Heating Press for Melt Splices SM-HP-180/500-P

Electrical heating devices for fabricating melt splices using Forbo Siegling belt material.

The presses are entirely dismantlable; therefore larger devices are also easily transportable.

The standard equipment of the heating presses of this type includes: Hold-down bar, pressure equalizing metal sheets, shim bar set, textured fabric, separating paper, soft pad 1 mm, silicone fabric no. 1 and thermometer.

The application can be enhanced by using the following components: A portable cooling device, a control unit and a handy compressor.

The connection cables of the 230V heating presses are delivered in plug-in form.
