

Forbo Floor Care - Furniture Linoleum

Forbo Flooring Cleaning and Maintenance advice:

Forbo Flooring furniture linoleum collections are easy to clean and maintain. Following these guidelines will ensure that the appearance of the products is retained.

Initial clean before use

At furniture production

Before packaging and leaving the place of manufacture you should make sure the surface is clean and ready for use. Wipe over with a damp cloth to ensure loose residue from manufacture is removed and check the surface.

For extra protection during transportation and initial use we recommend to apply a blend of water and natural soap or waxes (e.g. Forbo Monel) with a clean cloth.

Regular cleaning:

Wipe clean with a damp cloth and a neutral cleaner. As a regular cleaner you can also use with a blend of water and natural soap or waxes (e.g. Forbo Monel in the ratio of 0.5 cl. to 10 liters of water).

Periodic Maintenance:

In order to maintain the surface of Furniture Linoleum a blend of water and natural soap or waxes (e.g. Forbo Monel in the ratio of 0.5 cl. to 10 liters of water). should be used periodically. If the surface has been neglected or worn hard, a dilution of water and natural soap or waxes (Monel at a ratio of 1:10) to water can be used to upgrade the Furniture Linoleum

Stain removal:

- To prevent stubborn stains always use coasters under the flower pots, vases and also cups, glasses, etc.
- It is important to remove spots, stains and spillages as quickly as possible to prevent them from penetrating into the material. The surface can be cleaned with a neutral detergent and water.
- If the above treatment does not help, try soaking the surface in water with a pH-neutral Universal Cleaner (e.g. Forbo Cleaner diluted 5% to water) for a few minutes. Scrub the surface gently with a white pad or similar. Finish by wiping off the dirty water with a cloth. To upgrade the surface after a thorough cleaning see under "Periodic Maintenance" above.
- Some pigmented stains may be removed or made less visible by using turpentine or similar oil based solvent. Do not use alkaline or alcohol based cleaning products since it will damage the surface.
