent testing by the University of Glasgow has proved that Marmoleum has a unique suitability for a diverse range of environments where hygiene and control of bacteria are important. Marmoleum FR²/Striato FR is also an Allergy UK approved floor covering.

Topshield²

All Marmoleum FR²/ Striato FR floors include Topshield², a double layer,

UV-cured finish that is scratch and scuff resistant, easy to maintain and ensures long lasting appearance retention. With its natural bacteriostatic properties and resistance to chemicals, it is the ideal solution for heavy traffic rail vehicles.

Welding

In the majority of installations, Marmoleum does not need to be welded as it is completely dimensionally stable and will not shrink after proper installation. However, if welding is the preferred option, there are matching welding cords for every Marmoleum FR²/Striato FR design.

Aquajet

Forbo recognise that sometimes you may wish to create something totally unique, perhaps something specific to a particular project, such as signage to facilitate the restrictions and safety guidelines within the train. Whatever may be required, our in-house design team has skills and experience to turn ideas into reality.

From an initial concept, detailed drawing, or computer file, our design team prepares a flooring design that is transferred electronically to the Aquajet cutting machines. These computer-controlled machines represent state-of-the-art cutting technology and produce precision cut items accurate to a fraction of a millimetre.

The pattern is inlaid and, importantly, retains all the performance characteristics of the original product. Whether it is a complete rail layout in floor covering, a company logo, signage or thematic design, the possibilities are limitless.

MARMOLEUM FR² **NATURALLY**

Forbo's Marmoleum FR² and Striato FR have been independently confirmed as CO₂ neutral floor coverings in the cradle to gate phase of the product's life cycle, without the need for offsetting.

In simple terms, the CO₂ produced in the extraction, transportation and manufacturing process of Marmoleum FR²/Striato FR is balanced by the removal of CO₂ through the growing of its natural ingredients such as flax, jute and rosin.

As such, Forbo Marmoleum FR²/ Striato FR is the best flooring choice for every sustainable interior. By using durable materials in your rail projects, you can also contribute to a better environment.

A floor covering made from natural materials. Key materials from which Marmoleum FR²/Striato FR is created:

- linseed oil from the seeds of the flax plants
- fibres from jute stems
- upcycled wood residues from controlled sustainable forestry
- limestone
