

SUSTAINABLE VALUE CREATION

Social responsibility and environmental protection are fundamental Forbo values. We are committed to protecting the environment and investing in a sustainable future. As a responsible manufacturer and employer, Forbo sets very high standards for health, safety, the environment and quality.

SOCIAL DIMENSION. Forbo promotes appropriate skills and competencies at all organizational levels and supports this internally through training and educational activities. The divisions provide internal trainings in a wide range of areas covering products and applications, sustainability, sales and marketing, finance, operations, software application programs, project management, strategy content and implementation as well as guidance on Forbo values. Continuous, intensive training in health and safety includes measures relating to accident prevention, risk awareness, and occupational health and safety.

In collaboration with the University of St. Gallen, other external partners and internal specialists, a practice oriented training program is being offered on Group level for senior managers, persons in key positions, and junior managers. It consists of various modules with the aim to improve leadership and management skills so that managers are equipped to meet ever higher requirements and to make a direct contribution to the sustainable success of Forbo.

ENVIRONMENTAL DIMENSION. Preserving the environment and generating environmental added value are decisive factors in all Forbo's developments and investments. Minimizing our environmental footprint is a top priority, and both divisions are fully committed to optimizing production processes so as to minimize water and energy consumption, reduce emissions, and reuse heat generated in production processes as well as to reduce, and wherever possible, recycle used materials. Flooring Systems linoleum floor coverings are made from natural raw materials. They are biodegradable and climate-positive (cradle to gate), without offsetting. In the manufacture of its heterogenous vinyl floor coverings, Forbo uses phthalate-free plasticizers of the latest generation. The Movement Systems BioBelt is a conveyor belt made of 20 percent or more renewable raw materials. The AmpMiser conveyor belt enables energy savings of up to 50 percent. In 2024, the CO₂ emissions (Scope 1 and 2) were reduced per square meter produced by 2.5% compared to the previous year.

ECONOMIC DIMENSION. As a listed company, Forbo also engages intensively with the economic dimension of sustainability on a daily basis, with the aim of creating sustainable value for the stakeholders. Compliance is of enormous importance for the reputation and positioning of a company. Regular training on the Code of Conduct, competition law, the fight against corruption, respectful behavior, and various topics relating to IT security and data protection is provided across the entire Group. The module on respectful behavior addresses and raises awareness regarding discrimination, bullying, and sexual harassment in the workplace.

THE FORBO GROUP

Forbo is a leading producer of floor coverings, building and construction adhesives, as well as belts for power transmission and lightweight conveyor technology. For our clients, we offer tailored solutions that stand out for their functionality, quality, design, and sustainability. The company employs about 5,100 people and has an international network of 25 production and distribution companies, 6 fabrication centers and 47 sales organizations in a total of 39 countries worldwide. Forbo is headquartered in Baar in the canton of Zug, Switzerland. The Group company Forbo Holding Ltd is listed on the SIX Swiss Exchange.

Forbo is a global player, and its two divisions supply a wide range of industries. The Group's global reach means that it is close to attractive markets and customers. The quality, longevity, and performance of our products and systems lead to long-standing relations with our business partners.

FLOORING SYSTEMS

FLOORING SYSTEMS

The Flooring Systems division offers a broad and attractive range of environmentally friendly natural linoleum, high-quality vinyl floors, entrance flooring systems for cleaning and drying shoes, carpet tiles, needle felt, and Flotex, the washable textile flooring. Thanks to their excellent technical properties and attractive design, these flooring solutions are invariably the first choice for public buildings, department stores, hospitals and healthcare facilities, schools, libraries, commercial offices, leisure centers, hotels, restaurants, and cafeterias and are also used in the residential market. With a market share of about 70 percent, Forbo is the world market leader in linoleum.

Under the brand name Eurocol, Flooring Systems also provides ready-made adhesives for flooring installations, parquet and ceramic tiles, as well as leveling compounds for the construction industry.

MOVEMENT SYSTEMS

MOVEMENT SYSTEMS

Movement Systems is a global industry leader providing top-quality power transmission belts, sophisticated conveyor and processing belts, as well as plastic modular, timing, and flat belts made of synthetic materials. These products are known under the brand name Siegling. They are used in a wider range of applications in the industry, trade, and the service sector, for example as conveyor and processing belts in the food industry, as treadmill belts in fitness studios, and flat belts in mail distribution centers.

STRATEGIC DIRECTIONS

To be successful in the market place as a Group with differently aligned operations, the individual divisions act independently and flexibly, but always along the strategic directions defined for the Group as a whole:

- Based on a pronounced customer focus, a high level of service, innovation, sustainability, digital transformation, and a strong global brand, we are creating global leadership positions in clearly defined market segments.
- Thanks to a strong market orientation, we shape markets and drive profitable growth.
- We are developing significant positions in growth markets.
- We are acquiring companies to extend our product range, to consolidate and/or reinforce market access.
- We are developing a high-performance culture and providing the relevant skills and competences at all levels.
