

FLOORING SYSTEMS

## FLOORING SYSTEMS

The Flooring Systems division offers a broad and attractive range of environmentally friendly natural linoleum, high-quality vinyl floors, entrance flooring systems for cleaning and drying shoes, carpet tiles, needle felt, and Flotex, the washable textile flooring. Thanks to their excellent technical properties and attractive design, these flooring solutions are invariably the first choice for public buildings, department stores, hospitals and healthcare facilities, schools, libraries, commercial offices, leisure centers, hotels, restaurants, and cafeterias and are also used in the residential market. With a market share of about 70 percent, Forbo is the world market leader in linoleum.

Under the brand name Eurocol, Flooring Systems also provides ready-made adhesives for flooring installations, parquet and ceramic tiles, as well as leveling compounds for the construction industry.

### CUSTOMER SEGMENTS

HEALTHCARE  
AGED CARE

MOVEMENT SYSTEMS

## MOVEMENT SYSTEMS

Movement Systems is a global industry leader providing top-quality power transmission belts, sophisticated conveyor and processing belts, as well as plastic modular, timing, and flat belts made of synthetic materials. These products are known under the brand name Siegling. They are used in a wider range of applications in the industry, trade, and the service sector, for example as conveyor and processing belts in the food industry, as treadmill belts in fitness studios, and flat belts in mail distribution centers.

## STRATEGIC DIRECTIONS

To be successful in the market place as a Group with differently aligned operations, the individual divisions act independently and flexibly, but always along the strategic directions defined for the Group as a whole:

- based on a pronounced customer focus, a high level of service, innovation and a strong global brand, we are creating global leadership positions in clearly defined market segments
- due to a strong market orientation, we shape markets and drive profitable growth
- we are developing significant positions in growth markets
- we are acquiring companies to extend our product range, to consolidate and / or reinforce market access
- we are developing a high-performance culture and providing the relevant skills and competences at all levels

## THE FORBO GROUP

Forbo is a leading producer of floor coverings, building and construction adhesives, as well as power transmission and conveyor belt solutions. The company employs more than 5,400 people and has an international network of 25 production and distribution companies, 6 fabrication centers and 48 sales organizations in a total of 38 countries worldwide. Forbo is headquartered in Baar in the canton of Zug, Switzerland. The Group company Forbo Holding Ltd is listed on the SIX Swiss Exchange.

Forbo is a global player, and supplies with its two divisions a wide range of industries. The Group's global reach means that it is close to dynamic markets and makes it the first choice as a local partner for customers that have similar global requirements. The quality, longevity, and performance of our products and systems reflect the quality and stability of our relations with our business partners.

## SUSTAINABLE VALUE CREATION

Social responsibility and environmental protection are fundamental Forbo values. We are committed to protecting the environment and investing in a sustainable future. As a responsible manufacturer and employer, Forbo sets very high standards for health, safety, the environment and quality.

**SOCIAL DIMENSION.** After the group-wide standardization and introduction of the most important human resources tools and processes, Forbo introduced an internal management training program. In collaboration with the University of St. Gallen, other external partners and internal specialists, a practice oriented training program has been introduced for the first time on group level for senior managers, persons in key positions, and junior managers, consisting of various modules which are put together according to the target group. The aim is to perfect their leadership and management skills so that they are equipped to meet ever higher requirements and to make a direct contribution to the sustainable success of Forbo.

**ECOLOGICAL DIMENSION.** Preserving the environment and generating ecological added value are decisive factors in all Forbo's developments and investments. Minimizing our environmental footprint is a top priority, and both divisions are fully committed to optimizing production processes so as to minimize water and energy consumption, reduce emissions, and reuse heat generated in production processes as well as to reduce, and wherever possible, recycle used materials. Flooring Systems can build on linoleum, per se a highly environmentally friendly product that is made from purely natural and renewable raw materials. With the BioBelt, Movement Systems is the first ever conveyor belt manufacturer to develop a biodegradable conveyor belt whose physical and dynamic properties are equal to standard belts.

**ECONOMIC DIMENSION.** As a listed company, Forbo concerns itself with the economic aspects of sustainability on a daily basis, with the aim of creating sustainable value for the stakeholders. Compliance is of enormous importance for the reputation and positioning of a company. Forbo continued its efforts in this area for example by training employees in the code of conduct, competition and anti-corruption law, supporting this in some cases by the worldwide introduction of e-learning tools as well as risk management processes, while further reinforcing the internal control system.
