

Declaration that 425Euroflex Standard complies with the European Model Environmental Product Declaration “Dispersion-based products, group 3”

Dear customer,

Forbo Eurocol Deutschland GmbH is a member of IVK, which in turn is a member of FEICA, the Association of the European Adhesive and Sealant Industry. FEICA has developed European Model EPDs for dispersion-based products. These Model EPDs were verified by the independent institute IBU (Institut Bauen und Umwelt); Germany's EPD programme holder organization.

The European Model EPDs have been published on the [FEICA website](#), and also on the websites of the IBU¹ and in future ECO (Platform of the European EPD Programme Operators) and can be downloaded there.

As a member of IVK and with the help of an internal FEICA guidance, Forbo Eurocol Deutschland GmbH is entitled to determine the compatibility of its product with the European Model EPD.

By means of this declaration, we confirm that 425 Euroflex Standard is covered by the European Model EPD for “Dispersion-based products, group 3” according to the guidance developed for this purpose. This means that the LCA data and the other content of the attached Model EPD apply to the above mentioned product and can be used for the assessment of buildings.

Please do not hesitate to contact us if you require any further information.

Yours sincerely,

Forbo Eurocol Deutschland GmbH
